Clay, Robinson & Company's LIVE STOCK REPORT

Vol. 20 | Chicago, Friday, January 7, 1910 | No. 1.

Year Makes a Good Start.

The year 1910 has started out in way that should bring cheer to the feeders of live stock. Prime beef steers are quotable up to $8.50, a remarkably high price for this time of the year. Hogs this week sold as high as $8.75, a record figure for January. Lambs made $8.90, Mexican yearlings made $8.25 and western wethers $6.25, also new high prices for the first month of the year. And the future outlook is very promising. Industrially the country is in excellent shape. This spells a broad demand for beef, pork, mutton and lamb meats. The fat grades of stock will not be laggards under judicious marketing.

Class of Cattle to Feed Longer.

Prices for fat cattle are remarkably high for this time of the year. And present and prospective conditions surrounding the trade warrant taking a most optimistic view of the future. Industrial conditions are in a most flourishing shape. Busy factories are seen all over the country and labor is being engaged on every hand. With the laboring man employed at good wages a broad outlet for beef is insured. For the above reason, we strongly advise against marketing good quality steers that lack finish, where parties have the feed and the hogs to follow them. Cattle of this class should pay a good profit if held and put in first-class condition for slaughter. However, common quality offerings should not be held back any longer than practicable. It is better to put the wheels under them and not take any chances.

100-Day Fed Cattle at $7.75.

August Dammrow of Treynor, Ia., was represented on the Chicago cattle market Monday with 36 head of 1,452-lb beeves which Clay, Robinson & Co. sold at $7.75. The remarkable thing about this sale was that although the cattle had been on full feed only 100 days, they went within 25c of the extreme top of the market. They were grade Herefords and branded westerns. The cattle were well wintered and grazed during the summer.

Load Cattle Friday and Sunday.

No small numbers of cattle from Nebraska, South Dakota and Kansas at Chicago this week arrived a day later than the shippers had bargained for. Many that were intended for the Monday market failed to make their appearance until Tuesday. As this was an off-market day for good cattle, on account of the absence of eastern shippers, they had to be carried over until Wednesday. We would advise shippers from the above mentioned states to load the cattle on Friday where they are intended for the Monday trade at Chicago and those on Sunday where figured to have them on the Wednesday market.

High Farm Products to Stay.

"The present high prices for farm products have come to stay; the rural population is playing out; the present census, if it classes the unincorporated villages as towns, will show between 60 and 65 per cent of population living in towns. At the present rate in twenty years the United States will cease to be an exporting nation for agricultural products, except as to cotton."—Congressman Champ Clark of Missouri.

Is Worthy of Preservation.

This issue of the LIVE STOCK REPORT contains statistics of the live stock trade at the central markets, as well as other important figures on agricultural and live stock matters of the United States, for 1909. They are gathered from official sources by this paper, and are as complete as it is possible to have same at this date. From no other publication and from no other single source can you obtain the same data. The gathering and compiling of these statistics has involved an enormous amount of labor on the part of our editorial and clerical staff, and our readers will do well to preserve the issue for future reference.

DORIS AND HER PETS.

All raised on the Badger Stock Farm, owned by T. Y. Buchanan, New Auburn, Wis.

Another Bull Movement in Swine.

The unexpected happened in the hog market again this week. Instead of material enough at hand to enable packers to inaugurate a campaign of retrenchment in prices, they were put to it to secure enough swine to meet current necessities. In the scramble which resulted prices were forced back to the high point; in fact, without actual cost sheets at hand, it is open to question if Wednesday purchases were not the highest of the winter season. Transportation of swine to market was deterred by storms over practically all producing territory and by a pronounced inability of rail lines to furnish cars, return of "empties" to loading points having been retarded by the same weather conditions, which caused most aggravating delays in getting stock to market. Where hog house "talent" confidently guessed 40,000 to 50 000 hogs for Monday, actual receipts were 27,795, and part of this number did not get in for market that day. Tuesday experience was a repetition of Monday and Wednesday history but little different from Tuesday. Heavy snow and consequent abandoned trains west of the Mississippi River Tuesday night no doubt will curtail shipments the remainder of the week. Generally the outlook is healthy. However, when weather conditions permit receipts will improve, but shotes can be fed out with every hope of good profit.

Put a Dollar in Your Pocket.

At this season of the year clubbing offers and subscription propositions are rife, and many of these offers are excellent value. We believe, however, that it would be difficult, if not impossible, to find anywhere an offer equaling that which we are making on page 10 of this issue. We state simply the facts when we say that in this offer we are giving $2.50 value for only $1.50. You can readily figure it up for yourself. We also give on page 10 our reasons for making this extraordinary offer. We do not pose as philanthropists, and this is simply a straight-out business proposition whereby any of our readers accepting same will receive $2.50 value for $1.50.

When our present supply of the various premium articles offered is exhausted, we shall hardly be able to duplicate this offer, hence we advise prompt acceptance of same. As long as the goods hold out the offer will be open, and when they are gone it will be withdrawn and our readers notified. In the meantime, we hope that a very large number of our readers who are not now paid subscribers to the REPORT will accept this proposition, thereby enabling us to retain their names on our regular mailing list. Those whose subscriptions have expired or are expiring at this time or in the near future will also do well to take advantage of this offer.

More Feeder Cattle at Denver.

From our Denver house comes the following: "Weather conditions have changed considerably the past few days, and there is little snow in evidence around Denver. Everything is moving along rapidly at the Yards, looking towards the completion of arrangements to handle the exhibits for the Stock Show. The entries for pure bred cattle show considerable increase over a year ago and the single entries in the Fat Cattle Class also show an increase. It begins to look as though the offerings of stockers and feeders would exceed last year.

"Since last report we have received advices from W. W. Wolf of Grand Junction, Colo., stating that he will have 100 head of choice three-year old dehorned Hereford feeders at the auction; W. J. Kelly of St. Anthony, Idaho, two loads of his high-grade Shorthorns; Geo. E. Anderson of Gunnison, Colo., two cars of choice Hereford yearlings, and Mac Highfill of Folsom, N. M., a car each of two-year-olds, yearlings and calves.

"We also have received advices from several parties in Wyoming who will have from 200 to 300 head each of good native Hereford and Shorthorn two and three year-old steers. These cattle have all been on hay feed, and are in excellent shape to go on feed at once."

Few Cattle Running in Iowa Fields.

A message from Des Moines, Ia., reads: "We are inclined to think the surplus corn of Iowa is still in the fields ungathered, with deep snow over much of it, which certainly will make slow progress in getting the balance of the corn husked. Many of the farmers have not enough corn husked and in their cribs to feed their stock through the next two months, because there are so many fields not entirely husked out. Practically no cattle running in the stalk fields for their living this year. More farmers than we have known of before are feeding their cattle in the barnyards on hay and grain. No prospects of a free movement of corn in Iowa in the near future."

Address all communications and make all remittances payable to THE LIVE STOCK REPORT, Union Stock Yards, Chicago.

The Government Meat Inspection.

Dr. A. D. Melvin, chief of the United States Bureau of Animal Industry, in his annual report to the secretary of Agriculture, among other things says with regard to the meat inspection:

"During the past fiscal year there were inspected at the time of slaughter 35,672,075 animals Of these there were condemned because of disease or other conditions 141,057 entire carcasses and 899 628 parts of carcasses, making a total of over 1,000.000 animals condemned in whole or in part. In addition there were condemned on re-inspection nearly 25 000 000 lbs of meat and meat products which had become unwholesome since inspection at the time of slaughter.

"The meat inspection has continued to grow in volume and has reached the point where further extension is impossible without an increase in the appropriation by Congress. The expenditures on account of this work during the fiscal year amounted to about $2.884,000 out of an appropriation of $3,000,000. At the close of the year the rate of expenditure was higher than at the beginning, and it is now by the strictest economy that the service can be maintained on its present basis without additional funds.

"With the additional authority given by the new law the Bureau has been able to bring about a steady improvement with respect to sanitation. New packing houses have been built so as to embody the best modern sanitary construction, and great improvement has been made in the sanitary condition of the older plants. The latter are being gradually abandoned for the erection of modern plants which may be kept at a proper standard of cleanliness with less labor and expense.

"A constant effort has been made to keep the service at a high standard of efficiency and to make improvements wherever possible. Notwithstanding the efforts to give the public a reliable inspection, however, the service has been made the object of unjust attacks. The attacks have proved to be due to ignorance or misconception of the facts, a failure to understand the system of inspection, or a desire to cause sensation.

"These unwarranted attacks are sufficient to show that credence should not be placed in published reports reflecting upon the meat inspection. The regulations are based not only upon the knowledge and experience of the Bureau staff, but upon the advice of high scientific authorities outside of the Department. The persons making up the inspection force are carefully selected through civil service examination, and their work is closely supervised. One class of employes consist of veterinarians who are graduates of certain recognized colleges and who have a thorough knowledge of animal diseases and their relation to human health. Other employes are chosen because of their expert knowledge of live stock, meats, sanitation, packing house processes, etc. There are seven supervising traveling inspectors who visit the various stations from time to time, unannounced, and investigate the methods of carrying on the work. In this way it is extremely unlikely that inefficiency or corruption could remain undetected very long. In a work of such magnitude carried on by so many people, however, it is too much to expect absolute perfection. All men are liable to occasional errors or judgment, and in a force of 2,500 people there may even be a few who are incapable or unworthy. But even if it should happen on rare occasions that meat which should be condemned is passed, the amount is such an infinitesimal part of the entire quantity that it does not affect the value and integrity of the service as a whole. The large amount of meat actually condemned is good evidence of the care and thoroughness of the inspection."

The quality of service rendered by Clay, Robinson & Co. is such as to merit your patronage.

Summary of 1909 Trade at Chicago.

Native Beef Steers.

The year 1909 goes down into history as one long to be remembered by the cattle feeders. It was a red letter event. New history was made in prices In spite of the high cost of feed, those who were courageous enough to fill up their feed lots were well remunerated. What a contrast with most of 1908! General Prosperity camped amidst the meat-eating people and they created a remarkably broad outlet for beef. An average price of $6.35 for beef steers during the year just closed was never before recorded, and stood 25c above 1908 and 15c higher than the previous high year—1902. A new top figure was also paid in the open market, when Clay, Robinson & Co. sold a load of the Foster Bros. beeves from Iowa at $9.50, being 20c per cwt higher than any previous sale. Prosperity extended from the feeder of prime matured corn-fed beeves down to the party who never even permitted his cattle to extend their acquaintance beyond the society of grass. The months of August and September proved the highest of the year, the average price being $6.75, against $5 85 in February, low month of the year. Only in one month was there serious domination of the market by the buyers. That was in the middle of December, when feeders flooded the market with offerings and prices dropped 50c@$1.25 within the short period of ten days. However, this unwise liquidation soon ceased, and a good part of the break was repaired in due time. Perhaps never in any previous year were so many steers in plain and medium flesh sent to market as during 1909. There was a good reason. In most months buyers paid relatively high prices for light and handy weight steers and then the high cost of feed rendered feeders very timorous. This made the available supply of choice to prime beeves about the smallest in the annals of the trade. Yearling cattle, where fat, again met with high favor of the buyers. In fact, they sold snug up to prime matured beeves, if fancy. In two months—June and July—fancy yearlings outsold prime heavy beeves.

Butcher Stock.

Not since the beef famine year of 1902, when the average price was $4 70, was the average of $4.20 for cows and heifers in 1909 passed. The gain over 1908 was 10c. Fancy heifers reached $7.50 in July and October and top on cows $6.50. Broad outlet, a high beef steer trade and smaller receipts than the previous year enabled sellers to control the whip hand in most months. Eastern shippers and local packers were the mainstay of the trade. Exporters were moderate buyers and confined operations chiefly to fat heavy cows. The high month of the year was in May, just before the grassers become numerous, the average price climbing up to $5.00. A November average of $3.85 proved the lowest of the year. Fat yearling heifers were in urgent request all year. The supply fell far under trade requirements, and prices for these ruled the highest of the year. Bulls sold well, the great bulk going at $3.25@.50 for bologuas to butchers, though the May top was $5 85 for prime. Calf prices did an aeroplane stunt in 1909. Tops for vealers reached the unprecedented figure of $10 in both the first and last month of the year, while the market as a whole was 50c up from 1908. Supplies were normal, but the demand seemed insatiable. A large number of calves too heavy for veal sold at $3.25@4.75, when vealers of suitable weight went at $8.25@9.25.

Stockers and Feeders.

Notwithstanding the remarkably high market for fat cattle, the 1909 movement of feeding cattle from Chicago at 304,000 was the smallest since 1900. During the first half of the year the falling off from the same period of 1908 was around 50 per cent Feeders seemed to lack faith in the future fat cattle market. In this they were wrong. Then the high price of feed and uncertain outturn of the corn crop were other deterrents. At no time did prices rest on a level that looked high when compared with the rates prevailing for fat steers. Quality was lacking, with choice heavy steers being in unusually small numbers. Lighter weights and common grades of stockers were in goodly numbers in most months Relatively few stockers sold under $3 25 and not many feeders above $5.00 during the year. In June a load of fancy selected 1,240 lb fleshy steers were taken out by a feeder at $6.40, being well worth the money for slaughter, and comparing with $6 05 for top in 1908. This was a new high price in the open market, the next highest figure for 1909 dropping down to $5 85. All records were smashed in the International auction ring, when Clay, Robinson & Co. sold at $50.50 a load each of Shorthorn and Hereford calves for Colorado and Kansas. Al. A. Neale of Montrose, Colo., and Fowler & Tod of Maple Hill, Kan., were the shippers.

Hogs.

It is necessary to turn back the pages of history twenty-seven years to find a time when the average price of $7.40 for hogs in 1909 was eclipsed. As compared with 1908 there was an advance of $1.70. Revival of industrial activity and the smallest run since 1904 were the factors that brought prosperity to hog producers. A top of $8.75 was paid in December, not beaten since 1882 and highest in modern packing times for the last month of the year. The initial month of the year proved the lowest, with an average price of $6.10. However, the advance from then on was not interrupted until August, when the average stood at $7.75, against $7.85 in July, which was highest for the first seven months. Yet buyers were unable to resist the inevitable. The average shot up to $8.20 in September, fell back to $7.75 in October, only to steadily rise from then on, making $8.35 in December, the highest in modern packing times. This was in striking contrast with the December average of $4.70 two years ago. Buyers predicted $7.00 for swine in the last two months of the year, but their expectations fell from $1.00 to $1.35 shy of realization. In the first place there were not the hogs in the country to make an old-time winter rush of shipments and in the second place producers had gotten a familiar acquaintance with $7.50 and $8.00 swine and they refused to sever the relationship. Eastern shipping demand was relatively good and was a firm prop under the market in most months. Local packers were also goodly bidders, the short crop and insistent call causing them to put less meats in their cellars and market more through fresh pork channels than ever before. Hogs have truly earned the title of the "farmer's best friend." Marketing corn by the hog route has been a most profitable plan. The health of swine throughout the year was remarkably good, fewer cases of so-called cholera being noted than in years.

Sheep and Lambs.

New history was made in the lamb trade during 1909. The rangeman prospered and the feeder made money. Never before were such high prices realized. An average price of $7.30 for lambs was 30c above the previous record average in 1907, and 95c higher than 1908. Top lambs reached $9.90 Clay, Robinson & Co. landed the Trimble & Doty Colorado-fed offerings at this figure, which was 65c per cwt higher than the previous record price in 1907. Shorn lambs made $8.90, a new high price and was obtained by Clay, Robinson & Co. for Colorado-fed offerings of the Trimble & Threlkeld feeding. Mexican yearling wethers brought $8.15, a record figure by 15c per cwt. No new records were made in the ewe or wether departments. However, the general average price of $4.95 was 30c higher than 1908 and compared with the record average of $5.25 in 1907. Summit on sheep was $7.00, the highest since 1907, when $7.25 was paid. October proved the low month of the year, the average for sheep being $4.35 and for lambs $6.50. May was the high month, average prices being $6.00 and $8.10 for sheep and lambs respectively. The proportion of western range arrivals to go for slaughter was greater than ever, due to their improved condition. Native offerings carried the usual liberal number of lambs in poor to medium flesh, failure of owners to dock and castrate the lambs in tender age and to give them the care they warranted bringing this deplorable condition about. There was less inclination on the part of corn-belt feeders to avoid a high feed bill and market westerns in partly-fatted shape, a plan that paid them well for following. Then more Iowa feeders provided shelter for their stock, another wise course. If there was any disappointment in the trade it was on the part of those who fed ewes and wethers. There was a very narrow outlet for such offering through export channels and local buyers were enabled to secure these at relatively cheaper cost than the younger animals. Yearlings and lambs had the best call, the public showing a decided preference for the younger and tender meats of ovine stock. Prices for feeding stock were held at levels that amazed and disappointed most prospective buyers. Result was that in most states the feed lots do not contain as many offerings as usual. During the regular stocking-up season bulk of lambs were taken out at a cost of $6.50@7.00, most yearlings at $5.00@5.50, wethers largely at $4.25@4.75 and ewes in main at $3.00@4.00. These prices were $1.00@1.25 higher than last year for lambs and 50@75c higher for sheep. Range yearling breeding ewes reached $6.60 and bulk cost $5.75@6.50, with older ones in main at $4.75@5.50, these prices being 50c@$1.00 up from 1907.

DENVER FEEDER SALE THURSDAY, JAN. 13.

The auction sale of stockers and feeders at the National Western Live Stock Show will be held Thursday, Jan. 13, at the Denver Stock Yards.

We have already called attention to this splendid opportunity for corn-belt feeders to secure the sort of cattle that will respond to a corn diet and make money for the man who fattens them. Commenting upon some of the offerings to be made from Colorado herds, our Denver house writes:

"The reputation of Colorado feeders for unusual development and smooth finish has become national. Being bred and raised in the Colorado mountains gives these cattle a ruggedness and hardiness lacking in feeders from many other localities."

If you are unable to attend and are in the market for any cattle, send Clay, Robinson & Co., Union Stock Yards, Denver, Colo., your order and they will do the rest.

In Old Time Cattle Sheds.

Days, weeks and years float by and in the rapid stream of passing time we have scarcely leisure to reflect on the old days and the somewhat strange customs of early youth. Having of late spent many winters in my calf country and watched with earnest eyes the customs and conditions, more especially of the middle and lower classes, it seems an enigma to me, living in this changing West, how conservative they remain. They live a little better, the houses improve, the farmer works harder and possibly gets less than in days of yore, but the system of agriculture, the breeding and feeding of live stock, is very much the same as in the days when first I tried my 'prentice hand on a Scottish farm. At our largest farm we carried through the winter about 75 to 100 cattle. Of these about 50 head were fattened for market. The crop made a difference as to the bovine stock we carried, the price also. The "nowt," as the peasant called them, were a small adjunct on the farms in the Valley of the Tweed. It was sheep and more sheep all the time. My father believed in them and was always overstocked. He was continually grumbling like most farmers about having too much stock and consequently too big bills for feeding stuffs to help out the regular crops. Yet he had great love for his cattle, and about the seventies, when heavy cuts were in demand, he turned off season after season a grand lot of steers. Our dwelling house looked north, catching the bitter northeast winds that came with sullen roar from the German Ocean, but by good luck the cattle sheds faced south, with fine drainage, and while they were old-fashioned they were comfortable and roomy. Aside from making money, the principal work of our bovine stock was to break down the straw, turn it into farm manure to be used the following spring and summer in connection with the root crop, very much in the same way as the Colorado sheep feeder gets his yards as full of sheep litter as possible for the use of his beet crop. As we had stationary threshing mills on all the farms in that part of the country, in fact, it is almost universal in Scotland, we had only to turn on the water from the old mill pond to start our machinery. As the straw was delivered, it was encircled by a rope and carried off to the sheds where the cattle were. How cosy it was when the fresh straw lay a foot or two deep both in the covered and open part of the court and how happy the lazy bullocks looked. They ate and drank, and then groaned, sighed and slept—a short Elysium before they met the pole-ax.

In the days I speak of we had a "byreman," as the cattleman is locally called, named Geordie. His second name I forget. But I can see him yet. He was a big angular man, red haired, badly shaved, generally chewing tobacco, the brown liquid staining his chin, a sort of through other, shabbily dressed individual occasionally swearing at large, fond of his dram, but a diligent, conscientious worker; in fact, a slave to his business. On account of having so many sheep we were using turnips very sparingly in our cattle feeding and only gave the cattle one "fothering" of "neeps" per day. Geordie began about 5:30 in the morning and filled the troughs which ran down inside of the sheds, with swedes. We had half a dozen or more sheds holding eight to ten head of cattle each. You heard the turnips rolling down the stone bottom of the trough as if you were near a bowling alley. When it was full he took his slicer and in a short space of time the cattle were at breakfast. Geordie might have faults, but he was methodical and on time, a gift that every successful feeder must have. After this work was over he commenced to mix his "mashie," as he called it. This was a mixture of chaff, meal and sometimes molasses added, with enough of water to make the meal stick to the chaff and soften the whole mixture. When we had no chaff we used cut hay. Barley chaff with a lot of young clover in it was decidedly the best. Over this mixture my father and Geordie had many a shindy. The former wanted the meal weighed and only so much used per day, but the latter thought the appetites of the cattle were the best guage, and in the dispute the "byreman" and the cattle had the best of it. After this work was over water had to be carried from the horse trough to the big half barrels that stood in the sheds. It was a big job in the warm days of spring. About 11 o'clock a generous allowance of oilcake or meal was placed in small troughs distinct from those used for the turnips. After dinner the turnip troughs were cleaned and the mashie put in them. How the cattle used to go for it! It had just soured a bit and was very tasty. By 4 o'clock it had been disposed of, the cattle were resting and Geordie went off for his tea. At 7:30 he returned and lamp in hand we took a last look and bid the bovines good night. While Geordie was an expensive feeder, the results were good and in these days we turned off a grand lot of bullocks. It was before the days of auction rings. The dealer came along and bought your cattle in the yards and then took them south to such markets as Newcastle-on-Tyne, Leeds, Manchester or London and sold them himself on those markets. We had no weigh-bridges then so we used to measure them by the tape. Girth the bullock and then measure his length from point of the shoulder to the drop of the tail. We had an old-fashioned book that gave you the weight. How it was done has passed from memory, but the dealer and my father generally agreed on the price, the latter keeping closely in mind the weights I had given him. And then what a sad day it was when the bullocks went! There was a void in your heart, softenened by your cheque. And the wife at the farm house looking out from her door remarked sarcastically: "They are braw beastles, but deil a bit do we ever taste o' them."

Geordie grew to love his grog not wisely but too well and eventually left us. John, the groom, who was the Sherlock Holmes of our place, used to spy through Geordie's cottage window after he and his wife had retired. They slept in one of the old Scotch box-beds. They are fitted with shelves and other conveniences. Geordie would strike a match and light the candle, stretch out his arm for the glass and bottle, help his wife with characteristic gallantry and then in due form help himself. How often he repeated the doses during the night history telleth not. After he left I lost sight of him in the hurly-burly and shuffle of the passing days.

J. C.

Written for Christmas number Iowa Agriculturist.

Record Price for Hogs at Denver.

Clay, Robinson & Co. broke all records on the hog market at Denver on Jan. 5. On this day E. W. Bostrum of Big Springs, Neb., had in a car of swine which our house sold at $8.60. This was not only the highest price ever realized for hogs on that market, but was also the summit by 10c per cwt.

Feeding Fewer Cattle in Missouri.

H. R. Clay, Clinton county, Mo., was at our Chicago office this week and said that there was a great reduction in cattle feeding in that part of the state as compared with recent years. For instance, he usually feeds 200 to 300 a year and has only 100 in his feed lots at this time. The hog crop is shorter than usual. He reported around one-fourth of the corn still in the fields under snow.

THE PRIDE OF "BROOKMONT."

Above photo shows A. E. Cook, the genial proprietor of the great "Brookmont" Farm at Odebolt, Iowa, (well known as a Hereford breeder as well as very extensive farmer and feeder) engaged in judging the fine points of one of his younger "whitefaces." From the expression of sire and son both are well satisfied with the "decision." This lusty youngster, one of the brightest and happiest mites of humanity ever seen, is doubly fortunate: first, in having wisely selected for its father one of the finest men in the big state of Iowa, and second, in having for its environment the mansion and broad acres of "Brookmont," with its shaded avenues and velvet lawns, where in the "good old summer time" it can roll and romp to its heart's content.

CHICAGO MARKET REVIEW, AND OUTSIDE MARKETS BY WIRE

Current Comment and Chicago Quotations to Wednesday Noon.

Receipts and Shipments.

Following shows official receipts and shipments of cattle, hogs and sheep at Chicago for the past week:

RECEIPTS.

	Cattle.	Hogs.	Sheep.
Wednesday, Dec. 29.....	15,859	18,002	12,278

CHICAGO MARKETS.

Cattle.

NATIVE BEEF STEERS.

Receipts of 21,000 cattle on Thursday and Friday of last week rendered trade very dull and draggy and prices showed a net loss of 10@25c from Wednesday, while the loss from early Monday was anywhere from 25@50c.

The cattle market this week opened with a total run of 21,321. The beef steer trade opened steady to 10c higher than late last week, but after most urgent orders were filled all change in the price range was towards weakness, the close being very dull. Eastern shippers were best props under the market, local buyers being very bearishly inclined. Late trains again hampered the trade. Bulk of supplies were short fed and warmed up steers. Top for day $8 00, paid for a load of 1,509 lbs average. Bulk of selling $5.50@6.80. Yearlings were very scarce and in good demand. Tuesday's receipts of 6,934 included a fair number of beef steers. Cold weather and a snow storm again delayed marketings. Trade lacked firmness of early Monday and most of the better and heavier grades were carried over. A run of 15,000 cattle on Wednesday made both eastern shippers and local buyers bestir themselves and prices were advanced 10@15c over Monday. Top beeves made $8 05, realized for 32 of 1,495 lbs average.

Revised quotations for all grades of native beef steers:

BUTCHER STOCK.

Last week's trade in cows and heifers closed 15@25c lower than best levels on Monday and 10@15c under the finish of the previous week. Bull trade averaged steady for the week. Calf prices on Friday were unchanged from the close of the previous week.

Starting out on the initial market day of the week with prices 10@15c higher than last Friday, practically all of this advance was lost towards the close. Stock straggled in all day and the total supply was above expectations. Outside orders were only of fair volume and local buyers naturally took advantage of the situation. The market for bulls held steady. There was no quotable change in rates for calves. Tuesday's market for cows and heifers was very dull, with all price changes tending toward weakness. Trains were again belated. Butcher bulls sold steady and a brisk outside demand for bolognas boosted prices for these to the highest rates in several months. A very light run of calves met fairly good demand at steady rates. Cows and heifers made a stronger range Wednesday, general demand being better. Bulls advanced 10c. Calf prices were steady.

Revised quotations for all grades of butcher stock and calves:

Extra choice to prime yearling heifers.....	$6 00	@ 7 00
Choice to prime heifers.....	5 00	5 75

SALES MADE BY CLAY, ROBINSON & CO.

Thursday, Dec, 30—22 heifers, 838 lbs, $5.30; 4 export heifers, 1,000 lbs, $5 25; 12 export cows, 1,200 lbs, $4.80; 6 medium cows, 1,093 lbs, $4.00; 6 medium heifers, 860 lbs, $3 90; 8 medium cows, 930 lbs, $3 85; 6 medium cows, 960 lbs, $3.75; 6 medium cows, 880 lbs, $3.50; 8 cutter cows, 1,100 lbs, $3 25; 17 cutter cows, 840 lbs, $3.15; 10 cutter cows, 910 lbs, $3.10.

Monday, Jan. 3—3 export cows, 1,260 lbs, $5.65; 30 export cows and heifers, 1,036 lbs, $5.60; 7 export heifers, 1,088 lbs, $5 25; 13 export cows and heifers, 1,090 lbs, $5.00; 12 Kosher cows, 1,277 lbs, $5.00; 11 fair to good killing heifers, 856 lbs, $4.65; 6 medium export cows, 1,050 lbs, $4.65; 16 medium export cows, 1,110 lbs, $4.45; 9 fair to good killing cows, 1,070 lbs, $4.30; 22 medium cows and heifers, 900 lbs, $4.10; 12 medium cows, 1,080 lbs, $4.10; 7 medium cows, 1,090 lbs, $4 00; 10 fleshy heifers, 672 lbs, $4.00; 9 fleshy heifers, 760 lbs, $3.90; 8 plain killer cows, 1,010 lbs, $3.50; 7 plain killer cows, 950 lbs, $3.40; 6 cutter cows, 876 lbs, $3.10; 6 canner cows, 850 lbs, $2.80; 5 canner cows, 760 lbs, $2.60.

STOCKERS AND FEEDERS.

Last week's market for stockers and feeders closed up in wretched shape. In spite of a 10@25c decline from the previous week, a goodly number of offerings had to be carried over, owing to the lack of buyers.

The week started out with a goodly supply of stockers and feeders, counting the fresh arrivals and those carried over from last week. Thus conditions were decidedly against the selling interests and where there were any marked changes they tended toward weakness. As compared with early last week most sales showed 15@25c loss. There was no improvement in the market on Tuesday. Accumulations were liberal and the attendance of buyers greatly reduced, owing to the cold and stormy weather. Common and medium quality stockers were a drug on the market. Wednesday trade steady. Common light stockers were practically unsalable. General market 25c under week ago.

Revised quotations for stocker and feeding cattle:

Good to choice feeders.....	$4 65	@ 5 10
Poor to medium feeders.....	4 00	4 40
Good to choice stockers.....	4 00	4 50
Plain to medium stockers.....	3 40	3 65
Inferior to common stockers.....	2 75	3 25
Good to choice stock heifers.....	3 25	3 65
Common to medium stock heifers.....	2 85	3 15
Plain to good thin young cows.....	2 75	3 35

SALES MADE BY CLAY, ROBINSON & CO.

Wednesday, Jan. 4—65 Illinois, 943 lbs, $5.00; 26 Iowas, 1 000 lbs, $5 00; 23 Illinois, 1,046 lbs, $4.65; 36 Iowas, 1,016 lbs, $4.40.

Hogs.

Thursday of last week receipts of hogs were 24,505. Opening steady with best time previous day on shipping kinds, trade finished 5@10c lower. Packing droves cost a little more money than previous day. Conditions were in favor of the buying interests Friday. Run totaled 25,341, not counting 8,200 held over from Thursday. Starting generally 5c lower, trade finished 10@15c off. Saturday's trade was 5c higher than Friday's close. Marketing was 8,518. Top $8.50, with bulk $8.25@$8 40.

This week started out with a run of 27,795 hogs. Opening 10@15c higher, with catch sales 20c up, part of the advance was lost, late trading being mostly 10c higher than Saturday. Under a run of 20,797 Tuesday, general market was 5c lower. Run was figured at around 25.000 Wednesday and general trade was brisk at mostly 15@20c higher rates than early Tuesday. Top $8 75, equaling season's pinnacle, while cost of droves was highest in history. Bulk of sales $8.50@8 70. It should be taken into account that the market is on a weather basis. Moderate climatic conditions will likely result in increased supplies and a decline in prices. We advise putting wheels under fat hogs and keeping immatured stock back for heavier weight.

Revised quotations for all grades of hogs:

Fair to choice heavy shipping.....	$8 65	@ 8 75
Fair to choice butchers.....	8 55	8 65
Fair to choice medium weights.....	8 50	8 60

Governments.....	2 00	5 00

Sheep and Lambs.

Final trade in sheep last week showed 35@50c advance over previous week's close, with yearling stock up 50@75c and lambs showing generally 50c gain. Fed-western lambs reached $8.85, Mexican yearlings $8.15 and fed-western wethers $6.00.

On Monday of this week receipts totaled 20,420. The general market was steady to strong. Tuesday's run was 13,927. Lambs went on a firm basis, with sheep and yearlings strong to 10c higher. Under receipts of 19 000 Wednesday, trading was brisk at prices strong to 10c higher, sheep and yearlings developing most of the strength. Prime lambs made $8.90, fancy lamb-weight yearlings $8 25 and extra choice fed-western wethers $6.25. The latter price was secured by Clay, Robinson & Co., who also sold fed-western yearlings at $8.15. The above prices are the highest ever known at this time of the year. As we have previously advised, keep the well-fatted kinds coming to market as fast as practicable, but hold half-fat kinds for better flesh.

Revised quotations for all grades of sheep and lambs:

SHEEP.

Wethers, good to choice.....	$6 00	@ 6 25

Prices for sheep and lambs went 15@25c higher than late last week. Pinnacle on lambs $8.25 and bulk around $8.00, with best sheep at $5.75 and bulk $5.15@5.35.

Exodus from the Farm.

It is common to lament the tendency of the best men and women to leave the farm and go to the city as a modern or present-day tendency, whereas it is as old as civiliz[illegible] itself.

Plutarch in his "Præcepta Politica" protested against the threatening invasion of large cities; Cicero thundered against the depopulation of the rural districts through similar attractions to those which draw young men and young women from the farm today. Even Justinian, the great law maker, was in favor of legislation designed to keep the people on the farm.

The great Roman Emperor Augustus before the Christian era saw that his empire was being undermined and the strength of his people sapped by the exodus from the country to the city, and called to him the poets of the nation and commanded them to sing of the beauties and profits of country life, in order to attract his people back to the land. This trend cityward has been to a great degree due to the half education which has prevailed in the rural districts and which has given the farm boy glimpses of the more attractive city life without teaching him at the same time how he may attain such a life at home.

For the first time in history this situation is sought to be met by making a profession of farming, so that it may be attractive to the intellectually strong, at the same time that the returns are large enough to command the reasonable comforts and luxuries of life. These countervailing influences, however, will be found to be inadequate unless they strike at the very root of the difficulty—the farm home, the country road, the rural school and the country church. —H. J. Waters, president of Kansas State Agricultural College.

From Tarkio, Mo., comes the following: "Continued cold weather, together with the snow that has been upon the ground continuously for almost three weeks, has made corn husking almost impossible in this part of the state. It is estimated that not over half the corn is out of the field, and it looks as if the remainder would not be hauled into the crib before the end of January. On one of David Rankin's farms 500 acres in the field are yet to be husked."

FARM WEALTH OF UNITED STATES ON JAN. 1, 1910

The United States has $30,000,000,000 invested in farm lands, their buildings, machinery and live stock, according to a census the results of which have just been made public in the Orange Judd Farmer. From 1,000,000 in 1850, the number of farms has increased to nearly 7,000,000 in 1910. No such increase in agricultural land values was ever known before in the history of the world in any country. The value of farms in the United States has increased 44 per cent more than in 1900, the figures of that year showing an increase of 25 per cent over the previous decade.

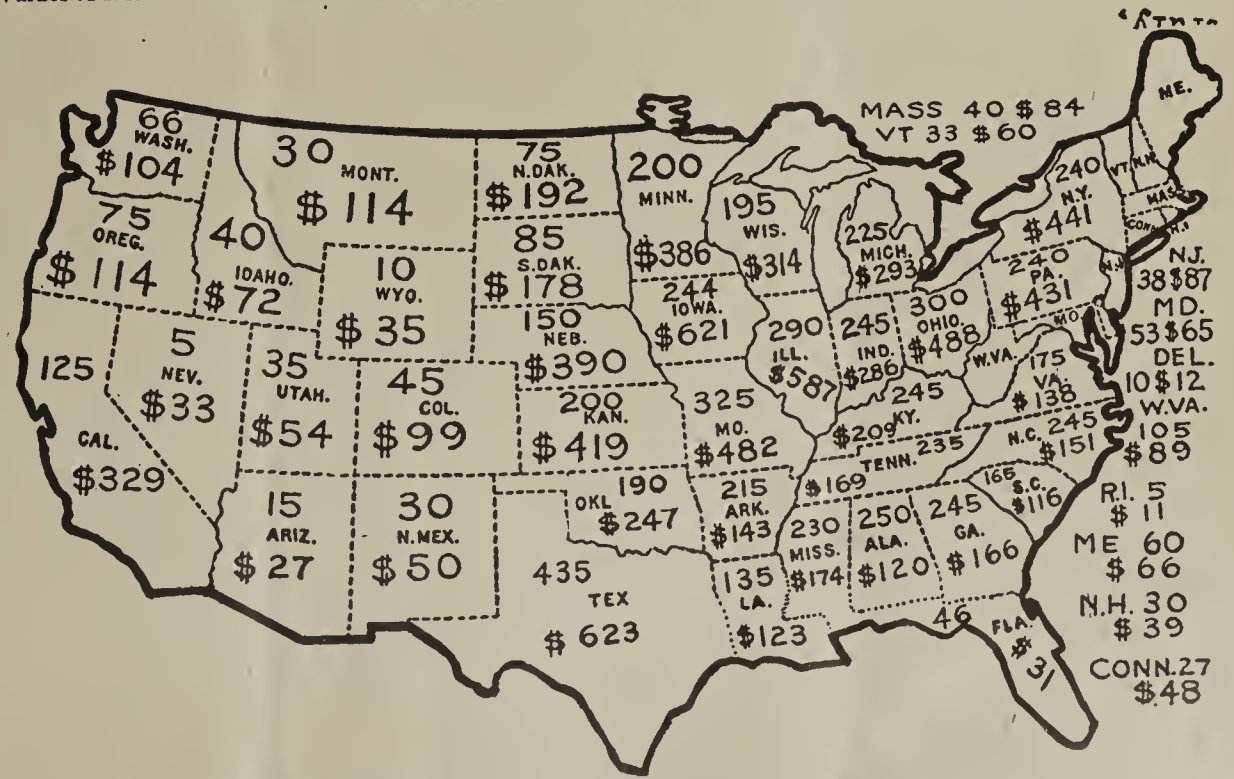
The most remarkable figures presented show that the western section, which includes New Mexico, Colorado, Wyoming, Montana and other states, has within the last ten years shown an increase in the number of farms of 100 per cent. At the same time the value has increased 98 per cent and the products 211 per cent.

Values of farms in the Southcentral states have increased 58 per cent and in the Northcentral states 43 per cent. In the North Atlantic states there has been an increase in value of 13 per cent, and in the South Atlantic states an increase of 34 per cent. Of the Northcentral states the report says:

"Observe, however, the stupendous totals of farm values in the Northcentral states, including Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, the Dakotas, Nebraska and Kansas. This vast group has gained almost an even $5,000,000,000 in the fair worth of its farms compared to ten years ago.

"Observe further the remarkable fact that this gain represents fully half the total gain in agricultural values for the whole country during the decade just closed. Also the total of value for these farm lands exceeds the total of all the rest of the country put together."

The figures show that there were 290,000 farms in Illinois, which give $587,000,000 worth of products. Only Texas and Iowa exceed Illinois in production.



The upper figures in cut, prepared by the Orange Judd Farmer, give, in thousands, the number of farms in each state on New Year's day, 1910. The lower figures, with $ sign, show total value in millions of dollars on all farm productions during 1909.

D. W. Black's Grand Championship load of International Show Texans, fed in Ohio, were sold in December, 1901, by Clay, Robinson & Co. at $12.00, and the same price was also obtained by Clay, Robinson & Co. in December, 1909, for a load of the S. B. Burnett International Show Texans, fed in Illinois. These were the highest Texas-bred cattle on record.

Valuation of live stock received at the Chicago Stock Yards for forty-four years:

Best Clubbing Offer of the Season

The BREEDER'S GAZETTE and THE LIVE STOCK REPORT

ONLY $1.50 FOR BOTH PAPERS.

The Breeder's Gazette needs no introduction. It is the greatest live stock and agricultural paper in the world. Sixty to seventy pages weekly. Splendidly illustrated. Biggest and best.

EXTRA!

Free With Every Order

Since writing the adv. opposite we have determined to make our offer so attractive that no reader will feel like passing it by. We shall therefore give every person sending us an order for the REPORT and BREEDER'S GAZETTE this little slate memorandum book (with pencil), a very handy article for any farmer, housewife or schoolboy or girl.

Here's What You Get:

BREEDER'S GAZETTE one year
LIVE STOCK REPORT one year
COMBINATION PEN AND PENCIL
SLATE MEMORANDUM BOOK
CLAY, ROBINSON & CO.'S American Beauty Souvenir Calendar for 1910

All for Only $1.50

Pretty good offer, isn't it? Regular price of the Breeder's Gazette alone is more than we ask for the whole of above list.

How can we afford to do it? In one sense we can't afford to—but we do it anyway. We are giving you full $2.50 value for $1.50. Why? Partly because we know that if you read the Live Stock Report for a year you will become acquainted to some extent with our firm, our methods, and the results we get for our consignors. You may not necessarily become a customer, but at least you will say, with thousands of others that

"Clay, Robinson & Co. are O. K."

That's what we want—your GOOD WILL first, then your BUSINESS if you are in position to give it to us and feel that we can give you better service than others. If not, well and good. You will have had big value for your money anyway, and we too shall be perfectly satisfied. We of course are seeking to make new customers as well as retain old ones, and this is one of our methods of doing it. We figure that if we give a man something worth $2.50 for $1.50 we have made a good start toward gaining his friendship.

We cordially invite you to "come in" on this big offer. Use the coupon opposite and save writing a letter.

Get This Point

IF you are already a subscriber to either the REPORT or GAZETTE, or both, that makes no difference, as your subscription will be extended a year from expiration date. YOU CAN'T INVEST $1.50 BETTER.

As an incentive to prompt action, we will send, free and postpaid, to every person mailing the coupon and $1.50 for a year's subscription to the two papers, the neatest and handiest combination pen and pencil you ever saw, as long as our supply lasts. They are going fast but reasonable promptness on your part will insure one. You will also receive free our beautiful 1910 calendar. Now is the time to attend to this matter, while you have it in mind. No letter to write—just use the coupon. SEE COLUMN HEADED "EXTRA" OPPOSITE.

GOOD WORK OF OUR SALESMEN

$8.85 Was the price we obtained for a lot of 80 lb lambs at Chicago on Dec. 31. being top that week. William Butzke, Minnehaha county, S. D., was the owner.

$8.85 Ida county, Ia., was represented on the Chicago market Jan. 3 by S. Baxter, who had in 207 western lambs, averaging 80 lbs. We sold them at the top price of $8.85 for westerns.

$8.60 It was Dec. 30 that our East St. Louis house sold for E. S. Mathias, Rio Grande county, Colo., two double-decks of Colorado lambs, averaging 70 lbs, at $8.60 straight. This was the highest price obtained there for the season and 20c per cwt above any other sale that day.

$8.55 Was as high as light weight hogs brought on the Chicago market Jan 3 and was obtained by us for 74 head of 199 lbs average, marketed by J. M. Buster, Louisa county, Ia.

$8.50 Our house topped the hog market at South St. Joseph on Dec. 30 with 55 head, averaging 293 lbs, at $8.50, owned by A. Falk, Page county, Ia.

$8.50 Our South Omaha house secured $8 50 for 61 hogs, averaging 291 lbs, belonging to C. V. Almquist, Montgomery county, Ia. This was the highest price on record there.

$8.40 Our South Omaha house sold a load of 262-lb hogs at this price Jan. 3 for Pratt & Naylor, Cass county, Ia., top that day.

$8.35 This figure, which was top by 5c per cwt for hogs at Sout St. Paul on Dec. 28, was secured by our house for a load of 231 lbs average, shipment originating from North Dakota.

$8.30-$8.00 The former price was obtained for shorn lambs on the Chicago market Jan. 3 and was obtained by us for 403 head of 77 lbs average. The latter price was pinnacle for yearling wethers, also obtained by us for 157 head, averaging 89 lbs. Both lots were marketed by George Dick, Dekalb county, Ill.

$7.75 Jan. 4 our East St. Louis house sold for J. R. Fesler, Pike county, Ill., 126 yearling wethers, averaging 84 lbs, at $7.75, which was top by 10c per cwt that day and also the record price for such stock there.

$7.25 Anderson & Son, Fremont county, Ia., were the owners and we the sellers of the 267 feeding lambs of 52 lbs average which brought $7.25 at Chicage on Jan. 3. the highest price of the season.

$6.50 This price was extreme top of the South Omaha cattle market Jan 3. Our house obtained the same for a car of steers sent in by D. R. Anderson, Antelope county, Neb.

$6.00 J. Aull, Sarpy county, Neb., had two doubles of 113-lb wethers on the South Omaha market Jan 4, and our house sold them at $6.00. These were the first sheep to make this figure there this season.

$6.00 We secured this price at Chicago for western wethers on Dec. 30 and 31. On the previous date the Columbus Canning Co., Columbia county, Wis., had in 190 head of 119 lbs average, and on the latter date the Waupun Canning Co., Fond du Lac county, Wis., marketed 105 head of 126 lbs average.

$5.90 The 252 fed-western wethers of 113 lbs average which brought this figure at Chicago on Dec. 29 were handled by us and marketed by M. McGonagle, Waseca county, Minn.

$5.10 S. E. McCurdy, Burt county, Neb., was on the South Omaha market Dec 28 with a double of 103-lb ewes that our house sold at this price, top for their kind and quite a little higher than expected by Mr. McCurdy.

Handsome Horse Pamphlet.

We are in receipt of a very attractive little pamphlet, "A Collection of Equine Gems," from Alex Galbraith & Sons, De Kalb, Ill. It has a Galbraith tone about it and if you are in the horse business it will pay you to send for it.

HOW ARE YOUR HOGS?

Dangerous policy to let them get wormy and out of condition while feed costs money.

VESEY'S STAR ANTI-CHOLERA does the work and pays big to feed. No herd is safe without it. Used and recommended by large hog feeders everywhere. Try it. If you are not satisfied money will be paid back. Price $9.00 per dozen bottles; $5.00 per half dozen bottles.

ANTI-CHOLERA CO., Union Stock Yards, Chicago

CREAM SHIPPERS.

Send for sample copy of the NORTHWESTERN DAIRYMAN, the only paper of its kind published. A good advertising medium of manufacturers of Dairy supplies. Agents wanted, large commissions, sample free. Address

Northwestern Dairyman, St. Paul, Minn.

The Climax of Manure-Spreader Value—

$83.50 Freight Paid

Value boosted—price dropped—on the spreader that has led them all in quality for 17 years—that's **your** opportunity **this season.** We jump years ahead again, with 19 improved features—all found on no other spreader made. Yet, with increased facilities and the largest output in the business, we slash prices while increasing values. Others have always imitated the old famous "American" as closely as they dare—even imitated the **name** of our machines—that's why we now call it "Detroit-American." But don't be blinded by claims—get the books and compare. Note our offers—

30 Days' Trial—Cash or Credit

Get our proposition before you buy—see why others are getting excited, making extravagant promises and harping on **price,** with little to say about construction. But do they even beat these prices with their makeshifts? We deliver to you, freight prepaid, in Michigan, $83.50; in Indiana or Ohio, $85.00; in Illinois, $86.50; in Wisconsin, Iowa, Minnesota or Missouri, $90.00; and these figures are for a spreader that is better than any one thought a spreader could be—the improved—

Detroit-American

Made in all sizes. More steel used than in any other spreader; cylinder all steel; steel rake and end gate; simplest feed—6 changes made from seat; the **only direct** chain drive—no gears; lightest in draft—all together 19 special features.

Free Books—The best published on value of manure; how to spread, etc., **and how to buy at the right prices on the right terms.** Shows and prices the original Tongueless Disc and the finest line of Cultivators too. Send coupon or postal today.

Freight Prepaid—30 Days' Free Trial

I want to quote you a price that will cause you to sit right up and take notice on the grandest, best plow that ever turned a furrow. I can do it because we are the *actual manufacturers*, and sell *direct to you*. We don't have traveling salesmen—don't sell to dealers nor even to catalogue houses. You save those expenses and profits when you order direct from our factory. But that isn't all. You get a *better plow*. I say to you that the

MONMOUTH Sulky or Gang PLOW

will prove easier for you to handle, easier on your horses and will do your work better than any plow you can buy, regardless of price. Tell you why the draft is lighter. It's positively the only plow that actually carries the beams on top of the frame. No pressure on bottom of furrow—no friction against bank of land, can't be, for there's no land side. Don't need any. The plows *ride on the wheels*—wheels, frame and driver can't ride on the plows as they do sometimes with other makes. Besides, we have a Direct Beam Hitch, Single Ball and Horse Lift; and "Point First" action, which is easiest and quickest going into and coming out of the ground. I'll give you a chance to prove every one of these claims, and we'll pay the "damages"—freight *both* ways—if we "fall down" in a single assertion.

Clay, Robinson & Company's LIVE STOCK REPORT

Vol. 20 | Chicago, Friday, January 14, 1910 | No. 2.

National Western Stock Show.

Denver, Colo., Jan. 12.—Everything was hustle and bustle at the yards Monday morning, it being the opening day of the National Western Stock Show. Although the trains were late in arriving, and entries delayed to a large extent, a good showing was made for the opening day, the exhibits in the stocker and feeder classes outnumbering the entries last year. In the calves and yearling classes Angus predominated, and the quality is exceptionally good, while in the two-year-olds the Herefords were in the larger number, although there are several loads of choice Shorthorns and Angus. On the whole, exhibits in this division show the effects of the severe winter, the Angus offerings looming up in a little better flesh than either the Shorthorns or Herefords.

The Tomkins Cattle Co. have on exhibition two loads of choice Hereford calves, native bred and dehorned. They are also showing a load of yearlings. These cattle are out of the famous Adams herd that carried off the honors last year, and the offerings this year will certainly find a place when the prizes are awarded. G. F. Lucore of Arriba, Colo., has an exceptionally fine bunch of Angus yearlings. W. C. Stiles of Loveland, Colo., is showing a car of steers and a car of heifer Angus calves that show quality and breeding. P. H. Boothroyd of Loveland, Colo., also has a car of Angus calves that are not lacking in quality. The exhibits from the Southwest District, which includes Texas, New Mexico and Arizona, are light. Colonel W. E. Hughes of Estelline, Tex., has a car of two-year-old Herefords and two cars of Hereford yearling steers that loom up well in comparison with the natives from Colorado and Wyoming. The Colorado Valley Land Co. of Monte Vista, Colo., are showing a load each of Hereford and Shorthorn two-year-old steers. A. H. Norell's load of two-year-olds are a credit to North Park.

There is a larger supply of two-year-olds than was offered last year, and the indications are that there will be a good brisk demand during the auction, as there are a large number of buyers for stockers and feeders present.

The long-fed class for fat cattle was eliminated, but the offerings in the hay and short-fed classes more than offset this. The Colorado Stock Feeding Co. of Longmont, Colo., are showing three loads of short-fed steers that have been fed pulp, alfalfa and molasses, while the carload of southern short-fed yearlings, exhibited by H. W. Moore of Brush, Colo., attracted considerable attention, as this carload of cattle was received from the South last spring and shows what can be done with southern yearlings when properly handled. The Great Western Sugar Co. also are showing several loads of aged steers in the Commercial Class.

The exhibits in sheep and lambs were divided up in three classes—the Northern Colorado, Arkansas Valley and San Luis Valley Districts. The exhibits in the Northern Colorado District consist of a car of range-fed lambs, shown by Drake & Wagner of Fort Collins, that are good quality and well finished. Bruce G. Eaton of Eaton, Colo., is showing a car of his native Shropshire lambs that have the quality and finish. F. P. Gover of Loveland, Colo., is showing a car of range lambs.

In the Arkansas District Drake & Wagner have a load of New Mexican-fed lambs and E. J. Wagner a car of native Colorado-fed lambs. The Colorado Stock Feeding Co. are showing two cars of New Mexican-fed yearlings that are well finished.

CLAY, ROBINSON & CO.

Two Important Meetings Held.

At the convention of the Wyoming Wool Growers' Association at Cheyenne last week, J. A. Delfelder, Welton, was elected president; Colonel E. J. Bell, Laramie, vice president; George S. Walker, Cheyenne, secretary-treasurer. Among the important resolutions adopted were: Declaring opposition to adoption of any system of leasing the public range; petitioning National Wool Growers' Association to take up with railroads the matter of more equitable rates for shippers of sheep and wool; indorsing tariff on wool, and co-operative wool warehouse plan; condemning improper diagnosis of sheep disease by agents of Bureau of Animal Industry; commending Governor Brooks for his acts in behalf of sheepmen's interests.

FRED W. GOODING MADE PRESIDENT.

The forty-sixth annual convention of the National Wool Growers' Association, held at Ogden, Utah, last week, elected following officers: President, Fred W. Gooding, Shoshone, Idaho; western vice president, J. A. Delfelder, Wolton, Wyo.; secretary, George S. Walker, Cheyenne, Wyo. Among important resolutions adopted were: Recommend that this association send a committee to Washington which shall endeavor to have a speed minimum clause added to present federal law, known as thirty-six hour limit, which governs shipment of live stock; recommend that our committee be instructed to co-operate with the American Humane Association in securing the enactment of the sixteen-hour speed limit legislation; recommend that this committee appear before the Interstate Commerce Commission to obtain an equitable reduction in the minimum rate on carloads of sheep, particularly lambs, and also bring before that commission the fact that the present freight rates on wool are excessive; strongly oppose any attempt to amend schedule K of the tariff law; condemn the practice of the Forestry Service in imposing forestry fines without giving the party fined a trial before a court of competent jurisdiction; demand such lands in forestry reserve as are not required for cattle and horses to be thrown open for the grazing of sheep; extend Secretary Wilson of the Department of Agriculture our sincere thanks for his visit to the West during the past year to meet the users of the National Forestry Reserves; the National Wool Warehouse and Storage Co. of Chicago has accomplished results in the marketing of wool far beyond the fondest hopes of its promoters, and appeal to all members of the National Wool Growers' Association to loyally support the warehouse company.

WHAT SANTA CLAUS BROUGHT.

Eugene, son of Wm. Beckley, Royal Center, Ind., and his Christmas tree and gifts, including a live pony, and complete 'cowboy'' outfit.

Ohio Hogs Made $9.35.

Last Saturday our East Buffalo house sold 62 head of 250-lb hogs at $9.35. This price was not only extreme top that day, but it is necessary to turn the pages of history back to 1893 to find a time when swine have gone higher on that market. These hogs were marketed by G. F. Carr of Bellefontaine, Ohio.

Changes in Cattle Quarantine.

A new rule modifying the area quarantined for cattle scabies has been issued by the Secretary of Agriculture. This rule is effective Jan. 15. The order defines the quarantined area, which includes portions of Montana, South Dakota, Nebraska, Kansas, Wyoming, Colorado, Oklahoma, Texas and a part of New Mexico. The effect of this order is to release from quarantine the counties of Boyd, Custer and Dowson, in Nebraska; counties of Cheyenne, Rawlins, Sherman, Logan, Gove, Lane, Ford, Kiowa, and Comanche, in Kansas; counties of Carbon and Albany, in Wyoming; that part of Weld and Adams counties lying west of Union Pacific Railroad running from Denver to Cheyenne; that part of counties of Adams, Arapahoe, Elbert, Lincoln and El Paso lying south and west of the Union Pacific Railroad running southeasterly from Denver to Limon and north and west of Chicago, Rock Island and Pacific Railway running southwesterly from Limon, Colo., to its intersection with the Eighth Guide Meridian West, in Colorado; and counties of Wheeler, Collingsworth, Childress, Cottle, King, Stonewall, Fisher, Nolan, Mitchell and that part of Knox, Haskell, Jones and Taylor counties lying west of the One Hundredth Meridian west of Greenwich, in Texas.

Load Cattle Friday and Sunday.

Frequently cattle from Nebraska, South Dakota and Kansas arrive at Chicago a day later than the shippers bargain for. Many intended for the Monday market fail to make their appearance until Tuesday. As this is usually an off-market day for good cattle, on account of the absence of eastern shippers, they have to be carried over until Wednesday. We would advise shippers from the above mentioned states to load the cattle on Friday where they are intended for the Monday trade at Chicago and those on Sunday where figured to have them on the Wednesday market.

Pleased Kansas Cattle Feeder.

W. C. Brown, prominent farmer and feeder of Douglas, Kan., was on the Chicago market Monday with two loads of cattle which averaged 1,209 lbs and 1,418 lbs and were sold by us at $6.40 and $7.60 respectively, prices that were highly satisfactory, according to Mr. Brown. "We have a short crop of corn and prices are very high," he remarked, "a result of which is a big decrease in the number of cattle being fed. Wheat looks fine."

Cattle Quarantine is Ordered.

Owing to the prevalence of Texas fever among southern cattle, a proclamation was issued by Governor Deneen, at the request of the State Board of Live Stock Commissioners, prohibiting importation of cattle into Illinois from California, Oklahoma, Texas, Missouri, Arkansas, Louisiana, Mississippi, Tennessee, Alabama, Virginia, North Carolina, South Carolina, Georgia and Florida between Feb. 1 and Nov. 1, unless accompanied by certificates from the inspector of the United States Bureau of Animal Industry that they are free from the fever.

Address all communications and make all remittances payable to THE LIVE STOCK REPORT, Union Stock Yards, Chicago.

Agricultural Products. Export Trade.

Nine billion dollars' worth of agricultural products have been exported from the United States during the last ten years, those exported in the fiscal year 1909 having alone amounted to practically $900,000,000, against less than $800,000,0000 in 1899.

The above statement summarizes the results of a special compilation made by the Bureau of Statistics of the Department of Commerce and Labor, showing the exports of the principal products of agricultural origin in the period from 1899 to 1909. The exports of agricultural products as a whole have increased from $785,000,000 in 1899 to $898,000,000 in 1909, the highest record having been made in 1907, when the total exceeded $1,000,000,000, or, to be exact, $1,049,000,000.

Meat and dairy products constitute the third largest class in the group of farm products exported. In 1899 the total exports of meat and dairy products were valued at $176,000,000; in 1909, $167,000,000, while in 1907 and 1908 the totals were $202,000,000 and $193,000,000 respectively.

Exports of bacon decreased from $42,000,000 in 1899 to $26,000,000 in 1909; hams increased from $21,000,000 in 1899 to $24,000,000 in 1909; lard increased from $42,000,000 to $53,000,000; oleo and oleomargarine from $10,000,000 to $19,000,000, while fresh beef declined $24,000,000 in 1899 to $13,000,000 in the fiscal year which ended last June, and other beef, including tallow, from $11,000,000 in 1899 to $6,000,000 in 1909.

The general group of animals shows a decrease in exports during the decade from $38,000,000 in 1899 to $23,000,000 in 1909. Cattle were the chief factor in this decline, the value thereof exported having decreased from $31,000,000 in 1899 to $18,000,000 during 1909.

American meats, while widely distributed, find their largest direct market in the United Kingdom, which took, in the fiscal year 1909, practically nine-tenths of the beef, over one-half of the tallow, 85 per cent of the bacon and hams and nearly 30 per cent of the lard, for which article Germany also affords a large market. American cattle go almost exclusively to the United Kingdom and in lesser numbers to Mexico, Canada and Belgium, while American swine are exported mostly to the West Indies, Bermuda and Mexico.

Woman Tops Swine Market.

"Nobody knows what a woman will do." But one thing is as certain as the flight of time, and that is whatever she decides to do she will do thoroughly. No half-way effort is countenanced. Mrs. Jane Worth of Pender, Neb., marketed a lot of hogs at South Omaha Friday a week ago for which our house obtained the highest price that day and within 2½c per cwt of the pinnacle there. Her porkers sold at $8.60 and averaged over $25 a head. In response to an inquiry regarding her method of marketing, she said: "When hogs were around $8.00 and everybody was selling, I figured it out that the market would go still higher with fewer hogs in the country, and kept feeding. Corn of course is pretty high, but there never was and never will be a time when the prices of corn and of pork are very much out of proportion."

Successful Raisers of Native Lambs.

F. L. Holly and Boyd G. Reese, both of Marshall, Minn., pursue the right and only method in handling native sheep, if profits and satisfaction are to be derived from this industry. They were recently on the Chicago market with lambs and we sold them at $8.60 and $8.75, averaging 75 and 87 lbs respectively. These prices were 60@75c per cwt above their expectations. The lambs were born in April and had the run of timothy and clover pasture until around Dec. 1, when they were put in the corn field. The lambs attracted the attention of the buyers soon after their arrival at market, due to their good breeding and excellent condition. Both Mr. Holly and Mr. Reese said that they always have registered bucks to head their flocks, trim and dock the lambs one to two weeks after birth and give both the ewes and lambs the attention they must have if the best results are to accrue.

Feed Fast Vanishing in West.

"The way that feed is vanishing in the range country is a matter of no small concern to the man who has a bunch of sheep or lambs," said Al. Williams of Sheridan, Wyo. "We have been having six weeks of the same kind of weather that you are having at present and stockmen are feeding their hay with as much caution as if it were made up of so many golden wisps. It has surely been a hard winter thus far and if it keeps up much longer there is liable to be more truth than fiction in yellow press reports of 'starving cattle and sheep in the West.' A great many stockmen would no doubt ship the bulk of their stuff to market right now if they could get transportation service, but it is almost as hard to get stock to market as it is to secure feed."

Mr. Williams was on the South Omaha sheep market Wednesday of last week with a shipment of range sheep and lambs which Clay, Robinson & Co. sold at the highest prices ever obtained for stock of their kind on that market at this time of the year. The lambs brought $8.00, the yearlings $7.25 and the ewes $5.65. They had been on a hay and oats ration for about sixty days.

"Sore Mouth" Lambs at $8.50.

Score one for the commission firms that resent the condemnation by Government officials of western lambs and sheep infected with "sore mouth." Last October a South Omaha commission firm received a shipment of sore mouth lambs from Wyoming. Inspectors forbade their shipment to finishers and they were sold to the Cudahy Packing Co., at $5.30; that is, all but 36 head were sold, says the Journal-Stockman.

This little bunch of sore mouths was kept for experimental purposes. They were put on feed and the sore mouth disappeared in a very short time. At the time they were received at the yards they averaged 70 lbs. When they passed over the scales the average weight was found to be almost 95 lbs. The price paid was $8.50 per cwt, up to then the highest price paid for fat lambs at that point since the opening of the fed season.

It's a Great Bargain.

J. A. Grimm, Ellingson, S. D.: "I am enclosing herewith $1.50 for the LIVE STOCK REPORT and Breeder's Gazette in accordance with your offer. This is the greatest bargain I ever heard of and I don't see how any farmer or stockman can turn it down, as either paper is absolutely worth double the price of both."

Secretary Wilson Gives Reasons.

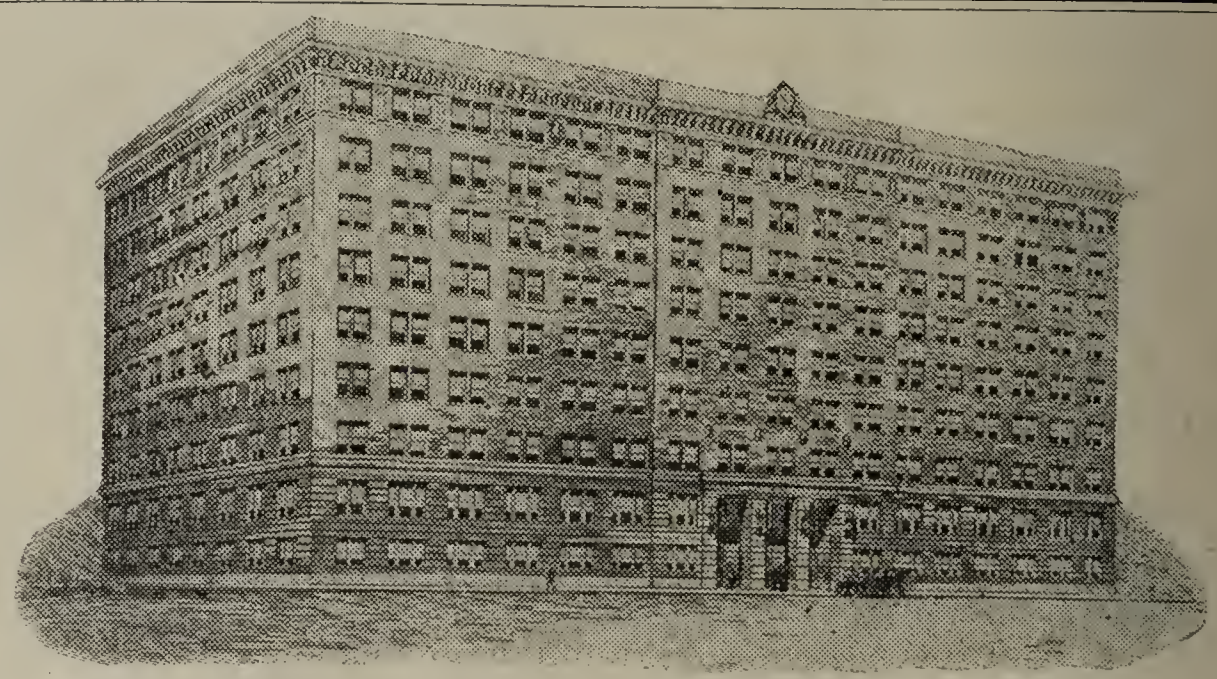
Secretary James Wilson of the Department of Agriculture, who is trying to find out why living costs so much more nowadays, has a theory which he thinks explains part of the mystery. He says foodstuffs cost more for one reason because there are too few farmers and too many grocers.

"Too many people are engaged in the business of distribution," said Secretary Wilson. "What we need is more farming. Too many persons are rushing to town and city and trying to make a living there and not enough are staying in the country. Too many are trying to get along without work and not enough of them are in the business of producing something.

"One man could do the business of distribution where twenty are now engaged in it. That is the reason why the cost of living is high and the people are complaining. The people must learn they can't get along without work, and the best place for them is on the farm, where they can raise something."

Keep Carloads of Stock Separate.

Not infrequently shippers of live stock from the same station fail to have marked on the railroad way-bill to keep the respective loads of live stock separate. This causes no end of trouble and annoyance to the owners, as well as to the commission men, when the stock arrives on the market through liability of the same getting mixed. All of this could be easily avoided if the owners would have marked on the railroad way-bill to keep the respective cars of stock separate. By doing this not only will the owners save themselves a vast amount of annoyance, but will help the commission men handle the stock to the very best advantage.



NEW KANSAS CITY LIVE STOCK EXCHANGE BUILDING.

The foundation piers for this building, which will be finished by next fall, are practically completed. It will be the largest office building in Kansas City and will set a new model, both in size and appearance, for the live stock markets of the country. Nine stories in height, it will be like a city set on a hill and will stand out as the masterpiece of architecture in the Kaw Valley. It will more nearly give the live stock industry the appearance of solidity and commanding importance that its immensity warrants, and will be a fitting structure for the clearing house of live stock for the trans-Mississippi country. The site of the new building is one block east of the present Exchange building, and is therefore wholly in Missouri. The frontage is 250 feet and the depth 126 feet. From ground level to the top is 109 feet, served by six elevators There are 5½ acres of floor space. On the west there will be three wings 50 feet square, with courts open on one end. The framework will be steel and the whole building fireproof. Each of the 475 office rooms will be an outside room of liberal dimensions. The first floor will be given to a large lobby, the postoffice, freight and shipping offices and two or three commission firms. What is called the main floor is the second, with the executive and operating offices of the Stock Yards Company, quarters for the Interstate National Bank and a few commission firms. The other floors will afford ample room for railroads and commission men and such other interests as are adjunct to the live stock industry.

LIVE STOCK & CROP CONDITIONS

REPORTS GATHERED AND RECEIVED BY CLAY, ROBINSON & CO.'S HOUSES AT THE NINE LEADING LIVE STOCK MARKETS.

STOCK DOING WELL IN SOUTH DAKOTA.

E. D. Richards, Butte county, S. D.: "Weather has been cold and bad for the last three weeks, but stock is doing fairly well."

STOCK WELL TAKEN CARE OF IN IDAHO.

J. E. Steinour, Twin Falls county, Idaho: "Our stock is doing well. Winter is very severe, but stock is generally well taken care of."

MORE CATTLE THAM USUAL ON FEED IN OHIO.

Will Coohrell, Wayne county, Ohio: "Most of the oorn is husked in this locality. Quite a number of cattle are on feed. More cattle have been shipped in here for feed this year than ever before."

SCARCITY OF HOGS IN MISSOURI.

J. P. Wright, Boone county, Mo.: "Hogs of every kind very scarce in this county. I do not know how feeders are going to be able to find hogs to follow their cattle. Corn is generally selling for 60o per bushel and some for 70c.

ROUGH FEED GETTING SHORT IN MISSOURI.

W. E. Lawrence, Scotland county, Mo.: "There are about the usual number of cattle and hogs on feed here. The winter has been unusually oold and roughage is going to be short. Feeders have most of their corn bought at 55@60c per bushel.

SOUTH DAKOTA WILL INCREASE CORN ACREAGE.

That South Dakota is rapidly forging to the front as a great corn producing state is shown by the fact that the crop for this year reached 86,339,000 bushels, and it is confidently expected that the yield next year will exceed 100,000,000 bushels.

MORE WINTER WEATHER THAN IN YEARS.

J. W. WcKee, Rice county, Kan.: "There are very few cattle on feed here. Hogs are nearly all gone out. Corn is selling at 60c per bushel. Rough feed is very scarce. More winter weather than Rice county has seen for twenty-eight years, old settlers say."

SNOW EIGHT INCHES DEEP IN NEBRASKA.

W. H. Gould, Plaine county, Neb.; "We are having very cold weather here. Snow caked all over the ground and hay is getting scarce. We have fed sheep for sixty days, during whioh time they have not been on the ground. Snow eight inches deep and frozen hard.

CORN 65c AND HAY $10 IN IOWA.

J. J. Smith, Davis county, Ia.: "The weather is very cold here at present and there is lots of snow. Very few cattle on feed in this section of the country. Corn is bringing 65c per bushel and hay $10 per ton. Feeding cattle are selling around $4.50 and stockers around $4.25."

BIG YIELD OF CORN IN INDIANA.

Indiana local papers are reporting a world of corn raised in that state, and the statements of individual yields do not indicate that the Government is far out of the way. In one instance it was reported that a farmer raised 13,000 bushels of corn on 200 acres, and other yields were in proportion.

UTAH RANGE CONDITIONS ARE EXCELLENT.

A message from Salt Lake City, Utah, says: "Almost without exception, the sheep raisers declare that the ranges in Southern Utah are in excellent oondition, owing to the absence of heavy storms. The sheep have just enough snow to keep them nicely and it has not yet been necessary to trail to any of the springs. The wool growers are in the best of spirits and are looking forward to a prosperous year."

WILL BE NO CHEAP CATTLE IN COLORADO.

A. T. Moseley, dealer in range oattle and horses, Lincoln county, Colo.: "We have had more winter to date than we have experieneed all through the winter season for several years in this section of the country. It is surely telling on stock of all kinds. I am fearful there will be mauy 'bone yards' 'ere the 1910 crop of feed comes on. There will be no cheap cattle during this year, unless all signs fail."

CONDITIONS IN WYOMING ARE IMPROVING.

A dispatch from Cheyenne, Wyo., says that the improvement in range conditions in Southeastern Wyoming continues steadily. The greater part of the snow and ice whioh accumulated during three weeks of cold weather has been melted, leaving range grasses accessible to live stook. In other sections of the state, however, there has been little improvement, and even though snow leaves the range bare, feed is so short that it will be of little value.

CONDITION OF OHIO CORN REDUCED.

The Ohio state report makes the Jan. 1 condition of corn in cribs 97, against 101 last year, and in sbook 92, against 98 a year ago. The percentage unhusked was 12 per cent, against 8 a year ago. The amount which will be fed on the farm was given as 77 per cent. The state report estimated the orop at 121,000,000 bushels, while the Government report made the crop 153,000,000. Winter wheat is reported generally proteoted by snow.

NORTH DAKOTA KANGE CATTLE IN FINE CONDITION.

W. N. Crist, McKenzie oounty, N. D.: "Although very snug winter weather has prevailed during the past six weeks and quite a lot of snow has fallen, cattle are in about the best oondition at this time of the year that they have ever been under like conditions. The grass orop was the best in years, both in quantity and quality. Grass cured in splendid shape last fall and the hay is superior to that of some years past. Range cattle look fine and the loss will be very light."

ALL'S WELL ALONG PECOS SLOPE.

"Stockmen on the Pecos slope are well pleased with the present conditions on the range," says a report from Carlsbad, N. M. "A heavy snow has placed enough moisture in the ground to insure early grass and this means a good calf crop and lamb crop. The last two years have been very dry and last year the stockmen made no money, as a ru[illegible] and others lost money, grass being too short to save [illegible] lambs and the calves. So far the winter has been good, not being cold enough te materially hurt stock."

LOSSES OF LIVE STOCK EXAGGERATED.

From Denver, Colo., comes the following: "The sensational reports sent over the country alleging heavy losses of cattle and sheep in the West on account of severe weather are grossly exaggerated. There has been some suffering in a few localities, due to the intense cold, but the weather has now moderated over all the range country. Reports are that losses have been practically nothing. There was some uneasiness about the sheep in northern Wyoming, but if the present fine weather continues there will be no loss."

FEW LOSSES OF LIVE STOCK IN MONTANA.

Word comes from Miles City, Mont., to the effect that there will not be any losses of sheep or cattle to speak of in the eastern part of that state. It is true that sheep are are having a difficult time in getting feed, because of a crust of ice which has formed over the snow, but many flockmasters have supplied themselves with grain and will be able to make provision for their sheep unless the spell should last for too long a time. There are large bands of sheep out on the open range and away from shelter, but advices from there are also encouraging.

Cattalo Stock in Colorado.

For the purpose of breeding cattalo stock, a cross between buffalo and cattle, a fine young bull buffalo has been brought to Eaton, Colo., and will become the head of a herd to be bred on the Bruce G. Eaton ranch. The cattalo is much prized for its meat and its hide is like that of a buffalo, but the hair is more silky in texture.

SHEEP AND WOOL STATISTICS OF UNITED STATES.

Two records were established in the wool trade during 1909. More wool was grown than ever before and more was used than in any previous year. Also importations were the largest in recent years. Early in the year the price list was down, but there was a steady advance to July and a regular boom in the market in remaining months. At the close of the year prices held firm at the higb level. According to the Wool and Cotton Reporter, Boston has seldom entered a new year with so little wool on hand belonging to dealers as now. Medium wools are practically cleaned out, although more than the usual quantity of delaines have been carried over, due to high prices. Other fleece wools have been well sold out. Thus the outlook regarding prices for the 1910 clip are quite promising. Total number of sheep in the country, exclusive of lambs, is 44,867,200, largest number since 1894. They produced 347,623,400 lbs of wool, largest clip ever raised in this country and 23,516,900 more than in 1902, previous banner clip. In the "territory" sections, Wyoming leads in the number of sheep, as well as amount of wool produced, with Montana coming second and New Mexico third. In the "domestic" sections Ohio shows a big lead over other "native" states, with Michigan coming second. The average weight per fleece of wools produced in 1909 was 6.8 lbs, against 6.6 lbs in 1908.

Following shows the 1909 and 1908 number of sheep, exclusive of lambs, yield of wool past two years, crop since 1840, and imports and exports since period of 1891-92, compiled from official sources by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT.

	No. of Sheep Exclusive of Lambs		Yield of Wool in Pounds

Comparison of Methods of Short Feeding Cattle.

By Professors Herbert W. Mumford and H. O. Allison.

Among common methods of beef production there is recognized the practice of short feeding of cattle. This process usually requires from 60 to 100 days and the cattle are generally marketed in a half-fat or unfinished condition. In this the variations of common practice are wide. These variations are in the grade and condition of cattle selected for feeding, the methods of handling and the rations used. Some feeders select heavy fleshy cattle of the better grades, while others select cattle thin in flesh, but generally mature, and of the lower grades. Then, too, the variations in the methods of handling the cattle are wide, the chief difference being in the policy of forcing rapid and large gains by the use of a rather expensive ration as compared with that of smaller gains by the nse of limited quantities of feed or less expensive feeds.

CONDITIONS OF THE EXPERIMENT.

The steers used in the experiment at the Illinois Station were purchased at Chicago Aug. 22, 1905. They consisted of 34 good to choice fleshy three-year-old feeders. All were dehorned and the average weight was 1,073 lbs in Chicago. They were natives and northwest rangers mixed, but all grassers. Upon arrival at the experimental farm, they were divided into two lots of 17 each. In this division every effort was made to make the lots as nearly alike as possible in quality, condition and weight. The steers were put on experiment two days after their arrival.

Both lots received the same feeds, consisting of oorn meal, oil meal, and clover hay. Lot 1 received these according to the eommon method of feeding; that is, whole hay and concentrates fed separately at regular feeding periods twice per day. In the case of lot 2 the clover hay was chaffed by running it through an ordinary ensilage machine and it was then mingled with the grain portion of the ration and fed through a self-feeder, to which the cattle had access at all times.

Four pigs were placed in each lot to utilize whatever nndigested feed passed through the steers. While it was thonght at the time that more pigs might have been used to advantage, the difficulty in securing them made the trial impossible.

FEED LOTS AND EQUIPMENT.

With the exception of the method of feeding, the conditions surrounding both lots were alike. The feed lots proper were paved with brick and measured 36x48 feet, with a 12 foot shed running along the north side. In these small lots the cattle were fed and allowed to run at all times. The steers had access to pure, fresh water, snpplied in galvanized steel tanks. The concentrates were supplied to lot 1 in an open feed box similar to that used in the ordinary feed lot, while the clover hay was fed in mangers along the side of the lot. As the hay and grain were mixed for lot 2, a specially adapted self-feeder was constructed through which the mixture would run as the cattle needed it.

QUALITY AND COST OF FEEDS.

The feeds used were corn meal, oil meal, and clover hay. The corn graded No. 2 yellow, and the clover hay No. 1. The oil meal was "Old Process," ground linseed cake, pea size. The cost of feeds and their preparation was as follows:

Cost of grinding corn	$ 1.200	per ton
Chopping hay, through ensilage machine.	1.000	"
Shelled corn	12.499	"
Ground corn, including cost of grinding	13.699	"
Clover hay	8.000	"
Chopped clover hay	9.000	"
Oil meal, gronnd linseed cake, pea size	28.000	"

METHOD OF FEEDING STEERS.

Owing to the shortness of the feeding period it was thought best to get the cattle on full grain feed as soon as possible in order to secnre the greatest gain in live weight and best finish, as this principle was thought to be desirable in short feeding. Oil meal was used to supplement the gronnd corn because it has been found at the Illinois Station that it contributes to the production of larger gains by stimulating the appetite so that larger qnantities of concentrates are consumed to advantage. The full grain feed was reached by gradually increasing the grain ration in lot 1 and the proportion of concentrates to roughage in lot 2, the rate of change varying somewhat with the appetite of the oattle. At the end of four weeks they were practically on full feed with no bad effects.

Table 1 shows the average daily ration per steer by periods. These periods correspond with the periodical weights which were taken every two weeks. Period 1 extended from Aug. 25 to Sept. 8; period 2, Sept. 8 to 22; period 3, Sept. 22 to Oct. 6; period 4, Oct. 6 to 20; period 5, Oct. 20 to Nov. 3; period 6, inclnded 19 days from Nov. 3 to 21.

TABLE I.

AVERAGE DAILY RATION PER STEER BY PERIODS (POUNDS)

Lot	Feeds.	Periods. 1	2	3	4	5	6	Av. 89 days.
1	Ground corn	9.45	18.69	17.92	20.91	23.19	22.81	19.05
	Oil meal	1.81	2.98	2.71	3.23	3.23	3.41	2.92
	Clover hay	18.47	14.60	15.05	13.39	11.53	9.13	13.45
2	Ground corn	10.78	21.59	22.01	27.26	25.20	22.06	21.52
	Oil meal	2.06	3.27	2.52	3.82	3.79	3.31	3.13
	Chopped clover	16.63	17.85	12.60	12.18	10.50	8.39	12.77

It will be seen fram Table 1 that lot 2 consumed the most feed. This was also noticeable from the appearance of the cattle dnring the experiment, as lot 2 carried the best fill. We can attribute this to no other cause than the method of feeding, as lot 1 could not be induced to take more feed.

The decreased consumption in period 3 in the case of lot 1 was due to a change in gronnd oorn which it was impossible to avoid. While the meal seemed sweet and good in every way, it was ground by the burr process while the plate grinder had previously been used. As a result it took the cattle in lot 1 several days to become accustomed to it, whereas with lot 2, the corn being mingled with the hay, the falling off was not so noticeable.

TABLE II.—PROPORTION OF CONCENTRATES TO ROUGHAGE.

	Periods. 1	2	3	4	5	6	Av. 89 days.
Lot 1	1:1.64	1:0.67	1:0.72	1:0.55	1:0.43	1:0.34	1:0.61
Lot 2	1:1.29	1:0.71	1:0.51	1:0.39	1:0.36	1:0.33	1:0.51

The above table shows the proportion of concentrates to roughage for both lots during different periods. The plan was to cater to the appetites of the cattle in these proportions and as a result lot 1 took a larger proportion of hay than lot 2. When we consider that the cost of digestible nntrients in the case of lot 1 is .9029c per pound in form of hay and .8692c per pound in form of corn (which is .0337c per pound greater in the form of hay than in corn), it is probable that this larger proportion of roughage would work as a handicap to lot 1 in the cost of producing gain. It will be noticed that from the first period on, the proportion of grain was gradually increased until at the close of the experiment the grain ration was about three times that of the roughage.

Table 3, which is found below, shows the average daily gain per steer during the periods corresponding to those in table 1. Owing to the great variation in the weights of steers it has seemed best to snmmarize these six periods into three in order to study the relative rate and cost of gains. Consequently periods 1 and 2, 3 and 4, and 5 and 6 are summarized in table 4. From this it can be readily seen that lot 2 made the larger gains, but the difference in rate of gain decreases as the feeding period advances. This indicates that the mixed feed fed through a self-feeder may be especially advantageous for accustoming cattle to a grain ration. It also indicates that the difference in its favor would probably be more marked in the short than in the long feeding period.

LOT 1, AS FEEDERS IN THE ILLINOIS EXPERIMENT FEEDLOT.

TABLE III.—AVERAGE DAILY GAIN PER STEER IN POUNDS BY PERIODS AND AVERAGE FOR WHOLE TIME.

	1	2	3	4	5	6	89 days
Lot 1	4.117	1.910	3.025	2.976	3.466	2.554	2.984
Lot 2	4.147	2.794	3.088	3.655	4.242	2.337	3.326

TABLE IV.—SUMMARY OF TABLE III (POUNDS).

	Periods. Aug. 25 to Sept. 22	Sept. 22 to Oct. 20	Oct. 20 to Nov. 21	Aug. 25 to Nov. 21
Lot 1	3.014	3.000	2.941	2.984
Lot 2	3.470	3.371	3.146	3.326

Table 5, which is given below, summarizes the cost of gains. While the data presented here are probably not sufficient to warrant a definite conclusion, it indicates that the diminishing efficiency of the feed consumed as the feeding advances was slightly more marked in lot 1 than in lot 2. In the lower part of the table the value of the pork prodnced was deducted from the expense, thus redncing the cost per pound gain of beef. Another point of significance, as shown by table 5, is the similarity in the average cost of gain for the two lots for the entire period. Large consumption of feed in order to produce maximum gains is generally associated with expensive gains. In this case, however, the self-fed cattle (lot 2) produced an average daily gain per steer of .342 lbs more, and not figuring value

of pork produced, the cost was four hundredths of a cent per pound less than the hand-fed lot (lot 1). It should also be kept in mind that the cost of the chopped hay was $1.00 per ton more than the ordinary hay and this extra charge was figured in the cost of gain. This indicates strongly then that for short feeding cattle there is an advantage in chopping the hay, mingling it with the grain and feeding through a self-feeder.

TABLE V.—AVERAGE COST PER POUND OF GAIN BY PERIODS AND AVERAGE FOR THE ENTIRE EXPERIMENT.

Value of pork is not credited to steers.

	Aug. 25 to Sept. 22	Sept. 22 to Oct. 20	Oct. 20 to Nov. 21	Aug. 25 to Nov. 21
Lot 1	$0.0650	$0.0770	$0.0832	$0.0753
Lot 2	0.0650	0.0797	0.0798	0.0749
Value of pork produced credited to steers.				
Lot 1	$0.0637	$0.0753	$0.0817	$0.0739
Lot 2	0.0638	0.0747	0.0763	0.0711

TABLE VI.
WEIGHT OF STEERS AND EXTENT OF GAINS IN POUNDS.

	Total Wt. 17 steers		Av. Wt. per steer		Av. gain in 89 days	
Lot	Beginning of Exp.	Close of Exp.	Beginning of Exp.	Close of Exp.	Total per steer.	Per steer per day.
1	18,110	22,625	1065.29	1330.88	265.58	2.98
2	18,176	23,200	1069.17	1364.70	295.52	3.32

Table 6 shows the total and average weights of the steers at the beginning and close of the experiment and the total and average daily gain per steer. As the increase in live weight of mature cattle is largely fat, we might suppose that the steers in lot 2, which had gained 29.94 lbs per steer more, would be fatter and consequently worth more on the market. This was corroborated by the values placed on the steers in Chicago at the close of the experiment.

MARKETING OF THE CATTLE.

In preparing the cattle for shipment three feeds of timothy hay were substituted at the last for the clover hay usually fed. Two of these were included in the feed before the final weights were taken. No special account is made, however, in the feed tables of this hay, as it was thought of too little difference in value and importance to be considered as affecting the gains or the cost to any noticeable extent. The last feed lot weight was taken on the morning of Nov. 22, before the cattle had been fed or watered. They were then fed timothy hay and about half the usual grain feed. They also had access to water for an hour, after which it was removed. They arrived on the Chicago market Thursday, Nov. 23. After being allowed to fill, their value was estimated by expert judges. Lot 1 was estimated at $5.45 and lot 2 at $5.60 per cwt on the then existing market. This makes a margin between buying and selling price of $1.20 per cwt in the case of lot 1, and $1.35 per cwt for lot 2. For commercial reasons the two lots were turned together and sold as one bunch for $5.60 per cwt. The Chicago weight was taken and showed a shrinkage for the 34 head of 1,175 lbs, an average of 34.558 lbs per steer.

As the cattle were sold together the dressing percentages obtained were for the entire 34 head. They follow: 58.10 per cent beef; 6.80 per cent fat and 6. 65 per cent hides.

ITEMIZED FINANCIAL STATEMENT.

Lot 1—17 steers.

To 17 steers, 18,110 lbs at $4.455 per cwt....	$ 806.800
14.416 tons ground corn at $13.699 p. ton.	197.488
2.214 tons of oil meal at $28 per ton.....	61.999
10.175 tons clover hay at $8.00 per ton....	81.404
Freight Champaign to Chicago, commission, feed and yardage.....	38.440

By 17 steers 22,612.5 lbs at $5.60 per cwt..	$1,266.300
325 lbs pork at $5.00 per cwt	16.250
Total receipts.....	$1,282.550
Total expenditures.....	$1,224.680
Total profit.....	$ 57.870
Profit per steer.....	3.404

The itemized financial statement shows that no charge was made for the labor involved in feeding the steers after the feed was prepared. The general custom is to allow the value of the manure produced to balance the cost of the labor involved. There seemed to be but little difference in the amount of labor necessary to feed the two lots, although it was of a little different nature. For lot 1 the skill of the feeder was an important factor and called for regularity in the work. On the other hand for lot 2 the work was not necessarily regular, but involved considerable labor in mingling the concentrates with the chopped hay.

The larger amount of pork produced in lot 2 accounts for part of the difference in profit. The reason the pigs did better in this lot was partly due to the steers throwing small quantities of feed out of the self-feeder. Being from this source it seems proper to credit the account with this full amount of pork produced.

In general, the financial results of this experiment are favorable to the method of feeding used for lot 2. The data given in this article indicates that for short feeding cattle the plan of chaffing hay, mingling it with grain, and feeding through a self-feeder is worthy of further investigation and trial by feeders.

LOT 1, AS READY FOR MARKET.

*Record price on open market and 20c per cwt higher than previous best price, paid in 1882, obtained by Clay, Robinson & Co. for load of 1,518-lb grade Hereford branded Wyomings.

Points for Cattle Feeders.

Many cattle feeders make the mistake of shoveling c[illegible] to steers of common quality between Aug. 1 and Dec. 1. It has been our experience that handling cattle of this class is most profitable when they are marketed off grass. Where owners have no other cattle to take their place, however, and possess plenty of rough feed and fall pasture, it pays best to carry them along in this manner until early winter and then give them enough corn during January and February to keep them going ahead nicely. By March 1 they should be put on full feed and carried along in this way until the middle of May or June 1. By that time they should be in desirable marketable condition and prove popular with buyers, as light weight cattle are in best demand at that time of the year. Only in this way can common quality cattle be handled profitably in the above mentioned periods.

We have found that cattle giving the best returns are those that are short fed during the fall months; that is, from 75 to 100 days. These cattle should carry as much good flesh as practicable, weighing from 1,150 to 1,250 lbs. The heavier they are the better. At that time of the year flesh can be bought relatively much cheaper than it can be put on. There is usually a good chance to buy heavy weight cattle at all of the leading markets between Sept. 15 and Oct. 15 to advantage. Practicability of getting heavy steers is that when they are finished they will suit either the packers, eastern shippers or exporters. On the other hand, if light weight steers are bought for short feeding during the fall months they cannot be gotten in desirable shape during the winter months for either the eastern shipping or export demand, which outlets are a big price factor during that period. Not only this, but as a rule they sell 40@60c per cwt under steers of heavier weight, although they have been on the same ration of feed. Thus can be seen the advisability of feeders stocking up with cattle carrying as much flesh as possible. To verify the above statement regarding buying of heavy fleshy feeders, we wish to call your attention to our sale of 100-day fed cattle at $7.75 on the Chicago market Monday of last week, which price was within 25c per cwt of the extreme top of the market that day. There were 36 head in the lot. They were grade Hereford branded westerns and averaged 1,452 lbs, being bought by the United Dressed Beef Co. of New York. The cattle were fat off grass and had been on a full grain feed less than 100 days.

During latter part of October and in November well-bred light weight steers can be bought to good advantage, as they have been well shrunk out by that time. These can be carried along on fall pasture and roughage, and given enough corn during January and February to keep them in thrifty condition. By the first of March they should be put on full feed. Such cattle usually meet ready sale in June and July, or just before the movement of grass cattle is in appreciable volume.

NATIVE BEEF STEERS.

Range of prices and bulk of sales of native beef steers this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Range.	Bulk.
This week	$4.25@8.10	$5.40@6.65
Previous week	4.25 8.05	5.50 7.00
Year ago	4.00 7.15	5.25 6.75
Two years ago	3.75 6.30	4.85 6.00
Three years ago	4.00 7.30	4.80 6.30

Market for beef steers last week closed up in excellent condition. Supplies continued light on Thursday and Friday and demand was good. Final sales for the week showed 35@50c advance over the close of the previous week, plain and medium kinds showing most gain.

Cold weather again hampered trade in cattle at the start of the week. Hardly half of the 21,797 head had arrived when trading commenced. Market for beef steers started out fairly active, with both eastern shippers and local dressed beef men taking hold fairly free at steady rates with Friday. However, after most urgent orders had been filled, weakness crept into the trade and final sales for the day showed mostly 10c loss for plain and medium lots. Best beeves offered went at $8.10, paid for Angus offerings averaging 1,222 and 1,612 lbs. A run of 16,058 cattle Tuesday was a result of milder weather and an improvement in railroad facilities. A price break of 15@25c from general trading the previous day was logical, as the supply was far above trade needs. Offerings which sold between $5.50@6.50 bore the brunt of the loss. Many cattle went over unsold, due to lack of buyers, and there were not a few not even shown. Summit for day $7.60, a load of 1,418 lbs average making the price. Receipts of cattle Wednesday 18,000. Beef steer trade active at prices 10@15c higher, both eastern and local buyers being free bidders. Pinnacle was $7.75.

As there is seldom any advance in the cattle market between the middle of January and the first of March, we advise those who have cattle of common quality in the feed lot, and intend to market the same during this period, to let them come as soon as practicable, owing to the high cost of feed and rough weather. However, those who have cattle of good quality and have the hogs to follow them, we believe that these can be profitably held for two months longer feeding, as there is no doubt of a shortage of choice to prime heavy cattle in the country.

Revised quotations for all grades of native beef steers:

Extra choice to prime steers	$8 40 @	9 00
Good to choice steers	7 40	8 25
Medium to good steers	6 00	7 25
Plain to fair short-fed steers	5 25	5 90
Common to fair steers	4 25	5 00
Extra choice to prime yearling steers	8 00	8 75
Good to choice yearling steers	7 50	7 75
Medium to good yearling steers	6 00	7 25
Plain to fair short-fed yearlings	5 25	5 85
Common to fair yearlings	4 50	5 00
Good to choice stags	5 50	6 25
Common to medium stags	4 50	5 25

SALES MADE BY CLAY, ROBINSON & CO.

Monday, Jan. 10—15 Kansas, 1,418 lbs, $7.60; 26 Indianas, grade Hereford yearlings, 967 lbs, $7.35; 64 Illinois, 1,450 lbs, $7.00; 24 Missouris, 1,210 lbs, $6.50; 21 Kansas, 1,209 lbs, $6.40; 21 Iowas, 1,219 lbs, $6.40; 20 Iowas, 1,170 lbs, $6.25; 99 Indianas, 1,315 lbs, $6.25; 18 Iowas, 1,226 lbs, $6.15; 38 Missouris, 1,194 lbs, $6.10; 58 Indianas, 1,291 lbs, $6.00; 18 Iowas, 1,225 lbs, $6.00; 20 Iowas, 1,196 lbs, $5.90; 18 Iowas, 1,125 lbs, $5.90; 41 Illinois, 1,101 lbs, $5.60; 20 Wisconsins, 830 lbs, $5.60; 24 Iowas, 866 lbs, $5.50; 22 Minnesotas, 936 lbs, $5.35; 22 Iowas, 1,003 lbs, $5.30; 29 Iowas, 1,026 lbs, $5.30; 21 Iowas, 951 lbs, $5.00; 25 Indianas, 978 lbs, $4.75; 20 Iowas, 908 lbs, $4.60.

Tuesday, Jan. 11—E. Hulteen, 20 Iowas, 1,228 lbs, $7.00; A. W. Nesbit, 19 Missouris, 1,443 lbs, $6.90; C. Van Auken, 34 Indianas, 1,165 lbs, $6.30; B. Garland & Son, 40 Indianas, 1,131 lbs, $6.30; R. E. Parker, 17 Iowas, 1,263 lbs, $6.20, 15, 1,210 lbs, $5.90; H. Piper, 17 Illinois, 1,226 lbs, $6.15; Benj. Eddie, 21 Illinois, 1,236 lbs, $6.00; J. B. Lohman, 20 Missouris, 1,300 lbs, $5.75; J. A. Simpson, 70 Iowas, 1,172 lbs, $5.70, 13, 1,021 lbs, $5.25; Wyman Bros., 22 Indianas, 1,095 lbs, $5.55; T. Goettsch, 24 Iowas, 1,065 lbs, $5.45; M. Merfield, 21 Iowas, 1,075 lbs, $5.40; T. Cartney, 13 Illinois, 1,090 lbs, $5.35; J. M. Neails, 25 Illinois, 1,083 lbs, $5.30; T. O. Trondson, 22 Minnesotas, 1,005 lbs, $5.10; John Anderson, 40 Iowas, 1,011 lbs, $5.00; W. A. Johnson, 22 Missouris, 978 lbs, $5.00; Stnebe Bros., 19 Minnesotas, 952 lbs, $5.00; J. McCollum, 31 South Dakotas, 995 lbs, $5.00, 11, 980 lbs, $4.75; S. Kramer, 11 Iowas, 880 lbs, $4.60.

FIRST HOGS TO GO ABOVE $9.00.

Last Friday Robert Richardson, Sangamon county, Ill., had 61 hogs of 286 lbs average on the Chicago market and N. D. Beale, Monona county, Ia., 60 also averaging 286 lbs. Clay, Robinson & Co. sold both loads at $9.02½, the first hogs to ever sell over $9.00 in January and for any time since 1882. The hogs shown in above photo belonged to Mr. Richardson.

BUTCHER STOCK.

Bulk sales of beef cows and heifers, canners and cutters, and bulls this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	and heifers. Bulk cows	and cutters Bulk canners	bulls. Bulk
This week	$3.60@5.00	$2.60@3.25	$4.00@5.15
Previous week	3.50 4.85	2.40 3.15	3.75 4.75
Year ago	3.35 4.75	1.85 2.90	3.75 5.00
Two years ago	3.00 4.25	2.00 2.65	3.40 4.00
Three years ago	3.25 4.75	1.75 2.50	3.35 4.25

No fault was to be found with the market for cows and heifers Thursday and Friday of last week, as trade was brisk and prices on the latter day 15@25c higher than corresponding day of previous week. Bulls were also 25@35c higher. The calf market finished with a firm undertone, tops reaching $9.50 for vealers and $6.00 for heavy.

A moderate proportion of cows and heifers was included in the general receipts Monday. Demand was good from both local and outside buyers at strong rates with last Friday. Bull market was generally steady. Cold weather continued to hold down the run of calves and the light run sold freely at steady prices. A good supply and a sharply lower deal in beef steers brought about a 10@15c loss for cows and heifers Tuesday. Demand proved good for fat lots, both outside and local buyers being free takers at the prices. A load of choice 1,036-lb heifers reached $6.40, highest in several weeks. Bulls held steady, with strong demand for good weight bolognas and butchers on both eastern and local account. Good to choice veal calves sold 25c higher, a lot of fancy 118-lb Wisconsins reaching $10, as high as any time on record. Plain and medium grades, however, went 25c lower, while heavy sold steady. A brisk trade in cows and heifers at prices strong to 10c higher on Wednesday. This week 900 to 1,000-lb heifers, though fat, met with more difficult sale, buyers' wants being chiefly for yearling stock and well-fatted heavy cows. Bulls made a firm price range. Prices are at a dizzy height and a sudden let-up in the demand or an increase in receipts would bring about a sharp fall in the price range, especially for medium butchers and bolognas. Calf market was uneven, yet best grades held steady.

Revised quotations for all grades of butcher stock and calves:

Extra choice to prime yearling heifers	$6 00 @	7 00
Choice to prime heifers	5 35	5 85
Fair to good heifers	4 25	5 15
Common to plain heifers	3 40	3 85
Choice to prime cows	5 25	6 00
Medium to good cows	4 00	5 00
Plain to fair cows	3 35	3 90
Plain to good cutters	2 90	3 25
Medium to good canners	2 60	2 80
Common to fair canners	2 25	2 50

BULLS.

Good to choice heavy calves	5 00	6 00
Poor to fair heavy calves	3 50	4 75

SALES MADE BY CLAY, ROBINSON & CO.

Thursday, Jan. 6—3 medium export cows, 1,050 lbs, $4.75; 14 half-fat Angus heifers and steers, 740 lbs, $4.75; 5 good cows, 1,140 lbs, $4.25; 9 medium light heifers, 700 lbs, $4.10; 6 cowy heifers, 843 lbs, $4.05; 5 cows, 810 lbs, $4.00; 34 fleshy heifers, 650 lbs, $3.60; 12 common cows, 1,200 lbs, $3.45; 13 stock heifers, 600 lbs, $3.40; 18 cutter cows, 940 lbs, $3.15; 12 canner cows, 900 lbs, $2.75; 11 canner cows, 852 lbs, $2.55.

Monday, Jan. 10—7 good heifers, 957 lbs, $5.70; 5 export cows and heifers, 1,150 lbs, $5.50; 5 export cows, 1,330 lbs, $5.20; 32 medium to good heifers, 783 lbs, $5.00; 4 export cows, 1,192 lbs, $4.75; 5 medium heifers, 706 lbs, $4.60; 7 medium cows, 1,130 lbs, $3.75; 4 medium cows, 985 lbs, $3.65; 5 medium cows, 1,114 lbs, $3.65; 6 stock heifers, 496 lbs, $3.60; 7 medium cows, 990 lbs, $3.60; 6 medium cows, 971 lbs, $3.40; 6 cutters, 1,006 lbs, $3.10; 4 cutters, 925 lbs, $3.00; 5 canners, 886 lbs, $2.85.

Tuesday, Jan. 11—13 export heifers, 910 lbs, $5.10; 12 fair to good heifers, 890 lbs, $4.85; 21 fair to good heifers, 800 lbs, $4.80; 9 medium export cows, 1,140 lbs, $4.70; 6 fair heifers, 780 lbs, $4.60; 7 medium export cows, 1,104 lbs, $4.45; 6 medium heifers, 790 lbs, $4.40; 5 medium export cows, 1,024 lbs, $4.35; 6 cows, 1,024 lbs, $4.00; 8 fleshy heifers, 663 lbs, $3.65; 12 plain to fair cows, 1,000 lbs, $3.65; 6 plain cows, 1,105 lbs, $3.65; 12 plain to fair cows, 875 lbs, $3.50; 23 plain to fair stock heifers, 547 lbs, $3.30; 6 cutter cows, 840 lbs, $3.25; 10 cutter cows, 970 lbs, $3.15; 10 cutter cows, 887 lbs, $3.10; 6 canners, 900 lbs, $2.70.

STOCKERS AND FEEDERS.

Top price and bulk sales of stockers and feeders this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Top Feeders.	Bulk Feeders.	Bulk Stockers.
This week	$5.40	$4.35@4.85	$3.50@4.25
Previous week	5.25	4.35 4.90	3.50 4.25
Year ago	5.35	4.35 5.00	3.65 4.35
Two years ago	5.25	4.00 5.00	3.00 3.75
Three years ago	5.15	3.90 4.65	3.00 3.65

Trade in stockers and feeders Thursday and Friday of last week was in bad shape. Cold weather kept down the attendance of buyers and supplies were above trade requirements. The week closed with prices 25@40c lower than same time of two weeks ago, with quite an accumulation of plain and medium offerings in the pens. Buyers are centering their wants on cattle which they can give a short corn ration and turn back in early season. Thus they are side-stepping plain light steers which they would be forced to rough through the balance of the winter before attempting to put any flesh on them.

Moderate receipts and broader outlet brought about a 10@15c advance at the start this week. The sharp break of last week failed to bring in many orders for cheap light steers, and these were to be had at the lowest level of the

season. Slaughterers again put the price list for most heavy fleshy steers above feeder buyers' limit. A strong market for stockers and feeders Tuesday. Demand continued best for the good quality kinds, especially weighty steers. The Wednesday trade in stockers and feeders was 10c higher, with general demand good.

Revised quotations for stocker and feeding cattle:

Good to choice feeders	$4 75 @	5 10
Poor to medium feeders	4 25	4 65
Good to choice stockers	4 15	4 60
Plain to medium stockers	3 60	3 90
Inferior to common stockers	3 00	3 40
Good to choice stock heifers	3 25	3 75
Common to medium stock heifers	2 85	3 15
Plain to good thin young cows	3 00	3 35

Hogs.

Bulk sales of hogs of respective weights this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Bulk 200 to 250 lbs.		Bulk 260 lbs and heavier.		Bulk 135 to 195 lbs.	
This week	$8.45@8.65		$8.50@8.70		$8.30@8.50	
Previous week	8.50	8.90	8.60	9.00	7.85	8.30
Year ago	5.75	6.30	5.90	6.35	5.15	5.90
Two years ago	4.15	4.50	4.20	4.55	5.15	5.90
Three years ago	6.35	6.60	6.40	6.65	6.40	6.55

The Thursday hog market of last week was generally 10c higher, with best at $8.85 and most deals at $8.65@8.80. His majesty, the great American hog, was landed at $9.05 on Friday. Thus traders' dream of 9c hogs was realized. The first to be landed over $9.00 were handled by us, we selling two different lots at $9.02½. Bulk of business was transacted at $8.85@9.00. The market opened 15@20c higher than Thursday morning, but after shippers had filled their orders trade slowed up and the market closed tame at prices 5@10c lower than at the start. Anticipating a big run Monday, and with speculators and shippers out of the market, packers Saturday lowered the price range 20@30c from the previous day. The 9c hog was retired, best going at $8.90 and bulk at $8.65@8.80.

With fresh arrivals totaling 43,497 and 8,600 over from Saturday, buyers again Monday brought into telling effect the big stick. This was indicated by a price loss of 10@15c from Saturday, or 30@40c decline from Friday's best rates. Eastern shippers had comparatively light orders and big local buyers did not begin operations until around noon. Light weights suffered most loss. Summit was $8.75 early, but $8.70 bought prime later on. Bulk of trading at $8.50@8.65. Opening 5@10c lower Tuesday hog market closed 10@15c lower. A local run of 41,511 and a carryover stock of 9,500, with liberal runs at outside points, proved the undoing of the selling interests. Pinnacle $8.62½ and bulk $8.35@8.55, latter price securing prime late in the day. Wednesday receipts of hogs 35,000, with holdovers totaling 9,800. Opening steady, the market closed generally 5o higher on anything with weight. General bulk of business $8.35@8.55.

Revised quotations for all grades of hogs:

Fair to choice heavy shipping	$8 60 @	8 70
Fair to choice butchers	8 50	8 60
Fair to choice medium weights	8 45	8 55
Good to choice assorted light shipping	8 40	8 55
Poor to good heavy packing	8 40	8 55
Poor to good mixed packing	8 35	8 50
Poor to good light bacon	8 30	8 45
Pigs, 115 to 140 lbs	8 00	8 25
Pigs, 110 lbs and under	7 50	8 00
Stags	9 00	9 40
Boars	4 50	6 00
Governments	2 00	5 00

Sheep and Lambs.

Following shows top prices and bulk of sheep and lamb sales this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Sheep Top.	Sheep Bulk.		Yearlings Bulk.		Lambs Top.	Lambs Bulk.	
This week	*$6.25	$5.25@6.00		$7.25@8.15		*$9.00	$8.00@8.75	
Last week	6.30	5.25	6.00	7.25	8.10	9.10	8.00	8.75
Year ago	5.85	4.50	5.50	6.75	7.15	8.10	7.25	7.85
Two years ago	5.50	4.50	5.35	5.75	6.25	7.40	6.50	7.25
Three yrs ago	5.80	4.75	5.65	5.80	6.50	7.80	7.00	7.75

*Sold by Clay, Robinson & Co.

A steady to strong trade was recorded for sheep and lambs Thursday of last week. Top lambs made $8.90 and bulk $8.00@8.75, a string of hay-fed lambs from Montana making the former figure. Best sheep brought $6.25 and $5.85 was paid for Montana hay-fed wethers. Friday was another new high market for sheep and lambs. Rates were strong to 10c higher. Lambs reached $9.10, western yearlings $8.35 (sold by us) and western wethers $6.30. City butchers bought the $9.10 lambs, big packers refusing to go higher than $9.00.

This week started out with 20,129 sheep and lambs on sale and fairly good demand at prices steady to 10c lower than Friday. Top grades of lambs showed the most weakness. Eastern shippers held light orders and packers were thus enabled to have better control of the situation, market closing weak and dull. Stopping point for lambs was $9.00, we obtaining this figure for natives Most sheep sold at $5.65@6.25. Indifference of buyers and a supply of 23,178 proved too much for the sellers Tuesday. Result was a dull trade, with sheep going weak to 10c lower, and yearlings and lambs 15@25c down, late transactions being mostly 25c off. Many loads had to be carried over. The 9c lamb was put out of business. Top was $8.90, to a city butcher, with best yearlings $8.00 and top sheep $6.25, we landing wethers at this figure. The Wednesday trade in sheep was steady to 10c lower, while yearlings and lambs sold 10@15c lower early and generally 25c off at the close. Receipts 18,000. On the late market prime lambs sold around $8.50, yearlings $7.75, with best sheep around $6.00. The buyers claim that the eastern dressed market is in bad shape. This is reducing eastern shipping orders and leaving local buyers in better control of the market. They are making hay while the sun shines, as indicated by their pounding tactics this week. Half-fat stock is being given a very cold reception.

Revised quotations for all grades of sheep and lambs:

SHEEP.

Wethers, good to choice	$6 00 @	6 15
Wethers, plain to medium	5 50	5 75
Yearlings, good to choice light	7 50	7 75
Yearlings, plain to medium	6 50	7 25
Yearlings, good to choice heavy	6 75	7 00
Ewes, good to prime heavy	5 85	6 00
Ewes, good to choice light	5 50	5 75
Ewes, plain to medium	4 25	5 25
Cull ewes	3 00	4 00

LAMBS.

Wethers, good to choice	5 25	5 50
Wethers, plain to medium	4 75	5 00

Sioux City Markets.

[Special telegram from Clay, Robinson & Co.]

Sioux City, Ia., Jan. 11 —Cattle prices broke 15@25c from late last week. Bulk beef steers $5.00@5.50.

As compared with last Saturday rates for hogs were 15@20c lower. Top $8.30 and bulk $8.10@8.20.

East Buffalo Markets.

[Special telegram from Clay, Robinson & Co.]

East Buffalo, N. Y., Jan. 11.—Beef steers sold strong to 10c higher than late last week, while cows and heifers showed 10@20c advance.

Hog rates went 40@50c lower than last Saturday, when we obtained $9.35 for a load of 250-lb Ohio-fed offerings, highest price since 1893. Mixed, medium and heavy sold at $8.75@8.85, with Yorkers and pigs at $8.70@8.75.

Sheep and lambs sold 10c lower than late last week. Top lambs $8.90, with best culls at $7.75@8.00. Other tops were: Yearlings $7.75, wethers $6.25 and ewes $5.75.

East St. Louis Markets.

[Special telegram from Clay, Robinson & Co.]

East St. Louis, Ill., Jan. 11.—Monday opened with 5,000 cattle on sale and market steady to strong on all classes. Tuesday with 5,000 cattle on sale prices ruled 10@15c lower on all classes of steers, decline due to heavy receipts at other markets. Top beeves $7.25 for car load and bulk $5.50@6.25. Butcher stock and feeders in moderate supply and selling steady.

About 14,000 hogs on sale today. Heavy receipts at other markets caused our market to be very dull and generally 10c lower, top hogs selling at $8.60 and bulk $8.25@8.45. Pigs and lights $8.00@8.25.

Market steady on strictly choice sheep and lambs, while medium grades went 10c lower than close of last week. Top lambs $8.90, bulk very good to choice $8.25@8.70 and medium to good $7.50@8.00. Most sheep $5.25@5.75 and yearlings $7.00@7.65.

South Omaha Markets.

[Special telegram from Clay, Robinson & Co.]

South Omaha, Neb., Jan. 10.—Under very heavy receipts both beef steers and cow stuff showed 15@25c loss from late last week. Feeders held steady.

Opening 5@10c lower today, hog market closed strong. Top $8.35 and bulk $8.10@8.25.

A decline of 15@25c from late last week took place in the sheep and lamb department. Best lambs $8.50. Light yearlings made $7.00@7.40, wethers $.570@5.90 and and ewes $5.50@5.65.

Kansas City Markets.

[Special telegram from Clay, Robinson & Co.]

Kansas City, Mo., Jan. 11.—All classes of cattle 10@25c lower than late last week. Top beeves $7.40.

Rates for hogs today were lowered 25c from last week's close. Top $8.40 and bulk $7.95@8.30.

As compared with late last week sheep and lambs sold steady to 10c lower. Top lambs $8.60. The yearlings which made $7.65, highest price of season, were sold by us.

South St. Joseph Markets.

[Special telegram from Clay, Robinson & Co.]

South St. Joseph, Mo., Jan. 11.—Bulk of heavy run of cattle were short-fed steers. Prices showed 10@20c loss from late last week. Butcher stock, as well as stockers and feeders, went 10@15c lower.

Prices for hogs today fell 30@35c under last Saturday. Top $8.40 and bulk $8.10@8.35.

Strong demand for sheep and lambs. Prices steady to 10c lower than late late last week. Tops were: Lambs $8.65, yearlings $7.65, wethers $6.00 and ewes $5.80.

South St. Paul Markets.

[Special telegram from Clay, Robinson & Co.]

South St. Paul, Minn., Jan. 11.—Both beef steers and butcher stock sold steady to 10c lower than late last week. Stockers and feeders slow but about steady sale.

Today's price range was lowered 30c under last Saturday. Top $8.25 and bulk $8.15@8.20.

Sheep and lambs went steady to 10c lower than late last week. Pinnacle on lambs $8.50 and bulk $8.00@8.25. Summit on sheep $6.00 and most sales $5.25@5.50.

DO YOU KNOW THE REASON?

Webster said: "Deal with the man who does the most business: You will find there is a reason for it." We are doing a good business. There's a reason for it. In the conduct of your business you no doubt have due regard for all details that are an aid to success in that business. Close attention to smaller details makes money in any business. If you will take care of the pennies the dollars can go it alone. At your end of the road we will concede you overlook nothing that helps you to make money. You are closely advised on the market and market conditions. You buy cautiously, exercise extreme care in feeding, look out for the health, give stock good care while in your pens and load them carefully in cars in best condition. Exercising all these precautions, then the all-important matter is the choice of a salesman at market. You cannot hope to secure the best reward for your labor, caution and painstaking methods without you are certain your shipment will have the same careful attention at market you give it at home. We watch these details, for upon your satisfaction our success depends. That's the reason we do a good business. That's the reason you hear so much about us. Results tell in dollars and cents: the results of your attention to details and ours. Try Clay, Robinson & Co. at any one of nine markets and be convinced.

Denver Markets.

[Special telegram from Clay, Robinson & Co.]

Denver, Colo., Jan. 11.—Market 15@25c lower than late last week on beef steers as well as butcher stock. Top steers $5.50, with bulk medium lots $4.65@5.00. Summit on cows $4.50 and most good kinds $3.85@4.25. Slow trade in stockers and feeders at barely steady prices with late last week.

Rates for hogs were lowered 15@20c under late last week. Top $8.35 and bulk $8.25@8.30.

Prices for sheep and lambs 10@15c lower than late last week. Tops were: Lambs $7.75, yearlings $6.75, wethers $5.75 and ewes $5 25.

Pioneer Customs in Scientific Days.

The influence of the pioneer and early settler is still strong in American rural communities. The farm is conscious of the beginnings of scientific agriculture, bnt unconsciously he is doing as much to pnt an end to pioneer agriculture. At least half of the significant public movements in the country look toward the erasure of the pioneer influence.

The pioneer was a lonely worker. Between his cabin and clearing and the house of his neighbor there were miles of wilderness. Intercourse was only occasional. His work in the forest was carried on without regular co-operation. He must practice all the trades for himself. Even after the shoemaker and blacksmith had specialized for each growing commnnity the early settler mnst still raise the sheep and shear them, card and spin the wool and weave the cloth, and in his own household the homespun garments were made.

The same series of processes in the preparation of food laid their tax upon his time, while all the work of barter was added to the labor of production. The resnlt was that the pioneer settler of the soil was self-reliant and emotional, and dependent upon no one but himself. He did his own plowing and harvesting, bntchering, curing and marketing. In like manner he transacted his educational and religions processes for himself in the beginning.

The pioneer's influeuce remains in country institutions. The country school expressed his meagre faith in education. He relied less upon trained powers than upon individual power. He believed less in the teacher than in himself. He boasted of the persons who had come from the little red school honse rather than of the standards of culture attained in the school district. Many country places still preserve the independence of small school districts by which low standards are preserved, instead of assembling the schools for a wide region in order to build up a higher social standard. The self-reliance and individualism of the early settler is a force in education long after it has been banished from the economic processes.

The country church has strong inheritance from the pioneer. First of all its theology is a theology of individual salvation, and of this salvation alone. The pioneer expended the energies of his life in preserving himself and his family against the beasts of the forest and the wild passions of men. He expended his prayer in self-preservation also against the devil and the dissolution of death and all other enemies of chaos and darkness.

The modern temperance movement is a rural enterprise. It has had small success in the cities. Its firm advances have been in country places in those states and counties which are devoted largely to agriculture. The reason for this is that the abolition of rum from the farm is in harmony with the change from emotional farming to systematic farming. The hoary-headed farm hand smokes his pipe in the corner, and tells how many acres he cut over as a lad with a scythe, and bewails the decadence of the modern farmer's son. But if he be asked whether there was not a brown jug in the fence corner, he will smilingly admit that these great feats were performed under the influence of alcohol. The modern farmer is deliberately resolved to do his farming with less impnlse and more system.

The pioneer was wasteful. The abundant resources of virgin nature were his to desolate, and from a small portion to find his living. He cut down the black walnut groves of Ohio, and laid them in heaps to be burned. The smoke that went up from Ohio in the first half of the nineteenth century represented in modern values many millions of dollars a year. In like manner the pioneer was wasteful of his energies morally and intellectually. He felt the abundance of nature within and around him. Men and women associated with greater freedom than today and with less of scruple as to small details of conduct. Pioneer days were a struggle for the maintenance of moral conduct under the leadership of the churches. The systematic farmer has established higher standards; and the better moral conduct of the adults in the prosperous farming communities is a testimony to the moral economy of the systematic period into which American agriculture is entering.

The genius of the new day is co-operation and organization of all forces in the rural community. In this the churches should lead, teaching a gospel that is not decisive but social. The public school should be used as an agency for cultivating a common feeling. In many places the little red school house should be abandoned and the scholars brought at public expense to a central place where an organized graded school should represent in a practical way the new education for higher standards on the farm. The grange, the farmer's union, the dairymen's league, the fruit grower's association, and all other agencies which represent the economic life of the rural commnnity, should insist upon the co-operation of the churches and other institutions with them in the interest of the country community.

The countribution of the pioneer in the ideal of personal character will never need to be amended or abolished. For where the teaching of the pioneer is of personal independence it is to be affirmed. But it is not enough for modern days. In its deficiences, in its wastefulness, in its feud spirit and in its insubordination the independence of the pioneer must be regulated by the interest of the whole community. This is a task which has already in large part been accomplished in progressive country communities.—Warren H. Wilson, Ph. D.

The county of Devon is celebrated in England as being one which carries a larger proportion of cattle to the total acreage than any other. Its area runs to 1,666,839 acres, and in 1907 cattle of all sorts numbered 296,965. Three-quarters of the connty is under cultivation, and more than half of this is permanent pasture.

There is no snch thing as luck. Achievement is the result of a combination of hard work and ability. It is not luck, but hard wcrk, ability and the know-how that enable ns to so often top the market for cattle, hogs and sheep. You are always sure of obtaining this top-getting service when you consign to us.

GOOD WORK OF OUR SALESMEN

$9.35 Is the highest price paid on the East Buffalo hog market since 1893. This figure was obtained by onr house there Jan. 8 for 62 of 250 lbs average. They were marketed by G. F. Carr, Logan county, Ohio.

$9.10 It was Jan. 7 that our East Buffalo house sold for Burton Hannibal, Hillsdale county, Mich., 86 lambs, averaging 81 lbs, at $9.10, extreme top.

$9.00 J. Wolf, Steuben county, Ind., marketed 152 western lambs, averaging 82 lbs, at East Buffalo on Jan. 7 which our house landed at $9.00, summit for western lambs.

$9.00 Was top of lamb market at Chicago on Jan. 10 and was obtained by us for a lot of 94-lb natives, marketed by J. N. Cobb, Woodbnry county, Ia. The price was 15c per cwt higher than any other natives brought.

$8.90 Proved summit of lamb market at Chicago Jan. 6. We landed two different lots at this price, which follow: For J. Owens, McLean county, Ill., 165 natives, 85 lbs average, and for Sackett & Brown, Allegan county, Mich., 90 head, 87 lbs average.

$8.60 Was highest price ever paid on the South St. Paul market for a carload of hogs and was obtained by our house Jan. 7 for a load of 264 lbs average, belonging to H. D. Kisor, Rice county, Minn.

$8.60 On Jan. 5 our house broke all price records on Denver hog market. On that day they sold for E. W. Bostrum, Deuel county, Neb., a car of swine at $8.60. This was not only the highest price ever realized on that market, but also snmmit by 10c per cwt.

$8.60 Jan 6 our South Omaha honse had a part of car ef hogs from Mrs. Jane Worth, Thurston county, Neb., which they sold at above price, the top that day and within 2½c per cwt of highest price ever obtained there. The balance of the shipment belonged to a neighbor, weighing 167 lbs, made $8.40.

$8.55 Was as high as butcher weight hogs made on the Chicago market Jan. 4. This figure was obtained by us for 100 head of 230 lbs average, belonging to H. E. Chichester, Peoria county, Ill., and 55 head of 222 lbs average marketed by C. A. Calkins, Iroquis county, Ill.

$8.50 Proved as high as light hogs brought on the Chicago market Jan. 4. We landed at this figure 96 head of 171 lbs average, sent in by A. K. Easley, Sangamon connty, Ill.

$8.50-$5.90 Jan. 11 our South St. Paul house handled a mixed car of lambs and ewes for F. A. B. Peterson, Martin county, Minn. The lambs averaged 86 lbs and sold at $8.50, while his ewes of 130 lbs average brought $5.90, both prices being extreme top for their respective classes.

$8.50-$5.75 Top on lambs at South St. Paul on Jan. 10 was $8.50 and obtained by our house for 75 of 78 lbs average. The latter price—$5.75—was snmmit on ewes that day and also secnred by onr house for 25, averaging 132 lbs. Both bunches belonged to J. L. Record, Hennepin county, Minn.

$8.45 Summit on hogs at South St. Paul on Jan. 6 was $8.45 and secnred by our house for a load of 220 lbs average, belonging to S. W. Bradford, Cass county, N. D.

$8.35 Proved summit of yearling sheep market at Chicago last week, as well as being highest price ever paid in January. This figure was obtained by us for 158 westerns of 76 lbs average, sent in by H. J. Cornish, Porter county, Ind.

$8.25 Summit on hogs at South St. Paul on Jan. 11 was $8.25, which price our house obtained for a load of 239 lbs average, beonging to Ole Brederson, Renville county, Minn.

$8.00 L. W. Williams, Sheridan county, Wyo., had a shipment of sheep on the South Omaha market Jan. 4. They were practically range stock, as they had had but little grain, and that only during the last few days. In this shipment were 183 lambs that averaged 71 lbs and sold at $8.00, while a lot of yearlings, 98 lbs, at $7.25, and 150 ewes, 97 lbs, at $5.65. These offerings made the top of trade for their kind and were handled by onr house.

$7.40 This is the highest price ever paid in the month of January for feeding lambs and was obtained by us at Chicago on Jan. 6 for 141 head, averaging 72 lbs, marketed by O. S. Martin, Clay county, Ia.

$6.25 Pinnacle of sheep market at Chicago on Jan. 10 was $6.25, we landing at this figure 107 western wethers, averaging 109 lbs and belonging to Holbrook & Co., Cook connty, Ill.

$6.25 C. C. Searls, Plymouth county, Ia., marketed a lot of 174-lb native ewes at Chicago on Jan. 4. We sold them at $6.25, top for ewes by 25c per cwt and highest ever known for ewes at this time of the year.

$6.25 Was top of sheep market at Chicago last week. On Jan. 5 we landed two different lots at this figure, which follow: For Jacob Weiss, Crawford county, Ia., 382 western wethers, 103 lbs average, and for Colnmbus Canning Co., Columbia county, Wis., 97 western wethers, 112 lbs average.

Wanted, To Purchase

A carload of registered Shorthorns, to consist of yearling bulls and yearling and two-year-old heifers. Pedigrees mnst be furnished. These cattle are wanted by one of our customers. Address with particulars,

KITSELMAN BROS. Box 200 MUNCIE, INDIANA.

A Heavy American Fence Costs You No More Per Rod Than Lighter Fences of Other Makes

A roll of heavy fence means big wire. Big wire means more strength and longer life. Insist upon the dealer weighing the roll of fence he sells you. This will tell the story quicker than any other way, for you cannot always tell the size of wire by eye. American Fence will stand this test against any fence made, and will prove its greater weight. Why, then, pay the same money for a lighter fence?

American Fence is made of hard, stiff steel. It is made of a quality of wire drawn expressly for woven-wire-fence purposes by the largest manufacturers of wire in the world. Galvanized by latest improved processes, the best that the skill and experience of years has taught. Built on the same elastic hinged-joint (patented) principle, which effectually protects the stay or upright wires from breaking under hard usage.

Test, judge and compare American Fence under any and all conditions and you will find that the steel, the structure and the galvanizing are equal in durability, strength and efficiency to the hardest uses.

EXTRA!

Free With Every Order

Since writing the adv. opposite we have determined to make our offer so attractive that no reader will feel like passing it by. We shall therefore give every person sending us an order for the REPORT and BREEDER'S GAZETTE this little slate memorandum book (with pencil), a very handy article for any farmer, housewife or schoolboy or girl.

Here's What You Get:

BREEDER'S GAZETTE one year
LIVE STOCK REPORT one year
SLATE MEMORANDUM BOOK
CLAY, ROBINSON & CO.'S American Beauty Souvenir Calendar for 1910

All for Only $1.50

Pretty good offer, isn't it? Regular price of the Breeder's Gazette alone is more than we ask for the whole of above list.

How can we afford to do it? In one sense we can't afford to—but we do it anyway. We are giving you full $2.50 value for $1.50. Why? Partly because we know that if you read the Live Stock Report for a year you will become acquainted to some extent with our firm, our methods, and the results we get for our consignors. You may not necessarily become a customer, but at least you will say, with thousands of others, that

"Clay, Robinson & Co. are O. K."

That's what we want—your GOOD WILL first, then your BUSINESS if you are in position to give it to us and feel that we can give you better service than others. If not, well and good. You will have had big value for your money anyway, and we too shall be perfectly satisfied. We of course are seeking to make new customers as well as retain old ones, and this is one of our methods of doing it. We figure that if we give a man something worth $2.50 for $1.50 we have made a good start toward gaining his friendship.

We cordially invite you to "come in" on this big offer. Use the coupon opposite and save writing a letter.

SIOUX CITY.

W. R. Golden, Lincoln county, S. D.: "I am more than pleased with the way you sold the cattle. Thank you for your good service."

KANSAS CITY.

J. M. Callaway, Polk county, Mo.: "I think you have a fine sheepman and also good cattleman."

THE MADE-TO-ORDER CREAM SEPARATOR

The dairy farmer who buys a 1910 De Laval Cream Separator gets a machine that is really made especially to order for him.

First: Because the 1910 De Laval is designed and constructed, without sacrificing any vital feature, to meet the comments and criticisms gathered from over 1,100,000 dairy farmers to whom De Laval machines have already been sold.

Second: Because if he should offer to pay ten times the ordinary price he couldn't secure a closer skimming, a greater money, time and labor saving, a more durable, a more convenient or an easier running separator than the 1910 De Laval.

Lastly: Because every feature of the 1910 De Laval machine from top to bottom is just as the best mechanical as well as the most practical engineering demands that it should be.

The De Laval is the made-to-order cream separator without the made-to-order price. The De Laval catalogue tells the whole story. Ask for a copy.

Imitations of This Harrow Are Not Worth The Prices Asked

The Genuine is Better Than Ever At Same Low, Factory Price

Free Book Will Prove It

The Detroit-American was the first and still is the only genuine Tongueless Disc made. All others are weak imitations—mere makeshifts—old-style tongue harrows with tongues cut off and front trucks stuck under. The real tongueless is made only by us and sold only direct from our factory to farm. Don't let a dealer or anyone else palm off a substitute on you. They don't work at all the same; they don't save the horses; they don't last like the famous original—

Detroit-American

Lightest Draft Harrow Made

Try It Free 30 Days; No Money Down CASH OR CREDIT TERMS

Try this harrow entirely at our risk. Use it a month—even more. If it does the work as it should do it, send us the price—if not, return the machine. We take care of the freight in both cases. Test won't cost you a nickel.

Note these points:—All-steel frame; hard maple bearings; rigid steel adjustable standard; pipe oilers; double levers; indestructible steel spools between blades—and a dozen other important features.

NEW PRICE RECORDS

MADE IN 1909 BY

CLAY, ROBINSON & CO.

Below will be found some of the extreme top sales of CATTLE, HOGS, SHEEP and LAMBS made by our firm at the various markets during 1909. These have nothing to do with the many sales made by us that were top for their weight, quality, etc.:

CHICAGO.

$50.50 Dec. 2—Landed in the public auction ring of the International Feeder Cattle Show a load of calves at $50.50 for both Al. A. Neale, Montrose, Colo. and Fowler & Tod, Maple Hill, Kan., highest price ever known for such offerings.

$11.00 Dec. 2—Sold a load of International show lambs at $11 for Dan Black, Lyndon, Ohio, top price by 50c per cwt for 1909 show lambs.

$9.90 June 3—Obtained this price for 220 lambs of 88 lbs average, belonging to Trimble & Doty, Fort Collins, Colo., record price for lambs on open market.

$9.50 Dec. 1—All previous price records smashed for cattle on the Chicago market by 20c per cwt, selling 19 steers of 1,573 lbs average at $9.50 for Foster Bros., Earlham, Ia.

KANSAS CITY.

$7.80 Sept. 10—Obtained $7.80 for 1,164 lambs, averaging 69 lbs, for A. Murdock, Heber, Utah, highest price at Kansas City for lambs from Utah since Sept 11, 1906.

SOUTH OMAHA.

$7.50 May 25—Sold 225 Mexican wethers, averaging 98 lbs, at $7.50 for W. F. Edmondson, Berthoud, Colo., highest ever paid at South Omaha for wethers.

$6.40 May 25—Landed 228 ewes of 116 lbs average at $6.40 for R. L. Hershey, Gibbon, Neb., extreme top figure for ewes in 1909 at South Omaha. Also on same day 56 ewes, averaging 107 lbs, at same price for H. E. Hershey, Gibbon, Neb.

SIOUX CITY.

$8.50 Sept. 20—Landed for Joseph Easton, Merrill, Ia., 15 steers of 1,280 lbs average at $8.50, highest price ever paid on the Sioux City market.

$8.40 Dec. 11—Sold for L. Hanson, Wausa, Neb., 53 hogs, averaging 291 lbs, at $8.40, highest price ever paid on the Sioux City market.

SOUTH ST. JOSEPH.

$6.65 Aug. 25—Landed at $6.65 for D. C. Robey, Eureka, Kan., two loads of 1,501-lb grass steers, highest price ever obtained for straight grass cattle on the South St. Joseph market.

SOUTH ST. PAUL.

$7.25 Oct. 28—Sold three range steers of 1,643 lbs average at $7.25 for J. M. Wilson and O. B. Williams, both of Custer, Mont., highest price ever obtained at South St. Paul for grass cattle.

$6.25 Nov. 8—Landed a load of 1,476-lb range cattle at $6.25 for J. C. Arbogast, Harlem, Mont., highest price in 1909 for full load of grass cattle.

DENVER.

$9.00 January—Sold 15 steers of 1,467 lbs average at $9.00 at the National Live Stock Show at Denver for H. W. Williamson, Diller, Neb., top sale for show cattle at Denver.

$8.00 June 14—Landed at this price for L. V. Olcese, Mojave, Cal., 587 head of 74-lb range lambs, pinnacle for the year at Denver.

$6.85 January—Obtained this price for a load of 891-lb feeding cattle in the auction ring of the National Stock Show for Ballentine & Beggs, Collbran, Colo., record price for show feeders at Denver.

$6.75 June 2—Sold for Henry Alberts, Loveland, Colo., 70 steers of 1,388 lbs average at $6.75, highest price paid on the open market at Denver in several years.

$6.00 May 29—Sold 1,647 range wethers, averaging 119 lbs, at $6.00, highest price for sheep at Denver for several years. They were marketed by L. V. Olcese, Mojave, Cal.

$4.55 Oct. 23—Obtained this figure for two loads of 1,204-lb cows, belonging to William Boot of Denver, Colo., highest price in several years for strictly range cows at Denver.

Clay, Robinson & Company's LIVE STOCK REPORT

Vol. 20 | Chicago, Friday, January 21, 1910 | No. 3.

The Cattle of Colorado.

The Winter show at Denver is a great educational center. People gather together. They come, they see, they conquer. Till these shows were instituted some years ago Colorado did not know her strength. It had been pent up, almost strangled in the years of adversity that followed 1893. Those were savage years on the bovine interests. Prices were low and there was a pessimistic storm on. In Colorado it was all silver, and free silver at that. The blatant politician, the misguided merchant, the farmer almost at sea did not realize that in farm and field there were gold and silver mines that could not be fathomed. A Croesns never dreamed of such wealth; even a Rothschild never can possess it. The defeat of the silver craze meant the mission of the soil being explained and realized by her citizens. And far up in her valleys the cry was echoed. I write tonight at the Denver Club. Some thirteen years ago you dare not mention the gold standard there. If you did, God help you. You were surrounded at once by a group of fiery silverites, declaiming fiercely against you. After you slid away you thought a thousand of brick had fallen about your ears. What a change today! Colorado is a

GRAND CHAMPION FEEDERS.

These Angus yearlings, bred and exhibited at the 1910 National Western Feeder Show, Denver, by G. F. Lucore, Arriba, Colo., were sold by Clay, Robinson & Co. at the record price of $8.00 per cwt to the Champion Feed Co., Tarkio, Mo., averaging 793 lbs.

smiling paradise, so far as the farmer is concerned. The smoke stacks of its sugar beet factories rise heavenwards at what in old days were hamlets, now thriving towns. Along its mesa lands are serried ranks of fruit trees. When spring comes the far stretching prairie is dotted with patches of alfalfa with its glorious greenery. But it has gone further in the march of improvement. Its herds are second to none in the States. For quality, for hardiness, for stretch they have no equals. During the show week the best feeders of the United States congregate in the Denver Yards. They come because they know they have the pick of the best. Last year Casper Beekman, now no more, paid Clay, Robinson & Co. $6.85 per cwt for a car of Herefords, owned by Ballantine & Beggs. They averaged 981 lbs at the time of sale, and when his estate shipped them to the International they crossed the scales at an average of 1,394 lbs and sold at $11.20 per cwt. And now we have a record broken, for on the 13th of this month the Champion Feeding Co. of Tarkio, Mo., paid Clay, Robinson & Co. $8.00 per cwt for the Lucore yearlings, averaging 793 lbs.

It speaks volumes for the men who bred this class of stuff. Individually while it is great it merely shows the trend of events—the gradual development of splendid herds, for while Lucore is great, he has many rivals who are anxious to catch up and fill his shoes. Among those Colorado men there is a fine feeling. They fight for first place with a keen zest. They criticise the judges freely, but when it is all over and the auctioneer has played his part, they accept the conditions.

But there is another handwriting on the wall so far as Colorado is concerned. It is not only quality and richness she produces in these feeding cattle, but further they go. It is to the finishing yards. They can produce to perfection the frames, ready for corn and other eastern states feeding mixtures, but gradually, almost like a thief in the night, Colorado is beginning to finish its own product. In this line of work the sugar beet raisers are doing much. A notable example is found in the first load of fat cattle sold. Those cattle were Herefords, averaged 1,405 lbs and were sold by Clay, Robinson & Co. at $7.00 per cwt. They were Colorado bred, as well as fed, and they reflected much credit on Messrs. Beer & Hogarty, who were the owners and feeders. All this goes to show that the Silver State has drifted away from old lines and prejudices, and they propose to compete with the older states, whose people thought they held an impregnable position in the realms of feeding. It is well that matters should shape in this way. Our corn producing region is pretty well exploited. We cannot increase the average very much under natural conditions. But out West in our irrigated regions there is an endless empire of productive land, on which they can raise almost anything—alfalfa, grain, sugar beets, and every kind of forage crop. The silo will invade the plains just as the Shorthorn and Hereford did years ago. And it will play its part, only in a different way. Further still, it will keep the fertilizer at home. The stealing process will be stopped and the soil, thirsting for its return in the form of manure, will return manifold to its owner. J. C.

Better Send Them In.

Conditions are not favorable for holding cattle in the feed lot that are in suitable condition for the shambles. The only possible exception to this would be cattle of good quality that are not quite finished and weighing around 1,300 lbs and heavier. These probably could be held back for several weeks longer feeding to good advantage, as there is and most likely will be a shortage of choice to prime cattle for several months. Barring these, however, we advise marketing at the earliest convenience. There is seldom any advance in the cattle market between the middle of January and the first of March. Between that period times are also trying for the cattle feeders, owing to climatic conditions being generally of an adverse nature. Then to make matters worse, corn and hay are high in price.

J. A. Jastro Made President.

The National Live Stock Association at its session in Denver last week overwhelmingly declared in favor of federal control of the open range. Despite the protests of Colorado delegates, the resolution commanding the administration of Gifford Pinchot and advocating a range lease law under federal control was adopted. Resolutions condemning the Payne tariff law, advocating the increase of power in the Interstate Commerce Commission and the fixing of a minimum speed limit for stock trains were also adopted.

Election of officers resulted as follows: President, J. A. Jastro; first vice president, Murdo Mackenzie; second vice president, Joseph M. Carey. The secretary and treasurer will be appointed by the executive committee.

Fort Worth, Tex., was selected as the next place of meeting.

Grand Champion Cattle at $7.00.

The Colorado Stock Feeding Co. of Longmont, Colo., carried off the honors for the grand champion car of fat cattle at the Fifth National Western Stock Show, held at Denver, Colo., last week, with a load of three year-old Herefords. The cattle averaged 1,405 lbs and were sold by Clay, Robinson & Co. at the top price of $7.00. Stuart, Son & McCormick of East St. Louis were the buyers. These cattle were placed in the feed yard on Oct. 22, averaging 1,160 lbs at that time. They were fed 15 lbs of cut hay and syrup, being 75 per cent cut hay and 25 per cent syrup, with 138 lbs of beet pulp. They made an exceptionally good gain, considering the length of time they were on feed. In selling the 15 head of grand champion cattle, Clay, Robinson & Co. threw in the balance of the car, or tailends, which possibly affected the price to a certain extent. Of course Clay, Robinson & Co. were anxious to sell the steers the way they would net the owners the most money. In addition to the above great honors, the Colorado Stock Feeding Co. also took first and second prizes on yearling wethers, as well as having the champion load of wethers, both lots being sold by Clay, Robinson & Co. at $7.60. The Colorado Stock Feeding Co. is composed of

GRAND CHAMPION FAT CATTLE.

Three-year-old Hereford steers fed and shown by Colorado Stock Feeding Co., Longmont, Colo., and sold by Clay, Robinson & Co. at top price of $7.00, averaging 1,405 lbs.

Frank H. Church and Bernard Beer, both of Denver, Colo., and W. P. Hogarty of Longmont, Colo. They are extensive feeders of both cattle and sheep, having at the present time something like 4,000 cattle and 6,000 sheep on feed.

Newspaper Agitation of Meat Prices.

Live stock market talent, always close students of conditions, is just now watching intently newspaper agitation of high meat prices, reports of the so-called "meat strike", etc. American housewives are more or less agitated by current high rates for all food stuffs and as people are never more quickly and keenly interested than when their purse is affected publicity may have far-reaching results. Financial circles are at present somewhat disturbed by recent bear raids on stocks, cotton, grain, etc., cotton especially having undergone very marked recessions. A feeling of uncertainty as to future values is as quickly communicated to the public as one of optimism. So closely akin is the financial and industrial mechanism of this country that that which influences one oft-times affects the other. General industrial conditions, barring such depression as may be excited on the cotton industry by late declines, are as favorable as could be wished for. It is, therefore, unseemly to sound any note of alarm, but in times of plenty it is always well to have regard for the future, when days of prosperity might be changed to days of adversity.

Shropshire lambs fed and shown by Bruce G. Eaton, Eaton, Colo.

Class 109—Yearlings—First, H. W. Moore, Brush, Colo.; second, Great Western Sugar Co., Longmont, Colo.

Class 110—Champion carload—Great Western Sugar Co., Longmont, Colo.

Class 111—Carload hay-fed cattle, 3 years old or over—First, Andrew Peterson, Hebron, Colo.; second, J. J. Underwood, Underwood, Wyo.; third, Liggett & Rigdon, Fort Collins, Colo.

Class 112—Carload 2 years old and under 3, hay-fed—J. A. Whiting Austin, Colo.

Class 113—Grand champion carload fat cattle—Colorado Stock Feeding Co., Longmont, Colo.

Record Price for Feeding Cattle.

In the auction ring of the 1910 National Western Live Stock Show, Clay, Robinson & Co. sold 20 head of 793 lb Angus yearling feeding steers at $8.00, highest price ever realized for such offerings and 65c per cwt higher than top for feeders at recent International Live Stock Exposition. These cattle were bred, raised and shown by George F. Lucore of Arriba, Colo., and were bought by the Champion Feed Co. of Tarkio, Mo. Of the 147 cars of stockers and feeders sold in the auction on Thursday and Friday of last week, Clay, Robinson & Co. handled 54 loads. The average weight of the same was 793 lbs and the average price $5.12. On the latter day Clay, Robinson & Co. sold 25 cars of two and three-year-old feeders, averaging 936 lbs, at an average price of $4.80, against an average price of $4.40 for 53 cars handled by other firms.

Following were sales of show stockers and feeders made by Clay, Robinson & Co. at Denver Thursday and Friday of last week:

Owner.	No. steers.	Average.	Price.
G. F. Lucore	20	793	$8.00

FEEDING CATTLE AWARDS.

Below is given awards in the carlot feeder cattle show at the fifth National Western Live Stock Show at Denver last week:

Class 114—Carload 2-year-old feeders—First, A. H. Norell, Walden, Colo.; second, Mark A. Baldwin, Rand, Colo.; third, Jones Cattle Co., Longmont, Colo.; fourth, J. A. Whiting, Austin, Colo.; fifth, E. L. Montgomery, Longmont, Colo.

Class 115—Carload yearling feeders—First, Geo. F. Lucore, Arriba, Colo.; second, Sanborn & Dwinnell, Walden, Colo.; third, T. W. Tomlinson, Denver, Colo.; fourth, J. H. Welty, Berthoud, Colo.; fifth, Tomkins Cattle Co., Pueblo, Colo.

Class 116—Carload feeders under 1 year—First, P. H. Boothroyd, Loveland, Colo.; second, August

New Mexico lambs fed and shown by Drake & Wagner, Lamar, Colo.

Two-year-old Angus feeders shown by Clark Renfro, Fort Lupton, Colo.

Yearling Hereford feeding steers bred and shown by Tomkins Cattle Co., Pueblo, Colo.

Southern Hereford yearlings fed and shown by H. W. Moore, Brush, Colo.

Angus steer calves bred and shown by P. H. Boothroyd, Loveland, Colo.

New Mexico yearling wethers fed and shown by Colorado Stock Feeding Co., Longmont, Colo.

Bench, Agate, Colo.; third, Capitol Freehold Land & Investment Co., Channing, Tex.; fourth, W. C. Stiles, Loveland, Colo.; fifth, Tomkins Cattle Co., Pueblo, Colo.

Class 117—Champion carload feeders—Geo. F. Lucore, Arriba, Colo.

Show Calves Sell Well.

There was a good demand for calves in the feeder show at the 1910 National Western Live Stock Show at Denver last week. Clay, Robinson & Co. sold five cars of the Tomkins Cattle Co. calves at a range of $19.25@22.25 per head. There were 241 head in this consignment and they made an average price of $20.45 per head.

Following shows sales of calves in feeder show made by Clay, Robinsan & Co. at Denver last week:

Owner.	No. calves.		Per head.
Tomkins Cattle Co., Colorado.....	48	....	$22.25
Tomkins Cattle Co., Colorado.....	48	....	21.00
Tomkins Cattle Co., Colorado.....	50	....	20.50
Tomkins Cattle Co., Colorado.....	48	....	19.25
Tomkins Cattle Co., Colorado.....	47	....	19.25

Red King is Grand Champion.

The grand champion steer of the National Western Live Stock Show at Denver last week was Red King, grade yearling Shorthorn, owned and shown by Carpenter & Ross of Mansfield, Ohio, who also won the reserve championship with Rosebud, pure-bred yearling Shorthorn. Red King was not sold and will be taken to the Fort Worth Live Stock Show. The top sale of single fat steers was $9.50, being obtained by Clay, Robinson & Co., for an Angus animal, weighing 1,760 lbs and belonging to W. J. Miller of Iowa. The 18 head of single fat animals sold by us averaged 1,323 lbs and made an average price of $8.61.

Following sales of single fat steers in the National Western Live Stock Show made by Clay, Robinson Co. at Denver last week:

Owner.	No.	Descrip.	Weight.	Price.
W. J. Miller, Iowa.....	1	Angus	1,760	$9.50
W. J. Miller, Iowa.....	1	Angus	850	8.75

Colo. Stock Feeding Co.....	50	yearlings	105	7.60
Colo. Stock Feeding Co.....	50	yearlings	97	7.60
E. J. Wagner.....	54	lambs	81	8.85
F. P. Gover.....	56	lambs	99	8 00

Above parties from Colorado.

CARLOAD SHEEP AND LAMB AWARDS.

Following shows the awards in the carload fat sheep and lamb show of the Fifth National Western Stock Show at Denver last week:

Class 70—Carload yearling wethers—Northern Colorado—First and second, Colorado Stock Feeding Co., Longmont, Colo.; third, Will R. Young, Fort Lupton, Colo.

Class 71—Carload fat lambs—Northern Colorado—First, Drake & Bartels, Fort Collins, Colo.; second, Chas. Strickland, Eaton, Colo.; third, Bruce G. Eaton, Eaton, Colo.

Class 72—Champion carload sheep—Northern Colorado—Drake & Bartels, Fort Collins, Colo.

Class 73—Carload yearling fat wethers—First, Grant E. Newmyer, Monte Vista, Colo.; second, E. S. Newmyer, Monte Vista; third, N. M. Newmyer, Monte Vista.

Class 74—Carload fat lambs—First, Grant Newmyer, Monte Vista, Colo.; second, Noble M. Newmyer, Monte Vista; third, E. S. Newmyer, Monte Vista.

Class 75—Champion carload—Grant E. Newmyer, Monte Vista, Colo.

Class 77—Carload fat lambs—First, J. Wagner, Lamar, Colo.; second, Drake & Wagner, Lamar, Colo.

Class 78—Champion carload sheep—J. Wagner, Lamar, Colo.

Class 80—Carload fat lambs—A. J. Knollin, Soda Springs, Idaho.

Class 82—Grand champion carload fat wethers—Colorado Stock Feeding Co., Longmont, Colo.

Class 83—Grand Champion carload fat lambs—A. J. Knollin, Soda Springs, Idaho.

Prosperous Year for Stockmen.

President J. A. Jastro of the National Live Stock Association said the past year had been exceptionally prosperous for the stock raisers of the West and he was of the opinion that a continuance of the present basis of values seemed quite probable. The decline of exports of beef cattle and fresh meat was not, he said, a thing to be deplored, but rather it was a matter for rejoicing that at last there was a home market for an increased proportion of such products.

Angus beef steers fed and shown by Colorado Stock Feeding Co., Longmont, Colo.

Yearling Hereford feeding steers owned and shown by Colonel W. E. Hughes, Estelline, Tex.

Angus yearling feeding steers owned and shown by J. H. Wetley, Berthoud, Colo.

Hereford steer calves bred and shown by Tomkins Cattle Co., Pueblo, Colo.

Two-year old Hereford feeding steers owned and shown by A. H. Norell, Walden, Colo.

Range lambs fed and shown by Drake & Bartels, Fort Collins, Colo.

Clay, Robinson & Company's LIVE STOCK REPORT

Issued every Friday at Union Stock Yards, Chicago.

R. P. FALES.....Managing Editor
GUY FRIDLEY.....Associate Editor

Local and long-distance Telephone "Yards 4194."
Cable address "Kelso," Chicago.

This paper will be sent to anyone, whether a customer of Clay, Robinson & Co. or not, upon receipt of 50c to pay postage for one year.

If you receive the paper for a time without having ordered it, please understand that it is sent you with compliments of Clay, Robinson & Co., to keep you posted on the markets.

When requesting change of address always give old as well as new postoffice.

Advertising rate $2.80 per column inch, each insertion. Special low rate for live stock sale advertising. If you intend holding a public sale write for prices on quarter-page, half-page or page space.

Address all communications and make all remittances payable to THE LIVE STOCK REPORT, Union Stock Yards, Chicago.

Need More Live Stock.

Last week we quoted Secretary Wilson to the effect that there are too many consumers and not enough producers in the country. This condition is in no small measure responsible for the high cost of food products at this time. The great rush of countrymen to town and cities goes on unchecked, and a great percentage of the immigrants coming to this country are consumers. Somebody must raise more cattle, hogs and sheep. Never was there a time when prospects were so favorable for the producing and feeding of live stock as now. Relatively high prices are bound to prevail for some time to come. Even with a general concerted action on the part of farmers to increase their holdings of cattle, hogs and sheep, the price range would not be damaged severely. Probably never again will the supplies pass the consumptive demand. At the present time there is not a normal number of cattle on feed and there is really a paucity of choice, fat beeves back in the country. It is a patent fact that the hog supply is woefully short. The number of sheep and lambs on feed is considerably less than in recent years. It is a good time to get into the live stock business.

Let the Fat Ones Come.

While the trade in sheep and lambs is traveling a rather stormy sea, sellers will hold the helm firmly as long as pork and veal stay so high. Really mutton and lamb meats are cheaper than the above. That is why rates for sheep and lambs quickly work higher under light runs. Feeders never stood a better chance to have things more their own way, if present conditions continue. There is no need of pressing anything lacking good flesh on the market, where feed is available. They will pay well for their keep. Yet we would caution against too ambitious plans. Do not hold back good fat lots. Their place is on the market. Prevailing prices are high. A bird in the hand is worth two in the bush.

Many Hogs at Loading Stations.

Hog market of the immediate future will be influenced greatly by weather and transportation conditions. Interruption of normal movement incident to late storms, heavy snow fall and blockaded rail lines is responsible for much of the recent shortage in supplies at the several markets. Price has been attractive. Heavy snows and cold weather, followed by mild temperature and muddy lots, no doubt is discouraging to further feeding. Blockade of rail lines preventing free movement of stock to market also curtailed the return of empty stock cars to loading points. In consequence it can be taken for granted a good many hogs are already at stations awaiting cars and the ability of railroad companies to transport loaded cars to market. Aside from the possibility that, weather permitting, temporarily liberal runs of hogs may come out, there is not a discouraging cloud on hog market horizon. Shortage in receipts to date is so pronounced that packers must feel frightened when they look at bare cellars and contemplate spring and summer contracts for product. Prospective late spring and summer supply offers no encouragement of anything approaching normal supplies and it is certain summer swine prices will rule in producers' favor. Fat hogs should be marketed to save board bills, but shotes will make money if carried. But a few weeks more of winter confronts feeders and good judgment warrants keeping young immature hogs near the corn crib for some weeks.

Many Short-Fed Cattle in Sight.

The scarcity of choice fat cattle, the non-appearance of prime beeves and the abundance of plain and medium grades is causing comment among traders. It goes to show that the country is not finishing their cattle this winter. Instead they are letting them come in half to two-thirds fat condition. These kinds were the money makers last year, and feeders are prospecting in the same place for more "strikes." Not until Kansas and Nebraska begin to market will a decent showing of long-fed beeves show up. But short-fed lots will continue to come in liberal proportion to the receipts for some time. Missouri, Iowa and Illinois have a big crop of these grades to throw into the market hopper.

Deny Shortage of Beef Cattle.

Murdo Mackenzie of Trinidad, Colo., vice president of the National Live Stock Association, and manager of the Matador Land and Cattle Co., denies that there is any danger of a shortage of beef in the United States.

In an address before the association at Denver last week he declared that as long as $200,000,000 worth of beef is exported from America each year there is no danger of a shortage.

"The price of beef in Chicago is regulated by the price received for our surplus cattle shipped abroad," said Mr. Mackenzie. "The howl that present prices are putting beef beyond the reach of the poor man is unwarranted. It is true that if the consumer demands the choice cuts he must pay for them, but good beef is within the reach of all. "Had it not been for the increase in value of their lands, cattlemen could not have continued in the business at prices that have prevailed in the past. At present prices stockmen are just beginning to realize a fair return on their investment. What we would advocate is better cattle, not more of them."

Milo as Feed for Cattle.

The twenty-five million acres comprising the plains of Eastern Colorado will become a great beef-fattening center whenever the dry land farmers of that section generally raise milo as one of their chief crops.

One hunred pounds of milo has a fattening value equal to 90 lbs of corn, and milo is the surest grain crop grown under dry land farming in Eastern Colorado, yielding twice as much grain as corn.

For fattening cattle, when first put on feed, milo may be cut with a corn-binder, shocked until cured, and the stalks and heads fed together.

Usually after thirty days of such feeding the waste becomes too great and it will pay to snap the heads from the stalks and feed them in grain boxes the same as ear corn.

For the final feeding after the steers have become fairly fat, it will pay to grind the milo.

The heads may be ground without threshing, the small stems to which the seeds are attached forming a ground roughage which mixes with the meal, or the heads may be threshed and then ground, making a clear meal.

Milo is a constipating feed and the best results are always obtained by feeding some laxative or succulent feed with it.

The best feed for this purpose is alfalfa hay, carefully cured, to retain most of the leaves. Sorghum cut in the bloom, stock beets and stock melons may also be fed for this purpose, careful watch of the cattle being made to see that they get just the right amount.

Milo is like corn, rich in starch and poor in protein, and during the last half of the fattening period when it is fed, cattle should have some alfalfa hay, linseed, or cottonseed meal.—H. M. Cottrell.

Big Montana Live Stock Returns.

According to returns to the State Board of Equalization of Montana, there are 4,585,000 sheep in that state, and from these 35,000,000 lbs of wool was clipped, which realized for its owners an average close to 20c a pound, or $7,000,000. No accurate record is kept of the sheep shipments, but it is estimated by the live stock board that these ran about as usual. Of cattle, according to the same returns in March, Montana had 5,921,488 cattle within its borders. While no computation of dishonesty is conveyed, it is regarded as absolutely certain that in reality there are greater numbers extant in both classes. Cattle shipments amounted to between 240,000 and 245,000 head, according to the Board of Live Stock Commissioners, and for these splendid prices were realized, ranging as high as $7.60 per cwt at Chicago, and where not a few shipments brought $7.50. These shipments will average approximately 1,000 lbs to the animal, and at a trifle more than a $1.00 rate, this means a return of $10,000,000. Total of live stock and wool sales are estimated to have brought into that state $21,000,000.

Competition in Education.

The American ambassador to Great Britain recently facetiously referred to our educational system as America's chief industry. In other ways it is frequently suggested that in this matter the rate of growth has been out of proportion to our development in other directions and beyond our real needs.

Of the eighteen million children in the graded schools in the United States today, less than a million, or less than one in twenty, will ever matriculate in a high school or an academy. Moreover, of the nine hundred thousand pupils in the secondary schools, only about two hundred thousand will be enrolled in our colleges and universities, or approximately one out of every four. It requires, therefore, approximately eighty pupils in the grades to supply one college or university student. Less than one in five of these colleges and universities matriculates graduates. Therefore, over four hundred graded school pupils are required to furnish one college graduate.

Of more significance than all this is the fact that seven out of every eight of the boys and girls of the United States leave school between the fifth and sixth grades and go out into a world of splendid opportunities without the training and intellectual power to enable them to take advantage of these opportunities.

It would not seem, in the light of these facts, that there was much serious competition in education. In fact, it does not appear that we are doing very much to break down human ignorance and overcome human prejudice. —H. J. Waters, president of Kansas State Agricultural College.

Day of Mixed Feeds.

Upon this important subject the Champion Feed Co., Tarkio, Mo., to whom our Denver house sold the grand champion load of Lucore feeding cattle of the 1910 Denver Show at the new record price of $8.00 per cwt, have the following to say:

"The particular stock raiser and feeder has discovered that it pays, and pays big, to feed a mixed ration, just as the progressive farmer long ago discovered that the way to make farming more profitable was to diversify his crops. The time is past when a straight grain ration will answer. The profitable feeding of mixed feeds is so well known now that the question is which mixed feed is best to use."

The Champion Feed Co., "millers of mixed feeds that make money for feeders," claim that their feed for cattle, hogs, sheep and horses has been tried and not found wanting. This feed has been on the market for seven years and each year the sales of the same have trebled. In fact, it is recognized as one of the great standard mixed feeds. The chief ingredients for feeding cattle are a scientifically balanced mixture of ground grain, thoroughly permeated with prime black strap molasses drippings from the cane and sugar mills of the South, with enough pure flax seed meal to condition the animal. The feed can be fed alone or on whole, snapped or shelled corn or other feeds or roughage with which it combines and makes a perfectly balanced ration. It greatly increases the value of corn. The feed is also fine for hogs.

P. R. Low and Jens Christensen, who are among the best and well-known cattle feeders of Northwest Missouri, are at the head of this company. Their reputation stands behind this feed and that alone is sufficient evidence that the feed has worth and value to the party who is trying to shorten the feeding period of stock; how to increase the nutritive value of feed, thereby reducing the cost of feeding, and at the same time how to give their cattle a better finish—a finish that always brings the best price on the market.

Feed Production Great Problem.

How many farms are producing 40 bushels of corn to the acre when they ought and might produce 60 or more? How many fields are yielding 25 to 50 per cent less oats than they would grow if conditions were as they should be? How much land is being wasted by growing half as much hay or other forage as could easily be produced upon it? These are questions for every farmer to first ask himself and then seek the answer from the agricultural department of his state college, from the department at Washington, or from the most successful farmers in the neighborhood, the coutry or the state.

The perfection to which the various breeds and breeding methods have been brought in the past few years is truly remarkable, but we are face to face in the East, the West, the South and the North with the greatest problem of all, namely, how to make the land produce enough feed to make the most out of the animals we are breeding.—Arthur G. Leonard.

LIVE STOCK & CROP CONDITIONS

REPORTS GATHERED AND RECEIVED BY CLAY, ROBINSON & CO.'S HOUSES AT THE NINE LEADING LIVE STOCK MARKETS.

LESS STOCK ON FEED IN MISSOURI.

J. Hickman & Son, Adair county, Mo.: "There is much less stock on feed in this locality than usual."

FEEDING FEWER CATTLE IN IOWA.

John Frandsen, Ida county, Ia.: "There are not so many cattle being fed in this locality as last year and not many fat hogs available."

FAT STOCK SCARCE IN INDIANA.

F. Galloway, Fountain county, Ind.: "Fat hogs are scarce and but few swine are being fed. There is some cholera. Cattle and sheep also scarce."

"MUCH SNOW IN SUMMIT COUNTY, IOWA.

Ira A. Gripp, Summit county, Ia.: "There are not hogs and cattle enough in this county to flag a hand-car. Hay is very big. There are about 12 inches of snow."

HARDEST DECEMBER WEATHER ON RECORD.

M. A. Robinson, Adair county, Mo.: "We have had the hardest December weather on record. Hay is scarce and is costing $6.00@8.00 per ton and corn 65@75c per bushel."

IDEAL RANGE CONDITIONS IN CANADA.

H. J. Badger, Battle Creek, Sask., Canada: "Range conditions in this 'neck of the woods' are ideal. Just snow enough to make the ground white. No hay at all being fed. Beef was out to the limit last fall."

WINTERING FEW CATTLE IN MICHIGAN.

J. E. Sharp, Newaygo county, Mich.: "Corn crop was a very poor one all through this and adjoining counties. Hogs are very scarce and but few cattle being wintered. We have as fine a fruit country as there is in the United States."

STOCK DOING FINE IN TEXAS.

Reports received from the inspectors of the Cattle Raiser's Association, Fort Worth, indicate that the loss of cattle from cold and exposure this winter has been very slight and the belief is expressed that the worst of the suffering is over for this year.

COLD WEATHER FORCES FEEDING OF CORN.

Indiana grain dealers report that there has been an unusual amount of feeding of corn as the result of the cold weather. Hay is selling at high prices. The average price of corn at country stations in Indiana and central Illinois is said to be around 63c per bushel.

MANY SHEEP IN OPEN IN EASTERN MONTANA..

Charles M. Blair, one of the largest live stock owners in Montana, says that most of the sheep in Eastern Montana are on the open range and far from places of shelter and feed and that unless the severe weather conditions are decidedly altered there will be a great loss.

FEED IS VERY HIGH IN IOWA.

Carl H. Van Evera, Scott county, Ia.: "Corn is scarce and high priced here. Very few cattle are being fed. Some of our big feed lots are entirely empty on account of high-priced feed. Corn is worth 60c per bushel and hay about $14 per ton, and very scarce at that."

SEVERE WEATHER IN FERGUS COUNTY, MONT.

News from Fergus county, Mont., is to the effect that the winter there has never been exceeded in prolonged severity, although there has been practically no losses of stock. There has been much snow, but sufficient bare ground to keep sheep and cattle going nicely.

NORTHERN MONTANA STOCK ALL RIGHT.

J. B. Long of Great Falls, Mont., says he does not anticipate any great loss this winter in sheep or cattle in Northern Montana. Conditions are favorable in most sections of that state, with the exception of Southern Montana, where severe storms and heavy snowfall have prevented much live stock from feeding.

STOCK IN MONTANA DOING WELL.

F. C. Sumner, Park county, Mont.: "Winter is not too bad in the Shields River Valley. Snow is about ten inches deep, but not crusted. Stock is standing the winter will. There is an abundance of hay on nearly every large cattle and sheep ranch, which insures a small loss. Only about one-half usual number of beef being fed.

CAN'T GET SOUTH DAKOTA CATTLE TO HAY.

Ed. Jones, prominent ranchman of the Cheyenne River country, says that there is plenty of hay along the Cheyenne, but the deep snow makes it practically impossible to get the cattle to the hay or the hay to the cattle. He predicts a severe loss of cattle unless the winter breaks early, with the percentage as heavy with the small owners as with the big ones.

MONTANA CATTLE WITHSTOOD FIRST STORMS.

According to advices from Montana, cattlemen are of the opinion that the outlook for herds is not promising. Most of the stock that was fattened and strengthened by the summer's excellent feed on the range has withstood the brunt of the first storm and cold weather well, but it is feared that continuance of such conditions as have prevailed lately would damage cattle severely.

Cost Less—Weighed More Than He Expected

Quitman, Mo., Jan. 12, 1910.

Clay, Robinson & Co.,
South Omaha, Neb.

Cattle got in Saturday, about three o'clock. They looked good to me, but as I didn't know what they cost I could not feel right. I put them at $50 per head, and, O! when I called the bank up and found the amount of the draft to be only $40 per head! And yet I did not know what they weighed, never found out Monday. Everyone that saw them put them at 1,000 lbs or more and cost $5.00 and better. I guessed them at 950 lbs. They are the biggest cattle I ever saw not to weigh any more than they did, and have the flesh they have. Smith "shure" delivered the goods this time. This is the first letter of the kind I ever wrote you or any one else, and I have had as good work done before, and often, both in buying and selling. It has been Clay, Robinson & Co. everywhere I could with me for twenty years. All I can say is, "go to it, Smith."

Yours truly, A. J. HOLT.

Reduce Wyoming Sheep Values.

The State Board of Equalization of Wyoming decided to reconsider the valuations placed on live stock at the meeting held recently. At the first meeting the same schedule of valuations made last year was adopted, but at the last meeting the board decided to lower the valuations of bucks for this year, as follows: Bucks and thoroughbred sheep, lambs and coming yearlings, are reduced from $10 a head to $8.00 a head, and bucks and thoroughbred sheep, yearlings and over, are reduced from $14 to $12.

Render Service that Satisfies.

W. L. Delcamp, Ottawa county, Kan., writes our Chicago house: "I always have a good word for Clay, Robinson & Co.; think they are best equipped for handling stock. They have salesmen of good judgment and get best prices for all kinds of stock. When I ship to Kansas City I always consign to your house and buy my feeders through you. When I have good heavy cattle they go to Clay, Robinson & Co. at Chicago. I am well satisfied with the firm and have always received good prices for my stock."

Education is the searchlight that enables a man to scan the horizon of his possibilities.—Henry Sabin.

GOOD WORK OF OUR SALESMEN

$9.05 Is highest price ever obtained for hogs at Chicago for this time of year and it is necessary to go back to 1882 to find a time when a higher price was paid. On Jan. 14 we sold at this price 35 head of 353-lb swine for J. Warnock, Washington county, Ia., 5c per cwt higher than any other hogs brought that day.

$8.75 J. E. Edwards, Iowa county, Ia., was on the Chicago market Jan. 18 with 251 lambs of 78 lbs average, which we landed at the summit—$8.75.

$8.75 The 111 native lambs of 83 lbs average which brought top price of $8.75 at Chicago on Jan. 12 were handled by us and marketed by J. Hoppingarner, Branch county, Mich.

$8.75 On Jan. 13 top of lamb market at East Buffalo was $8.75, which price our house secured for two different lots, which follow: For W. J. Miner, Livingston county, Mich., 175 head, and for B. H. Taylor, Shiawassee county, Mich., 46 head.

$8.75-$5.75 Summit of western lamb market at Chicago on Jan. 14 was $8.75, at which figure we landed 255 head of 80 lbs average for J. Marshall, Ida county, Ia. Top for western ewes same day was $5.75, we also obtaining this price for 152 head of 111 lbs average, also belonging to Mr. Marshall.

$8.62½ Emmet county, Ia., was represented on the Chicago hog market Jan. 11 with 60 head of 331 lbs average which we sold at above figure. They were sent in by Mrs. M. J. Sutherland.

$8.60 Kelley & Morris, Chaves county, N. M., marketed 269 lambs, averaging 73 lbs, at Chicago on Jan. 12 which we landed at the top price of $8.60 for such offerings.

$8.60 This is highest price western lambs have made at South Omaha for the season and was obtained by our house Jan 19 for two loads of 75 lbs average. They were marketed by Frank Graves, Buffalo county, Neb.

$8.60 Was the top price our East St. Louis house secured for two lots of lambs Jan. 18, which follow: For J. M. Carson, Rio Grande county, Colo., two double-decks, averaging 70 lbs, and for D. W. Rusk, Henry county, Mo., one double-deck of 79 lbs average.

$8.50 Frank Grast, Buffalo county, Neb., marketed at South Omaha on Jan. 18 a load of 80-lb lambs which our house landed at top price of $8.50.

$8.50 It is necessary to go back to June, 1907, to find a time when feeding lambs have sold as high as $8.50, which price we obtained at Chicago on Jan 18 for 520 head, averaging 67 lbs, belonging to A. Cullen, Cass county, Ia.

$8.45 Was extreme top on hogs at South St. Paul on Jan. 14 by 5c per cwt, being secured by our house for a load of 268 lbs average, belonging to Maerz Bros., Scott county, Minn.

$8.40 Top on hogs at South St. Paul on Jan. 17 was $8.40, obtained by our house for a lot averaging 261 lbs and originating in Minnesota.

$8.40 Is the highest price of the year for cattle at Chicago, and was obtained by us Jan. 19, top that day by 65c per cwt, for 17 beeves of 1,527 lbs average, marketed by John Baker, Muscatine county, Ia.

$8.25 Proved pinnacle by 25c per cwt of yearling sheep market at Chicago on Jan 18. This figure was secured by us for a lot of 93 lbs average, sent in by C. H. Rider, Muscatine county, Ia.

$8.00 Rankin & Cowden, Fremont county, Ia., were represented on lamb market at Chicago on Jan. 12 with 246 westerns of 73 lbs average which we sold on feeding account at top figure $8.00.

$8.00 Proved pinnacle by 20c per cwt of yearling sheep market at Chicago Jan. 13, obtained by us for two different lots, which follow: For S. Reed, Morgan county, Colo., 186 westerns, 82 lbs, $8.00, and for J. B. Jolliffe, Osceola county, Ia., 56 head, 81 lbs average.

$7.75 Jan. 17 our East St. Louis house sold for N. A. Beatty, Jackson county, Mo., 270 yearling wethers, averaging 73 lbs, at $7.75. This is as high a price as on record there for yearlings and was 35c per cwt above any other sale made that day.

$7.75 Is highest price of season at South St. Joseph for yearling wethers. This figure was secured by our house Jan. 18 for a double deck of 79-lb westerns, sent in by H. A. Gudger, Phillips county, Kan.

$7.65 This figure was top for feeding lambs at Chicago on Jan. 11 and was obtained by us for one load of 68 lbs average, marketed by W. E. Eggers, Pipestone county, Minn.

$7.40 Barring April, 1907, this price was the highest ever obtained for feeding yearling wethers on the Chicago market. It was Jan. 17 that we sold for E. Emery, Jefferson county, Ia., 107 head, averaging 82 lbs, at $7.40.

$6.50-$6.25 Former price was secured by us for 13 Angus heifers of 1,176 lbs average at Chicago on Jan. 13, being highest heifers have made in several weeks. Latter price was also secured by us on same day for a lot of 1,440-lb Angus cows, also highest for cows in some time. These offerings were fed and marketed by W. Schmick, Jo Daviess county, Ill.

$6.35 Was top of sheep market at Chicago on Jan. 18 by 5c per cwt and was 10c per cwt higher than any other firm secured for such offerings. We landed at this price 90 head of 133 lbs average, belonging to Columbus Canning Co., Columbia county, Wis.

$6.30 C. Hinebaugh, Saint Joseph county, Mich., was the owner and we the sellers of the 110 wethers of 97 lbs average which brought the top figure of $6.30 at Chicago on Jan. 17.

$6.10 The western wethers which made pinnacle of sheep market at Chicago on Jan 12 were sent in by J. Weiss & Son, Crawford county, Ia., and sold by us. There were 484 head of 100 lbs average in the consignment.

$6.00 Top for ewes at Chicago on Jan. 14 was $6.00. We landed a lot of natives, averaging 108 lbs, at this price for H. Collins, McCook county, S. D.

NATIVE BEEF STEERS.

Range of prices and bulk of sales of native beef steers this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Range.		Bulk.	
This week.....	$4.25	*8.40	$5.35@	6.75
Previous week.....	4.25	8.10	5.35	6.65
Year ago.....	4.00	7.15	5.25	6.60
Two years ago.....	3.50	6.20	4.75	5.75
Three years ago.....	4.00	6.90	4.85	6.35

*Sold by Clay, Robinson & Co.

Market for beef steers last week finished with prices generally steady with corresponding period previous week. As compared with like time of two weeks ago—the close of the old year—rates showed 25@35c advance. This is unusual at this time of the year, but short supplies thus far this year brought about the unexpected. The sharp decrease in the run from a year and two years ago is due in main to the bad weather conditions and poor rail facilites.

This week started out with total marketing of 28,985 cattle. This proved a big surprise to the trade. Milder weather, ability of railroads to transport stock more freely and anxiety of feeders to liquidate caused this big run. Beef steers were generally 10@15c lower, although there were numerous instances of heavy cattle showing 25c loss from last week's close. Trade was slow from start to finish. While bulk of supplies were yarded and ready to be shown at the earliest hour in several weeks, buyers did not take hold with any freedom until around 11 o'clock. Shippers and exporters were best buyers early. Sales were rarely above $7.25. One load of 1,347 lbs average went at $7.75. Bulk of transactions at $5.60@6.75. Tuesday's supply of cattle 7,122. Trade was again slow, with prices about steady. Many medium to pretty good steers were not shown. Best offered, averaging 1,207 lbs, went at $6.10. Wednesday's run of cattle 20,000. Beef steer buyers started out to pound the market, but sellers resisted bearish efforts and prices were generally steady. Top beeves made $8.40, obtained by Clay, Robinson & Co., and next best price was $7.65.

Revised quotations for all grades of native beef steers:

BUTCHER STOCK.

Bulk sales of beef cows and heifers, canners and cutters, and bulls this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	and heifers. Bulk cows		and cutters Bulk canners		bulls. Bulk	
This week.....	$3.60@	5.00	$2.65@	3.35	$4.25@	5.25
Previous week.....	3.65	5.25	2.50	3.25	4.25	5.15
Year ago.....	3.25	4.85	2.10	2.75	3.45	4.50
Two years ago.....	3.00	4.25	2.00	2.65	3.15	3.90
Three years ago....	3.10	4.75	1.75	2.50	3.35	4.35

In spite of the larger receipts of cows and heifers last week, prices at the close showed 10@25c advance over previous week's finish. Good demand from both local and outside sources were boosting factors. Good to choice corn-fed lots received most favor and rates for these were lifted to the highest level in recent months. Top heifers $6.50 and summit on cows $6.00, both sales being made by Clay, Robinson & Co. on Thursday. Prices for bulls were advanced 10c. In the face of increased receipts, rates for calves showed 25c advance.

At the start of this week fat corn-fed cows and heifers sold steady, but other kinds lost 10@15c from last week's close, these meeting with very dull demand. Top cows made $5.90, this price being obtained by Clay, Robinson & Co. for 13 head of 1,260-lb offerings. Bull market was steady to 10c lower, good butchers and bolognas going on former basis. Choice butchers reached $5.40 and heavy bolognas $4.50. Dull trade in calves and all price changes tended toward a lower basis. Practical top $9.75 and best strong weight calves $6.00. Best grades of cows and heifers sold steady Tuesday, but other kinds lost 10c. Some late arrivals went over unsold, owing to indifference of local buyers. No quotable change in bull market. Moderate run of calves and prices firm, with a prime lot of 128 lbs average reaching $10. Prices for cows and heifers Wednesday held steady and there was no quotable change in market for either bulls or calves.

Bull prices are still at a dizzy height and a sudden let-up in the demand would likely cause a drop of 50c.

Revised quotations for all grades of butcher stock and calves:

$8.40 —Top of Cattle market By 65c Per Cwt— $8.40

at Chicago on Wednesday, Jan. 19.

CLAY, ROBINSON & COMPANY

Obtained this price, the highest of year thus far, for 17 head of 1,527-lb Shorthorn and Hereford, mostly Shorthorn, beeves. They were bought by Doud & Keefer and fed and marketed by John Baker of Muscatine, Ia., who has been feeding cattle for thirty years and shipping to Clay, Robinson & Co. ever since their organization.

"This is the highest price I ever received for cattle. I want to say that the sale was far above my fondest hopes, and I am delighted with the way the cattle were handled in the Yards."

Clay, Robinson & Co. are O. K.

Three years ago	5.00	4.00 4.50	3.00 3.50

An urgent demand on late days of last week enabled sellers to dictate terms at the close and buyers were forced to pay generally 25c higher prices than previous week's finish. Kentucky distillery feeders bought liberally of 700 to 800-lb steers at generally $4.40@4.65. There was also good demand for fleshy steers from eastern corn feeders. Week closed with pens pretty well cleared of offerings.

While there was a fairly good run at start of week, local buyers were anxious to replenish their depleted stocks and demand from outside sources was good. This resulted in active trade on both Monday and Tuesday at firm rates with close of previous week. Offerings with quality, irrespective of weight, are meeting with quite free sale. When these offerings are scant in number the plain and medium classes meet with freer demand. Rates for stockers and feeders held steady Wednesday, with demand good.

Revised quotations for stocker and feeding cattle:

Good to choice feeders	$4 90 @	5 25
Poor to medium feeders	4 40	4 80
Good to choice stockers	4 25	4 70
Plain to medium stockers	3 75	4 15
Inferior to common stockers	3 25	3 65
Good to choice stock heifers	3 25	3 75
Common to medium stock heifers	2 85	3 15
Plain to good thin young cows	3 00	3 35

MILKERS AND SPRINGERS.

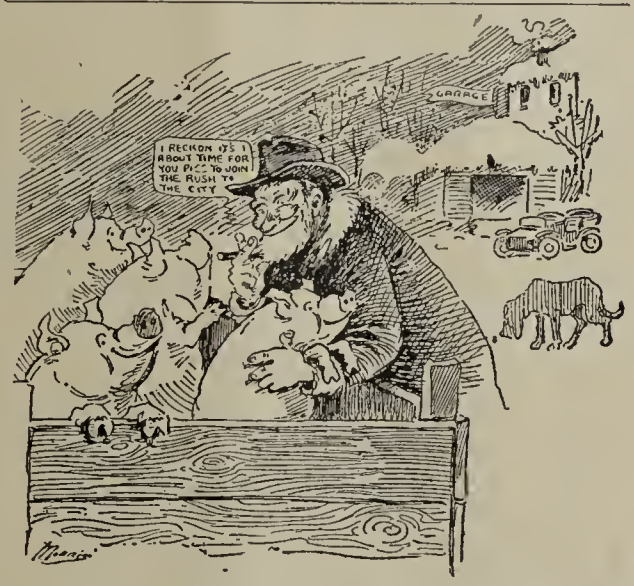
Revised quotations for milkers and springers:

Choice to prime	$50 00 @	65 00
Medium to good	35 00	45 00
Common to plain	25 00	30 00

SALES MADE BY CLAY, ROBINSON & CO.

Last week—30 good quality, Angus and Shorthorns, thin flesh, 936 lbs, $5.00; 21 fair to good quality, fleshy, 951 lbs, $5.00; 26 fair quality, Shorthorns, 920 lbs, $4.90; 14 fair quality, thin flesh, 800 lbs, $4 70; 16 fair to good quality, 870 lbs, $4.70; 19 fair quality, 836 lbs, $4.65; 39 fair quality, horned and dehorned, 970 lbs, $4.60; 8 medium quality, horned, 700 lbs, $4.25; 13 medium quality, 820 lbs, $4.25; 24 nice quality, thin, 690 lbs, $4 15; 21 fair to good quality, 620 lbs, $4.10; 12 plain quality, 639 lbs, $3.85; 6 common, 500 lbs, $3.00.

Monday, Jan. 17—26 Illinois, 911 lbs, $5.00; 22 Iowas, 895 lbs, $5.00.



Wise Suggestion to Owners of Matured Swine.

Hogs.

Bulk sales of hogs of respective weights this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Bulk 200 to 250 lbs.	Bulk 260 lbs and heavier.	Bulk 135 to 195 lbs.
This week	$8.55@8.80	$8.60@8.85	$8.45@8.65
Previous week	8.45 8.80	8.50 8.90	8.30 8.65
Year ago	5.90 6.50	6.05 6.55	5.65 6.30
Two years ago	4.20 4.45	4.25 4.50	4.15 4.40
Three years ago	6.60 6.75	6.65 6.75	6.55 6.70

A flighty hog market Thursday of last week. Opening 15@20c higher, late trade was about 5c lower than at start. Top was $8.90 and bulk made $8.60@8.75. Following day early trade was 10@15c higher, with 5@10c of this gain wiped out later in the session. Top $9 05, a record price for January and highest since 1882, being obtained by Clay, Robinson & Co. for a load of 353 lbs average, marketed by J. Warnock, Washington, Ia. Most selling was at $8.70@8.90. With speculators and shippers out of the market on Saturday, trade was on bottom and generally 25c lower than Friday morning. It was a demoralized week-end market. Summit was $8.90, but $8.60@8.75 gathered in most mixed stuff. Armour put up a drove at $8.60.

On initial market day this week receipts were 34,265. Trading was very uneven, yet averaged a little higher than general market Saturday. Summit was $8.87½ and sales in main at $8.50@8.80. Another irregular market on Tuesday, but as good as Monday's best time. Run was 18,744. Shippers did most of the early business, packers holding back until a late hour in the session. A speculator paid up to $8.90, but transactions higher than $8.80 were "scratchy." Sales largely at $8.50@8.80. Run of hogs Wednesday 30,000. Under poor support from both speculators and eastern shippers, packers had the market pretty much their own way and lowered prices 10@15c. Summit was $8.80 and bulk sales $8.50@8.70.

Revised quotations for all grades of hogs:

Fair to choice heavy shipping	$8 70 @	8 80
Fair to choice butchers	8 60	8 70
Fair to choice medium weights	8 55	8 65
Good to choice assorted light shipping	8 50	8 60
Poor to good heavy packing	8 50	8 60
Poor to good mixed packing	8 45	8 60
Poor to good light bacon	8 40	8 55
Pigs, 115 to 140 lbs	8 00	8 25
Pigs, 110 lbs and under	7 50	8 00
Stags	9 00	9 60
Boars	4 50	6 50
Governments	2 00	5 00

Sheep and Lambs.

Following shows top prices and bulk of sheep and lamb sales this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Sheep Top.	Sheep Bulk.		Yearlings Bulk.		Lambs Top.	Lambs Bulk.	
This week	*$6.35	$5.25@6.00		$7.25@8.25		$8.85	$8.00@8.65

*Sold by Clay, Robinson & Co.

A light run on late days of last week enabled sellers to repair the break made in the sheep market early in the week and closing rates showed only about 10c loss from the corresponding time the previous week. Sheep were scarce and slaughterers seemed to want them. However, lambs were in heavy proportion to the week's total arrivals and the week closed with rates for these 25@35c lower than finish of the previous week. Owing to effort of buyers to keep the top price down and along with the strong demand for offerings suitable to take back to the country for longer feeding, medium lambs are selling unusually close to the top grades.

At the start this week total receipts were 29,030. Sheep and yearlings went steady to strong, but most lambs, after a few catch sales early, sold 15@25c lower than Friday. The medium grades bore the brunt of the decline. Top lambs $8.75, with summit on yearlings $8.25 and pinnacle on sheep $6.30, this sale being made by Clay, Robinson & Co. The Tuesday run was 9,480. Prices ruled steady to strong. Trade in sheep and yearlings was active, but the selling of lambs was attended with less freedom. Summit on lambs was $8.75, with Montanas, averaging 80 lbs, at $8.40, and shorn 73-lb westerns at $7.65. Best yearlings brought $8.25 and summit on sheep $6.35, both sales being made by Clay, Robinson & Co. All price changes on Wednesday tended toward a stronger basis, with marketing

Hay-Fed Cattle at $6.00.

Included in the week's total receipts of cattle was a small number of hay-fed cattle. Included in these were the L. L. Swan offerings from Montana, which were sold by Clay, Robinson & Co. at a range of $4.75@6.00, the latter price being top of week's trade for hay feds. These were of a good fat class, while those at $5.60 were fairly good and such as went at $5.00 were of a rather common grade. The feeders sold at $4.75, being horned and dehorned and of fair to good quality. Above cattle were first hay feds here this season and Mr. Swan expressed himself well pleased with our sales which follow:

L. L. Swan, Livingston. 15 Mont. 1,146 lbs	$6.00
L. L. Swan, Livingston, 30 Mont. 1,167 lbs	5.60
L. L. Swan, Livingston, 15 Mont. 1.010 lbs	5.00
L. L. Swan, Liviugston, 28 Mont. feeders, 845 lbs	4.75

Load Cattle Friday and Sunday.

Frequently cattle from Nebraska, South Dakota and Kansas arrive at Chicago a day later than the shippers bargain for. Many intended for the Monday market fail to make their appearance nntil Tuesday. As this is nsually an off-market day for good cattle, on account of the absence of eastern shippers, they have to be carried over until Wednesday. We would advise shippers from the above mentioned states to load the cattle on Friday where they are intended for the Monday trade at Chicago and those on Sunday where figured to have them on the Wednesday market.

READ THIS CHALLENGE OFFER

on the ECONOMY CHIEF CREAM SEPARATOR

We believe the Economy Chief is the best and most satisfactory cream separator on the market today, regardless of price. We believe it to be the best in design, the closest skimming, the easiest running, the quickest cleaning; in short, the greatest separator value that money can buy. We have absolute confidence in the Economy Chief and we want every owner of cows to share this confidence with us. We want everyone interested in buying a cream separator to have an opportunity to find out for himself which is the best machine, which is THE SEPARATOR TO BUY.

HERE IS OUR CHALLENGE OFFER

Deposit in your local bank the price of the Economy Chief Cream Separator you want to try, or

Send us a letter of reference from your banker stating that you are a reliable person; then

We will ship to you at once, freight prepaid, the separator you order, with the understanding that you are to set it up and try it on your farm for sixty days. Give it the hardest kind of a test; if possible try it alongside some other well known standard make, such as the Empire, United States or De Laval. Compare our machine in actual operation with any other. Note the amount of cream you get from each. Compare ease of running, time consumed in cleaning, and make any other comparisons you can think of. Never mind about the price; what you want from a cream separator is CREAM. If any other machine selling even as high as $85.00 or $90.00 will do better work, will skim closer, will give better satisfaction than our Economy Chief at $42.50, our advice to you is, buy the other machine and send ours back.

When you have finished your sixty-day test, if you are perfectly satisfied that you have the best separator on the market, write us saying that you want to keep the machine, and we will send you a bill for your separator and the freight charges we paid on it.

If at the end of sixty days you are not satisfied that the Economy Chief is the world's best separator, you don't need to even tell us the reason for your dissatisfaction unless you wish to; just drop us a line saying you don't want the machine. We will then send you a return address card to tack on the box **and we will pay you for your time and trouble in making the test, setting up the machine, repacking it and hauling back to the station. You set your own price. We don't want you to lose one penny in trying out the Economy Chief for sixty days.**

Note the Reduced Prices for 1910

WE RECOMMEND THE BIG 600-POUND SIZE

No. 23T51 New 1910 Economy Chief. Capacity, 250 to 300 pounds, or 120 to 145 quarts per hour. Price reduced to.....	**$27.90**
No. 23T52 New 1910 Economy Chief. Capacity, 350 to 400 pounds, or 170 to 195 quarts per hour. Price reduced to.....	**33.80**
No. 23T54 New 1910 Economy Chief. Capacity, 600 pounds, or about 290 quarts per hour. Price reduced to.....	**42.50**

If you want to send cash with your order, as most of our customers do, you won't lose any of the benefit of the above CHALLENGE OFFER, for if at the end of sixty days you decide you don't want the machine, if you think after a sixty days' trial you can get along just as well without a separator, or if you have seen a separator in operation giving better results than the Economy Chief, just send it back at our expense, tell us how much we owe you for freight charges, hauling from and to the station, setting up and repacking, and we will promptly send you every cent of the purchase price, plus your bill.

This Is Our Challenge Offer and Our Whole Cream Separator Proposition!

FILL OUT THIS SPECIAL ORDER BLANK

☐ **CASH WITH ORDER.** If you are enclosing the full price, simply write the amount in this square.

☐ **CASH IN BANK.** If you have deposited the purchase price of the separator with your local banker, make an X mark in this square and enclose your certificate of deposit properly made out and signed by your bank.

☐ **BANK REFERENCE.** If you prefer not to send us the money, or to hold it in the bank subject to our order, make an X mark in this square and enclose a letter of reference signed by your banker, telling us that you are a responsible property owner.

☐ **FREE DAIRY GUIDE.** Nearly everybody has a copy of our big General Catalog or our Cream Separator Catalog, but if you have not and want more information before ordering, make an X mark in this space.

Live Stock Report Please write plainly and carefully.

We think our Economy Chief Separator is the best machine in the world. We want to sell you an Economy Chief if you think the same as we do, not otherwise, and we make this challenge offer to give you a chance to find out all about the Economy Chief **at our expense** and to prove our confidence in our own machine.

IF THE MAKER OF ANY OTHER CREAM SEPARATOR IN THE WORLD BELIEVES IN HIS MACHINE AS WE BELIEVE IN OURS, LET HIM MAKE YOU THE SAME PROPOSITION WE DO.

That's all!

What They Say About Us.

CHICAGO.

M. Denney, Mahaska county, Ia.: "I was well pleased with sale of cattle."

George K. Gilson, Mercer county, Pa.: "Received cattle and was very much pleased with them. Thanks for service."

A. Johnson, Boyd county, Ky.: "Load of cattle arrived all right. If we had been there and picked them we would not have been better suited. Will give you our influence in this country. Many thanks."

I. L. Cripe, Ida county, Ia.: "In regard to hog market letter that I have been receiving, will say that I am very thankful for it."

R. Heven, Madison county, Ia.: "Accept my thanks for selling those little cattle for price you did. It was much more than I expected."

Elmer Bumgardner, Des Moines county, Ia.: "Will say that I am well satisfied, as the cattle brought fully as much as I expected."

Morgan L Miers, Decatur county, Ind.: "Load of feeders arrived. Look like they were worth the money. Thank you for pains in selecting and grading the cattle."

J. C. Caldwell, dealer in fancy draft and saddle horses, Cedar county, Ia.: "Received returns from my sheep and was very well satisfied. I only wish that you had had the other sheep, as I could have put a few more dollars in the bank. You will get my consignments for some time to come. Thank you for the promptness in your returns."

EAST BUFFALO.

C. M. Link, Seneca county, Ohio: "Received account sales and am satisfied with same."

Chas. C. Luce, Genesee county, Mich.: "In regard to lambs, I appreciate the manner in which you sold them and also the price you got for them."

C. H. Eaton, Clinton county, Mich.: "Am in receipt of your account of sheep and lambs and thank you for the promptness in which you have handled this car for us."

SAVE $10—Get My Factory Price—

Freight Prepaid Before You Buy Any Plow

Sit right down and get a postal or letter off to me by next mail. I have a proposition to make you on a plow that is a world-beater. First, I'll prove to you that the Monmouth Plow is lighter to handle, easier on horses, and does better work than any other plow you can buy at **any** price. Then I'll prove that my low, direct-from-factory price will save you a ten-dollar bill. I know this to a certainty—and to prove it all to you, I say, "Try this plow for a month at my risk, so you'll **know** what a bargain you are getting before you agree to keep it." Understand, I'm going to **prepay** the freight to you—and pay the freight back if you don't find it the top-notcher of them all. I just want your permission to send you a

MONMOUTH PLOW ON 30 DAYS' FREE TRIAL

But one day's work will prove to you that this is the most easily handled, steadiest running, lightest drawing plow that ever turned a furrow. It has exclusive features that other makes would **like** to use, but they **can't**—not till our patents run out. For instance, it's positively the only plow that actually carries the beams on top of the frame. No pressure on bottom of furrow. No friction against bank of land—can't be, for there's no land side. Don't need any. Has Direct Beam Hitch, Single Bail and Horse Lift, and "First Point" action, which is easiest and quickest going into and coming out of the ground—all controlled by foot levers.

BIG BOOK FREE, pictures and describes our Gang, Sulky and Walking Plows, Two-row and One-row Cultivators, Tongueless Disc Harrows, Spike-tooth Harrows, Harrow Carts, Harrow Attachments for Plows, Farm Gates, etc.—all sold at factory prices, freight prepaid, on 30 days' free trial. Satisfaction guaranteed. Get book and make selection. Address letter or postal **now** to me, The Plow Man, with

Monmouth Plow Co., 139 South Main St., Monmouth, Ill.

Lightest Draft

Steadiest Running

19 Improved Features—All Found on No Other Spreader.

Guarantee Unlimited in Time—the ONLY one of the kind.

PRICE Cut to $83.50 Freight Prepaid

on the manure spreader **you** want—the spreader that has eclipsed all others so completely that no manufacturer now hopes to compare his machine with this. Always the **leader,** it now jumps many more years ahead of the imitations, with 19 improved features, all found on no other spreader. Yet, note the prices, **delivered to you, freight prepaid:** In Michigan, $83.50; in Indiana or Ohio, $85.00; in Illinois, $86.50; in Iowa, Minnesota, Wisconsin or Missouri, $90.00. Write for prices for other states. These prices equal or beat prices asked for other spreaders—yet we will prove to you that they are mere makeshifts when compared with the latest improved—

Detroit-American—30 Days' Trial—Cash or Credit

Made in five sizes—of **guaranteed capacity.** Stronger and lighter running than any other spreader—more steel used; all-steel cylinder—all-steel rake and end gate; twice as effective as any others and indestructible; the **only** direct chain drive—no gears to create draft and break; simplest feed; six changes. In fact, every feature from 40 to 100 per cent better than any other machine at any price.

Prove it. Our trial offer IS free—no money down; no deposit. Just order.

Our Wagon-Box Spreader $42.50 Freight Paid

Delivered in Michigan and only a trifle more in other States. The limit of big value in a box spreader. Guarantee, trial, credit, all go on this, too.

FREE BOOKS: The best published on value of manure; how to spread, etc., and how to buy at the right price. Also shows and prices the Detroit-American Tongueless Disc Harrows—the **only genuine** tongueless disc, and our full line of Detroit-American Cultivators. Don't buy anything in these lines till you have our propositions to you. Just send your name and address. Do it today.

THE 1910 DE LAVAL CREAM SEPARATOR

In keeping with the established De Laval custom of making the De Laval Cream Separators as much better each year as possible, the De Laval machines for 1910 show even greater perfection than they have in the past.

The dairy farmer who buys a 1910 De Laval can feel assured that he has by far the best cream separator ever made anywhere at any time.

The dairy farmer who lets the year or even the month pass by without at least seeing and examining the 1910 De Laval will be doing himself an injustice.

The opportunity of examining and trying a 1910 De Laval right at his own home is open, free of all cost or trouble, to every dairyman who will simply say the word.

Next to a De Laval machine is the De Laval catalogue, free for the asking and containing a separator education in itself.

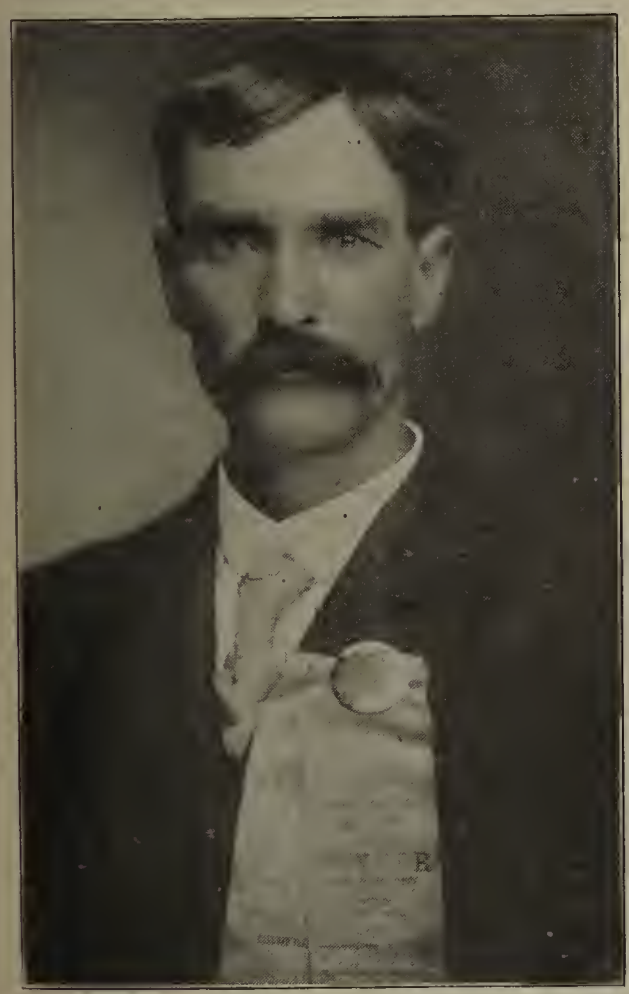
Clay, Robinson & Company's LIVE STOCK REPORT

Vol. 20 | Chicago, Friday, January 28, 1910 | No. 4.

Big Shrinkage in Meat Demand.

The widespread current agitation against high prices for beef, pork and mutton caused a big reduction in the demand for meats this week. Buyers took in sail and hugged close to shore. In consequence there was a sharp price loss in all departments of the live stock trade, and dull, draggy markets were the rule. It has been a blue week for the selling interests; in fact, the most unsatisfactory one in some time. Beef steer prices were lowered anywhere from 25@40c from early last week, cows and heifers 50@60c, bulls 50@60c, veal calves $1.00@$1.25 and stockers and feeders 25@40c. Hog rates were slashed viciously, loss from the start last week being 45@55c. Sheep sold 25@45c under then and lambs 40@50c. Fortunately the feeders did not get panicky. If they had, demoralized markets would have ensued. Until the storm of agitation against meat prices blows over, there is little hope of preventing buyers from making still further inroads on the price list for cattle, hogs and sheep.



G. F. LUCORE, ARRIBA, COLO.

He was the breeder and owner of the Grand Champion load of feeding cattle at the 1910 National Western Live Stock Show, held at Denver recently. These cattle were high-grade Angus yearlings and were sold by Clay, Robinson & Co. in the auction at the record price of $8.00 per cwt, averaging 793 lbs. Mr. Lucore and his brothers are well-known and extensive breeders of Angus cattle, having over 100 pure-bred steers and 150 high-grade cows. He has been a breeder of the black cattle for the past thirteen years. That he has been successful is shown by the many prizes his cattle have won during all those years and the high position he occupies in western cattle breeding circles.

LOVING CUP FOR D. W. BLACK.

Sterling silver loving cup given D. W. Black of Lyndon, Ohio, by Ohio friends on Jan. 4 at a banquet of Ohio Live Stock Association, Columbus, in recognition of the distinction he has brought to Ohio in winning three times the grand championship in carload lots of fat cattle and sheep at the International Live Stock Exposition at Chicago.

There are Many Orders for Cars.

Railroad companies are utterly unable to meet the demands for stock cars. This week shippers from Iowa told of one place where there were orders for 100 cars Monday and only five were to be had, while at another station five cars were wanted and none were to be had. This shows the extremes. Rail lines in other Middle West states are in just as bad condition. Storms, cold weather and lack of motive power prevent due return of empty cars to loading stations. Yet "it's an ill wind that blows nobody good." Had all of the orders for cars been filled the markets would have been swamped, and it would be hard to even guess how much prices would have been lowered.

Why Meat is High Priced.

"It isn't the fault of the stockman, the packer or the butcher," says B. O. Cowan, secretary of the American Shorthorn Association, regarding the agitation against the high price of beef. "Two reasons can be given for the high prices of meat, which we all admit. These are the scarcity of cattle and the high price of feed. City people, not conversant with these conditions, are prone to think the packer is forcing the price up for his own profit. This is not so. Of course the packer is in the business to make money, but I do not think he is demanding an exorbitant profit. He is forced to allow the feeder a fair margin of gain, and to do this profitably to himself he is obliged to raise the price.

"With corn selling from 50@60c a bushel the stockman has to get from 7@9c a pound for his product in order to make money. Of course the packer is not going to meet this increase out of his own pocket. It's up to the man who buys.

"Feed is high principally because we have not had a bumper crop in this section for several years. Two or three years of bumper crops and you would see the price of meat go down. As to the other difficulty—scarcity of cattle—it can be attributed to many things. It's a fact, though, you can accept that. According to Secretary Wilson's recent report there are 2,100,000 less cattle in the country than there were one year ago.

"The breaking up of the big ranges some years ago and the consequent breaking up of the big herds is partly responsible. Then again the small feeder is afraid to feed many cattle on account of the high price of corn. I couldn't say whether meat will go higher. It certainly doesn't look very encouraging. But I can say this: Those people in Ohio, and other places, who have boycotted the meat industry in an endeavor to lower the prices are wrong. It isn't the packer and it isn't the butcher or stockman. It's just conditions."

W. P. HOGARTY, LONGMONT, COLO.

This gentleman is active manager of the Colorado Stock Feeding Co., which firm fed and exhibited the Grand Champion load of fat cattle at the 1910 National Western Live Stock Show, held at Denver recently. These cattle averaged 1,405 lbs and were sold by Clay, Robinson & Co. at the top price of $7.00 per cwt. In addition to taking first honors in fat cattle, they also captured first and second prizes on fat yearling sheep and the champion load of wethers. Clay, Robinson & Co. sold both lots at $7.60 per cwt. Mr. Hogarty deserves much credit for the cattle and sheep being in such excellent show condition, as the feeding of the same was under his personal direction. The above company is composed of Frank H. Church and Bernard Beer, with headquarters at Denver, and Mr. Hogarty. They are extensive feeders of cattle and sheep, having at the present time around 4,000 cattle and 6,000 sheep in their feed lots at Longmont, Colo.

ANOTHER VIEW OF THE LUCORE GRAND CHAMPION LOAD OF FEEDING CATTLE.

These Angus yearling steers, bred, owned and exhibited by G. F. Lucore, Arriba, Colo., at the 1910 National Western Live Stock Show, were sold in the auction ring by Clay, Robinson & Co. at the record-breaking price of $8.00 per cwt, averaging 793 lbs. The Champion Feed Co. of Tarkio, Mo., bought them. This price was 65c per cwt higher than the previous highest sale on reoord, paid at the 1909 International Show.

Louis Pfaelzer is Dead.

Another veteran Chicago packer and cattle buyer has passed away. Louis Pfaelzer, senior member of the packing firm of Louis Pfaelzer & Son, died at Excelsior Springs, Mo., last week, a victim of pneumonia. Surviving him are two daughters and four sons. Mr. Pfaelzer was born in Germany, 1844, and oame to Chicago 20 years later. He began his career in the live stock trade in the old Myrick Yards. He also was a cattle buyer at the old Fort Wayne Yards and upon the establishment of the Union Stock Yards he began bnsiness here and continued until his death. From 1865 nntil 1880 he was a buyer for eastern concerns, among them for Meyer Goldsmith of New York, who in earlier days was the largest exporter of live eattle into the British markets. In 1880 he went into the meat packing business in Chicago. As well as operating one of the largest independent packing plants in Chicago, Mr. Pfaelzer was for seventeen years bead cattle buyer on the Chicago market for Schwarzschild & Sulzberger Co., bnt ceased this connection several years ago. Mr. Pfaelzer as a business man and jndge of live stock had a high standing in the packing trade and his genial nature made him hosts of friends.

Good Meat Dressing Record.

Some very high dressing records were made in the meat demonstration at the Iowa State Agricultural short course. One of the champion Berkshire barrows at the recent International Show dressed out 88.2 per cent, which lacks bnt .4 of 1 per cent of the highest record ever made in Chicago. The Angus steer First Choice touched a high mark by dressing out 69.9 per cent. John Gosling of Kansas City, who conducted the demonstration, stated that this was the highest dressing record he had ever known to be made by a steer of this age. Roan Jim dressed 68 8 per cent. The difference in appearance between the marbled loins of the steers and the slab sidedness of the canner cow was a revelation to some of the students.

Fine Journalistic Effort.

The Jannary number of "Bit and Spur" is a beautiful produotion. From its artistle front cover to its last page of "ads" it is full of interest. The report of the horse show at the great International is a unique piece of work. It is racy, readable and reflects a lot of philosophy. The editor-in-chief, Capt. Waddell, who attended the show, has done his work well. He knows his subject and he never lets your interest flag. If yon are a lover of the horse be sure and subscribe for this journal. It is published by the Angas Company, 389 Fifth Avenue, New York, at $3.00 per year.

J. C.

No Loss of Dakota Sheep.

The hnngry demand for breeding ewes at all market points last fall and the notable scarcity of this class of stock among the range offerings, made tt easy for market writers to detect a semi-famine of she stock in the West, but word comes from South Dakota that exactly the opposite condition is true in that part of the country.

"Sheep growers around Belle Fourche, S. D., are better snpplied with breeding ewes than they have been for years," declared H. L. Barnett of that place to the South Omaha Journal-Stockman. "One neighbor of mine has 50,000 head of breeding ewes on the winter range and the practice of cnlling out and marketing the poorer ewes in the fall is becoming more wide-spread each year. I should judge that there are right around 75,000 head of lambs on hay feed, bnt only a small portion of them will be marketed, as practically all of them will be held over until this fall.

"We have not suffered at all for want of feed on account of the severe winter weather lately. In fact, I do not believe that there is a single stockman who has experienced losses of any consequence. It has been pretty cold of course, but the snowfall has been rather light and sheep and cattle have had little trouble getting down to the grass."

Care for Sore Mouth Sheep.

J. S. McCnmsey, Malheur county, Oregon: "I saw quite an item in the REPORT some time ago from some Wyoming man about the sore month among sheep. We have been bothered here with the sore mouth more this winter than ever before, but the extreme cold weather and frost on the ground is the canse of it. I have had the first sheep with this disease this winter since I have been in Oregon, but have been very successful so far in keeping the same in check by using lard and tnrpentine and going through the sheep every morning and catching every one that is infected."

U. S. Loses; Argentina Gains.

While the United States is face to face with a serious problem in connection with its meat supply, Argentina, with its inexhaustable resources, has stepped in and captured the British markets, writes London M. Douglas in the Scotsman, Edinburgh, Scotland. It is interesting to notice that in the qninquennial period 1904 to 1908 inclusive there has been a steady lowering of the meat imports from the United States, and as steady an increase in those from Argentina.

Quantities of dressed meat of all kinds imported into the United Kingdom from Argentina and the United States:

Argentina—

1904. Cwts.	1905. Cwts.	1906. Cwts.	1907. Cwts.	1908. Cwts.
3,327,841	4,284,786	4,431,178	4,308,453	5,444,086

United States—

1904. Cwts.	1905. Cwts.	1906. Cwts.	1907. Cwts.	1908. Cwts.
7,110,827	6,959,077	7,021,228	6.108,302	5,517,487

It will be noticed in this comparison tbat the figures for 1908 are almost equal. During 1909 there has been an even greater increase of the imports from Argentina, which now has left the United States far behind, and has assumed the position of being the principal source of the over-seas meat supplies which reach the United Kingdom.

In connection with the items of refrigerated and frozen beef, our snpplies from all over-seas sources run out as follows:

From.	Cwts.	Value.
Argentina	3,500,307	£ 6,102,926
United States	1,432,142	3,268,584
New Zealand	347,872	541,600
Other countries	351,668	395,270
Totals	5,631,989	£10,308,380

This shows that 60 per cent of the frozen beef we import is derived from Argentina. Those of frozen mutton 30.8 per cent come from the same source.

Total imports of frozen mutton into the United Kingdom are valned at over £8,000,000, sum in 1908 being made up thus:

From.	Cwts.	Value.
New Zealand	1,737,606	£3,452,584
Argentina	1,556,746	2,512,656
Australia	636,034	1,195,259
Netherlands	267,222	641,135
Uruguay	63,563	100,966
Other Countries	130,088	245,857
Totals	4,391,989	£8,148,457

Carl A. Rosenfeld, well-known breeder of Angus cattle at Kelley, Ia., was on the Monday market with a lot of Angus heifers of his own breeding which averaged 1,225 lbs and were sold by Clay, Robinson & Co. at $5.75. Mr. Rosenfeld is not only prominent in Angus cattle breeding circles, but also is a pastmaster in the art of preparing cattle for the shambles.

FIRST PRIZE CALVES OF 1910 NATIONAL WESTERN LIVE STOCK FEEDER SHOW.

These Angus steer calves were bred and owned by P. H. Boothroyd of Loveland, Colo. They were sold in the auction by Clay, Robinson & Co. at $6.35 per cwt, averaging 508 lbs.

LIVE STOCK & CROP CONDITIONS

REPORTS GATHERED AND RECEIVED BY CLAY, ROBINSON & CO.'S HOUSES AT THE NINE LEADING LIVE STOCK MARKETS.

ALL'S WELL IN VALLEY COUNTY, MONT.

J. C. Duncan, Valley county, Mont.: "Our range is in good shape and stock doing well."

CATTLE DOING FINE IN BEADLE COUNTY, S. D.

Phillip Smith, Beadle county, S. D.: "It is a hard winter here, but cattle are doing fine so far. Snow is very deep."

LOTS OF WINTER IN MONTANA.

Charles O'Donnell, Billings, Mont: "We are having lots of winter out here yet. Snow all over the hills and no sign of a let-up."

HOGS SCARCE IN MACON COUNTY, ILL.

J. M. Turner, Macon county, Ill.: "Fat hogs are very scarce in this locality, there not being over two cars being in ten miles square."

CATTLE ARE THIN IN BARNES COUNTY, N. D.

Ed. M. Larson, Barnes county, N. D.: "Stock is scarce and what there is is very thin just now"

FEED SCARCE AND HIGH IN POWESHIEK CO., IA.

A. E. Jones, Poweshiek county, Ia.: "There is but little stock on feed in this part and will be less towards spring as feed is scarce and high. No disease in hogs."

RALLS CO., MO., CATTLE FEEDERS TIRING.

H. H. Cleaver, Ralls county, Mo.: "There are not many cattle on feed here and those who are feeding are getting tired of it. Corn is worth 65@70c a bushel."

WILL WINTER MANY CATTLE IN OSAGE COUNTY.

A. G. Henry, Osage county, Okla.: "Corn is worth 50c a bushel here. There are no cattle on full feed. A good many steers will be wintered in the Osage country."

FEW FEEDING IN MADISON COUNTY, IA.

James McNamara, Madison county, Ia.: "There are not many cattle, hogs or sheep on feed here at present. We are having lots of cold weather and feed is getting scarce and high in price."

MOST FAT HOGS GONE IN SHELBY COUNTY, MO.

T. W. Herbst, Shelby county, Mo.: "Live stock is doing a little better now, as it is not so cold. Most of the hogs that have been on feed for some time have been marketed. Some few are being fed now for spring."

FEED IS HIGH IN COLORADO.

J. S. Elder, Laramie county, Colo.: "This has been a very hard winter on all stock, with high prices ruling for hay and other feed. However, sheep and cattle that are in the feed pens have been doing fairly well."

CORN HIGH AND LITTLE FEEDING.

Frank White, Woodson county, Kan.: "There is no feeding being done in this vicinity this winter, corn being too scarce and high. Fat hogs are about all gone. Not many stock hogs in the country and scarcely any stock steers."

FEEDING FEW CATTLE FOR BEEF IN COLORADO.

Al. A. Neale, breeder of Shorthorn cattle, Montrose county, Colo.: "Stock cattle are wintering fine here this winter, as the ground is frozen. We all feed on the ground. There is no snow to speak of. We are feeding very few cattle for beef this winter."

VERY HARD WINTER ON CATTLE IN ILLINOIS.

G. R. Spencer, Greene county, Ill.: "There are no fat cattle or hogs here to speak of. Corn is worth 54c per bushel. Not much feeding being done. It has been very cold and a bad sleet for over two weeks; just now going off. Very hard winter on cattle."

SOUTH DAKOTA RANGE CATTLE DOING WELL.

H. R. Davis, Perkins county, S. D.: "We have been having some pretty snug winter, but range cattle are doing fine. There is plenty of feed for the next sixty days. Sheep, however, have not done so well, but there has been no losses to speak about thus far."

CONSERVATIVE FEELING AMONG NEBRASKA FEEDERS.

A. J. Hunter, Hamilton county, Neb.: "Feeding outlook is not very promising owing to high price for stock and corn. This is discouraging to feeders, to say the least. There is the most conservative feeling that ever prevailed among feeders here for many years."

SEVERE WEATHER IN OHIO.

W. S. Woosley, Madison county, Ohio: "We are having a very severe winter. There is much snow and ice and severe cold. Stock is doing fairly well and eating a great deal of feed. Corn is scarce and high. There are not many cattle on feed. Hogs are scarce and high."

NORMAL LOSSES IN LARAMIE CO., WYO.

H. Ralph Hall of the Hall Live Stock Co., Laramie county, Wyo.: "December and January up to the 10th were very cold and more than the average snow fall, but those since have helped range conditions. Ranchmen have more than one-half of the hay crop on hand and to date do not think that stock loss is more than normal."

MONTANA WEATHER SEVERE, YET FEW LOSSES.

Pierre Wibaux was at Chicago on his way from Miles City, Mont., to Paris, France, where he spends the greater part of the year. Mr. Wibaux says the winter has been rather severe in Montana, but thus far there have been no losses in cattle and very little in sheep. In Wyoming sheep losses have been very heavy, according to him.

NO LOSSES IN BUTTE COUNTY, S. D.

Louis Matson, Butte county, S. D.: "We are having the most severe winter we have had for several years. Snow is a foot deep on the level and crusted. No loss of live stock so far and there is an abundance of feed to be gotten among the farmers. I do not look for any loss unless the severe weather should continue and the snow get so deep that the stock could not get to the hay."

LOOKS FOR MORE HOGS IN NORTH DAKOTA.

F. W. Henkel, who is a resident of Cando, N. D., and one of the successful business men and farmers in that section, had a car of hogs to our house at South St. Paul Jan. 24. He remarked that both cattle and hogs were scarce in his neighborhood, but looked for the depleted supply of hogs to be soon replenished, judging from the keen demand manifested for brood sows.

OREGON SHEEPMEN SUPPLIED WITH GRAIN.

J. S. McCumsey, Malheur county, Ore.: "We have had the coldest weather here in years, from what old-timers say. There has been lots of snow and about forty days of extreme cold. If it continues there will be heavy losses of sheep, but at present there is not much loss. Most of the sheepmen are well supplied with grain and the weather the last two days is rather encouraging, as it has been quite warm."

Number and Value of Live Stock in United States.

A deficit in the supply of live stock available for food and the big bulge in the valuation were brought to light by the annual report of the Department of Agriculture, made public this week. The report indicated the prosperity of the American farmer by placing the total value of all live stock on the farms Jan. 1, 1910, at $5,138,486,000, compared with $4,525,259,000 a year ago, an increase of $613,227,000.

DECREASE IN MEAT ANIMALS.

A decrease of 7,333,000 in the number of cattle, hogs and sheep on the farms and ranges of the United States Jan. 1, 1910, as compared with the number on Jan. 1, 1909, and an increase of $177,185,470 in the total value of these animals is shown.

Beef cattle, of which there were 47,279,000, were valued at $19.41 a head, making a total of $917,685,390, contrasted with $863,638,710 a year ago, when there were 49,379,000 in the hands of the farmers. The average price of $19.41 is the highest on record and $1.92 higher than a year ago.

RECORD VALUE OF HOGS.

Hogs also were valued at more money than ever recorded before, their average value being placed at $9.14, or $2.59 higher than a year ago. As there were 47,782,000 head valued at that figure, the total valuation was $436,727,480, as compared to $354,794,000 a year ago. The 56,084,000 sheep (excluding lambs) on the farms and ranges were valued at $6.55 per head, or a total of $367,350,200, against $192,367,120 a year ago, when the number on the farms was 1,132,000 head smaller and the average value 65c lower.

The total value of meat animals (horses, mules, and milk cows being excluded) was, according to these figures, $1,587,854,150, as contrasted with $1,410,668,680 Jan. 1, 1909, and the number was 1,587,854,150, against 1,416,713,120 a year ago.

LIVE STOCK VALUES INCREASE.

Yearly average prices of live stock on the farms on Jan. 1 of the under-mentioned years, were reported as follows:

	Milk cows.	Other cattle.	Hogs, all ages.	Sheep.
1910	$35.79	$19.41	$9.14	$4.08
1909	32.26	17.49	6.55	3.43
1908	30.67	16.89	6.05	3.88
1907	31.00	17.10	7.62	3.84
1906	29.44	15.85	6.18	3.54
1905	27.44	15.15	5.99	2.82
1904	29.21	16.32	6.15	2.59
1903	30.21	18.45	7.78	2.63
1902	29.23	18.76	7.03	2.65

Following shows cattle, hogs and sheep in the United States in January during past eighteen years, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT from reports of the Department of Agriculture:

	Milch cows.	Other cattle.	Total cattle.	Hogs.	Sheep.	Grand total.
1892	16,416,351	37,651,239	54,067,590	52,398,019	44,938,365	151.403.974
1893	16,424,087	35,954,196	52,378,283	46,094,807	47,273,553	145,746,643
1894	16,487,400	36,608,168	53,095,568	45,206,498	45,048,017	143,350,083
1895	16,504,629	34,364,216	50,868,845	44,165,716	42,294,064	137,328,625
1896	16,137,586	32,085,409	48,222,995	42,842,759	38,298,783	129,364,537
1897	15,941,727	30,508,408	46,450,135	40,600,276	36,818,643	123,869,054
1898	15,840,886	29,264,197	45,105,083	39,759,993	37,656,960	122,522,036
1899	15,990,115	27,994,225	43,984,340	38,651,631	39,114,453	121,750,424
1900	16,292,360	27,610,054	43,902,414	*.....	41,883,065	*.....
1902	16,696,802	44,727,797	61,424,599	48,698,890	62,039,091	172,162,589
1903	17,105,227	44,659,206	61 764,433	46,922,624	63,964,876	172,651,936
1904	17,419,817	43,629,498	61,049,315	47,009,367	51,630,144	159,688,826
1905	17,572,464	43,669,443	61,241,907	47,320,511	45,070,423	153,732.841
1906	19,793,866	47,067,656	66,861,522	52,102,847	50,631,619	169.595,988
1907	20,968,000	51,566,000	72,534,000	54,794.000	53,240,000	180,568,000
1908	21,194,000	50,073,000	71,267,000	56,084,000	54,631,000	181.982,000
1909	21,720,000	49.379,000	71,099,000	54,147,000	56,081,000	181,330,000
1910	21,801,000	47,279,000	69,080,000	47,782,000	57,216,000	174,078,000

*No report given by Government.

FIRST PRIZE TWO-YEAR-OLD CATTLE OF 1910 NATIONAL WESTERN LIVE STOCK FEEDER SHOW.

These Hereford steers were bred, owned and exhibited by A. H Norell of Walden, Colo. They were sold by Clay, Robinson & Co. in the auction at $6.00 per cwt, averaging 975 lbs.

Clay, Robinson & Company's LIVE STOCK REPORT

Issued every Friday at Union Stock Yards, Chicago.

R. P. FALES ..... Managing Editor
GUY FRIDLEY ..... Associate Editor

Local and long-distance Telephone "Yards 4194."
Cable address "Kelso," Chicago.

This paper will be sent to anyone, whether a customer of Clay, Robinson & Co. or not, upon receipt of 50c to pay postage for one year.

If you receive the paper for a time without having ordered it, please understand that it is sent you with compliments of Clay, Robinson & Co., to keep you posted on the markets.

When requesting change of address always give old as well as new postoffice.

Advertising rate $2.80 per column inch, each insertion. Special low rate for live stock sale advertising. If you intend holding a public sale write for prices on quarter-page, half-page or page space.

Address all communications and make all remittances payable to THE LIVE STOCK REPORT, Union Stock Yards, Chicago.

Montana Sheep Free From Diseases.

Dr. M. E. Knowles, state veterinarian of Montana, states that Montana is freer from from diseases inimical to the shepherd's interests than any other state in the Union. He remarked:

"There are about 5,000,000 sheep within the boundaries of Montana at the present time, approximately this figure having been maintained for a number of years past. All types are represented, although fine wools predominate.

"Range conditions up to the present time have been substantially unhampered and unlimited, but are now rapidly becoming restricted, necessitating greater conservatism on the part of the flockmaster, but making the industry far less hazardous than during the past.

"Beet sugar factories and knowledge of alfalfa's value have given a marvelous impetus to winter feeding during the past few years and this is certain to increase more than one can now even conjure.

"All valleys in Montana are agriculturally prolific, capable of producing a wonderful variety of forage. There is not a valley in the state that will not produce from three to seven tons of alfalfa to the acre annually. The various varieties of clover flourish marvelously. In the eastern part of the state, particularly in the Yellowstone and Missouri valleys, corn is grown that would make an Iowa, Illinois or Indiana farmer green with envy. Beyond question of doubt, these prolific valleys, flanked by hills not agricultural, but rich in nature's grasses, coupled with almost unlimited national forests, accessible to a large number of flockmasters, will ultimately make Montana a far greater sheep producing state than it is today.

"The evidences of this future have been apparent during the past ten years. While there may be some decrease in numbers of sheep maintained, the improved quality will more than compensate for this reduction. The number of breeders importing the best blood obtainable is increasing by strides and bounds. The state has been in the past, is at the present time, and will be in the future, more than it has ever been, an ideal sheep growing state. The grasses are nutritious over its entire area, the valleys intensively agricultural, the air salubrious, the water purity itself—all going to make conditions ideal for producing the best mutton and wool that can be produced in the world. Climatic conditions incident to the latitude in which our state had its fortunate location, lends no small part to the advantage of the flockmaster."

Angus Sales are Higher.

Charles Gray, secretary of the American Aberdeen-Angus Breeders' Association, Chicago, sent us a copy of the report of the proceedings of the association's annual meeting and directors meeting held during the year 1909. Every breeder and every party interested in Angus cattle will find interesting reading therein. Breeders of Aberdeen-Angus should feel much encouraged by the victories the breed has won at the leading shows in America and by the unparalleled victories at the leading fat stock shows of Great Britain. The values of the 1909 sales by the various breeders in the association ruled much higher than those of the past few years. Mr. Gray reports inquiries being constantly received, which indicate that a great number of farmers are turning their attention to the breeding of Aberdeen-Angus cattle. Mr. Gray takes a very optimistic view of the future for this breed of cattle.

That action is best which procures the greatest happiness for the greatest number.—Hutchinson.

To the Memory of Robert Burns.

This is the day of all the year,
To Scotchmen aye for ever dear,
This day they'll dance and sing by turns
In memory o' Robert Burns.

Nae doot they sing o' Bonnie Doon
Tae Afton Water raise the tune,
And gie a touch o' Heiland Mary
The sang that covered Burns wi' glory.

And ither sangs they'll sing wi' glee
Their mithers sung when on her knee,
Wi' cracks an' jokes they'll a' be glorious
O'er a' the ills o' like victorious.

Noo fill your coggies tae the brim
Wi' usquaba and drink tae him,
The fame an' name o' Burns the poet
The chief o' a' nae yin will dout it.

Wi' laurals fresh we'll aye adorn
Well worthy is he o' the crown
Scotchmen whane'er the day returns
You'll aye revere the name o' Burns.

—John H. Gordon

Cheyenne, Wyo.

Even Little Girls Ship to Us.

We recently received at Chicago a shipment of sheep from the Harrison Bros. of Washta, Ia. In the consignment were three head belonging to their little sister, Miss Frances Harrison, and she gave us the following instructions:

"My brothers, the Harrison boys, are shipping you a lot of sheep today, but three of them are mine. Bo Peep is the biggest one there and has but one ear. Nannie is almost as big. Mary-Ann is a little lamb. I did not like to sell them, but my brothers said the dogs would get them. They got some of their sheep. Now Mr. Robinson will you please take good care of them and sell them to someone who has a little girl that will be good to them. One of my neighbors gave Bo-Peep to me. I have had her a long time and I hate to sell her."

In reply to our letter, Miss Frances wrote as follows:

"I was glad to get your nice letter, but was sorry you didn't get my letter in time. I saw the dog take an ear off of Bo-Peep. I am ten years old now. I walk a mile to school when the roads are good, but when they are not good they take me. I have lived on this farm all my life."

Corn Is Half Husked.

Walter Osborn, Decatur county, Ia.: "There are very few cattle on feed in this vicinity. Hogs are very scarce Corn is worth 65@70c per bushel and hay is selling at $14 per ton. We are having very severe weather and the snow is 12 to 15 inches deep. Corn is only about one-half husked and the balance is under snow. More hay than ordinarily is being used, with that raised here practically all gone."

South Dakota Ewes at $5.70.

One of the most notable sheep sales at South Omaha lately was made by our house Jan. 20 for H. L. Barnett, an old-time stockman of the Black Hills, with headquarters at Belle Fourche. Mr. Barnett was in with a car of ewes of his own feeding of 100 lbs average that sold at $5.70. This stock had only been fed grain for the past sixty days and in conversation with Mr. Barnett he stated (although not thoroughly posted on the market at this time) this shipment brought nearly $1.00 per cwt more than he had expected. Mr. Barnett is going on East for a visit among friends and relatives and intends to get back to the range country about March 1.

United States Consul Alfred A. Winslow writes from Valparaiso that, according to the best information obtainable, there were in Chile, at the beginning of 1909, approximately 700,000 horses and mules, 2,500,000 head of cattle, 3,000,000 sheep, 500,000 goats, and 300,000 hogs

THE FARMER KEEPS THE GATE.

What They Say About Us.

CHICAGO.

J. R. Bennett, Adams county, Ia.: "I thought the sale on my cattle O.K."

A. H. Whitney, Columbia county, Wis.: "Two sales of sheep for me were fine."

Geo. C. Holtz, Columbia county, Wis.: "We are pleased with the lambs sent us and treatment received at your hands."

Renshaw Bros., Nobles county, Minn.: "We received your statement of sale of lambs and are well satisfied with same."

W. G. Fulton, cashier of the Fairland Banking Co., Douglas county, Ill.: "I am well pleased with the sale of lambs."

Harry Holmes, Jerauld county, S. D.: "Was well pleased with the way my sheep sold. Thank you for for past favors."

J. M. May, Lucas county, Ia.: "Thank you for the good care given my cattle and the sale after they were held so long at Galesburg."

Albert Young, Spink county, S. D.: "Was well pleased with the sale of my sheep. Thank you for keeping me posted on the market."

John Sturgis, Saint Joseph county, Mich.: "Lambs you sent me are doing very well and also western breeding ewes are in the pink of condition."

J. F. E. Yiesley, Linn county, Ia.: "Received account sales of hogs and am well pleased with way you handled same. Price was more than I expected and weight heavier than here."

Ira B. Wilcox, Lenawee county, Mich.: "Received Hereford cattle all O. K. Think them a fine lot. They certainly look good to me. Thank you for securing so good a bunch."

McCandless Bros., breeders of pure-bred Chester White hogs, Sangamon county, Ill.: "Sale of sheep and hogs very satisfactory. We wish to thank you for the manner in which you handled our shipment.

J. K. Smith, Wayne county, Ind.: "Car of cattle arrived in good order. Every one a good one. I can truly say I am much pleased. My order was well filled in every respect. Am writing you an order for another load."

F. B. Hope, Bureau county, Ill.: "Your native cattle letters have been a great help in keeping me posted on the market. Received returns from steers and thank you for your promptness and for the way you handled them."

Frank Caspers, breeder of registered Angus cattle and Duroc hogs, Grant county, Wis.: "I was well pleased with sale you made for me and shall recommend your firm to my neighbors. Thanks for your efforts in my behalf."

R. R. Mattis, of the Banking Co. of Trevett & Mattis, Champaign county, Ill.: "Your telegram received and very satisfactory as to sale as well as purchase of lambs. I thought they were a nice bunch and they did well. Thank you."

C. J. Nessley, Fairfield county, Ohio: "Cattle came in good shape. I was greatly surprised that you got them at the price, as I expected they would cost at least 50c per cwt more than they did. When in want of more will let you know."

Charles N. Boynton, prominent in real estate circles, Ramsey county, Minn.: "I am very much pleased with the sale of yearling wethers and lambs, as they brought more than I expected. Eight dollars per cwt is certainly a good price for yearling wethers."

E. H. Boyd, Eaton county, Mich.: "Cattle arrived and they suit us down to the ground. Some of our neighbors say they are the best steers we have ever fed. They are taking hold of feed fine. We expect to send them back to you some time next spring."

C. L. Heren, manager of the Briggs & Ellis Co., Yellowstone county, Mont.: "Cattle brought a nice price and weighed out better than I expected after getting into storms in the East. Consider it very lucky to get them through in as good condition and also to bring the price."

Wm. Putzke, Minnehaha county, S. D.: "I have shipped two loads of sheep and lambs to you. The first load, shipped about Nov. 20, sold for $7.50 and the second load, in December, at $8.85, being top by 35c per cwt that day. They sold for 50c per cwt more than I expected. I also wish to thank you people for the way you have handled my shipments at Sioux City."

H. R. Davis, Perkins county, S. D.: "You people are 'there with the goods' when it comes to selling cattle, hogs or sheep. I want to thank you for the good price you obtained for three loads you sold for me. Will say I expect to favor you with my shipments this coming fall and will pull for Clay, Robinson & Co. in this 'neck of the woods' ".

BUFFALO.

L. W. Leffingwell, Shiawassee county, Mich.: "I received the check for lambs Saturday. They made me the most money I ever made on a load shipped in January."

John Sturgis, Saint Joseph county, Mich.: "I appreciate your market information very much and will be glad to do you a good turn at any time. You are the only firm in Buffalo that are not afraid of their stamps to the one and two-load shippers."

Geo. B. Fisher, Calhoun county, Mich.: "I received the bill of sale and draft for load of lambs. Was very well pleased with the sales, considering the break in the market. I think you sold them very well. Thank you for prompt returns and past favors."

A. Frye, Washtenaw county, Mich.: "I have received dispatch, letter and draft O. K. I am quite well satisfied, considering all circumstances, at least the storm and the late arrival of lambs in Buffalo. I will ship again before long. Many thanks to you."

SOUTH OMAHA.

John Flynn, Mills county, Ia.: "I shipped you two loads of cattle and you made a very good sale."

Harry E. Biddick, Grant county, Wis.: "I purchased one double-deck of yearling wethers through your firm and they have done very well and made good gain."

KANSAS CITY.

S. A. Stewart, Rooks county, Kan: "I was well pleased with the price you got for my hogs."

Dr. E. A. Creighton, Webster county, Neb.: "Sale satisfactory, being $196 more than I expected. Thank you."

Adam Rider, Union county, Ohio: "Cattle arrived in good shape and I am well pleased with them. Thank you for the service."

SOUTH ST. PAUL.

F. A. B. Patterson, Martin county, Minn.: "I am very much pleased with sale of lambs, so much so that I had an item in regard to sale published in our local paper. Thank you for attention."

Henry Steiber, Hanson county, S. D.: "Your letter regarding claim of Sept. 3, 1909, amount $34.02, which they are willing to allow me $22.80 on, is satisfactory to me. I am very much obliged to you. I will remember you the next time I ship to St. Paul."

J. L. Record, Hennepin county, Minn.: "I wish to express my appreciation of the manner in which you have handled shipment of lambs, and also other shipments which I have made to you. I will ship you another car as soon as they can be properly fitted for the market."

Clay, Robinson & Co.'s

BUYERS OF STOCKER AND FEEDING CATTLE, AND FEEDING SHEEP AND LAMBS

ARE "O. K".

There are good, sound reasons for our claim, and we cite a few to clinch the argument:

FIRST—We have houses at all of the leading markets. Thus we are in close touch with chief sources of supply, and fill your order on the market where prices are lowest.

SECOND—Our buyers are specialists in their line. They have received special training. Their sole duty is to buy on orders. Thus they are in position every day to pick up bargains that would escape the eye of the less experienced party.

THIRD—Filling orders by mail is one of our specialties. It is not necessary for you to come to market. Your order is guaranteed to be filled as carefully as if you were on the market in person. Thus you save railroad fare, hotel bills and valuable time.

FOURTH—"Well bought is half sold" is our stamp on every load of stock purchased by us. We well know that to please one customer is to hold that party and gain others through his good will.

FIFTH—We keep you in intimate touch with the market situation through our personal letters, weekly market letter and our LIVE STOCK REPORT.

SIXTH—If we find that we cannot fill your order in accordance with your wishes, we do not fill it at all. Also we tell you so.

There are many other reasons—lack of space barring us from mentioning same—why you should send your orders to us. Let us impress upon you that

Clay, Robinson & Co. Can Save You Money.

NATIVE BEEF STEERS.

Range of prices and bulk of sales of native beef steers this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Range.	Bulk.
This week.....	$4.25@7.70	$5.25@6.50
Previous week.....	4.25 8.40	5.35 6.75
Year ago.....	4.00 7.15	5.25 6.60
Two years ago.....	3.60 6.25	4.75 5.90
Three years ago.....	4.00 6.90	4.90 6.40

Market for beef steers last week finished with prices 10@20c lower than previous week's close. No small number of offerings, mostly belated arrivals Friday, went over unsold, owing to unsatisfactory bids. Barring the load of 1,527-lb beeves sold by Clay, Robinson & Co. at $8.40, there were no cattle above $7 75 during the week and only a few were good enough to land higher than $7.00. On the first market day this week trade in cattle was in very bad shape. Agitation against high-priced beef, and consequent reduced orders for beef, and total run of 27,041 proved greater than selling interests could withstand. Result was a dull, draggy market for beef steers, with many loads still unsold at close of the day's session. Prices at start were 10@15c lower and at finish 15@25c down. Not many sales had been made before 11 o'clock. Eastern shippers and exporters bought gingerly in early hours at the decline, but representatives of packers did not take hold until the forenoon was far advanced. Receipts of well-fatted lots were of small quota, while there was a big proportion of offerings lacking good flesh, many of these from Nebraska, Kansas and Missouri. Scarcity and high price of feed and lack of faith in the future market were causes of so many of these arrivals at hand. Best beeves offered, numbering 42 head and averaging 1,500 lbs, were from Kansas and sold at $7.70. There were few sales above $6 75, however, and bulk trading at $5 25@6.50. Tuesday run of cattle 7,183. Beef steer trade was dull and prices generally 10c lower. One two-load lot of 1,514-lb beeves sold at $7.25. A good many cattle were locked up, owing either to lack of offers or unsatisfactory bids. Receipts of cattle Wednesday around 19,000. Beef steer trade slow at prices steady to 10c lower, plain and medium lots showing the loss. Top for a full load lot was $7.40 and a piece of a load reached $7.60.

Revised quotations for all grades of native beef steers:

Extra choice to prime steers.....	$7 60	@ 8 25
Good to choice steers.....	6 75	7 40
Medium to good steers.....	5 25	6 50
Plain to fair short-fed steers.....	4 75	5 10
Common to fair steers.....	4 15	4 50
Extra choice to prime yearling steers.....	6 75	7 25
Good to choice yearling steers.....	6 25	6 60
Medium to good yearling steers	5 50	6 00
Plain to fair short-fed yearlings.....	4 90	5 25
Common to fair yearlings.....	4 25	4 65
Good to choice stags.....	5 25	5 75
Common to medium stags.....	4 00	4 75

SALES MADE BY CLAY, ROBINSON & CO.

Wednesday, Jan. 19—John Baker, Muscatine, Ia., 17 Shorthorns, 1,527 lbs, $8.40; 19 Illinois, 1,430 lbs, $6.65; 18 Iowas, 1,284 lbs, $6.65; 19 Illinois, 1,375 lbs, $6.60; 18 Indianas, 1,446 lbs, $6.55; 26 Missouris, 1,398 lbs, $6.50; 13 Illinois, 1,248 lbs, $6.50; 23 Iowas, 1,299 lbs, $6.40; 18 Illinois, 1,300 lbs, $6.40; 18 Illinois, 1,210 lbs, $6.30; 34 Illinois, 1,256 lbs, $6.30; 18 Iowas, 1,252 lbs, $6.20; 20 Iowas, 1,350 lbs, $6 20; 16 Illinois, 1,263 lbs, $6.20; 22 Iowas, 1,286 lbs, $6.15; 21 Illinois, 1,167 lbs, $6.15; 16 Illinois, 1,306 lbs, $6.10; 18 Illinois, 1,232 lbs, $6.00; 16 Iowas, 1,381 lbs, $6.00; 13 Missouris, 1,225 lbs, $6.00; 17 Iowas, 1,241 lbs, $3.00; 19 Iowas, 1,161 lbs, $5.90; 22 Iowas, 1,200 lbs, $5 90; 18 Iowas, 1,198 lbs, $5.85; 20 Illinois, 1,173 lbs, $5.75; 21 Illinois, 1,229 lbs, $5.75; 12 Illinois, 1,173 lbs, $5.70; 20 Illinois, 1,109 lbs, $5.70; 13 Iowas, 1,203 lbs, $5.70; 37 Iowas, 1,174 lbs, $5.65; 15 Illinois, 1,092 lbs, $5.65; 19 Iowas, 1,093 lbs, $5.60; 30 Illinois, 1,075 lbs, $5.65; 17 Illinois, 1,167 lbs, $5.65; 20 Indianas, 1,097 lbs, $5.60; 34 Indianas, 1,162 lbs, $5.60; 14 Illinois grade Angus steers and heifers, 857 lbs, $5.50; 21 Minnesotas, 1,038 lbs, $5.50; 10 Iowas, 1,087 lbs, $5.50; 20 Wisconsins, 1,166 lbs, $5.35; 16, 1,025 lbs, $5 30; 22 Illinois, 979 lbs, $5.25; 12 Illinois, 1,100 lbs, $5.00.

Thursday, Jan. 20—39 Illinois, 1,410 lbs, $7.00; 34 Iowas, 1,398 lbs, $6 85; 19 Illinois, 1,410 lbs, $6.70; 21 Illinois, 1,389 lbs, $6 70; 11 Iowas, 1,385 lbs, $6.65; 58 Iowas, 1,309 lbs, $6.35; 18 Iowas, 1,390 lbs, $6.35; 24 Illinois, 1,336 lbs, $6 20; 58 Minnesotas, 1,215 lbs, $6.20; 9 Iowas, 1,202 lbs, $6.10; 25 Iowas, 1,248 lbs, $5.95; 17 Iowas, 1,304 lbs, $5 90; 11 Minnesotas, 1,195 lbs, $5.85; 22 Iowas, 1,253 lbs, $5.75; 31 Iowas, 967 lbs, $5.60; 19 Illinois, 1,144 lbs, $5.55; 18 Illinois, 1,066 lbs, $5.55; 17 Iowas, 1,028 lbs, $5.50; 34 Iowas, 1,092 lbs, $5.40; 13 Minnesotas, 1,073 lbs, $5.40; 29 Illinois, 1,133 lbs, $5.40; 19 Iowas, 1,110 lbs, $5.25; 12 Iowas, 823 lbs, $5.10 ;20 Minnesotas, 954 lbs, $5.05.

SHOWN AT 1910 DENVER SHOW.

Albany 6th, two year-old Hereford steer, owned and exhibited by A. L. Weston of Edgewater, Colo. This animal won championship in the pure-bred Hereford classes at the 1909 International Show at Chicago.

Monday, Jan. 24—31 Nebraskas, 1,611 lbs, $7.50; 94 Indianas, 1,496 lbs, $7.00; 17 Iowas, 1,381 lbs, $6.55; 50 Iowas, 1,422 lbs, $6.50; 62 Iowas, 1,305 lbs, $6.40; 68 Iowas, 1,420 lbs, $6.40; 30 Iowas, 1,314 lbs, $6.35; 29 Nebraskas, 1,429 lbs, $6.25; 21 Iowas, 1,335 lbs, $6.25; 41 Iowas, 1,218 lbs, $6.25; 38 Illinois, 1,223 lbs, $6.00; 62 Iowas, 1,216 lbs, $6.00; 48 Ohios, 1,313 lbs, $5.80; 27 Iowas, 1,138 lbs, $5.75; 40 Iowas, 1,212 lbs, $5.75; 20 Illinois, 1,372 lbs, $5.75; 37 Iowas, 1,114 lbs, $5.70; 61 Ohios, 1,258 lbs, $5.65; 69 Indianas, 1,038 lbs, $5.65; 51 Iowas, 1,194 lbs, $5.60; 20 Ohios, 1,165 lbs, $5.60; 19 Missouri tailend yearlings, 622 lbs, $5.50; 15 Iowas, 1,191 lbs, $5.50; 19 Iowas, 1,101 lbs, $5.50; 21 Illinois, 1,222 lbs, $5 50; 21 Nebraskas, 1,174 lbs, $5.50; 20 Iowas, 1,151 lbs, $5.50; 17 Iowas, 1,277 lbs, $5.40; 19 Missouris, 962 lbs, $5.25; 41 Minnesotas, 1,032 lbs, $5.35; 24 Iowas, 1,068 lbs, $5.35; 27 Iowas, 1,113 lbs, $5.25; 18 Iowas, 1,002 lbs, $5.15; 13 Iowas, 1,084 lbs, $5.15; 11 Iowas, 934 lbs, $5.10; 36 Illinois, 844 lbs, $4.85; 21 Iowas, 928 lbs, $4.85; 11 Illinois, 961 lbs, $4 85; 26 Iowas, 925 lbs, $4.70; 19 Iowas, 875 lbs, $4 60.

BUTCHER STOCK.

Bulk sales of beef cows and heifers, canners and cutters, and bulls this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	and heifers. Bulk cows	and cutters Bulk canners	bulls. Bulk
This week.....	$3.35@4.85	$2.50@3.15	$4.00@4.85
Previous week.....	3.65 5.25	2.45 3.35	4.25 5.25
Year ago.....	3.60 4.75	2.15 3.00	3.25 4.25
Two years ago	3.30 4 60	2.10 2.85	3.25 4.25
Three years ago....	3.35 4.75	1.90 2.75	3.35 4.50

There was a price break of 15@25c for most cows and heifers last week, although it took 35c to cover the decline for pretty good offerings as compared with high spot previous week. The losses were most severe during Wednesday and Thursday. Top heifers for week $6.25 and cows $6.00, latter price being obtained by Clay, Robinson & Co. The break in the market for bulls, which Clay, Robinson & Co. predicted in the REPORT the previous week, came about, the decline being generally 15@25c. Late in the week it took choice export grades to land at $5.25 and good fat bolognas at $4.50. Prices for veal calves at the close were 50@75c down in most cases as compared with previous week's finish. Choice kinds showed less loss, while some 110 to 115-lb lots were off as much as $1.00. It took very choice calves to go above $9.25 late in the week. Trade in cows and heifers on initial market day this week was in miserable condition. Trade got worse as day advanced, bulk of offerings selling 15@25c lower than last Friday. Some offerings above $4 00 showed even more than 25c loss, buyers making extra efforts to get better classes on a much lower basis. There is no doubt that the beef agitation had a depressing effect on the market, as the supply was of only normal proportion. Price break from same day a week ago was 25@50c, such as sold between $3.50 and $4.50 and the cows as went upwards of $5.00 bearing brunt of loss. Top was $6.25, Clay, Robinson & Co. securing this figure for 51 Missouri grade Hereford yearlings, mostly heifers, of 832 lbs average. Bulls went 15@20c lower than last Friday and largely 30@50c down from early last week. It took fat export bulls to make $5.00 and good heavy bolognas sold at $4 40. Veal calves sold 25c lower than late last week, or 75c@$1.00 under early last week. Only a few choice vealers reached $9.25 and best strong weight calves went at $5.50. Cow and heifer market Tuesday was slow to 10c lower. Bulls lost 10@15c. Market for vealers held about steady. Dull, draggy trade in cows and heifers Wednesday at prices steady to 10c lower. Bulls about steady. Calves lost 25c.

Revised quotations for all grades of butcher stock and calves:

Extra choice to prime yearling heifers.....	$5 75	@ 6 50
Choice to prime heifers.....	5 00	5 60
Fair to good heifers.....	4 25	4 85

STOCKERS AND FEEDERS.

Top price and bulk sales of stockers and feeders this week, with comparisons, as complied by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Top Feeders.	Bulk Feeders.	Bulk Stockers
This week	$5.70	$4.35@4.85	$3.50@4.25
Previous week	5.65	4.50 5.15	3.75 4.50
Year ago	5.50	4.40 5.10	3.65 4.40
Two years ago	5.00	4.25 4.75	3.45 4.00
Three years ago	4.90	4.00 4.65	3.45 3.85

Late trading in stockers and feeders last week showed 10c advance over like period previous week. A broad country demand for good quality steers could not be entirely filled. Call was mostly from eastern buyers, nearby western parties evidently not being in shape to handle many cattle by reason of shortage of rough feed, as well as corn, much of which is still under snow. A load of 1,199-lb assorted Shorthorns went back to Ohio at a cost of $3.65, buyers having to compete with slaughterers for fleshier steers. A sharp break in beef steers and uneasiness regarding future cattle market, owing to the beef agitation, caused the bullish feeling in feeder cattle circles to disappear at the start this week. Trade was dull throughout day and prices went 15@20c under last Friday. Plain and medium feeders and light stockers were very difficult sale. Tuesday rates went 10@15c lower than previous day and 40@50c under a week ago. Dull trade in stockers and feeders Wednesday at barely steady prices.

Revised quotations for stocker and feeding cattle:

Good to choice feeders	$4 75 @	5 00
Poor to medium feeders	4 15	4 65
Good to choice stockers	4 10	4 50
Plain to medium stockers	3 50	4 00

Hogs.

Bulk sales of hogs of respective weights this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Bulk 200 to 250 lbs.	Bulk 260 lbs and heavier.	Bulk 135 to 195 lbs.
This week	$8.15@8.40	$8.25@8.50	$8.00@8.30
Previous week	8.50 8.75	8.60 8.80	8.35 8.65
Year ago	5.90 6.50	6.00 6.55	5.75 6.30
Two years ago	4.30 4.50	4.35 4.55	4.20 4.45
Three years ago	6.80 7.00	6.85 7.00	6.75 6.95

Thursday trade in hogs favored buying interests. Receipts were second largest of week, and speculators and shippers were weak props under market. Trade was slow at prices 5@10c lower than previous day. Top $8.75, obtained by Clay, Robinson & Co., and bulk sales at $8.40@8 70. Opening 5c lower on Friday, trade closed with break fully repaired. Summit $8.70, obtained by Clay, Robinson & Co., while trading in main was at $8.40@8.60. A 5@10c lower deal on Saturday, market getting worse as day advanced. Pinnacle $8.65, Clay, Robinson & Co. securing this figure, while $8.35@8.60 bought most offerings.

This week opened with receipts totaling 29,010. Market started out with a limp and wound up badly crippled. Opening 5@10c lower, prices later on were 15@20c lower than last Saturday, closing very dull. Packers did not commence operations until around 11 o'clock. Clay, Robinson & Co. sold hogs at top price of $8.60, but just as good swine as ever walked had to go at $8.50 later on. Bulk of arrivals at $8.20@8.50. Down went the market again Tuesday. Receipts 19,328. Opening steady with Monday's close, trade soon weakened and closed 10@15c lower. Top $8.40, this figure being obtained by Clay, Robinson & Co., and bulk sales $8 00@8.30. Run of hogs Wednesday around 28,000. Trade opened 5@10c lower and closed 5c higher than early sales. Top $8.35 and bulk $8.05@8.25.

Sheep and Lambs.

Following shows top prices and bulk of sheep and lamb sales this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Sheep Top.	Sheep Bulk.		Yearlings Bulk.		Lambs Top.	Lambs Bulk.	
This week	$6.25	$5.00@5.75		$7.00@7.50		$8.60	$7.75@8 25	
Last week	6.35	5.25	6.00	7.25	8.25	8.85	8.00	8.65
Year ago	5.65	4.50	5 15	6.00	6.50	7.75	7.00	7.50
Two years ago	5.75	4.50	5.50	5.75	6 25	7.30	6.50	7.20
Three yrs ago.	5 75	4.50	5.60	6.00	6.65	7.85	7.00	7.65

Last week closed with prices for sheep and yearlings generally steady with previous week's finish. Tops were $6.35 and $8.25 respectively, both prices being obtained by Clay, Robinson & Co. Lambs, however, went 10@15c lower, with those at $8.65 late in the week as good as those at $8.75 on earlier days.

Receipts on initial market day this week 24,076. Market dull from start to finish. Sheep held steady, owing to scant numbers, with top wethers at $6.25. Yearlings were 10@15c lower, best going at $8.00, while lambs showed a like price loss, $8.50 being practical top, which figure was obtained by Clay, Robinson & Co. for several lots. Tuesday run of sheep 13,067. Trade dull at prices mostly 10@15c lower than Monday and generally 25c off from last week's close. Practical top on lambs was $8.35, paid for westerns. Best sheep available went at $5.90. Receipts of sheep Wednesday around 18,000. Market generally 10@15c lower for both sheep and lambs. Top lambs $8.30 and best sheep $6.00, with summit on yearlings $7.60.

Sheep and lambs 15@25c lower than late last week. Tops were: Lambs $7.75, yearlings $6.75, wethers $5.75 and ewes $5.00.

Market Notes.

Among our patrons at South St. Paul on Jan. 24 was Will Sinclair, Stutsman county, N. D. Mr. Sinclair mentioned that weather conditions in his section the past few weeks had been severe.

E. O. Green, Lyon county, Minn., was on the South St. Paul market Jan. 24 with a mixed car of sheep and lambs to our house and expressed himself as well satisfied with the prices obtained and the way in which his shipment was handled.

Loseke Bros., young farmers and feeders of Platte county Neb., were on the South Omaha market Jan. 19 with a car of cows and heifers of their own feeding. Most of this stock—16 head, averaging 1,064 lbs—sold at $5.25, a very satisfactory figure.

M. G. Lee of Buffalo county, Neb., had a load of 70-lb lambs on the South Omaha market Jan. 18 which our house sold at $8.25. On the same day our house also sold for A. W. Clark, Sarpy county, Neb., a car of 74-lb lambs at $8 40, and landed at $6.75 for Anderson & Robson of Montgomery county, Ia., a load of heavy yearling wethers.

*Net gain.

Service that Means Something.

As an illustration of the careful way in which Clay, Robinson & Co. look after the interests of shippers, we mention two claims recently collected from railroad companies. For some time past our Kansas City office has employed an expert freight auditor to go over all railroad bills and when he discovers an error or overcharge claim is immediately made for same. In this way hundreds of dollars are saved to shippers. In the two particular cases referred to, the railroads were very stubborn, in fact, refused to consider the claim, but our traffic representative took the matter up with the Interstate Commerce Commission and after a great deal of correspondence the amounts were collected and remitted to our customers, involving $82.25 and $11.68 respectively. One of these claims was for the Butterfield Live Stock Co. of Weiser, Idaho, and the other for a Texas client. Mention of the collection of said claims will be found on page 31 of the Nov. 27, 1909, issue of the Traffic Bulletin. In view of the fact that except for the peristent and intelligent work of our traffic representative these claims would never have been paid, we feel that shippers ought to know and take into consideration the fact that when they consign to Clay, Robinson & Co. our interest in them by no means ceases as soon as their stock is sold. If you are a client of our firm, we are your representative on the the market and always prepared to protect your interests in every possible way. Few if any other commission firms possess the facilities, experience and expert knowledge required in cases of this kind. It is an easy enough matter to draw up an ordinary claim against a railroad, but to press it to a successful termination is another proposition. When selecting your commission firm remember that upon your choice may often depend considerable money in matters of this kind, while the class of service given in the selling and handling of your stock is of even greater importance. Whether in the sales pens or in the office, Clay, Robinson & Co. offer service unequaled elsewhere.

Accident is commonly the parent of disorder—Gibbon.

Average Price for Show Feeding Cattle $4.98.

Our Denver house writes us as follows regarding their sale of feeding cattle at the recent National Western Live Stock Show:

"The average price of the 24 cars of cattle sold by us through the ring on Thursday of show week was $5.12 and on the 25 cars sold Friday (these were consigned for sale on the open market) through the ring the average price was $4.77. This price, with one or two exceptions, notably that of the Grand Champion load, included the freight to the Missouri River. The average price per cwt on the 49 cars sold on the two days was $4.98. The average price last year on all our cattle was $5.31, so this year's figures are really about 33c per cwt under last year's price. Of course we did not have as many of the high-grade cattle this season as last, a string of Ballantine & Beggs steers last year helping to bring up the average. Besides the cattle this year were in thinner flesh than a year ago and therefore did not make as good an appearance in the ring. On the whole we are very well satisfied with the prices obtained this season, in view of the adverse conditions East."

Information for Shippers.

Below will be found the commission charges at the Chicago Stock Yards, put iuto effect by the Chicago Live Stock Exchange. The charges at the other leading markets are not materially different from these:

Section 1. The commission for selling live stock shall be governed by the following rates, qualified by the succeeding minimums and maximums:

Section 2. Cattle—Fifty cents per head.
Calves—Twenty-five cents per head.
Hogs—Twenty cents per head.
Sheep—Ten cents per head.

Section 3. Miuimum and maximum charges.

Straight carloads unmixed. Cattle and calves one species:

	Single deck carload.		Double deck carloads.	
	Min'm.	Max'm.	Min'm.	Max'm.
Cattle	$10.00	$12.00	$.....	$.....
Calves.....	10.00	12.00	12.00	18.00
Hogs	8.00	8.00	12.00	12.00
Sheep.....	8.00	8.00	12.00	12.00

Carload lots mixed: A mixed carload lot is one containing more than one species of live stock. Cattle and calves, one species.

All stock in the car to be charged at the per head rate, up to the following maximum rates, but no greater charge shall be made for selling any certain species in any mixed carload than would be charged on such species in an unmixed carload, except as hereinafter provided for in cases where commissions are pro-rated. Minimum on predominating species of stock in car to govern the minimum charge for the entire car, the predominating species being the one yielding the greatest amount of commission at the per head rate.

	Single deck carload.		Double deck carloads.	
	Min'm.	Max'm.	Min'm.	Max'm.
Sheep or hogs predominating.	$ 8.00	$15.00	$12.00	$16.00
Cattle pred'ng...	10.00	15.00	12.00	18.00

Section 4. (a) When part of a car is double decked, apply established rate for animals on the temporary deck up to the double-deck maximum of the species involved.

(b) Railroad billing shall determine the application of carload rates.

(c) On carloads of live stock having more than one owner, requiring more than one account of sale, the foregoing per head rates shall be applied, pro-rated according to ownership, not exceeding twenty-five per cent more than regular carload rates for the species involved.

(d) Animals of the cattle species are classed as calves when they weigh 300 lbs each or less.

(e) Sheep originating in double-deck cars, but for any reason arriving in single-deck cars, where double-deck freight rates are applied, may be sold at the double-deck rate of commission.

(f) Live stock driven or hauled in, in wagons, shall be governed by the above rates on the following basis of weights for a carload: Cattle, 20,500 lbs; hogs, 17,000 lbs; sheep, 11,000 lbs.

Section 5. Members of this Exchange may sell live stock on this market for one-half the foregoing rates of commission in the following cases only:

(a) When sold for the account of suspended members of this Exchange regularly engaged in selling live stock for non-residents on commission, or for account of another commission salesman who is a member of this Exchange in good standing, provided full rates are charged to the owner by the member for whose account such live stock is sold.

(b) On live stock purchased on this market by a regular buyer or dealer and without having beeu removed from this market, resold for the account of such purchaser, provided such purchaser is either a member of this Exchange, or the Traders' Live Stock Exchange of Chicago, or pays for his purchases of live stock on this market through a member of this Exchange.

Did He Regret? Hardly.

R. I. Smith of Marengo, Ia., writes our Chicago house as follows: "Bill of sale of my cattle, which you sold on Wednesday, just received. I am very much pleased with the price, which was more than I expected. I want to thank you for the way you handled them. Shrink was very light. These cattle were on feed only since Nov. 1, had a light feed of corn through October on good grass and they made me good money.

"I have not seen Mr. Faulkner, but he must be well pleased with his sale, as there was a load of cattle shipped on the same day which we thought better than his. They sold for 20c per cwt less. I told Mr. Faulkner he would not regret it if he shipped to Clay, Robinson & Co."

GOOD WORK OF OUR SALESMEN

$8.75 Harper & Cook, Fulton county, Ill., was represented on the Chicago hog market Jan. 20 with 60 head of 360 lbs average, which we landed at the top price of $8.75.

$8.75 This price was as high as western lambs made on the Chicago market Jan. 19. We sold two different lots at this figure, which follow: For R. R. Mattis, Champaign county, Ill , 419 head of 89 lbs average, and for A. Vanduren, Mahaska county, Ia., 225 of 71 lbs average.

$8.70 John McNeff, Rock county, Minn , had on the Chicago market Jan. 20 a lot of 245-lb hogs, which we sold at $8.70, summit for that weight hogs that day.

$8.70 W. F. Ullery, Rio Grande county, Colo., had 254 lambs, averaging 68 lbs, at East St. Louis on Jan. 20 which our house sold at $8.70, pinnacle by 10c per cwt.

$8.70 Cashin Bros., Peoria county, Ill., were represented on Chicago hog market Jan. 21 with 70 head of 231 lbs average, which we landed at $8.70. This price was top that day and no other hogs of this weight sold within 5c per cwt of the figure.

$8.65 Was 5c per cwt higher than any other hogs brought at Kansas City on Jan. 17 and was obtained by our house for 72, averaging 245 lbs, shipped by I. A. Palmer, Gage county, Neb.

$8.65 W. N. Clothier. Fayette county, Ia., marketed at Chicago on Jan. 22 a lot of 62 hogs, averaging 235 lbs, for which we obtained summit price of $8.65.

$8.60 Pinnacle for hogs at Kansas City on Jan. 20 was $8.60, secured by our house for 44, averaging 392 lbs, shipped by L. Neimoller, Clay county, Kan.

$8.60 Top for hogs at South St Joseph on Jan. 21 was $8.60, which our house obtained for 64, averaging 282 lbs, belonging to Mark Flanagan, Pawnee county, Neb.

$8.60 This was top by 20c per cwt for lambs at Kansas City on Jan. 20 and was obtained by our house for 884 of 69 lbs average, shipped by J. H. Weinlich, El Paso, Colo.

$8.60 P. H. Stoltz, Woodbury county, Ia., was represented on the Chicago hog market Jan. 24 with 62 head of 254 lbs average, which we sold at the pinnacle—$8.60.

$8.60 Was 10c per cwt higher than any other lambs brought at East. St. Louis on Jan. 24. This price was secured by our house for a load of 71 lbs average, belonging to Abe Mathis, Rio Grande county, Colo.

$8.57½ This was the top of the light hog market at Chicago on Jan. 20 by 2½c per cwt, being obtained by us for 76 head of 180 lbs average, marketed by Charles Peters, Adams county, Ill.

$8.55 It was Jan. 18 that our Sioux City house topped hog market with 70, averaging 260 lbs, at $8.55 for S. M. Harrington, Clay county, S. D., the only load at the price.

$8.55 Was 5c per cwt above any other sale of hogs at South St. Paul on Jan. 18, being realized by our house for a load averaging 298 lbs and belonging to O. J. Oyen, Chippewa county, Minn.

$8.50 Frank Graves, Buffalo county, Neb., had a car of 80-lb lambs on the South Omaha market Jan. 18 which our house sold at the above top price.

$8.47½ R. Anderson, Montgomery county, Ia., marketed 76 head of 198-lb hogs on the Chicago market Jan. 24. We sold them at $8.47½, pinnacle for hogs of this weight.

$8.40 On Jan. 21 our Sioux City house topped the hog market with their sale of 45 hogs of 384 lbs average at $8.40 for G. A. Anderson, Cedar county, Neb.

$8.40 The 127 lambs, averaging 84 lbs, which made the top price of $8.40 at East Buffalo on Jan. 20 were handled by our house for W. F. Paughlin, Sapeer county, Mich.

$8.40 Thomas Terhune, Livingston county, Mich., was the owner and we the sellers of the 173 lambs of 85 lbs average which our East Buffalo house landed at the top price of $8.40 on Jan. 21.

$8.40-$8.35 On Jan. 17 our Sioux City house topped the lamb market with 108, averaging 90 lbs, at $8.40, highest price ever paid there. Next best price was $8.35, also secured by our house for 215 lambs, 93 lbs average. They were fed and shipped by Freeman Lynch of Yankton county, S. D. They were bought by our South Omaha house Sept. 12, averaging 57 lbs. Mr. Freeman put them on feed Oct. 20.

$8.40 Our Chicago house sold two loads of hogs at the top price of $8.40 on Jan. 25 for J. W. McConnell, Le Sueur county, Minn., 68 head of 241 lbs average and for Pyle & Hanson, Franklin county, Ia., 78 head, averaging 211 lbs.

$8.35 Our East St. Louis house Jan. 25 sold for Clark Deitrick & McArthur, Rio Grande county, Colo., 300 lambs, averaging 67 lbs, at $8.35, extreme top of the market.

$8.35 Was 5c per cwt above any other sale of hogs at South St. Paul on Jan. 22 and obtained by our house for a load belonging to C. K. Clementson, Goodhue county, Minn., and averaging 254.

$8.30 On Jan. 24 our Sioux City house topped the hog market 5c per cwt with 52 head, averaging 360 lbs, at $8.30, for G. Dockstader, Moody county, S. D.

$8.30 Our East St. Louis house Jan. 19 sold for J. M. Carson, Rio Grande county, Colo., 746 lambs, averaging 71 lbs, at $8.70, extreme top.

$8.25 No other yearling sheep sold within 35c per cwt of this price Jan. 21. We obtained this figure for 110 westerns, averaging 86 lbs, for C. H. Rider, Muscatine county, Ia.

$7.85 Detrich & McArthur, Rio Grande county, Colo., had a load of 77-lb yearling sheep on the East St. Louis market Jan. 24 which our house landed at the extreme top figure of $7.85.

$7.75 Shorn lambs, numbering 256 head and averaging 71 lbs, were sold by us at Chicago on Jan. 21 at top price of $7.75 for such offerings, marketed by George Dick, Dekalb county, Ill.

$7.40 On Jan. 19 E. S. Leavenworth, Hall county, Neb., was on the South Omaha market with two cars of mixed sheep. In this shipment were about a deck of yearlings that averaged 70 lbs and were sold by our house at the above price, top of last week's market on that class.

$6.50 It was Jan. 20 that our East Buffalo house sold for C. E. Hibbard, Saint Joseph county, Mich., 138 wethers, averaging 114 lbs, at $6.50, top by 10c per cwt.

$6.35 Was top of the sheep market at Chicago last week, as well as a record for January up to close of that week. This figure was obtained by us for 93 western wethers of 124 lbs average on Jan. 20 for Columbus Canning Co., Columbia county, Wis. No other wethers sold within 10c per cwt of the price that day.

$6.25 S. B. Hazlett, Holt county, Mo., had at Chicago on Jan. 24 a lot of 51 grade Hereford yearlings, mostly heifers, that averaged 832 lbs and brought $6.25, extreme top of market for she stock. This sale was made by us.

$6.25 Proved extreme top of ewe market at Chicago last week. This price was obtained by us Jan. 19 for a load of 115 lbs average, marketed by A. T. Jones, Clay county, Ia.

$6 15 Was 15c per cwt higher than any other ewes brought on the Chicago market Jan. 24. This price was obtained by us for 33 head, belonging to William H. Williams, Lyon county, Ia.

$6.10 The 72 head of 126 lb ewes which sold on Chicago market Jan. 21 at $6.10, summit for ewes ewes by 10c per cwt, were sold by us and marketed by Joseph Padgett, Clinton county, Ind.

$6.00 This was the price we secured at Chicago on Jan. 18 for 15 head of 1,146-lb hay-fed cattle, the top price for such offerings last week. They were marketed by L. L. Swan, Park county, Mont.

$6.00 O. Strahn, Crawford county, Ia., was on the South Omaha market Jan. 20 with a mixed car of sheep and lambs, included in which were 29 native ewes, averaging 163 lbs, which our house landed at $6.00, top of ewe market last week.

$5.85 Jan. 18 our house topped the Sioux City cattle market with 1,336-lb steers at $5.85, for A. H. Denlinger, Cedar county, Neb.

$5.60 W. Able, Madison county, Neb., was on the South Omaha market Jan. 18 with a car of native ewes of 125 lbs average which our house landed at $5 60, top of day's trade in that class. He also had a few native lambs that brought $8 25, averaging 87 lbs.

$5.50 The 18 heifers of 990 lbs average which made $5.50 at Chicago on Jan. 19 were handled by us. They were grade Herefords and branded westerns. The price was top for a full load of she stock that day.

$5.35 L. C. Swink, Rocky Ford, Colo , was on the South St. Joseph market Jan. 24 with two double decks of ewes, averaging 79 lbs, which our house sold at $5.35, topping the market 10c per cwt. Mr. Swink is a regular patron of our firm and of the South St. Joseph market, but had not been there for over a year, and it seemed good to see his face again. He is one of the large and successful sheep feeders in the Rocky Ford district.

Letter Box.

CAN'T DO WITHOUT "REPORT."

A. G. Henry, Osage county, Okla.: "I sent 50c for REPORT. I cannot do without it."

"JUST FILLS THE BILL."

J. D. Hadden, Oakland county, Mich.: "Enclosed find 50c for REPORT. It just 'fills the bill.'"

WANTS EVERY COPY.

John Puse, Wood county, Ohio: "Enclosed find 50c for REPORT, as I do not want to miss one copy."

APPRECIATES "REPORT" VERY MUCH.

Ed. O'Reilly, Putnam county, Mo.: "Thanks for REPORT. I appreciate same very much."

WORTH MANY TIMES 50c.

George W. Armstrong, Cass county, Ill.: "I think the REPORT is O. K. and well worth many times my 50c."

"WELL WORTH PRICE."

H. H. Cleaver, Ralls county, Mo.: "Enclosed find 50c to pay for REPORT. I think it well worth the price."

"IT IS ALL RIGHT."

G. E. Johnson, Warrick county, Ind.: "I receive the REPORT, and must say that it is all right in every particular."

"LIKE YOUR PAPER FINE."

Litt Earp, Carroll county, Mo.: "Enclosed find 50c for REPORT. I am not feeding any stock this winter, but I like your paper fine."

"LEARNED TO ADMIRE IT."

Daniel Crumley, Fairfield county, Ohio: "Enclosed find 50c for REPORT, as I have learned to admire it for the very valuable lessons it presents."

CAN'T GET ALONG WITHOUT IT.

Mads Peterson, Dickey county, N. D.: "Enclosed find $1.00 to extend my subscription to REPORT two years, as I cannot get along without your paper."

"BETTER THAN SUNDAY PAPER."

J. C. Gregory, Iroquois county, Ill.: "Enclosed find 50c to pay postage on the REPORT, which I think more of on Sunday morning than I do my Sunday paper."

BEST FOR THE MONEY.

Samuel Schofield, Huntington county, Ind: "Enclosed find 50c to continue REPORT, which I think is the best reading matter for the money I can get hold of."

"IT IS O. K."

H. E. Clark, Steele county, Minn.: "Enclosed find 50c for REPORT ensuing year. I read the REPORT myself and then hand it to a farmer to read. It is O. K."

GIVES MUCH INFORMATION.

C. McCalla, Dickinson county, Ia.: "Enclosed find 50c to pay for REPORT another year. I like your paper very much as it gives me lots of information.

"TWO VERY FINE PAPERS."

E. A. Hadden, Mayes county, Okla.: "Enclosed please find $3.00 for two subscriptions to REPORT and Breeder's Gazette. We think these are two very fine papers."

"AN EXCELLENT PAPER."

T. A. Umbarger, Bates county, Mo.: "I have received your REPORT for some time and think it an excellent paper. Enclosed find 50c to renew my subscription."

"REPORT A FINE PAPER."

G. E. Hilliary, Mercer county, Ohio: "Enclosed find $1.50 for REPORT and Breeder's Gazette. I have been taking the REPORT for some time, find it to be a fine paper and and would not like to be without it."

"VERY MUCH TAKEN UP."

J. H. Walker, Marshall county, Kan.: "Enclosed find 50c for renewal of my subscription. Am very much taken up with the reports in general found in the REPORT."

APPRECIATE SAME VERY MUCH.

J. S. Hickman & Son, Adair county, Mo.: "Your market information is clear, comprehensive and instructive to shippers of live stock. We appreciate same very much."

"BETTER THAN ANY OTHER."

George Brush, Steele county, Minn.: "I might state that the REPORT comes regularly and for my purpose is better than any other that comes from the Union Stock Yards."

LIKES 'REPORT' VERY MUCH.

Ira A. Gripp, Summit county, Ia.: "I like your REPORT very much and could hardly get along without it, while your hog letter is absolutely great. We thank you for same."

NEEDS OUR MARKET FORECASTS.

L. J. Walter, Walworth county, S. D.: "Enclosed find remittance for REPORT one year. I have not been getting the paper recently and find that I cannot get along without your market forecasts."

"INTERESTING AND VALUABLE."

J. E. Sharp, Newaygo county, Mich: "Allow me to thank you for the REPORT. I find it very interesting and valuable, especially your report on live stock and crop conditions."

KEEPS FARMER WELL POSTED.

Charles Griesemer, Tazwell county, Ill.: "I received the first copy of the REPORT and must say that it keeps the farmer better posted than any stock paper I now of. Many thanks for same."

"MORE VALUABLE EVERY YEAR."

O. E. Hintz, Macoupin county, Ill.: "Enclosed please find 50c for REPORT. Your paper is getting more valuable every year and I think the live stock raiser or farmer who does not take it is behind the times."

"KEEP MY NAME ON LIST."

Al. A. Neale, breeder of Shorthorn cattle, Montrose county, Colo.: "Of course I want the REPORT. Keep my name on the list. I expect to have a few head to ship next season and I want to know where to go."

"JUST THE PAPER FOR US."

A. H. Rader, Bureau county, Ill.: "Enclosed find $1.50 for your paper and Breeder's Gazette. The REPORT is just the paper for us and do not see how any man feeding stock can afford to be without it."

"GETS BETTER EVERY WEEK."

Guy W. Prentiss, Peoria county, Ill.: "You have been very kind in keeping me posted on sheep and hog market, as well as sending me the REPORT, which I find very interesting. It seems to get better every week."

"WORTH DOLLARS WHERE COSTS CENTS."

Peter Sheridan, Yellow Medicine county, Minn.: "Enclosed find $1.00 for which send your paper to John Plowman, Canby, Minn. It is coming to me. The REPORT is worth dollars where it only costs cents."

"GREATLY ENJOYS THE REPORT."

J. E. Steinour, Twin Falls county, Idaho: "Enclosed find $1.50 for your paper and Breeder's Gazette. I have greatly enjoyed the REPORT. It is one of the papers we look for. It is a great help to interest stockmen in better stock."

STILL WANTS THE "REPORT."

A. S. Turner, Webster county, Neb.: "You have been sending me the REPORT complimentary for some time. I still want the paper, even though I have no stock to ship this year. Therefore enclose 50c to keep it coming."

WANTS 'REPORT' RIGHT ALONG.

George W. Ahlfeld, Taylor county, Ia.: "Enclosed find $1.50 to pay for REPORT and Breeder's Gazette to be sent to J. S. Deaver. I have been a reader of the REPORT for the past six months and must say that I could not do without it."

NEEDS THE "REPORT" BADLY.

Thomas Lytle, Sully county, S. D.: "Enclosed find $1.50 for your valuable paper and the Breeder's Gazette. I have taken the REPORT for four years and get more information from it than any other paper I can take. Could not keep house without it."

'REPORT' IS THEIR GUIDE.

Myers Bros., Fairfax county, Va.: "Enclosed 50c for one year's subscription to the REPORT, which I consider valuable, even though we are too far away to ship to your market. The REPORT has been our guide ever since we have been taking it."

DON'T WANT IT FOR NOTHING.

Carl J. Scharnhorst, Montezuma county, Colo.: "Please find enclosed $1.50 for which send according to slip enclosed. I have been receiving the REPORT for some time and would miss it should it stop. I don't want it for nothing. I take a great deal of interest in it."

IOWAN IS STILL INTERESTED.

Samuel Shaw, Warren county, Ia.: "Enclosed find 50c to cover another years' subscription to REPORT. I consider it a very reliable market paper and very interesting. Although I am out of the shipping business, I am still interested in live stock and in reading the REPORT.

"GIVES A FELLOW AMBITION."

J. W. McKee, Rice county, Kan.: "Enclosed find $1.00 to extend my subscription two years. Having been in Kansas only a year, I have not handled much stock, but do not want to be without the REPORT. Reading your paper gives a fellow an ambition to get into the stock business."

"LONG A SUBSCRIBER."

J. S. McCumsey, Malheur county, Ore.: "Enclosed find check for $1.50 for REPORT and Breeder's Gazette. I do not need to praise the REPORT, as I have long been a subscriber and always shall be. I am well pleased with your paper and find it all of interest to the farmer and stock raiser."

Clipping Farm Horses in Spring.

As a rule farm horses are soft in spring and when put at the heavy spring work perspire a great deal more than would be the case if they were kept regularly at work during the winter months. As the hair is long, the moisture is held in it and dirt accumulates much faster than if the horse was covered with a short coat. This condition has led to the practice of clipping all farm horses in some communities before putting them at the heavy spring work and the general opinion of those who have to do with such horses both in working them and in the maintenance of their health seems to be in favor of the practice of clipping. As everyone knows, horses as we are acquainted with them at the present time live very differently from their natural state. The wild horse was free to roam about and had very little work to do exccept in getting enough to eat. The horse as we know him is subjected to a great deal of hard labor and is fed and housed under conditions that nature evidently did not mean for him; conseqaenntly, every provision should be made to keep him under these unnatural conditions in as healthful a way as possible. Experience goes to show that a soft horse with a long coat of hair if left to stand on a cold day after perspiring freely or if stabled without ample protection on chilly nights is apt to take cold and be subject to other ills resulting from these conditions. A long coat of wet hair does not dry out very quickly and also requires considerable body heat to accomplish it. The argument is put forth by those who clip that the horse with a short coat of hair dries out very quickly and in that condition is much less liable to take cold than the unclipped horse with a coat of wet hair. We also reason that a man would not care to stand about on a cold day or try to rest at night with a heavy suit of wet clothes on and that he would be much better off if he had on a light, dry suit, all of which seems to be very reasonable. The horse of today is healthier and a better worker than the horse of a century ago but more is expected of him and he accomplishes more. If he is clipped in the early spring and a blanket is provided for protection whenever he is left to stand in the open on a day that is cold or at night when put into the stable, it would seem he is better off than the unclipped animal. It is further argued that the clipped horse makes a great deal better appearance than the unclipped animal in the spring and there would seem to be no question but that is true. It is also stated that the clipped horse is more easily cleaned and kept in good condition which appears to be reasonable, too, for with a short coat of hair he accumulates much less dust and the excretions of the body thrown off through the pores of the skin have a much better chance to escape. A long winter coat is an admirable protection for a horse when he is not at work but when man takes him in charge and subjects him to heavy spring work after the winter months of rest he surely ought to do everything to make life as healthful and comfortable for him as possible. It would seem to be the course of reason to give him a good clipping and authorities in general at the present time are about united in favor of this course. The practice is getting to be a very general one throughout the

Big Profit on Hogs.

The 9 cent hog counts up fast. Some feeders make from two to three dollars more per hog than others.

It isn't what the hog eats; it is what he digests and assimilates that makes the money.

You want the benefit of the man's experience who is able to make the most out of hogs. The know how, to keep hogs healthy, get growth in quickest time and biggest profits in the desired knowledge.

The principal cost of producing pork is the feed. Prof. Dietrich says, "90% of the farmers have nearly everything to learn about how to feed a hog to get the most out of him at the least cost." We can help every one who will be helped to this knowledge. One secret of success is to prevent disease. The sick hog is a losing proposition. Another is to get more gain and growth out of your feed. We have new conditions to meet with higher priced feed.

For $1.00 we will send you the American Swineherd, the aggressive and progressive acknowledge up to date leader, devoted to the swine industry, for four years and give you as a premium the "Progressive, Scientific Feeding Formula" for increasing the gain while feeding fattening hogs, a half pound per day a hog, over the customary way of feeding from the same feed given. This hygienic secret made the discoverer a fortune fattening hogs. It is simple, sensible, and just as easy feeding as the old way. It has been proven so conclusively that we will agree to make good or give your money back, making you absolutely safe. It will make you a hundred dollars fattening 50 hogs.

If this offer is accepted within ten days will also give as additional premium, copy of the Pig Feeder's Manual worth the dollar itself. The paper stops at the time paid to. All our efforts concentrated on this business, naturally attains highest success which you can share with us. Address

THE HUMAN SIDE OF TWINE

[illegible] drive home from the implement [illegible] our little load of Sisal twine for [illegible] harvest, we do not often realize that we are giving the twine its final lift on the journey of many thousands miles which it has taken months to make. Seldom do we appreciate when we give it its final resting place in the binder box that the first hands which touched it were those of a Maya boy or girl in far off tropical Yucatan whose ancestors were a great civilized people, with temples and literature, centuries before Columbus came ashore in his red velvet suit.

Or, if it is Manila twine, the first step in its long pilgrimage was under the guidance of a bare-footed, brown-skinned little Filippino savage, who perhaps never heard of a binder, and whose views of agricultural implements are a pointed stone or a crooked stick.

Yet, if it were not for the industry of these two widely separated nations, the farmers of this rich state would still be obliged to bind their grain with old-fashioned wire, which never worked or with untrustworthy cotton strand. In fact, the problem of twine was the problem of successful binding for years after the self-binder was an established fact.

It took many years and thousands of dollars to eliminate this primary drawback to the early grain growers of the country. One manfacturer alone spent $15,000 trying to make twine out of grass, $35,000 using paper as a substitute, and $43,000 on straw—all in the end to be discarded as unsatisfactory. Then, after searching the world with a close tooth rake, as it were, it was found that two fibres could be made to do the work—Manila and Sisal. The Manila—long, soft and even—had generally been used in multiple strands for making cable and cordage; while the Sisal—strong, pliable and smooth—was found to lend itself perfectly for the manufacture of a single-strand cord, such as the self-binder necessitated.

Then commenced a merry struggle between the distant races for the honor of supplying the twine which was to make His Majesty, the American farmer, the greatest food producer in the world. At first, owing to the established position of the Manila hemp trade caused by the cordage industry, the little brown brother in the Philippines forged ahead, but he made no progress in his methods of production, using the knife and block and other simple methods followed by his primitive forefathers in extracting the fibre. It was soon seen that Sisal would either be the ultimate material to supply this demand or the demand would not be filled. At this point of the race a number of clever, aggressive Yucatecans, educated in the sciences in this country and abroad, sprang into the game. They saw the future commercial possibilities of the neglected Sisal plant. At their own expense they built railroads into the arid, dry territories where henequen grew. They invented new machines, capable of cleaning 100,000 leaves a day, and soon began to compete on an equal basis with the Manila fibre.

The Spanish-American war temporarily advanced the price of Manila fibre to such an extent that good grades of Manila fibre commanded a price which was practically prohibitive for binder twine. Therefore, manufacturers of binder twine concentrated their energy and genius in the production of a perfect binder twine from Sisal. This required some adjustment of machinery and some change in methods, but manufacturers of twine succeeded so that the twine made from Sisal has for some years been as perfect and satisfactory as any binder twine ever made from any material. This has resulted in the increased use of Sisal, until during the past season not less than 85 per cent, and possibly 90 per cent. of the material which went into the manufacture of binder twine in the United States was Sisal fibre.

First-class binder twine can be made from high-grade Manila fibre, but it is very difficult to make even a reasonably good article of binder twine from low-grade Manila. Before the American occupation of the Philippine Islands, the Spanish officials at times exerted their arbitrary power for the purpose of maintaining the quality of the fibre which was produced by the natives. It was not an uncommon thing for the governor of a district to seize a quantity of inferior fibre and publicly burn it in the middle of the plaza. This was an object lesson to the natives to produce better grades of fibre. However, since the Americans have taken possession of the Philippine Islands, no authority has been exercised and no influence exerted by the officials in connection with the quality of fibre. The result is a very much greater proportion of low-grade fibres than has ever been produced in previous years. Unquestionably, large quantities of this low-grade fibre will be used in the manufacture of binder twine for the harvest of 1910, and it is unnecessary to state that those who attempt to use twine made from this low-grade Manila fibre will have troubles of their own.

There may never be a famine in twine, but it is rather to the farmer's interest always to keep a weather eye on the future, and in this particular instance to secure his twine supply, whether it be Sisal or Manila, at as early a date as possible.

What They Say About the Ditto Triple-Geared Feed Grinder.

Perhaps it would be interesting to know what actual users of this mill say. Mr. Ditto himself might talk to you all day about the many advantages of the tripple gearing which makes the Ditto exceedingly rapid. He might shout about the double cut feature which draws in the ear corn and grains and making a dependable force feed as well as still more rapid grinding. He could write a whole book about the ball bearings that make the Ditto so light running. But careful buyers demand still deeper proof.

To this end Mr. Ditto has requested us to publish the following letters, selected at random from a recent batch received by him. We are glad to publish these letters as we believe in helping a good thing along.

"Enclosed please find check for grinder. The grinder is as you recommend and I can say it is the easiest runner I ever hitched a team to and I have tried several. It is one of the fastest grinders I ever saw on corn and cob. Have not tried it on oats, but am satisfied it will do just what you say.—John Gennebeck, Kokomo, Ind."

"Received your grinder a week ago Monday. It arrived all O.K. I am well pleased. I could not have bought one here as good for less than $33. Please drop me a card and let me know if you get this all right.—Wm. H. Hero, Morral, Ohio."

"The mill I purchased of you about one year ago is still 'on deck' and doing splendid service. I am grinding this winter for 200 sheep and a dozen cattle and it does not take much of my time to furnish 'the goods' for them. The 'Ditto' is all you claim for it.—Will P. Green, Mt. Vernon, O."

Mr. Ditto invites you to write for a copy of his book and splendid 10 Day Free Trial Offer. Address G. M. Ditto, Box 63, Joliet, Ill. A postal card with your name and address is all that is necessary. Mr. Ditto will know just what to send.

ELLWOOD FENCE

MADE OF TOUGH SPRINGY STEEL

Savings from a Well-Fenced Farm Will Pay for Other Improvements

"'The most profitable crop walks to market or is carried in the cream can.' The raising of swine can be made one of the most profitable industries. It promises quicker and greater returns for labor and capital expended. Changing swine from one pasture to another is desirable, as they will do vastly better on fresh pasture and keep much healthier."

W. W. P. McCONNELL.

Ellwood Fence is built on simple, correct principles. The cross (or mesh) wires are firmly wound around heavy cable horizontal or line wires, forming a truss brace that effectually prevents side-slipping. It really is a WIRE BOARD, with meshes only 4 inches across throughout the first 18 inches of all styles of hog fences.

Ellwood Fences combine great strength with closeness of mesh. They hold the grown hog and the suckling pig. All styles furnished with barbed wire woven at bottom if desired. With barbed-bottom Ellwood Hog Fence you save the cost of an extra strand of barbed wire stretched under the fence, as is required with plain bottom fence

Clay, Robinson & Company's LIVE STOCK REPORT

Vol. 20 | Chicago, Friday, February 4, 1910 | No. 5.

The Feeder Foots the Bill.

The present meat boycott is pernicious, both in theory and in effect, in that it imposes a penalty, not upon the packers as the followers of this latest fad imagine, but upon the farmer and feeder, who is in no case receiving more than a legitimate profit upon his investment of money, time and labor, and in many instances is receiving far less. Moreover, it is playing with a two-edged weapon. That there are well grounded reasons for the present high price of meats can not be gainsaid. If the people who are fostering this boycott movement would stop to figure out what it costs to produce a fat steer, hog or sheep, they would be compelled to admit that the high range of prices is brought about by actual existing economic conditions.

A few years ago when corn could be bought at 10 to 15c per bushel, hay at $2.50 to $5.00 per ton and feeding cattle at 3¼ to 4c a pound, it was an entirely different proposition and the city dwellers as a result had cheap meat. Now good feeders are costing 5 to 5½c per pound, corn anywhere from 50 to 65c per bushel and in some cases more, and hay $15 to $25 per ton. As a rule it takes six months to produce a fat steer and during that time he will consume eighty bushels of corn and hay in proportion. In addition to the original cost of the steer when put on feed, a man must figure on putting in about $50 to $55 worth of feed before the animal is in good beef condition, to say nothing of the interest on the investment, the labor and the risk.

It goes without saying that this country will never again see low-priced corn. A few years ago about the only outlets for the corn crop were feeding to stock, selling to distillers, and a comparatively small amount consumed in the form of corn-meal. Now, however, the outlets are multiplied. In addition to the former uses, vast quantities are consumed by manufacturers of the various cereal foods, and as a result of the propaganda which has been carried forward abroad for a number of years past with a view to educating Europeans to the value of corn products as human diet, the export outlet has been greatly enlarged.

Under the above conditions the meat boycott is not only unwarranted but futile. One might as well try to sweep back the waters of the Atlantic with a broom as to change the workings of the law of supply and demand. At the outset of this article we stated that the use of the boycott in this connection is like playing with a two-edged sword. Instead of permanently lowering meat prices, it is far more likely to place them upon a higher level, because it presents a menace which, if long continued, will naturally deter many farmers from putting cattle and other stock on feed, thereby reducing the supply and forcing meat prices still higher. What is needed now is a restoration of confidence throughout live stock circles, which would result in increasing the supply, thereby placing prices of the dressed products upon a basis more satisfactory to the ultimate consumer.

Certainly there is nothing that will throttle our our greatest industry, the production of live stock, quicker than to boycott our meats. The feeder who puts his money, time and labor into fattening a bunch of stock at the present high price of feed, who faces the discomforts and hardships of rough weather during the feeding period, and the hazards of the market when the stock is ready to turn off, should be recognized as a public benefactor rather than otherwise.

We quote below some extracts from a forceful letter received by us from H. M. Thayer, an extensive cattle feeder at Woodhull, Ill. Mr. Thayer says:

"I see from the papers that the people of some of the large cities are going to quit eating meat for thirty or sixty days, or until the price comes down. This kind of a proposition does not look good to the feeder who has a couple of hundred of high-priced feeders in his feed yard and prices of corn soaring up to 70c a bushel and hay worth $15 to $20 a ton. It seems as though the man who fattens cattle for market is always up against the real thing. A few years ago the muckrakers and the Government started an investigation of the packers that resulted in the farmers and feeders losing plenty of money. Our Government and the people of our capital city seem ready to sting the farmers and feeders of the United States and hand them a lemon about every six or eight years. Why don't some of these people who are howling about the packers' profits go into the packing business themselves? If some of these same agitators were feeding a lot of cattle and hogs in mud a foot deep, with high priced feeders, high corn and roughness, perhaps they would know more about what it costs to make a steer or hog ready for market."

C. O. R.

On Farm of R. S. McKie, Blanchard, Ia.

Is Blow at the Producer.

As a result of the agitation against the high price of meat, the members of the National Western Stock Show Association have become aroused and at a meeting held in Denver the following resolution was passed:

We condemn this movement as calculated to discourage an increased production of meat animals. We believe that stockmen and farmers of the United States should be given every incentive for increased production rather than discouragement. The present prices of meat are caused by the increased demand due to the growing population of the country and the low prices that have hertofore prevailed are responsible for the failure of the producer to keep pace with the increase in population.

We call the attention of the public to the fact that on the production of live stock in a large measure depends the fertility of our soil and, consequently, the production of agricultural crops.

With the increase of our population it is the duty of every patriotic citizen to encourage agriculture in every possible way. We assert that the present prices for meat are not unduly high as compared with the prices on all food products. The present movement to boycott the use of meat food is popularly supposed to be aimed at the packer, but in reality it is a blow at the stockman and farmer and is calculated to decrease production rather than materially to reduce prices.

Britain Imports More Meat.

In their annual review of the frozen meat trade, W. Weddel & Co. of London mention that the aggregate weight of beef, mutton, and lamb imported into the United Kingdom in 1909, frozen, chilled, or alive, was approximately 648,653 tons, compared with 626,421 tons in 1908. In connection with what may be termed the old sources of supply, the most notable features were the further marked decline in receipts of live cattle, live sheep, and chilled beef from North America, against the material increase in arrivals of Australia, New Zealand, and South American frozen and chilled meats. There was a large falling off in the importations of pork and bacon, but a marked increase in the supply of rabbits. Receipts from new sources were unimportant, though they comprised chilled beef from Australia and Mexico, and pork from China, also small experimental lots of mutton and lamb from South Africa. Altogether some 1,197,843 tons of beef and 579,410 tons of mutton and lamb have been consumed in the United Kingdom during 1909, a supply which works out at 59.8 lbs of the former, and 28.9 pounds of the latter per head of the population. Of the total supply 22.3 per cent consisted of frozen meat, 7.6 per cent of chilled beef, and 6.6 per cent of live cattle and sheep and Continental meat. Whereas 1908 was characterized by a great shortage in imports, leading to a general rise in prices, 1909 witnessed a material expansion in receipts, with an all round reduction in selling values, prices having fallen by as much as 16½ per cent on the average.

Big Drop in Southwest Feeding.

Frank Rhea, live stock agent of Missouri, Kansas, and Texas Railroad, says that according to reports received from the office of General Live Stock Agent Gabreath's office in Fort Worth less than 6,000 cattle have been in the feed lots along his line of road in Oklahoma this season, as compared with 50,000 a year ago, and that most of these have been sent to market. This indicates a big fall down in feeding operations, and it is quite likely that the feeding operations on other lines will show a coresponding decrease. Evidently there are not as many steers in the country, concludes the San Antonio Express, or more of them would have been forced into the feed lots even if meal and hulls were high.

Cattle from Six States.

On a recent Monday consignments handled by our house at East St. Louis included the following cattle shipments: Seven carloads from Illinois, two from Nebraska, two from Tennessee, one from Alabama, one from Missouri and one from Oklahoma. The fact that our East St. Louis house, though the youngest of our branches, draws shipments from so wide a scope of territory, goes to prove the truth of the phrase that no matter what market you ship to, you will find that "Clay, Robinson & Co. are O.K." If you have never done so, try it and see.

Clay, Robinson & Company's LIVE STOCK REPORT

Issued every Friday at Union Stock Yards, Chicago.

R. P. FALES.....Managing Editor
GUY FRIDLEY.....Associate Editor

Local and long-distance Telephone "Yards 4194."
Cable address "Kelso," Chicago.

This paper will be sent to anyone, whether a customer of Clay, Robinson & Co. or not, upon receipt of 50c to pay postage for one year.

If you receive the paper for a time without having ordered it, please understand that it is sent you with compliments of Clay, Robinson & Co., to keep you posted on the markets.

When requesting change of address always give old as well as new postoffice.

Advertising rate $2.80 per column inch, each insertion. Special low rate for live stock sale advertising. If you intend holding a public sale write for prices on quarter-page, half-page or page space.

Address all communications and make all remittances payable to THE LIVE STOCK REPORT, Union Stock Yards, Chicago.

A Wyoming Sheepman's Views.

To the Live Stock Report:

Since the meat boycott and the investigation of the packers started, opinions have been freely expressed by different people as to "who gets the money" and the causes leading up to the high cost of living. They have all had their fingers in the pie; it is a case of "the devil take the hindermost," and the farmer and live stock raiser are the "hindermost."

Now I want to say a few words in defense of the live stock raiser and farmer, the railroad official and the packer. Each is essential to the other toward making a success in the live stock business. I wish to submit for the consideration of your readers a few items showing the relative cost of running sheep in Wyoming at the present time as compared with ten years ago. First, it costs 100 per cent more to run sheep on western ranges now than it did then. Ten years ago a sheep herder was paid $30 a month and a camp-mover $35 per month; now herders receive $50 to $60 per month and camp-movers $60 to $70. A 1,500-lb team of horses ten years ago cost $125, now they cost $500. A sheep wagon ten years ago cost $125, now it costs $260. Food supplies for a camp cost ten years ago an average of $18 per month, as against $60 per month now. Ten years ago one man could move and care for three camps in winter time, while now he cares for only one, and it keeps him hustling. Sheep shearing ten years ago cost 8c per head, against 15½c now.

Ten years ago we ran our sheep almost exclusively on the public domain, while now we must own the most of the land run upon, at a cost of $10 to $75 per acre. The stock grazing areas in the West are diminishing in size on account of the forest reservations and game preserves on the one hand and the incoming settler on the other.

Live stock in many places is hand-fed for five months in the winter. Corn and hay is shipped into Wyoming by the train-load from Nebraska and Iowa to the starving live stock. Railroad officials have on the Wyoming division of the Chicago & Northwestern Railway worked three days and nights without sleep to raise the blockade caused by drifting snow so as to get feed to where it is needed. We buy this corn in Omaha from the Updike Grain Co. at a cost of 70c per cwt., sacked and on board the cars. The railroad company hauls this corn at a rate of 25c per cwt a distance of over 600 miles, and when we get to the end of the railroad we must pay a local freighter $2.00 per hundred lbs (or 2c a lb) to haul this a distance of 40 miles to where the live stock is starving. This would have looked to the outsider like a combination directed against the stock grower, but it was no combination,—just the "Big Swede" and his eighteen head of mules, with the law of supply and demand.

I am feeding a bunch of lambs which I bought at Fremont, Neb., Nov. 17, 1909. It takes 100 days to fatten a sheep or lamb for market. Lambs eat 3c worth of feed per head per day, grown sheep 4c worth, with corn at 70c per cwt and hay $14 per ton. I have my money invested in these sheep. They are out at La Fox, Ill., and I will sell these sheep to any man in Chicago at cost price and will not charge anything for my labor. I will lose money if the packers do not raise their prices. These are some facts about the cost of raising meat.

Now we come to the packer. I do not believe he gets all the profits or any more than he is entitled to. Here are some facts I saw yesterday and anybody can see them if he will look into the matter. A lamb bought at a cost of $8.25 per 100 lbs live weight weighed 80 lbs and dressed 50 per cent; in other words, yielding 40 lbs of dressed mutton. The packer sells this carcass whole to the butcher at 11c per lb., 5c per lb below the actual cost, but he gets his profit out of the by-products, i. e., the pelt, tallow, blood, etc., which would go to waste between the producer and consumer were it not for the scientific methods and modern facilities used by the packer to convert these by-products into marketable commodities.

In the meantime this government investigation has not hurt the packer any; it is the farmer and live stock raiser who has suffered the past week. During that time prices have been cut $1.00 per hundred pounds at a loss to the American farmer and live stock raiser of millions of dollars. The farmer and live stock raiser work eighteen hours per day. City folks work about eight, and want meat below the cost of production.

The retail butcher, whose assets comprise a meat block, butcher knife and meat saw, makes more money in a year than does a farmer in Iowa with 100 acres of good land The packers might well secure an injunction against the instigators of the present investigation, restraining them from eating nice, juicy beef steaks for a whole year. A college professor says that people can live cheaper in England than they can in America. There is no force to this comparison. A big stalwart laborer in England earns 25 to 30c per day and an American laborer of the same type earns from $2.50 to $3.00 per day. Why doesn't the learned professor go back to England to live?

A preacher in Baltimore is in sympathy with the meat strikers. The reverend gentleman never herded sheep or cattle in Wyoming when the mercury registered fifty degrees below zero and the wind was traveling sixty miles an hour. No, indeed, he has a better job. I warn you meat strikers and trust busters that unless you give the country a rest, quit throwing mud at one another and leave well enough alone, you will in the end accomplish nothing except the ruin of the greatest and most beneficial industry in America; namely, the production of live stock.

We will have to quit raising live stock at these prices. We will not work for nothing. There is no pleasure in it. We might come to the city and go into politics, and have another Coxey's army go through the country four years from now. The people have not forgotten Coxey's army yet. To be popular now a person must go into politics, play to the galleries, create panics and prosecute trusts.

Yours truly,
EUGENE McCARTHY.
Casper, Wyo. (A Wyoming Sheep Man.)

Small Clouds on Hog Market Horizon.

Hog market made good recovery from the semi-demoralized trade of a week ago, prices making rallies of 30@40c from low spot of Tuesday, Jan. 25. January receipts of swine disappointed all the seers of hog trade, both at Chicago and elsewhere, local marketing showing 30 per cent depletion from the total of January, 1909, and practically 50 per cent decrease from the January, 1908, marketing. Corresponding falling off is reported from other centers. Some portion of the famine run was no doubt due to transportation difficulties on rail lines. However, recent reports from interior points seem to warrant the conclusion that excesive numbers of hogs are now pressing for immediate transit to market. Another month of a winter packing season is history and packers were unable to accumulate product. The season is past middle age and supply in sight warrants no hope that sufficient cured meats can be acquired before season's demise to cover bare floors in packing house cellars. About the only cloud on hog market horizon is the attempt to organize an aggressive meat-abstinence movement and the new advent of that old meat trade bugaboo, the Lenten season. Singly, neither condition would have grave negative effect with such markedly diminished volume of raw material. In combination they might do considerable damage to prices current for the time being. The past few days trade experts seemed of the conclusion that the meat abstinence movement "died a bornin'," or at least that the agitation was not calculated to have serious permanent effect. In recent years the season of Lent exerted no excessive ill effect on the markets. Conservatism warrants keeping fat hogs moving marketward. Conviction, based on careful scrutiny of conditions, seems still to sustain faith in the future hog market.

No More Cheap Beef.

"In the past cheap food products have led to extravagant methods of feeding and large wastes in food products," remarked Professor Andrew Boss of the University of Minnesota. "There is no doubt in my mind but the production of feed can be greatly cheapened by the use of coarse forage and hay crops and by limiting the amount of corn and other grains fed. Feeding experiments conducted at several of our state experiment stations seem to indicate that quite as profitable results could be obtained by cutting down the grain ration at least one-half and supplying nutritive but cheap rough feed instead. The closing of the western ranges, it seems to me, is another factor that must be counted in the production of beef in the future. It will only be a few years until all beef must be produced on our smaller farms. While they may not be forced to maturity so rapidly, I believe that the general policy will be to grow the young stuff on pasture and cheap rough feeds, giving them a short finish on the by products of the grain and forage crops. Under these circumstances the supply of beef will be more or less limited and I cannot but believe that the price must go higher. I do not look for 4 or 5c beef to again reach the American consumer."

PRIZE WINNING HEREFORDS AT THE 1910 NATIONAL LIVE STOCK SHOW.

These cattle, owned and exhibited by A. L. Weston, Edgewater, Colo., won the first prize in steer herd class at the recent Denver Show. They also were the Reserve Grand Champions in the steer herd of all breeds at the 1909 International Live Stock Show at Chicago, and also first in each of their classes and herds at the 1909 American Royal Live Stock Show at Kansas City. The two-year-old steer (the one held by Mr. Weston on the left) was the champion at the last National Western, International and American Royal Shows.

An Open Letter.

Cheyenne, Wyo., Jan. 13, 1910.

Mr. John Clay,
Chicago, Ill.

DEAR MR. CLAY:

The copy of "Village Worthies" written by you (and which originally appeared in the Christmas number of the Breeder's Gazette) has been received, for which accept my sincere thanks. To say the least, you have given me a highly appreciated treat. I have read it over three times and at each reading beheld fresh visions of bygone days. There is a wonderful pleasure or fascination in retrospection. Auld age lives in the past and youth in the future, so each has its enjoyment in perspective.

In reading your praiseworthy production how my mind ambles back vividly to my boyhood days of almost sixty years ago, and how vividly I can see those dear auld neebers o' my youth. Fond memory lingers o'er their worth. Yes, the shearers, too, loom up in my horizon of memory. I well recall the great crowds of Irishmen, with their store of worldly goods, which consisted of an additional sark tied up in a handkerchief, dangling frae the end of their blackthorn o'er their shonther, embarking for the Scotch harvest, and on their return the marvelous tales they'd relate about the strange people they mingled with across the Irish Sea.

Yes, I can see the corn riggs as of yesterday. I have been there and shore my half rigg with another boy. He and I would take the back rigg, and receive for both the wage of one of the other shearers. And how the laugh and jest would go round, cheerily turning the toils of day into one round of pleasure as if they were only out for recreation. But why re-picture further. You have covered the ground so graphically it would really be pirating for me to further enlarge, but you'll excuse as it is hard for me to let go the theme, for you have stirred up my auld blood and auld recollections come up for review.

Yes, there's the traveling tailor and shoemaker. How they'd carry the gossip from one farmstead to another and tell their tales in their terse, comprehensive vernacular that was really pleasing and instructive! They were the principal news venders of fifty years ago in the country districts. I was about twenty years aul before the advent of a paper into the hoose, and when a callan what difficulty I experienced to get a newspaper tae make a kite! If I was fortunate enough to get one to make the body we could make the tail out of tufts of hay or straw, but I hae digressed. I remember well a shoemaker by the name of John Wilson. He had crooked feet, and persons so afflicted were called "reel fitted", and while he was at the house it was a real jubilee. He had a voice as sweet and melodious as any woman and could sing like the mavis. I was always sure to get him to sing me "Annie Laurie", which was my favorite then and is to the present time, and what soul of music he could pour forth! At times I thought my wee heart was in my very mouth. There is nothing like the good auld Scotch songs yet. Your French or Italian lays are tame compared tae them as they have nae the power to fire the blood and send that thrill o' ecstasy that charms and stirs the very soul.

While I have derived great pleasure from your lucid description of bygone days, still it imparts a kind of sadness to think of such a grand rural population fast sinking into decay. Goldsmith laments it also:

"A bold peasantry, a country's pride,
When once destroyed can never be supplied."

Again thanking you for the pleasure you have given me, I am,

Your sincere friend,
JOHN H. GORDON.

[NOTE:—We have a few copies of "The Village Worthies" still on hand. These are in pamphlet form, with the same illustrations that accompanied the original article. They bear no advertising, and were issued for private circulation. We shall be pleased to send a copy upon request to any person of Scotch birth or parentage, or anyone else, who would like to read the sketch.—EDITOR.]

"Report" Statistics Complete

Greeley, Colo., Jan. 16, 1910.

The Live Stock Report,
Union Stock Yards,
Chicago, Ill.

Gentlemen:

Enclosed find $1.50 for your paper and Breeder's Gazette. I have also got the REPORT with the year statistics for 1909 and I don't see how you could have improved in the manner you have it. I think it very complete and will file it away for future reference.

We have had very cold weather over a month right around here, but it has been fine for feeding, as the yards have been dry. By bedding them my lambs went on full feed quicker than ever before.

Corn and alfalfa is very high, around $1.25 per cwt for corn and $10 per ton for alfalfa. Think it is safe to say we have not over 25 per cent of sheep on feed in the district as usual.

Yours truly,
W. A. MINER.

U. S. Farms and Stock Value.

Below are given the number of farms, including ranches, and the total valuation of live stock in the United States for ten-year periods from 1850 to 1900, as compiled by the Department of Agriculture:

	Number of farms.	Valuation of live stock.
1900	5,739,657	$2,228,123,134
1890	4,564,641	2,418,766,028
1880	4,008,907	1,576,917,556
1870	2,659,985	1,822,327,377
1860	2,044,077	1,089,329,915
1850	1,449,073	544,180,516

The number of persons engaged in agriculture, according to ten-year census returns from 1900 back to 1870 follow:

1900	10,438,219	1880	7,713,875
1890	8,565,926	1870	5,922,471

Nothing with God is accidental.—Longfellow.

Gang Plows May be Light Draft.

There is a gang plow built at Monmouth, Ill., on the oldest plow manufacturing towns in the state by the way, which is designed in a manner that makes for remarkably light draft. It is constructed so that the beams are carried on top of the frame. This arrangement prevents any pressure on the bottom of the furrow. And as the plow is built without a land side, there is no friction from that direction. All the weight of plow, frame and driver is carried on the wheels with the result that the plow bears no burden other than that of turning the furrow. Other notable features made possible by this improved construction are a direct beam hitch, single ball and horse lift and "point first" action, which means that the plow enters the ground and comes out easily and quickly. This design, called the Monmouth Gang, made by the Monmouth Plow Co., is made also in sulky style, and is meeting great favor all over the corn belt particularly. The manufacturers sell their entire output direct from the factory to the users and are only too glad to send them on 30 days trial, which speaks louder than words for the good action of these plows. This firm has followed this policy for the past few seasons and finds it much more satisfactory than its old plan of doing business through dealers. They pay the freight charges, guarantee satisfaction and quote some mighty interesting prices. To those in need of a plow we suggest them as a likely firm to correspond with. Write for their book, addressing them as follows: Monmouth Plow Co., 1,039 South Main St., Monmouth, Ill. Theirs is a large, interesting catalogue, illustrating and describing not only Plows, both riding and walking, but a splendid line of Cultivators, Tongueless Disc Harrows, Spike Tooth Harrows, Manure Spreaders and other articles, all sold at factory prices and with the distinct understanding that everything must give perfect satisfaction.

Cost of Producing Meat Double.

John E. Law, New Windsor, Colo., writes our South St. Joseph house: "Crop conditions in our neighborhood last season resulted in a very short alfalfa crop, so much so that I did not have from my farm enough alfalfa to feed anything at all. This, with the high price for feed and lambs, kept me out of the feeding business altogether.

"I hope the present agitation over the high price of meats will not knock the profits off altogether for those who are feeding this winter. I see no show for any great reduction in the price of the staple articles of living, unless there is a reduction all along the line of other industries as well. The farmer is producing his grain and his meat on lands that cost him double what they did 15 years ago and his teams and labor cost him approximately double. So to get back to old-time prices would be to go below the present cost of production."

J. W. Mitchell, prominent in live stock and farming circles, Cherokee county, Ia., was at Chicago on Monday with 19 head of 1,196-lb steers which we sold at $5.75, which price, according to Mr. Mitchell, was very satisfactory.

LED BY 31c PER CWT

At the 1909 International Show, Chicago, there were 58 loads of fat cattle which passed through the auction. Of these Clay, Robinson & Co. handled 14 loads, which we sold at an average price of $11.38 per cwt. The other 44 loads—sold by other firms—made an average price of $11.07. This average was 31c per cwt lower than the average obtained by Clay, Robinson & Co. Only another instance of citing the superiority of our ability for selling cattle.

LIVE STOCK & CROP CONDITIONS

REPORTS GATHERED AND RECEIVED BY CLAY, ROBINSON & CO.'S HOUSES AT THE NINE LEADING LIVE STOCK MARKETS.

SHEEP DOING WELL IN COLORADO.

W. A. Miner, Weld county, Colo.: "The weather is now very much warmer and sheep are doing fine."

NO LOSS OF RANGE CATTLE YET.

I. T. Wheeler, Billings county, N. D. "We have had a hard winter so far, but cattle look well. No loss yet."

STOCK NEVER LOOKED BETTER.

Robert Wilcox, Dunn county, N. D.: "Live stock are doing fine; in fact, I never saw them look better at this time of the year."

TEXAS CATTLE DOING FINE.

C. F. Jackson, Hardeman county, Tex.: "Cattle are doing fine here. The range is short, but the weather is fine and warm. Hogs are scarce and high as ever."

WINTER BROKEN IN SOUTH DAKOTA.

C. J. Horgan, Pennington county, S. D.: "It looks as though the winter is broken in this country, as we are having fine weather now. Hay is selling at $15 per ton."

HAY GETTING SCARCE IN IOWA.

C. McCalla, Dickinson county, Ia.: "We are having a steady winter, with plenty of snow and cold weather. Fully one-half the corn is snowed under in the fields, and hay is getting scarce."

HAY $15@16 IN IOWA.

C. B. Hollenbeck, Adams county, Ia.: "Prices of feed are very high here, corn selling at 70c per bushel, and hay $15@16 per ton. There are very few cattle on feed and hogs are scarce.

NORTH DAKOTA CATTLE IN FINE SHAPE.

Beeh Bros., breeders of pure-bred Hereford cattle, Stutsman county, N. D: "The weather here is cold. Cattle are roughing it in fine shape. Feed is plentiful, although high in price."

NO LOSS IN NEBRASKA YET.

M. D. Cravath, Sheridan county, Neb.: "Winter is quite severe, but no death loss as yet. Snow has gone off, so we can get some grazing. Enough hay is in sight if we have any kind of a spring."

Market Notes.

G. Giddings, Anoka, Minn., was at our South St. Paul house Jan. 26 on his way to Chicago with five decks of sheep. In speaking of the potato industry in his country, Mr. Giddings stated that 2,500 000 bushels were shipped from Anoka last fall, which sold all the way from 30@52c per bushel. Many sheep are fed there for the sole purpose of securing the manure as a fertilizer.

A. Mears, who is the owner of a large farm in Kingsbury county, S. D., was represented at South St. Paul on Jan. 27 with a car of hogs and sheep to our house. Owing to the increased valuation of land in this section, Mr. Mears mentioned that the raising of stock is on the decline and interest centering more and more in farming. He said as high as $65@80 per acre is being paid for improved land there.

A. Garnett, of the firm of Garnett Bros., progressive merchants and farmers of Pembina county, N. D., was at South St. Paul on Jan. 29 with a mixed car of sheep and lambs to our house. Mr. Garnett, in conjunction with his brother, owns 7,000 acres in his section, which heretofore they have devoted largely to the raising of grain, but having met with such good success in feeding sheep Mr. Garnett stated that they contemplated raising and feeding live stock on a more extensive scale. The lambs in the shipment averaged 86 lbs and sold at $8.00, being 25c per cwt. above any other sale since Jan. 25.

Buying and Selling O. K.

A. H. WHITNEY
Real Estate and Loans.

Columbus, Wis., Jan. 30, 1910.

Clay, Robinson & Co.,
Chicago, Ill.

Dear Sirs:

I am very much pleased with this car of lambs; in fact, I am pleased with the whole year's transaction, as we have had over 2,500 sheep that you have bought for us. Your judgment in selling them has been O. K You have sold up to the present time over 1,100 sheep, and about all of them topped the market. Thanking you, I remain

Yours,
A. H. WHITNEY.

Do You Need a Housekeeper?

Any farmer or ranchman needing a housekeeper is requested to correspond with us, and we shall be pleased to refer him to a competent woman (widow with one child six years old), experienced in farm work, and with references. Capable and experienced cook. Will go anywhere. Address this paper.

Famous Bell Feeding Cattle.

Clayton & Murnan, Union Stock Yards, Denver, Colo., write us to the effect that they have purchased 5,000 of the well-known Bell cattle of New Mexico. They include 3,000 two-year-old dehorned steers and 2,000 dehorned spayed heifers. These cattle do not need any introduction to middle west or western cattlemen. To learn that they bear the Bell brand is sufficient evidence of their excellent quality. Prospective buyers should lose no time in getting into touch with Clayton & Murnan by letter.

No accidents are so unlucky but that the prudent may draw some advantage from them.—Rochefoucauld.

Geo. B. Smith & Co.

National Distributors of

MILL FEEDS

NATIVE BEEF STEERS.

Range of prices and bulk of sales of native beef steers this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Range.		Bulk.	
This week.....	$4.25@	7.60	$5.35@	6.75
Previous week.....	4.25	7.70	5.25	6.50
Year ago.....	4.25	7.15	5.25	6.50
Two years ago.....	3.75	6.10	4.85	5.90
Three years ago.....	4.00	7.25	4.90	6.35

A dull and unsatisfactory market for cattle on Thursday of last week. Receipts only 7,286, and demand was at a very low ebb. Prices sunk 10@15c under Wednesday. Export demand was nil, outlet through eastern shipping channels narrow and local buyers indifferent. A load of very choice 1,552-lb Shorthorn beeves reached $7.60, although most selling was at $5 25@6 00, with local buyers getting a liberal quota of plain light steers down to $4.75 and some very poor ones as low as $4.25. No relief was afforded selling interests Friday; in fact, the trade was at its worst for the week. Total run was only 3,477. Included in this supply was a larger proportion of beef steers than usual and prices went 10@15c lower. Not all offerings found sale and even some good heavy beeves were locked up owing to unsatisfactory bids. The week closed with rates 35@50c lower than previous week's finish and 50@75c down from high point two weeks ago. The two week's decline, direct result of agitation against high retail prices of beef, has been a very severe blow to feeders' interests, many having to market cattle at a financial loss. Not a few were forced to liquidate because of inability to secure feed, while others became afraid of the future and cut loose indiscriminately.

Total marketing of 19,565 cattle at the start this week was several thousand under expectations. Prices for beef steers were generally 10@15c higher than last Friday. Eastern shippers and exporters set the pace. Packers got into the saddle last and at no time used the whip or spur. Thus the market lacked real keenness and sellers had to fight for all concessions secured. Fat heavy beeves were again in small quota, sales rarely being above $6.85. Top for full load was $7.50, although 12 head, averaging 1,571 lbs, reached $7.60. Bulk of sales $5.35@6.65. The better buying on export account was due to higher cables from London, being quoted at 15¼c, highest for a long time, barring Christmas beef prices. Shortage of cars west of Chicago was given as the reason for smaller runs than anticipated, many shippers west of Mississippi River claiming that the roads were unable to furnish them half the number of cars they wanted. However, it is fortunate that receipts were reduced, as under liberal runs a different story would doubtless have been told of the market. Tuesday run of cattle 4,497. Strong to 10c higher prices were readily paid. Best beeves offered went at $6.60 The future trade promises well, under normal conditions. In our belief the eastern boycott against meat will end in a fizzle, which, along with industrial affairs in a most favorable condition, should not cause worry among cattle feeders. By all means do not rush cattle to market during the next few weeks. If you are thinking of shipping two or three loads at once, let one load come instead. Market the best and fattest first. Famine supply of 10.000 cattle showed up Wednesday. There was a wild rush for beef steers and rates were boosted 25@35c above Monday and 50@60c up from last Friday. Summit $7.50 and bulk $5.50@6.75.

Revised quotations for all grades of native beef steers:

Extra choice to prime steers.....	$8 10 @	8 60
Good to choice steers.....	7 25	7 90
Medium to good steers.....	5 85	7 10

Three years ago....	3.35	4.50	1.75	2.65	3.65	4.40

Very uneven trade in cows and heifers Thursday last week. Generally speaking, prices were steady to 10c lower. Bull trade weak to 10c lower. Veal calves went strong to 25c higher, better tone in dressed veal market stimulating trade. Another steady to 10c lower trade in cows and heifers Friday, with rates 25@40c down from one week ago. Weaker market for bulls, while the decline from Friday of last week was 30@40c. Calf market quiet but steady with Thursday, and mostly 50c under one week ago.

While trade in cows and heifers on the opening market day this week was uneven, prices were mostly 10c higher than last Friday. The early market was made by outsiders, although packers were freer buyers later on. Bull market steady. No quotable change in prices for calves. Cows and heifers went 10c higher Tuesday. A few dairy cows are showing up now and buyers are discriminating against them. Bulls made a stronger range. Calves advanced 25c. Cows and heifers mostly 15c higher Wednesday, or 20@30c up from last Friday. General demand strong. Bulls advanced 10c, showing 15@25c gain over late last week. Calf prices steady with previous day and 25c up from last week's close.

Revised quotations for all grades of butcher stock and calves:

Extra choice to prime yearling heifers.....	$6 00 @	6 50

SALES MADE BY CLAY, ROBINSON & CO.

Wednesday, Jan. 26—18 Nebraska steers and heifers,

OPPORTUNITY KNOCKS AT YOUR DOOR

Napoleon said: "For everything you must have a plan. Whatever is not profoundly considered in its detail produces no good result." Ever since our organization we have planned to render our patrons the best service possible; to give every one, be he a small or large shipper, a square deal. We have constantly kept in mind the details; and they are legion. We trust nothing to chance. Our selling forces are so organized that they are ever alert, and have the know-how, to obtain the highest market value for cattle, hogs or sheep. Ask anyone who is a patron of ours, or your home banker. You will readily receive an answer in the affirmative. All of our operations are conducted with a well considered system from an organized center. We never lose sight of the shipper's or feeder's interests from the time he signifies his intention of marketing his stock by the old reliable route—C. R. & Co.—until the stock goes over the scales at the Stock Yards. Are you getting this kind of service? If not, you should. Opportunity is knocking at your door. Try us next time at any one of the nine leading markets.

0.[illegible] lbs, $6.60; 3 export cows, 1,175 lbs, $5.40; 3 export cows, 1,340 lbs, $5.15; 25 Wisconsins, mostly heifers, 680 Angus, 680 lbs, $5.10; 5 export cows, 1,100 lbs, $5.00; 7 Kosher cows, 1,215 lbs, $4.85; 30 medium heifers, 776 lbs, $4.75; 4 medium heifers, 860 lbs, $4.65; 12 cowy heifers, 930 lbs, $4.60; 6 medium yearling heifers, 760 lbs, $4.50; 10 medium heifers, 882 lbs, $4.50; 10 medium cowy heifers, 835 lbs, $4.25; 3 medium export cows, 1,300 lbs, $4.25; 12 plain cows, 960 lbs, $3.50; 7 common cows, 1,020 lbs, $3.30; 8 common cows, 970 lbs, $3.20; 12 cutter cows, 900 lbs, $3.00; 19 cutters, 918 lbs, $2.90; 10 veal calves, 122 lbs, $8.50.

Thursday, Jan. 27—6 good export heifers, 1,130 lbs, $5.00; 12 medium yearling heifers, 830 lbs, $4.50; 9 medium heifers, 834 lbs, $4 50; 6 good cowy heifers, 1,070 lbs, $4.40; 18 fair, half fat yearling heifers and steers, 740 lbs, $4.40; 7 good cows, 1,000 lbs, $4.15; 15 good cows, 1,140 lbs, $4.10; 24 cowy heifers, 870 lbs, $4.10; 6 light fleshy heifers, 570 lbs, $3.90; 6 fair cows, 900 lbs, $3.60; 19 fair cowy heifers, 850 lbs, $3.60; 8 fair cows, 881 lbs, $3.60; 11 plain fleshy heifers. 660 lbs, $3.60; 5 plain heifers, 770 lbs, $3.40; 10 feeding cows, 817 lbs, $3.40; 6 cutter cows, 920 lbs, $3.00; 7 cutter cows, 1,030 lbs, $2.90; 21 calves, 392 lbs, $4.50.

Monday, Jan. 31—6 fair export heifers, 1,020 lbs, $4.55; 10 cowy heifers, 948 lbs, $4.50; 5 yearling heifers, 793 lbs, $4.50; 16 medium yearling heifers, 787 lbs, $4.40; 9 medium heifers, 830 lbs, $4.25; 5 common heifers, 572 lbs, $3.75; 17 fair cows, 970 lbs. $3.65; 5 fair cows, 1,016 lbs, $3.65; 6 fair cows, 855 lbs, $3.50; 5 fair cows, 962 lbs, $3.45; 6 fair cows, 858 lbs, $3 40; 5 cutter cows, 1,040 lbs, $3.15; 8 common cutters, 900 lbs, $2.90; 10 canners, 897 lbs, $2.75; 6 canners, 850 lbs, $2.50; 2 export bulls, 1,600 lbs, $4.65; 4 bulls, 1,500 lbs, $4.30; 5 bologna bulls, 1,316 lbs, $4.10; 5 bologna bulls, 1,312 lbs, $4.10; 3 bologna bulls, 1,330 lbs, $4.10; 2 bologna bulls, 1,200 lbs, $3.90.

Tuesday, Feb. 1—2 good export cows, 1,170 lbs, $4.70; 5 good cows, 1,080 lbs, $4.40; 9 good cows, 1,182 lbs, $4.30; 4 cowy heifers, 960 lbs, $4.30; 8 dairy cows, 1,054 lbs, $4.10; 10 fair cows, 1,095 lbs, $3.90; 7 fair cows, 1,020 lbs, $3.90: 7 fair cows, 1,125 lbs, $3.75; 7 stock heifers, 550 lbs, $3 40; 4 plain cows, 992 lbs, $3.35; 5 cutters, 882 lbs, $3.20; 4 cutters, 862 lbs, $3.15; 4 cutters, 982 lbs, $3.30; 8 cutters, 971 lbs, $3.25; 3 canners, 900 lbs, $2.75; 2 plain export bulls, 1,560 lbs, $4.35; 5 bologna bulls, 1,230 lbs, $4 00.

STOCKERS AND FEEDERS.

Top price and bulk sales of stockers and feeders this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Top Feeders.	Bulk Feeders.	Bulk Stockers.
This week	$5.60	$4.50@5.15	$3.75@4.60
Previous week	5.80	4.35 5.00	3.65 4.35
Year ago	5.50	4.65 5.10	3.75 4.50
Two years ago	5.00	4.25 4.65	3.40 4.15
Three years ago	5.00	4.25 4.75	3.25 4.00

Prices for stockers and feeders Thursday last week dropped 10c. Anything with quality went with more freedom, but common and off colored lots most difficult sale. No quotable change in the Friday market. The week finished 25@50c lower than last week's close. Increased offerings and bearishness of buyers, along with a big break in fat cattle prices, proved the Waterloo of the selling interests. No small number of plain light feeders and off colored stockers went over to Monday without bids.

Good demand and moderate supplies at the start this week boosted prices for stockers and feeders 15@25c over last Friday. Demand was centered on the better grades and these showed most advance. Tuesday trade in stockers and feeders was steady, all desirable offerings finding ready sale. Prices were strong to 10c higher Wednesday, with the advance over last Friday being 25@35c.

Revised quotations for stocker and feeding cattle:

Good to choice feeders	$4 90	@ 5 35
Poor to medium feeders	4 35	4 80
Good to choice stockers	4 40	4 75
Plain to medium stockers	3 75	4 30
Inferior to common stockers	3 25	3 65
Good to choice stock heifers	3 25	3 65
Common to medium stock heifers	2 85	3 15
Plain to good thin young cows	3 00	3 25

MILKERS AND SPRINGERS.

Revised quotations for milkers and springers:

Choice to prime	$50 00	@ 60 00
Medium to good	40 00	45 00
Common to plain	30 00	37 50

Hogs.

Bulk sales of hogs of respective weights this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Bulk 200 to 250 lbs.	Bulk 260 lbs and heavier.	Bulk 135 to 195 lbs.
This week	$8.40@8.60	$8.50@8.70	$8.25@8.40
Previous week	8.15 8.45	8.25 8.50	8.00 8.35
Year ago	6.15 6.60	6.25 6.70	5.95 6.55
Two years ago	4.30 4.50	4.35 4.55	4.25 4.45
Three years ago	6.95 7.10	7.00 7.15	6.90 7.05

Hog market had a decided reversal of form Thursday of last week. Prices were 15c up from bulk of Wednesday's transactions. Pinnacle $8.50 and general bulk of business $8.20@8.45. Receipts 20,024. Generally speaking, Friday market for hogs was steady, although top at $8.55 showed 5c advance, while some light weights went weak to 5c lower. Receipts were 13,151. Bulk of trading $8.30@8.45. It was a steady to 5c lower deal Saturday. Run 15,000. Top $8.50 and bulk $8 25@8.45. Very weak undertone to market, with prices 10@25c under one week ago, light weights showing most loss.

Car shortage and bullishness of producers served to greatly disappoint the hog buying contingent at the start this week. Instead of 45,000 to 50,000 hogs as expected Saturday, the Monday run was only 34,581. All classes of buyers were eager for offerings and result was a brisk trade at prices 5@10c, mostly 5c, higher than Saturday. Top $8.57½ and bulk $8.30@8.50. Opening 5@10c higher Tuesday, under activity on the part of eastern shippers and speculators, market closed with prices 5c under best of the session. Packers absolutely refused to pay early rates. Receipts 18,236. Top $8.70 and bulk $8.40@8.60. Opening 5@10c higher, Wednesday hog market closed with part of the advance lost. Run 23,000. Top $8.80 and most sales $8.45@8.70. As compared with last Saturday the advance was generally 25c.

Revised quotations for all grades of hogs:

Fair to choice heavy shipping	$8 65	@ 8 80
Fair to choice butchers	8 60	8 70
Fair to choice medium weights	8 50	8 65
Good to choice assorted light shipping	8 40	8 55

*Sold by Clay, Robinson & Co.

A total supply of 10,504 and better inquiry from both local and eastern buyers enabled sellers to check the tobogganing of sheep and lamb rates Thursday. Trade had good life at prices steady to strong. Wethers reached $6.00, yearlings $7.50 and lambs $8.30. In spite of the meager total supply of 8,081 Friday, sheep and yearlings sold 10@15c lower and lambs went 15@25c down. Market was very draggy. As compared with last week's close sheep rates showed 35@50c loss, while those for yearlings and lambs were 50@75c off.

A total run of 15,514 sheep and lambs on initial market day of this week proved far under trade requirements and a lively market at rates 15@25c higher than last Friday was a logical sequence. Sellers had no trouble in getting rid of their offerings on this price basis. Both local and eastern buyers were lively bidders. Top lambs made $8.25, obtained by Clay, Robinson & Co., best yearlings $7.65 and summit for sheep $6.25, secured by Clay, Robinson & Co. Another 10@25c higher trade Tuesday. Supply only 10,241. Trade brisk. Top lambs at $8.50 were handled by us. Best sheep $6.45. Yearlings made $8.00 for 75 lbs average. Receipts Wednesday 15,000. Opening 10@15c higher, market closed weak. Pinnacle on lambs $8.75. The wethers which made $6.65 were handled by us. Fancy lamb weight yearlings were quotable at $8.20. The advance over last Friday was 50@75c.

Revised quotations for all grades of sheep and lambs:

SHEEP.

Wethers, good to choice	$6 50	@ 6 65

East Buffalo Markets.

[Special telegram from Clay, Robinson & Co.]

Buffalo, N. Y., Feb. 1.—General cattle market 10@15c lower than late last week.

While pigs and light hogs sold steady, at $8.45 @8.55, other grades advanced 10c, at $8.70@8.80.

Sheep and lamb market 25@35c higher than last week's close. Top lambs $8.65@8.80, yearlings brought $7.25@8.00, best wethers at $6.50 and top ewes $6.00.

South Omaha Markets.

[Special telegram from Clay, Robinson & Co.]

South Omaha, Neb. Feb. 1.—Both beef and feeding cattle strong sale with late last week. Quality rather common. Top beef steers $6.15.

Prices for hogs 10@20c higher than last Saturday. Top was $8.45 and bulk $8.20@8.35.

Strong trade in sheep and lambs thus far this week. Good lambs $7.90@8.25, yearlings $6.80@ 7.35, wethers $5.60@6.00 and ewes $5.00@5.60.

Kansas City Markets.

[Special telegram from Clay, Robinson & Co.]

Kansas City, Mo., Feb. 1.—Cattle generally 25c higher than late last week. Top beeves $7.10.

Top hogs today $8.55 and bulk $8.20@8.45.

Rates for sheep and lambs 20@40c higher than late last week. Tops were: Lambs $8.40, yearlings, $7.60, wethers $6.10 and ewes $5.75. All of these sales were made by Clay, Robinson & Co.

South St. Paul Markets.

[Special telegram from Clay, Robinson & Co.]

South St. Paul, Minn., Feb. 1.—Steady to strong trade in cattle, as compared with late last week.

Hogs 10@15c higher than last Saturday. Top $8.30 and bulk $8.10@8.15.

Prices for sheep and lambs 15@25c higher than late last week. Top sheep $5.75 and bulk $5.25@ 5.50. Pinnacle on lambs $8.00 and most sales $7.50 @7.75.

South St. Joseph Markets.

[Special telegram from Clay, Robinson & Co.]

South St. Joseph, Mo., Feb. 1.—Quality of beef steers very common. Prices 10@20c higher than last Friday. Cows scarce, with rates 15@20c up. Very little doing in stockers and feeders, with market about steady.

Hogs 10c higher than last Saturday. Top $ and bulk $8.15@8.40.

Selling of sheep and lambs 25@35c higher than late last week. Tops were: Lambs $8.35, yearlings $7.65, wethers $5.90 and ewes $5.65.

East St. Louis Markets.

[Special telegram from Clay, Robinson & Co.]

National Stock Yards, Ill., Feb. 1.—Prices on steers, cows and heifers about 25c higher than close last week. No extra good beeves were here, best offered at $6.00 and bulk $5.00@5.40. Top heifers $5.75 and a few cows made $5.00. Little change in stocker and feeder market, with run small and consisting mostly of common and fair light weight stockers.

Hog market 15@20c higher than last week's close. Top $8.67½, which price Clay, Robinson & Co. obtained. Bulk made $8.35@8.60. Pigs and lights mostly at $7.75@8.25, according to weight and quality.

Sheep and lamb market 15c up from close last week, best lambs selling at $8.35, yearlings $7.75, ewes $5.65. Market seems to be in a very unsettled condition. Very few stockers were here.

Sioux City Markets.

[Special telegram from Clay, Robinson & Co.]

Sioux City, Ia., Feb. 1.—Prices for cattle showed 15@25c advance over late last week. Top beef steers $5.80 and bulk $5.25@5.50.

Trading in hogs today 15@25c higher than last Saturday. Top $8.35 and bulk $8.10@8.25.

People Living Too High.

Secretary Wilson of the Department of Agriculture is of the belief that the American people are suffering at present not so much from the high cost of living as from the cost of high living.

"It has been said an American is the best fed, best clothed, best educated, and best housed man on earth," remarked the Secretary. "We shall have to add now that he is the most expensively fed."

The Secretary pointed out that the fundamental difficulty was that people are leaving the farms to such an extent that there are not enough remaining to produce the food of the increasing population. The boys and girls of the farm, he asserted, are being lured away to the cities, to the factories, and to the mines, and to too great an extent the agricultural resources of the country are being neglected.

Let Us Help You Solve the Problem

Of feeding high-priced grain and hay to high-costing cattle. It's a sum in addition and substraction where two heads are better than one.

You have the feed and the know-how to handle cattle. We have buyers constantly on the leading markets where the cattle are to be had. They are **experts** when it comes to getting the **best cattle** at the **lowest market price.** And this best service costs you no more than the inferior.

Read what John W. Leach, Jacksonville, Ill., one of the large and successful corn-belt feeders, thinks of our way doing business. He writes:

"I want to thank you for your promptness, for information and for buying 111 choice calves. They are a fine lot. Also for information I got from Clay, Robinson & Co. from five different markets. I consider you have the advantage of any other firm, being in so many markets. You are good enough for me. I would risk you every time."

By Our Work You Shall Know Us.

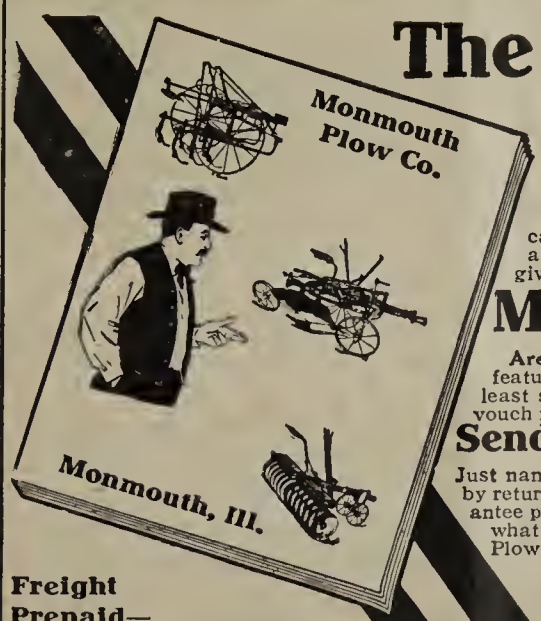
The Plow Man Wants To Send You His Book and Low Prices



I AM the Plow Man—I am with the Monmouth Plow Company. The firm has put it up to me to let you farmers know what good Plows, Cultivators and Harrows we make here in Monmouth, Ill. (where the first Sulky Plow was built). I am to let you know at what low prices we can sell these tools, too, direct from factory, freight prepaid. So I've written a big book to tell you all about everything—how we make them, sell them, give free trials, pay freight and guarantee satisfaction.

Monmouth PLOWS, CULTIVATORS, DISC AND SPIKE-TOOTH HARROWS

Are sold on Free Trial because they have the features that **please**—the features that mean ease of handling, light draft, most work in least time, with least strain on horses. They are made **right** of the **right** materials. I can vouch for that, and the firm guarantees it.

Send Me This Coupon or a Postal

Just name the tool you are most interested in. I'll send the book by return mail with our money-saving prices, free trial and guarantee plan. You'll send me your order, I think, when you see what these tools are and get our prices. Send to me, The Plow Man, with

The Tongueless Disc Again Improved

Five years ago the tongueless disc harrow was introduced to the farmers of America, and no implement ever received a warmer welcome. Within these five years the tongueless disc has revolutioned disking on the farm, and consequently has completely changed the disc harrow business.

The beating, thrashing, pounding and jamming of the tongue used to leave a farmer's horses in a sorrowful state. Galled neck and shoulders and loss of flesh were the rule, often to such an extent that a team would be laid up before the work was finished. Small wonder that the history of the tongueless disc has been a complete victory from the start.

Because, by completely discarding the tongue and the tongue-style of construction for the frame and using trucks in front, a harrow is made that not only relieves the horses of all the annoyance and weight of a tongue, but also means such lightness of draft as was never thought possible before.

Farmers are indebted to the American Harrow Co., Detroit, Michigan, for this change of affairs in disking. This firm originated the tongueless disc, patenting certain features of tongueless construction which have made their discs stand apart from all others that have been put on the market since.

This year, they come to the farmer with a tongueless disc still more improved, making disc harrowing easier than ever. This original and improved disc is called the "Detroit-American"—the same as the manure spreaders and cultivators made by this progressive company.

Formally, their tongueless disc has been known as simply the "Detroit," but a change of name and a uniform name was advisable, as interestingly explained in their new catalog.

The most important change in the Detroit American Tongueless Disc is that it is made almost wholly of steel. This means additional strength and easier draft.

Hard maple bearings that take up all the end thrust is another new feature—the sections do not run together in the center. Pipe oilers, another new feature, made for convenience and keep all dirt out of the bearings. Brand-new things, also, are the steel spools between the disc blades and steel sectors, obviating the chance of breakage. Rigid steel adjustable standard and shifter bars and adjustable bumpers are other features worthy of note.

We haven't space to go into further detail. We only mean to call attention to an implement that deserves the consideration of every man who has disking to do.

We wish to mention also that the American Harrow Co., 228C. Hastings St., Detroit, Michigan, is a manufacturing concern that has served the farmers well for nearly thirty years, a firm that sells direct at low factory prices and one that gives credit to worthy persons when asked to do so.

This company has not advanced the price of its harrows, although they are greatly improved; and any responsible farmer may order on 30 days' trial without making any deposit. Our readers who are in need of a disc will do well to send a postal to the address mentioned, asking for their large free book and freight-paid price-list, which quotes some mighty attractive figures.

Management of Cholera Herds.

Carcasses of hogs which have died from cholera should be immediately burned or buried deeply and covered with quicklime. Separate the sick from the well hogs and divide the well hogs into two or more groups and separate them as widely as practical. As the germs of cholera gain access to the system only through the digestive tract, the line of prevention is well marked. All feeding troughs should be thoroughly cleaned and disinfected. If the troughs are of metal, holding them over a blaze will be effective. Streams that do not rise on the home farm should be suspected as a possible carrier of infection, and for this reason water from wells should be given. Feed sparingly. Where hog cholera serum is used, the hogs should remain in the infected yards.—Nebraska Experiment Station.

John R. Trimble, Montezuma county, Colo.: "The REPORT is a fine paper and cheap for the money. Could not be without it now."

For Sale

Union Stock Yards, Chicago.

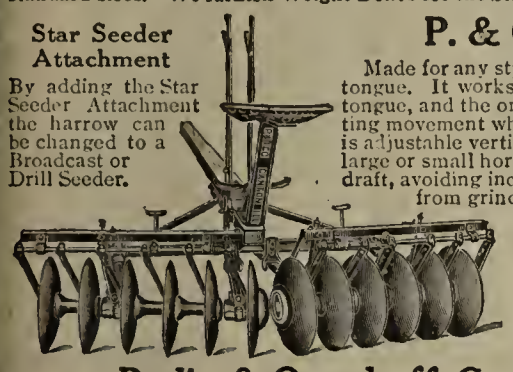
P & O

STAR DISC HARROWS

The pull is direct, and there is no neck weight and no strain on the frame. The bearings are dust-proof, and are provided with oil-soaked hard maple bushings and large convenient oil ducts. The oscillating Scrapers are perfect in action, thoroughly cleaning the discs, and are operated by the foot levers, which are placed within easy reach of the driver. The frame is heavy and rigid, and made to stand hard usage. Two levers are provided, one for each gang, and if necessary, one gang can be given a different angle from the other. Made in all standard sizes. We furnish Weight Boxes for the Star Disc Harrow when ordered.

Star Seeder Attachment

By adding the Star Seeder Attachment the harrow can be changed to a Broadcast or Drill Seeder.



P. & O. Harrow Trucks

Made for any style of Disc Harrow, either wood or steel tongue. It works equally well either with or without a tongue, and the only one made that has a flexible, oscillating movement when used without a tongue. The Truck is adjustable vertically for different sizes of Discs or for large or small horses. The evener is in the direct line of draft, avoiding increased draft, and preventing the wheels from grinding into the ground.

Insist on getting **P. & O.** implements from your dealer. They are all backed by an unqualified guarantee. A Beautifully Illustrated Brochure and a P. & O. Catalog, will be mailed free. They are of interest to every farmer in all sections of the country. Write today and ask for Catalog F29

Good Work of Our Salesmen.

$6.60 A. L. Valentine, Fairfield county, Ohio, was represented on the Chicago cattle market Feb. 1 with 16 head of 1,337 lb steers which we landed at $6.60, top of market by 20c per cwt.

$6.40 C. A. Swedburg, prosperous young farmer and feeder of Hamilton county, Neb., had a car of mixed cattle, mostly cows, on the South Omaha market Jan. 27. In this shipment were 5 very good steers that had been on feed of corn and alfalfa for 100 days and were sold by our house at $6.40, averaging 1,424 lbs, highest price paid for cattle in several weeks for beef steers.

$6.25 Johnson & Graham, Dodge county, Neb., had a string of wethers on the Chicago market Jan. 31 which we landed at top price of $6.25. Of these 546 head averaged 131 lbs and 176 head 105 lbs.

$6.00 The 47 head of 114-lb ewes which went at top price of $6.00 at Chicago on Jan. 31 were handled by us and marketed by H. McDaniels, Faulk county, S. D.

$5.90 Summit for sheep at Chicago on Jan. 26 was $5.90, which price we obtained for 100 head of 120 lb wethers, marketed by Dickinson & Co., Woodford county, Ill.

$5.75 Proved best price on South Omaha market Jan. 24 for beef cattle, obtained by our house for A. T. Hubbard, Pottawattamie county, Ia., for two cars, averaging 1,298 lbs.

$5.60 On Jan. 25 Harley Nettleton was at South Omaha with a car of cattle from York county, Neb., that our house sold at this figure, averaging 1,274 lbs, best price paid that day.

$5.50 The 198 western ewes of 105 lbs average which brought the top price of $5.50 for westerns at Chicago on Jan. 26 were marketed by C. D. Greene, Benton county, Ia., and sold by us.

Letter Box.

H. M. Rubin, Marion county, Ohio: "You have a very valuable paper. I always look at the REPORT first when the mail comes. Wish you success in your good work."

James Braden, Trumbull county, Ohio: "Enclosed find 50c to pay for REPORT for 1910. Though I am entirely out of cattle and hogs, and I like to read the REPORT for the facts it gives regarding the live stock of the different states and prices of same at the large markets."

32 Years Of

DE LAVAL Cream Separators

This is the record of the DE LAVAL machines, which is of itself a mountain of strength beside which the records of other cream separators are but mole-hills.

It means a feeling of confidence in the purchase of a separator to know that you are putting your money into the machine which was FIRST and which has LED in every single step of cream separator IMPROVEMENT and is today fully ten years in the lead.

It is a satisfaction to know that in buying a DE LAVAL you are not only getting the machine which will DAILY give you the best results, but one of which there are already many thousands an average of TWENTY YEARS in use, while the average life of imitating machines is not over five years and most of the so-called "cheap" machines of today are not likely to last two years.

A De Laval catalogue, to be had for the asking, explains why the De Laval is not only the best but actually the cheapest.

"Horse Secrets" Exposes for the First Time The Secret Tricks of Horse Fakirs

Did you ever find a lemon in a horse's nose? How and why did it get there? What was the meaning of the ears being tied together with a fine silken thread? Perhaps you are half persuaded to buy a horse because you like his "ginger"? Are you sure it is health and high spirits, or IS it ginger—commercial ginger?

Are you sure you could tell the age of a horse by its teeth? Or would your experience be like that other man's, who paid $3500 for a 17-year-old horse, thinking he was buying a 7-year-old? The horse had been Bishoped.

Horse buying and trading offer hundreds of opportunities and temptations to use trickery in sharp practice. There is only one way to meet it.

"Horse Secrets" Will Protect You

—make you horse-wise and crook-proof, and save you from being cheated by dopes or tricks when buying, selling or trading. It exposes and makes you acquainted with the tricks, dark and devious ways, and crooked methods of gyps and a certain class of unscrupulous dealers. Many of the secrets of this book are now made public for the first time. No such collection of Horse Trading, Horse Buying, Horse Training, and Horse Feeding information has ever been published. It is impossible even in this large space to give a complete list of the secrets in this sensational book. Some of the topics of greatest importance are:

Secrets of Hiding Blemishes
Shutting a "heaver."
Plugging a "roarer."
Turpentine and Gasoline tricks.
Unnerving and Cocaine tricks.
Hiding a Spavin.
Side Bones.
Concealing sinnses.
"An eye for an eye."
Examining the ears.

Secret Ways of Changing Appearance of a Horse
The tail trick. Making a star.
Making black spots.
Curing the broken crest.
False measuring.

Buying Tricks
Diamond cut diamond.
Making a horse act mean.

Selling Tricks
The "widow" trick.
Landing a sucker.
The winter board trick.

Secrets of Stopping Vicious Habits
Stopping a switcher.
Wedging a cribber.

Secrets of Hiding Age
"Bishoping."
Blowing Air under the skin.

Tricky Sayings
An honest horse dealer.
A horse that was right there.
A sharper's smooth savings.

Secret Ways of Inducing Action
Gingering.
Getting high knee action.
Keeping horse in the air.
Loose shoe trick.
Galloping past dodge.
Keeping horse on edge.

"Horse Secrets" has been prepared by Dr. A. S. Alexander, the famous veterinarian, who has had upwards of 25 years' experience in Horse-Breeding and Veterinary Science. He is the author of the first stallion service regulation and inspection regulation adopted and enforced in America. He is professor of Veterinary Science at the University of Wisconsin. There is no more competent authority on horses anywhere.

How to Secure "Horse Secrets"

"Horse Secrets" is not sold separately. It may be obtained only in connection with the following offer:

"Horse Secrets" and subscription to FARM JOURNAL for two years, both for 50c

Those who have already subscribed for the FARM JOURNAL may have the book and paper sent to different addresses.

Gentlemen:—Enclosed find 50c for a copy of "Horse Secrets" and subscription to Farm Journal for two years, beginning with the January number.

Name.....R. F. D.....

P. O.....State.....

FARM JOURNAL—"Unlike any other Paper." You will like It.

FARM JOURNAL is the paper taken by nearly every busy, thrifty farmer, the man that wants to know FOR SURE about agriculture. They value it so highly that it is kept year after year and is continually re-read and referred to. It is a departmental paper with a convenient arrangement for the reader to find what he wants, and it IS what he wants when he finds it.

The Farm, the Home, Horses, Swine, Sheep, the Cow and Dairy, Bees, Poultry, Fruit and Garden occupy their proportionate share in every issue. Then there are the less technical and material pages devoted to matters of the home—fashions, housekeeping, recipes, and bright, fresh reading for the younger members of the family.

FARM JOURNAL is a farm paper, but it is far more than this. It is for everybody outside a big city flat; it is equally at home in town, village, suburbs, or on the rural routes. It is for "humans," not fat hogs; fat hogs are all right, but they do not come first. Every reader of this paper will enjoy and learn to love the FARM JOURNAL as do its nearly 700,000 present subscribers, scattered all over the United States.

FARM JOURNAL need never be carried out of the house with the tongs. The advertising columns receive the most careful scrunity of our editorial department and the bars are up all the time against medical, deceptive, suggestive or nasty advertising of any kind whatever.

FARM JOURNAL is thirty-three years old, and has grown to be the leading farm and home paper of the world. Its score of editors are men and women who write "with their sleeves rolled up." They know what they are talking about, and can quit when they are through—a rare virtue. FARM JOURNAL is cream—not skim milk.

FARM JOURNAL, 1048 Cherry St., Philadelphia

Clay, Robinson & Company's LIVE STOCK REPORT

Vol. 20 | Chicago, Friday, February 18, 1910 | No. 7

Feed Bill is Very High.

f there ever was a time that the feeder of cattle, hogs, ep and lambs needed high prices, it is now. The feed is certainly at a dizzy height. In the main corn belt tes corn is costing generally 55@60c per bushel, while is selling in not a few states at $18@20 per ton. It is e that hogs, sheep and lambs are making a good price, a boost in cattle rates would be quite pleasing at this e. In addition to the high cost of feed, feed lot condi- ns are far from satisfactory, as rough weather and mud l slush will have to be contended with for some weeks to ne. It is onr belief that the holding of good quality nt steers for heavier weight, the shotes for longer feed- and partly-fatted sheep and lambs for better finish uld prove profitable.

Future Cattle Market Promising.

Ve view the outlook for future trade in cattle through imistic glasses. Owing to high price of feed and rough ather, there will likely be a good run of cattle during next thirty days, but after the middle of March we e to see the market improve. Present prices are c above recent low time on all grades. This reflects the provement in the eastern beef situation, as well as g ing how that the meat boycott is ending in a fizzle, as we all ng predicted. There has been a wonderfnl increase in demand for light and medium weight steers, due to the nt snpply of cows and heifers—this causing buyers fall back on the less weighty steers—and the insistent l for cheaper cuts of beef. Onr advices are to the effect t there is a big shortage of cattle being fed in Texas and lahoma for April, May and June. This of course will rk in favor of cattle feeders in the Middle West and st. We again repeat that buyers will have goodly need cattle in desirable flesh, both light and heavy weights, er the middle of March. However, let the fat heavy ves, also the poorer qnality steers, come marketward as t as convenient.

New Record in Hog Trade.

On Monday top hogs reached $9.27½. This price is highest ever paid at Chicago in modern packing times l not since 1882 has a higher figure been recorded. Lard d at the highest price Monday at this season since war ies, as did pork and short ribs. This in the face of the itation against the high price of meats shows that it is a pply and demand proposition. May and July deliveries all provisions sold higher than any previons time this son, pork going up to $23 65, lard $12.72 and short ribs 2.35. Stocks of meats are very small and packers are ving sufficient volume of cash trade to take the supplies out as soon as they are made. The decrease in packing the West from Nov. 1 to late last week was 2,580,000 gs from the same period of last year, and the total pack- g aggregated 7,480,000.

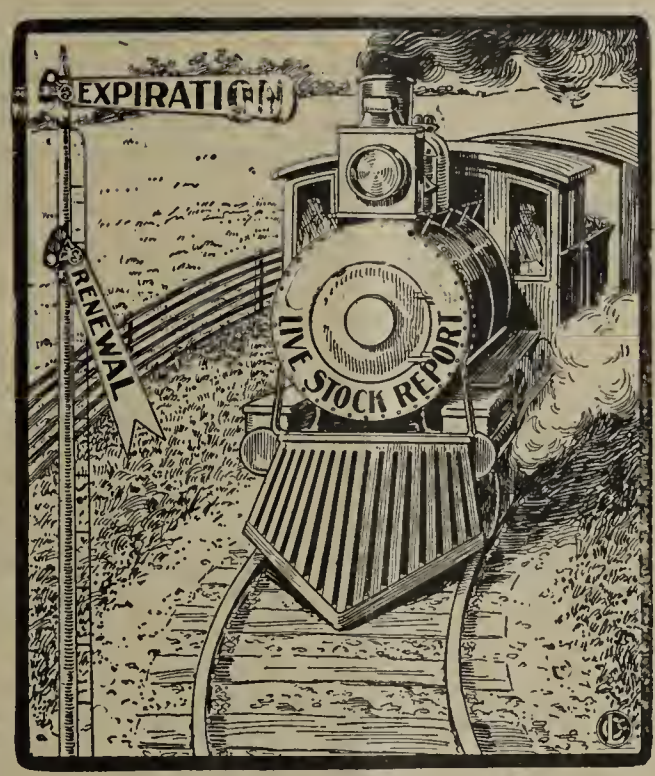
Sheepmen Need Not Worry.

Conditions in sheep and lamb trade are and should con- ue to be in favor of the selling interests. Consumers again making nrgent call for mutton and lamb meats, licating that the meat boycott has ended in a fizzle, as all along said it would. Prices are ruling the highest er known for February. Supplies in the feed lots, both st and west, are below those of recent years. If feeders uld continne to refuse to congest receipts and keep back rtly-fatted lots for better flesh, there should be no con- rn over the future market.

Look Out!

PERSONAL

If **YOU**, who are now reading this item, have been receiving the LIVE STOCK REPORT free for six months or longer, we shall have to drop your name from the mailing list at our next



revision (to begin at once) unless you send 50 cts to cover postage for one year (or $1.00 for two years including a useful premium—see page 3). We don't want to drop anybody, but the demand for the REPORT is so great that we are really unable to carry anyone on the free list longer than six months on account of the enormous expense of postage. All we ask is that after having received the REPORT six months or longer free and become acquainted with its merits, you will, if you consider it of value, send 50 cts to cover actual postage for the next twelve months. This entitles you to a full year from the time your payment is received. Over ten thousand readers gladly do this. Why not you? A single issue of the REPORT may give you information worth many times its cost for a year. If you have had the paper for some time free, show your appreciation by complying with this request **NOW**—before the revision, as we don't want to drop any of our old readers if it can be helped.

FREE—If you pay for two years we will send you the useful Expansive File described on page 3.

If you subscribe for only one year we will send you a handy little pocket slate memorandum book with pencil.

STAY ON THE LIST—It means that you will not only get the REPORT regularly, but also our beautiful calendars and the various advertising novelties, important market information, etc., which we send out from time to time.

If you are a paid subscriber and your subscription has expired or is about to expire, renew at once or your name will be dropped in the revision.

Use coupon and save writing a letter. Coupon on this page is for ONE YEAR (50c) subscriptions. Coupon on page 3 is for two-year ($1.00) subscriptions.

USE THIS COUPON FOR ONE YEAR SUBSCRIPTIONS

If you receive the paper for a time without having ordered it, please understand that it is sent you with compliments of Clay, Robinson & Co., to keep you posted on the markets.

When requesting change of address always give old as well as new postoffice.

Advertising rate $2.80 per column inch, each insertion. Special low rate for live stock sale advertising. If you intend holding a public sale write for prices on quarter-page, half-page or page space.

Address all communications and make all remittances payable to THE LIVE STOCK REPORT, Union Stock Yards, Chicago.

Fort Worth Exhibitors, Attention!

If you intend showing in the fat stock classes at the National Feeders' and Breeders' Show to be held at Fort Worth, Texas, March 14 to 19 inclusive, consign same to Clay, Robinson & Co. for care and selling. Our new house at Fort Worth will be in running order and every facility at your disposal. Representatives of our Chicago, Kansas City, East St. Louis and Denver houses will be present to lend their assistance and counsel.

Wyoming-Bred Cattle at $7.80.

Wyoming-bred cattle were on the Chicago market Wednesday of last week and were sold by Clay, Robinson & Co. at $7.80, topping last week's market by 55c per cwt for cattle weighing 1,300 lbs or less. In the shipment were 40 head of 1,300 lbs average, fed and marketed by M. A. Stacy of Glenwood, Ia. These cattle were of most excellent quality and were bought on the South Omaha market last September at $5.10, tipping the scales at less than 1,000 lbs. They were fed close to five months. Mr. Stacy was highly plessed with the whole transaction, as the cattle made upwards of 300 lbs gain while on feed and sold $2.70 per cwt above first cost. Only another instance of demonstrating that Clay, Robinson & Co. are O. K., and also showing what an excellent feeder Mr. Stacy is.

Views of Samuel Allerton.

Samuel W. Allerton, one of the most extensive and successful farmers and feeders of live stock this country has ever known, has the following to say regarding the investigation of high prices for food products:

"Congress and the common council are going to investigate the cause of high meat and other food products. This is as simple as A B C. We have had in the last twenty years enormous immigration; an increase in population until we have caught up with our products; cities and towns have grown; everyone wants to live in a city or town until farmers cannot get labor to husk their corn. These are the practical reasons why products are so high. In New York, Ohio, Indiana, Illinois, Iowa and Missouri the farmers have gone along for the last forty years without any thought of maintaining the fertility of the soil, and these states are reduced 40 per cent in fertility. Nearly all of our new lands are now occupied. I was born in the state of New York on the bank of the Seneca, where I worked on a farm when I was a boy, and where we raised good crops and as fine a country as there is in the world. Now it is all worked out."

Wyoming Stockmen Better Prepared.

J. B. Wilson, writing John Clay & Co., under date of Feb. 4 from Douglas, Wyo., says: "You will be glad to learn that the weather here continues mild and we have had no storms. In spite of the fact that people predict that if the Ground Hog sees his shadow there will be six weeks of hard winter, we have been having delightful weather since he saw his shadow. The snow is nearly all gone from the range in this particular vicinity, and for those who are feeding their live stock there will be very little loss from this time on, unless we have a very severe storm. The let-up in the storm has given everyone an opportunity to get feed to their various live stock interests, and the majority of the people will be much better prepared for a storm in the future than they were for our first hard storm. The concensus of opinion is that the loss of sheep in this vicinity will run from 15 to 25 per cent. Most of the people believe that it is nearer the latter figure.

"I look for rather a large loss of stock especially sheep in the spring months as they will not be strong enough after lambing and there is usually a heavy loss just after green grass appears. This loss will probably be heavier this year than usual."

Census Enumeration on Ranges.

It has been decided by the Census Bureau authorities to have the census enumerators take the census of the number and value of the live stock on the ranges of the western states as a part of the Thirteenth Decennial Census, beginning April 15 next.

The census authorities are convinced that the enumerators will be able to gather these statistics even more expeditiously, correctly and economically than would be possible by special agents under existing conditions.

Fearful that for one reason or another the live stock raisers may be deterred from freely stating the number and value of their holdings, the Census Bureau is exerting unusual efforts to assure the ranchmen and farmers, especially of the western range states, that their interests, whether personal or corporate, cannot possibly be affected in any way by their frank and full disclosure of their live stock possessions. The information gathered by the Census Office is held strictly confidential not only in respect to the fact that under no circumstances is it ever imparted to any one not connected with the Census Office, but in respect to its ever being given to any other branch of the Government.

Got More Than They Expected.

Livingston, Mont., Feb. 4, 1910

Clay, Robinson & Co.,
Chicago, Ill.

Gentlemen:

Your remittance for the sheep recently shipped to you came duly to hand. We are well satisfied with the returns; in fact, as matters stood you got more for us than we thought you would. We want to thank you for the way you handled same and especially for the care and interest taken by your Mr. C. A. Kleman. Our Mr. Brownlee, who went with the shipment, speaks loudly of the fine treatment received at your hands, both at Chicago and South St. Paul. Wishing you continued prosperity, as you deserve, we beg to remain,

Yours truly,

Yellowstone Valley Land and Irrigation Co.
Per F. A. Krieger, Pres.

January Movement of Feeders.

It is necessary to go back many years to find a January when the movement of stocker and feeder cattle from Chicago was as small as last month. The total was 19,871, a decrease of 7,592 from January last year. The outgo from both Kansas City and South Omaha for January was the smallest since 1905. Total from Kansas City was 35,853, or 21,150 under the corresponding month last year and from South Omaha 18,280, a falling off of 13,664 from like month of 1909. The three prime factors in the decreased movement were activity of slaughterers in the trade for heavy fleshy feeders, the smaller supplies of thin cattle and reluctance of those who wished to stock up to pay the prices.

Among Our Patrons.

L. Goos, Mills county, Ia., was on the South Omaha market Feb. 10 with a car of good steers of 1,254 lbs average which our house sold at $6.40.

P. O'Connor, Buffalo county, Neb., had a double-deck of ewes, averaging 121 lbs, on the South Omaha market Feb. 14 which our house sold at $6.15.

P. O'Connor, Buffalo county, Neb., was on the South Omaha market Feb. 10 with two cars of ewes that our house sold at $6.00, averaging 122 lbs.

Feb. 10 our South Omaha house had two cars of lambs from Stephens & Rust, Buffalo county, Neb., that sold at $8.70, averaging 78 lbs, this shipment being the last of their winter's feeding.

J. R. Greer, Bent county, Colo., was at South St. Joseph on Feb. 8 with 491 lambs, averaging 72 lbs, which our house landed at $8.75, summit of market. This is Mr. Greer's first experience in the sheep feeding game, and he was very much pleased with the result of our sales.

It was Feb. 10 that our South Omaha house secured $6.50 for J. R. Kingston, Stanton county, Neb., for 40 grade Herefords and Shorthorn steers, averaging 1,533 lbs. These cattle had been on a feed of corn and alfalfa for four months.

Our South Omaha house secured $5.40 on Feb. 14 for two cars of feeding cattle belonging to Sam Morris, Pennington county, S. D., a veteran cattleman of the Black Hills. Mr Morris was well pleased with the condition of the market at this time.

J. R. Kingston, a prosperous young farmer and stockman of Stanton county, Neb., was on the South Omaha market Feb. 14 with two cars of 1,504-lb steers of his own feeding which our house landed at $6.45. Mr. Kingston was very well satisfied with the price.

John McNaught, Bent county, Colo., one of the first men to feed lambs in that county, was on the South St. Joseph market Feb. 8 with 499 western lambs, averaging 77 lbs, which our house sold at $8.75, topping the market. He was greatly pleased with the sale and mentioned that this was the highest price he had ever received for lambs.

W. A. Miner, Weld county, Colo., is of the opinion that sheep and lambs should be finished before they are put on the market. "If feeders are cautious about marketing their offerings," says Mr. Miner, "the market will hold steady, if not go a little higher, for there is no doubt the stuff is short of former years and they have been marketed quite liberally already."

Our South St. Joseph house sold Feb. 8 for C. M. Andrews, Atchison county, Mo., 494 lambs, averaging 74 lbs, at $8.65, which was 15c per cwt higher than any other Missouri-fed lambs have brought there this winter. They were purchased by our South Omaha house, were fed well and made an excellent gain. Mr. Andrews expressed himself decidedly well pleased with both the buying and selling of these lambs.

J. A. Clarke, Hancock county, Ill., was at Chicago on Feb. 9 with 16 head of 1,287-lb cows which Clay, Robinson & Co. sold at $5.85, highest price in many months for a straight load. These cows were grassed last summer by Mr. Clarke and then bought by L. Miller, who fed them for 75 days, during which time they gained 200 lbs. The feed consisted of ear corn and clover hay, with cottonseed cake added the last 30 days. They were then bought by Mr. Clarke.

"When I arrived on the Chicago market Tuesday with my lambs I thought to myself if I can get $8.75 I will be doing nicely. You may imagine my gratification when I learned that Clay, Robinson & Co. had sold them at $9.00, being 25c per cwt above my fondest expectations and extreme top of market." This is the way A. E. Buck, Branch county, Mich., expressed himself regarding the load of Shropshire native lambs which he had in, most of which were of his own raising and feeding.

"This is my initial shipment to Clay, Robinson & Co. Your way of handling cattle from the chutes until they pass over the scales is an eye opener to me. In addition to this most satisfactory manner of handling my cattle, you secured relatively 15c per cwt more for them than a neighbor of mine, who shipped to another firm, obtained for his." This is what David E. Goudie, a prominent feeder of Plymouth county, Ia., said. He was at Chicago on Monday with a load of 1,342-lb beef steers which we landed at $6.55.

J. R. Ralston and his son, R. P. Ralston, Butler county, Kan., were on the Chicago market Feb. 10 with three loads of cattle which we sold at $7.05. The cattle were intended for the Wednesday market, but did not arrive until the day following. Mr. Ralston has been feeding cattle for 19 years and is well known as an expert in that line. "This makes the second year that I have been shipping to Clay, Robinson & Co.," said Mr. Ralston, "and the service that has been rendered me has always been satisfactory." In 1891 Mr. Ralston sold cattle at $5.60 at Kansas City, which up to that time was the highest price obtained there for the four preceding years.

T. B. Price, Appanoose county, Ia., was on the Chicago market Feb. 11 with two loads of cattle and hogs, the steers going at $5.85 and the swine at $8.75, the latter price being the highest he ever obtained for same. "During the two years that I shipped to Clay, Robinson & Co.," remarked Mr. Price, "I have always received the 'service that satisfies.'" Mr. Price removed from Illinois about three years ago to the well-known Callaway Baker place at Unionville and is numbered among the best farmers and feeders in that section. His son, John Price of same county was on the market last week with a load of cattle which we sold to his entire satisfaction, according to his father.

JUST WHAT YOU WANT
GET IT FREE

The Expansive File

Something every farmer and stockman needs for the classification and safe keeping of valuable documents, insurance policies, receipts and papers of all kinds. Substantially made. Six compartments. Size, 4½ by 10⅜ inches.

Here is Our Offer

Fill out coupon below with your name and address and send to us with $1.00 for two years' subscription to the weekly Live Stock Report, and the Expansive File will be sent you immediately free and postpaid by us. If not at present a paid subscriber here's your chance. This is a splendid opportunity for persons who have been receiving the Report complimentary for a while to enroll as regular subscribers, thus entitling them to the paper for two full years from now and giving them this valuable premium, all for $1.00.

We are sure that after you have used this Expansive File for a short time you would not be without it, to say nothing of also getting the Live Stock Report each week for two years. This file will absolutely prevent losing or mislaying your valuable papers and may save you many times its cost. Every document is properly classified and safely kept where you can put your hand on it at any time.

Present subscribers to secure this premium must send $1.00 for two years additional from present expiration date. Even though purchased by us in large quantities this is a pretty expensive premium for us to give away, in addition to furnishing, for the bare cost of postage, a paper which costs three times the subscription price to produce. We therefore wish to make it clear that the only way to secure the Expansive File is to send $1.00 for two years' subscription. Subscriptions sent in prior to publication of this offer do not count. No matter how far ahead your subscription may now be paid it will pay you to extend it two years more and secure this premium.

This announcement may not appear again, therefore send in the coupon at once.

LIVE STOCK & CROP CONDITIONS

REPORTS GATHERED AND RECEIVED BY CLAY, ROBINSON & CO.'S HOUSES AT THE NINE LEADING LIVE STOCK MARKETS.

WISCONSIN HAY AT $17.

William Courtney, Washington county, Wis.: "Hay is worth $17 per ton at our local market."

PLENTY OF HAY IN SOUTH DAKOTA.

John Robinson, Harding county, S. D.: "Stock in this vicinity is doing well. There is plenty of hay."

FEW HOGS IN CASS COUNTY, ILL.

W. W. Mathew, Cass county, Ill.: "There are not as many cattle and hogs on feed in this part as usual. In fact, the hogs are not here."

NOT MUCH FEEDING IN DALLAS COUNTY, IA.

E. W. Mueller, Dallas county, Ia.: "Not many hogs or cattle on feed in this locality. Corn is worth 60c per bushel and hay $15 per ton."

MCPHERSON CO., S. D., CROP YIELD GOOD.

Strucke Bros., McPherson county, S. D.: "There is practically no fat stock left in our section. Crop yield the past season was most gratifying."

MISSOURI CORN AT 65c.

W. W. Reddish, Lincoln county, Mo.: "There are very few cattle on feed in this section at present. Only half a crop of hogs are feeding. Corn is worth 65c.

SCARCITY OF HELP HINDERS RAISING OF STOCK.

H. H. Follett, Fayette county, Ia.: "There are not many hogs in this part of the country. I don't think there will be many swine raised until laborers are more plentiful."

LITTLE FAT STOCK IN MOWER CO., MINN.

L. C. Lindsley, breeder of Shorthorn cattle, Shropshire sheep and Jersey Red hogs, Mower county, Minn.: "There are few marketable hogs left in this locality and only three or four loads of cattle are on feed."

YIELD AND QUALITY OF CORN GOOD.

J. R. Peak, Scott county, Ill.: "The high price of corn is pushing cattle on the market. Supply in this country left is rather light, although yield and quality of corn is good. It is worth 60c per bushel."

BIG DEMAND FOR CATTLE IN CALIFORNIA.

Wm. Farr, Riverside county, Cal.: "Stock in this country is going to get fat early, but as the butchers have the fed cattle pretty well cleaned up now, I do not believe there will be anything shipped east this year. The supply of grass cattle will not exceed the growing demand for same."

CHOLERA AMONG MINNESOTA HOGS.

S. O. Boraas, Swift county, Minn.: "There is very little stock on feed in my section at this time. Cholera was quite prevalent around here a few months ago and the mortality loss among hogs was rather heavy. For this reason the farmers have been wary about raising swine. Our crop yield was excellent. My corn averaged 70 bushels to acre."

FEEDING LESS STOCK IN SOUTH DAKOTA.

E. W. Henderson, who farms about 100 acres at Brown county, S. D., was a patron of our South St. Paul house Feb. 3. In speaking of conditions in his section, Mr. Henderson mentioned that while there is a fair quota of stock on feed, the number is far below previous years. Crop yield was very satisfactory. There have been no severe blizzards this winter, but steady cold weather.

A Valentine for Sheepmen.

In spite of the 17,000 sheep and lambs on the Kansas City market Feb. 14, our house topped the trade in all departments that day. They sold Kansas-fed lambs at $8.65, Colorado-fed yearlings at $8.15, Colorado-fed wethers at $6.75 and Colorado-fed ewes at $6.35. This makes the third time since Jan. 1 that our Kansas City house has succeeded in making a record of this kind.

Never Received a More Square Deal from Anybody.

Emil Hoffmeyer, owner of the Hickory Hill Farm, Jackson county, Kan., writes us as follows: "I am going out of the feeding business and am living in town. While thinking back twenty years ago, when I had first started out with your people in Omaha, also later with you in Chicago, and while living in Kansas did my business with your firm in Kansas City, I have to say I never received a more square deal from anybody as I did from you people. I thank you very much for what you have done for me. While I was only a small shipper, I believe I received fully as good treatment as if I had shipped more to you."

Veterinary.

ANTHRAX.

NEBRASKA—I have 28 last April and May Duroc sows that are doing fine, but lately lost 4. They swell badly in the right flank and only live a day or two. One died inside of 8 hours. I let them eat a dead horse Jan. 22, but since then the trouble has begun. Part of them are losing their pigs, bred Dec. 1. Their flank for about 12 inches square is all black and badly swollen. It seems to be worse with the fattest ones. I cut one open and everything inside looked regular to me, as far as I could determine. Not a scratch on the outside. Some get very lame for a spell. There were no worms in the one I opened. A veterinary surgeon, who showed me the live cholera germ through a bottle with a 50c glass, is going to look at them. Please tell me what to do.

REPLY—This is a serious matter and it is high time to quit fooling with a quack veterinarian and his fifty cent glass through which he alleges to show you a germ that no man has ever seen with the finest microscope money will buy. We very much fear the disease is anthrax and that it came from the dead horse. It is your duty to at once notify the state veterinarian and the local health officer of the presence of what may prove to be this deadly and intercommunicable disease which will necessitate quarantine and scientific control. It will be an easy matter for a scientific veterinarian or bacteriologist to determine the true nature of the disease by making blood smears and cultures and if necessary inoculating guinea pigs with a solution of diseased tissue. It may be some other deadly disease, but anthrax is most to be suspected and it is incurable and highly dangerous to man as well as animals.

Wants Packers Let Alone.

D. M. Clump of Estherville, Ia., writes: "We are in hopes that the packers will be let alone and that there will be a better feeling with the consumers. We wish some of the people that are making such a howl about high-priced meat would try a hand at producing it, with stock cattle and feed so high in price."

Top Prices for Hogs.

Monthly top prices for hogs at Chicago for seven years, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

Good Work of Our Salesmen.

CHICAGO.

J. Orton Finley, Knox county, Ill.: "Sale of yearlings and wethers was very satisfactory."

W. T. Cooper & Son, Jo Daviess county, Ill.: "Were well pleased with the sale of our cattle."

George McDonald, Cass county, Ind.: "Cattle showed up O.K. Your buyer made good. Thank you."

H. J. Cornish, Porter county, Ind.: "Lambs came all right. Every one a good one. They are better than I expected."

H. H. Follett, Fayette county, Ia.: "I am satisfied with sale of cattle. Conditions were certainly not favorable at the time."

J. & S. Scharf, prominent merchants, Jasper county, Ia.: "We are very well pleased with returns for lambs and goats."

John L. Larson, Deuel county, S. D.: "I was very well satisfied with sale of sheep you made for me last week."

D. S. Lowe, Moultrie county, Ill.: "Returns of cattle sales at hand. It looks as though you did as well as could be done under the circumstances."

D. S. Lowe, Monitrie county, Ill.: "Your returns for cattle sales at hand and it looks as though you did as well as you could under the circumstances."

J. K. Johnson, Hamilton county, Ia.: "I wish to thank you for the promptness in returns on my cattle. I am well satisfied. You will get my consignments in the future."

John Betz, Valley county, Mont.: "Your house in South St. Paul ably assisted me in my trouble in having to dip my beef cattle, and your house in Chicago sold them at high prices."

W. A. Miner, Weld county, Colo.: "I am being kept posted by Clay, Robinson & Co.'s houses at Chicago, South Omaha, South St. Joseph and Kansas City, and appreciate same very much."

F. G. Paine & Son, Shiawassee county, Mich.: "Lambs arrived in good shape. We think they are a choice load and feel as though you have bought them right. Thank you for all you have done."

Mrs. M. T. Overton, Lee county, Ia.: "I think you sold my cattle well, considering the fact that they did not arrive until late Wednesday and also that the boycott had knocked prices 30@40c per cwt."

James F. Allgaier, Shelby county, Mo.: "I have 19 cattle, averaging 1,500 lbs, which are about ready to go to C. R & Co. at Chicago. They have topped the Chicago market several times for me in the last few years."

H. F. Walling, Woodbury county, Ia.: "I am more than satisfied with the way you sold my cattle. Thank you. I reported my sale to a neighbor and he wanted me to write you and have you send him a market report as you sent me. I would be glad to help you get shipments from here."

R. F. Hunt, Hendricks county, Ind.: "Load of cattle arrived in good condition. I am well pleased with them. I will have them weighing 1,500 lbs about Aug. 1 if they do as well as I believe they will. It is my intention to send them to you to sell for me. You have been very kind to me."

EAST ST. LOUIS.

J. W. Long, Noble county, Ind.: "I have done business with you and like your methods very much."

C. E. Lake, Marion county, Ill.: "I shipped my little bunch of sheep to you and the sale was very satisfactory. You can be sure that when I want to buy or sell live stock again I will come straight to you."

W. A. Mayfield, Cooper county, Mo.: "I am well satisfied with sale you made on two loads of stuff. Considering condition of market the day you sold my stuff, I think you did the best you could. I am always satisfied when I think a man, or set of men, have done the best they could for me, and I do not hesitate to acknowledge truth of the matter."

KANSAS CITY.

John W. Leach, Morgan county, Ill.: "I want to thank you for your promptness, for information and for buying 111 choice calves. They are a fine lot and doing fine. Also for the information I got from Clay, Robinson & Co. from five different markets. I consider you have the advantage of any other firm, being in so many markets. Please keep me posted, as I want to come to Kansas City for some more calves late this summer, and if I do not sell these calves at home I intend to ship them to C. R. & Co. at Chicago. They are good enough for me. Please remember me to the young man who bought my calves. He is all right. I would risk him every time."

Letter Box.

A. Harden, Auglaize county, Ohio: "Enclosed find $1.00 for which send me REPORT and also to my neighbor, Mr. Thrush. I think the REPORT is a splendid paper to keep one in touch with the market."

Geo. C. Belmont, president Brush Lumber Co., Morgan county, Colo.: "It is with pleasure that I receive the REPORT these days. You fellows are certainly to be congratulated the way you are putting it out."

NATIVE BEEF STEERS.

Range of prices and bulk of sales of native beef steers this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Range.	Bulk.
This week	$4.50@7.90	$5.35@6.90
Previous week	4.35 8.00	5.50 7.00
Year ago	4.50 7.00	5.25 6.40
Two years ago	4.00 6.15	4.75 5.65

Receipts of cattle Thursday 7,539. Trade in beef steers was steady to strong. Tone of market lacked keenness, owing to buyers purchasing liberally of the unusually big supply previous day. General quality fell off considerably and best steers offered went at $7.35, with few sales higher than $6.50. Marketing of cattle Friday 3,606. Steady deal in beef steers with previous day and 10@15c higher than close of previous week. Rail service was miserable all week. Cattle arrived from one to two days later than shippers had expected when starting for market.

Receipts of cattle on initial market day this week 23,346. Beef steer market had fairly good life at steady prices. Supplies would doubtless have been heavier had cars been available in the country. Trains were slow in arriving and many thousands of cattle intended for the Monday market failed to show up until Tuesday. Good to choice weighty offerings were in especially good favor with all buyers, these kinds being in relatively small numbers. Not many loads went above $7.00, reflecting the plainer quality of offerings. Clay, Robinson & Co. sold two head of 1,675 lb Nebraskas at $7.75, being 10c per cwt higher than any other steers brought. Top for a full load lot was $7.65, paid for 1,526 lbs average. Bulk of trading at $5.50@$6.80. Receipts of cattle Tuesday 9,959. Prices for beef steers were steady to 10c lower, heavy weights showing the loss. Five head of 1,676-lb Iowas brought $7.75, sale being made by us. Run of cattle Wednesday 16,000. Beef steer trade active at prices 10@15c higher than previous day. As compared with Monday heavy cattle were stronger sale and light and medium weights 10c higher. Best cattle offered up to a late hour went at $7.90. Trains were again late in arriving, total number back around the noon hour being 400.

Revised quotations for all grades of native beef steers:

Extra choice to prime steers	$8 35	@ 8 70
Good to choice steers	7 50	8 25
Medium to good steers	6 10	7 35
Plain to fair short-fed steers	5 70	6 00
Common to fair steers	5 00	5 50
Extra choice to prime yearling steers	7 50	7 85
Good to choice yearling steers	6 90	7 35
Medium to good yearling steers	6 25	6 80
Plain to fair short-fed yearlings	5 80	6 10
Common to fair yearlings	5 25	5 70
Good to choice stags	5 40	6 00
Common to medium stags	4 35	5 10

Tuesday, Feb. 15—A. E. Copeland, Waukee, Ia., 5, 1,676 lbs, $7.75, the top; 34 Iowas, 1,341 lbs, $6.50; 17 Iowas, 1,320 lbs, $6.35; 34 Iowas, 1,284 lbs, $6.30; 11 Illinois, 1,200 lbs, $6.10; 11 Iowas, 1,184 lbs, $6 00; 6 Iowas, 1,151 lbs, $6.00; 23 Iowas, 1,021 lbs, $5.85; 32 Iowas, 1,180 lbs, $5.85; 20 Iowas, 1,027 lbs, $5.75; 19 Iowas, 1,087 lbs, $5.70; 17 Iowas, 929 lbs, $5 65; 10 South Dakotas, 962 lbs, $5.50; 10 Iowas, 980 lbs, $5.45; 17 Iowas, 961 lbs, $5.40; 7 Iowas, 893 lbs, $5.25; 10 Iowas, 1,098 lbs, $5.00; 23 Illinois, 790 lbs, $4.90.

Wednesday, Feb. 16.—32 Illinois, 1,397 lbs, $6.90; 30 Iowas, 1,480 lbs, $6.60; 16 Michigans, 1,235 lbs. $6.60; 15 Iowas, 1,276 lbs, $6.55; 35 Illinois, 1,189 lbs, $6.40; 37 Illinois, 1,193 lbs, $6.30; 18 Illinois, 1,194 lbs, $6.10; 20 Illinois, 1,170 lbs, $6 00; 25 Illinois, 884 lbs, $5.90; 16 Iowas, 1,085 lbs, $5.85; 36 Iowas, 1,158 lbs, $5.75; 18 Illinois, 1,032 lbs, $5.75; 17 Iowas, 1,062 lbs, $5.75; 11 Iowas, 1,009 lbs, $5.65; 23 Iowas, 982 lbs, $5.75; 9 Indianas, 980 lbs, $5.60; 10 Indianas, 915 lbs, $5.35.

BUTCHER STOCK.

Bulk sales of beef cows and heifers, canners and cutters, and bulls this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	and heifers. Bulk		and cutters Bulk canners		bulls. Bulk	
This week	$3.85@	5.35	$2.60@	3.35	$4.40@	5.10
Previous week	3.75	5.35	2.50	3.35	4.35	5.10
Year ago	3.65	5.25	2.00	3.00	3.75	4.25
Two years ago	3.25	5.00	2.00	2.85	3.35	4.25

It was generally a steady deal in cows and heifers Thursday. Late arrivals did not meet with a good reception. Bull market held steady. Opening steady, veal calf market closed weak. Friday trade in cows and heifers was steady with previous day and 25@35c higher than last week's close. Bulls held steady and were 10@25c up from finish of previous week. Steady trade in calves and 25c higher than week ago, top vealers making $9.25.

At the start of this week prices for cows and heifers were steady, the run being of moderate proportions. General demand was good. Bull market steady to weak. Calf trade was steady. Unchanged prices ruled for cows and heifers Tuesday. Bulls also steady sale. Calf prices generally 25c higher, prime lots reaching $9.50. Brisk trade in cows and heifers Wednesday at 15c advance over Tuesday. Bulls made a stronger range. Calves sold steady.

SALES MADE BY CLAY, ROBINSON & CO.

Wednesday, Feb. 9—18 Nebraska yearling heifers and

Bought Cattle at $5.10

Sold Them at $7.80

A price difference of $2.70 between the buying and selling price! Also the selling figure was 55c per cwt higher than any other cattle weighing 1,300 lbs or less brought at Chicago last week.

The cattle in question were Wyoming bred and of excellent quality and were bought at South Omaha September last, averaging less than 1,000 lbs, and sold by our Chicago house Feb. 9, averaging 1,300 lbs.

M. A. Stacy of Glenwood, Ia., fed and marketed these cattle. They were fed only around five months, yet made a gain of around 300 lbs. There is no question of our rendering you just as good service.

Next time try our feeder buying department and when the stock is finished try our selling department at any of

Tuesday, Feb. 15—3 export heifers, 1,065 lbs, $5.25; 3 yearling heifers, 860 lbs, $5.25; 8 medium export heifers, 980 lbs, $5.10; 7 yearling heifers, 740 lbs, $5.00; 6 cowy heifers, 1,040 lbs, $4.85; 8 good cows, 1,109 lbs, $4.70; 5 good cows, 1,140 lbs, $4.60; 7 yearling heifers, 650 lbs, $4.60; 12 good cows, 1,078 lbs, $4.50; 11 medium heifers, 884 lbs, $4.50; 6 medium heifers, 600 lbs, $4.40; 5 cowy heifers, 712 lbs, $4.25; 4 fair cows, 905 lbs, $3.90; 8 dairy cows, 1,130 lbs, $3.85; 12 feeding cows, 840 lbs, $3.40; 5 cutter cows, 900 lbs, $3.10.

STOCKERS AND FEEDERS.

Top price and bulk sales of stockers and feeders this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Top Feeders.	Bulk Feeders.	Bulk Stockers.
This week	$6.00	$4.75@5.25	$4.00@4.65
Previous week	5.65	4.65 5.25	3.85 4.60
Year ago	5.35	4.75 5.15	3.90 4.75
Two years ago	5.25	4.40 5.00	3.50 4.00

Receipts of stockers and feeders Thursday were light and the good demand cleared the offerings in good order at steady rates. Prices for stockers and feeders held steady Friday and showed an advance of 15@25c over close of previous week.

A moderate run of stockers and feeders and a good demand enabled sellers to boost prices 10c Monday. Killers competed for the fleshy strong weight steers and purchased numerous lots at prices ranging up to $5.50, being above feeder buyers' limit. The better grades of stockers and feeders went on a strong basis Tuesday, and other kinds held steady. Stockers and feeders met a good demand Wednesday and prices were advanced 10c.

Revised quotations for stocker and feeding cattle:

Good to choice feeders	$5 10 @	5 50
Poor to medium feeders	4 60	5 00
Good to choice stockers	4 65	4 90
Plain to medium stockers	4 00	4 50
Inferior to common stockers	3 50	3 85
Good to choice stock heifers	3 35	3 85
Common to medium stock heifers	3 00	3 25
Plain to good thin young cows	3 00	3 60

SALES MADE BY CLAY, ROBINSON & CO.

Wednesday, Feb. 16—18 Iowa feeders, 897 lbs, $5.25; 9 Iowa feeders, 885 lbs, $4.65.

MILKERS AND SPRINGERS.

Revised quotations for milkers and springers:

Choice to prime	$50 00 @	60 00
Medium to good	40 00	45 00
Common to plain	30 00	37 50

Hogs.

Bulk sales of hogs of respective weights this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Bulk 200 to 250 lbs.	Bulk 260 lbs and heavier.	Bulk 135 to 195 lbs.
This week	$9.00@9.15	$9.05@9.20	$8.90@9.05
Previous week	8.50 8.90	8.60 8.95	8.40 8.80
Year ago	6.25 6.60	6.30 6.55	6.15 6.50
Two years ago	4.20 4.55	4.25 4.60	4.15 4.50

Marketing of hogs Thursday was 24,005. Trade opened steady to 5c lower on speculative and shipping account. Packers tried to lower rates 5@10c, but they finally had to pay steady prices with previous day. Top $8.85 and bulk sales $8.65@8.80. The Friday run was 19,060. Market was a runaway affair. Opening 10@15c higher, trade closed 20@25c up, a good share of late arrivals selling at outside advance over any time Thursday. Top $9.05, back to the high point of year, a packer paying the price. Bulk of business was transacted at $8.75@8.95. Supplies Saturday 11,061. Market opened strong with the previous day's best time, then became weak to 5c lower and finished steady with Friday's close. Top $9.07½ and sales largely $8.85@9.00. As compared with the close of the previous week there was an advance of mostly 45c.

Buyers had to employ a new front figure in making cost sheet calculations on hog purchases at the start of the week. In spite of a run of 37,863, all buyers were hungry for supplies. Market opened steady with Saturday's best time, then got a dime higher and closed 15@20c up. Top $9.27½, a price never before recorded at this time of year. General bulk of business at $9.00@9.15. Very uneven trade for hogs Tuesday. Market started out with prices 5@10c higher than Monday's close and finished 10@15c under then. Top $9.25 and most sales $9.05@9.15. Receipts of 31,562, a slump in the pit trade together with poor support from speculators and eastern shippers proved too much for the selling interests. Receipts of hogs Wednesday 32,000. Market opened slow, with bids about the same as previous day's close. Trade got a little better and in the middle was as good as any time yesterday, but final sales were a little easier. Top $9.20 and bulk trading $9.00@9.15.

Revised quotations for all grades of hogs:

Fair to choice heavy shipping	$9 15 @	9 20
Fair to choice butchers	9 10	9 [illegible]
Fair to choice medium weights	9 05	9 [illegible]
Good to choice assorted light shipping	8 95	9 00
Poor to good heavy packing	9 00	9 10
Poor to good mixed packing	8 95	9 05
Poor to good light bacon	8 90	9 05
Pigs, 115 to 140 lbs	8 75	9 00
Pigs, 110 lbs and under	8 00	8 75
Stags	9 50	10 00
Boars	5 00	6 50
Governments	2 50	6 00

Sheep and Lambs.

Following shows top prices and bulk of sheep and lamb sales this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Sheep Top.	Sheep Bulk.		Yearlings Bulk.		Lambs Top.	Lambs Bulk.	
This week	*$7.25	$6.00@7.00		$7.75@8.25		*9.00	$8.25@8.90	
Last week	7.00	5.75	6.60	7.75	8.40	9.05	8.25	9.00
Year ago	5.60	4.50	5 25	6 25	6.70	7.75	7.25	7.60
Two years ago	5.60	4.65	5.50	5.85	6 35	7.10	6.50	6.90

*Sold by Clay, Robinson & Co.

The Thursday supply of sheep and lambs was 10,612. Market active at generally steady prices. The native lambs at $8 95, top by 5c per cwt, were from Indiana and handled by Clay, Robinson & Co. Limit on westerns was $8.90, this price also being obtained by us for fed westerns from Michigan. Best yearlings offered went at $8.25, summit by 10c per cwt, being from Ohio and sold by us. Top for wethers was $6.75 and best ewes offered $6.25, this price being secured by us. Receipts Friday 4,689. Market brisk at prices strong to 10c higher than previous day and 10@25c up from last week's close, sheep showing most advance. Fancy Michigan-fed western lambs reached $9.00.

At the start this week sheep went 10@15c higher, while lambs sold steady. Total run 13,894. Top for lambs was $9.00, secured by Clay, Robinson & Co. for a lot of 77-lb Iowas. Fancy 122-lb western wethers reached $7.25. Top for ewes was $6.75, this figure being obtained by us for 123-lb natives. Fancy 90-lb western yearlings went at $8.35. Tuesday offerings totaled 12,390. Sheep were steady to 10c higher and lambs steady to 10c down. Wethers again landed at $7.25, price being secured by us, and top for lambs was $9.00, we landing natives from Michigan at this price. Marketing of sheep and lambs Wednesday 16,000. Market active at stronger prices.

New Records in Sheep Trade

GOOD WORK OF OUR SALESMEN

$9.20 This figure was top for hogs of this weight at Chicago on Feb. 14, being obtained by us for 83 head of 236 lbs average, sent in by R. Glaser, Buena Vista county, Ia.

$9.15 Charles Schuman, Crawford county, Ia., marketed 80 hogs of 189 lbs average at Chicago on Feb. 14 which we sold at the top price of $9.15 for offerings of this weight.

$9.00 A. W. Hess, Pocahontas county, Ia., was the owner and we the sellers of the 72 native lambs of 77 lbs average which made the top price of $9 00 at Chicago on Feb. 14.

$9.00 The 174 head of native lambs of 80 lbs average which brought the top price of $9.00 at Chicago on Feb. 15, were handled by us. Most of these lambs were raised, fed and marketed by A. E. Buck, Branch county, Mich.

$8.95 Proved 5c per cwt higher than any other lambs brought at Chicago Feb 10. We sold 197 natives of 90 lbs average at this price for J. G. Steele, Noble county, Ind.

$8.90 Was the snmmit for western lambs at Chicago on Feb. 10, obtained by us for 319 head of 81 lbs average, belonging to C. McNamara, Shiawassee connty, Mich.

$8.90 Pinnacle for lambs at Chicago on Feb. 9 was $8.90, which price we secured for 223 head of 81 lbs average, belonging to John Blanchard, Columbia county, Wis.

$8.90-$8.00 E. S. Leavenworth, Hall county, Neb., had in a shipment of lambs and yearlings to our South Omaha house Feb. 15 which sold as follows: Two cars of 66 lb lambs at $8 90, being 10c per cwt higher than any straight load of lambs made there this season and two cars of 76-lb yearlings at $8.00, the first time in the history of that market any yearlings have gone higher than $7.75.

$8.85 Proved summit for hogs at Chicago on Feb. 9 and was secured by us for five different lots, which follow: For F. H. Stark, 26 head of 269 lbs average; J. E. Eichelberger, 18 averaging 275 lbs; W. Hughes, 16 of 255 lbs average; H Pfiester, 13 averaging 316 lbs, all of the above gentlemen residing in Dupage county, Ill., and for M. M. Folsom, Porter county, Ind., 25 head weighing from 314 to 357 lbs.

$8.80 Was the top price received by our Sonth Omaha house Feb. 12 for 57 hogs of 270 lbs average, helonging to Gerhard Loseke, Platte county, Neb. These hogs were Duroc Jersey and were a nice lot.

$8.75 Was 10c per cwt higher than any other lambs sold for at Kansas City on Feb. 10 and was obtained by our house for 494 head, averaging 83 lbs, shipped by Leatherman & Leasnre, Prowers county, Colo.

$8.75-$6.60 E S. Leavenworth, an extensive sheep feeder of Hall connty, Neb., was on the South Omaha market Feb. 9 with 582 Mexican lambs which our house landed at $8.75, averaging 67 lbs This price was extreme top of day. Mr. Leavenworth also had 545 Mexican wethers, averaging 91 lbs, which our house also sold at $6.60, being 10c per cwt higher than anything of this sort this season.

$8.70-$8.35 Payne & Roembach, Sedgwick county, Kan., were represented on the East St. Louis market Feb. 10 with 524 lambs of 76 lbs average which sold at the top price of $8.70, and 249 yearlings, averaging 76 lbs, at $8.35, summit by 20c per cwt that day and highest price ever obtained for yearlings on that market. On the same day J. N. Carson, Rio Grande county, Colo., had in 234 lambs of 60 lbs average which also went at $8.70. All of these sales were made by our house.

$8.70 Proved top of the lamb market at East St. Louis on Feb. 11 by 10c per cwt. This price was secured by our house for 285 head of 64 lbs average, sent in by James A. Kelley, Rio Grande county, Colo.

$8.70 D. J. Gibbs, Rio Grande county, Colo., marketed at East St. Louis 236 lambs, averaging 69 lbs, which our house sold at $8.70, extreme top.

$8.70 Is the highest price ever realized for hogs at South St. Paul and was obtained by our house Feb. 11 for 51 head of 286 lbs average. They were marketed by Theodore Jansen, Lyon county, Minn.

$8.65 C. B Gridloy, Richardson county, Neb., was on the South St. Joseph market Feb. 9 with 411 lambs, averaging 79 lbs, which our house landed at $8 65, topping the market. These lambs were purchased by our house for Mr. Gridley last fall, and were of very good quality and made an excellent gain. He said he was very much pleased with both the purchase and sale of the lambs.

$8.50 H. W. Wright, Waukesha county, Wis., was the owner and we the sellers of the 108 head of shorn lambs, averaging 75 lbs, which our Chicago house landed at $8.50 on Feb. 15, top for such offerings.

$8.45 On Feb. 15 our East St. Louis house sold 246 yearling wethers of 74 lbs average at $8.45, being top that day by 10c per cwt. They were fed and marketed by Payne & Roembach, Sedgwick county, Kan.

$8.25 The 25 yearling wethers which averaged 84 lbs and brought $8 25 at Chicago on Feb. 10, pinnacle by 10c per cwt, were sold by us and marketed by Retterer & Son, Wyandot county, Ohio.

$8.05 This was extreme top for yearling sheep at Kansas City on Feb. 10 and secnred by our honse for 486 head of 75 lbs average, marketed by M. A. Rogers, Sedgwick county, Kan.

$8.05 The Laramie Development Co., Albany county, Wyo., had three cars of 61-lb lambs on the South Omaha market Feb. 10 which our house sold for feeding account at this price, top for season on feeders.

$8.00 The Riverside Live Stock Co., Bingham county, Idaho, was represented on the South Omaha market Feb. 8 with three cars of lambs and ewes to our house The lambs sold on feeding account for $8.00, averaging 81 lbs, top of season for anything of this sort by 25c per cwt. The ewes went to the packers at $5 85, averaging 103 lbs. These sheep were only hay fed and the price was top for this kind.

$7.80 M. A. Stacy, Mills county, Ia., was represented on the Chicago cattle market Feb. 9 with 40 head of 1,300-lb Wyoming bred beeves which we sold at $7 80, top of market last week for cattle of as light weight by 55c per cwt. These cattle were bought on the South Omaha market last September by our house at $5.05, averaging less than 1,000 lbs.

$7.75 Fred Lyons, Madison county, Neb., was the owner of the two head of 1,675-lb beef steers which brought $7.75 at Chicago on Feb. 14. This price was 10c per cwt higher than any other steers brought that day and were sold by us.

$7.75 E. C. George, a young feeder of York county, Neb., was at South Omaha on Feb. 9 with 255 yearling wethers that were sold by our house at $7.75, averaging 92 lbs. This was top for season on this class.

$7.75 It was Feb. 15 that our Chicago house landed 5 head of 1,676 lb beef steers at $7.75, top of the trade by a big margin. They were marketed by A. L Copeland, Dallas county, Ia.

$7.25 H. S Hoyman, Cedar county, Ia., had a shipment of sheep on the Chicago market Feb. 15 included in which were 41 wethers of 90 lbs average which we sold at $7.25, a record price for February and the highest since May, 1888. The other offerings were 520 yearlings of 84 lbs average for which we secured $8.00.

$7.15 The first aged wethers to soll above $6.70 at South Omaha this season were marketed by Patterson & Guthrie, McPherson county, Kan., and sold by our house on Feb. 15. There were two cars of them, being Mexicans and selling at $7.15.

$7.00-$6.80 Feb. 8 our East Buffalo house sold for W. H. Fritch, Lapeer county, Mich., 146 wethers, averaging 113 lbs, at $7.00 straight, 25c per cwt higher than any other wethers sold that day, excepting 151 of 111 lbs average which they also sold for Geo. Hill, Mercer county, Ohio, at $6.80, this sale being 5c per cwt above next best price any other wethers brought.

$6.85 The 95 wethers of 120 lbs average which brought this top price at Chicago on Feb. 9 were sold by us and marketed by the Columbus Canning Co., Columbia county, Wis.

$6.75 Was top of the market for ewes at Chicago on Feb. 14 and was secured by us for 84 native ewes of 123 lbs average, belonging to M. E. Diehl, Stevenson county, Ill.

$6.60 Walter J. Barr, Stanton county, Neb., was on the South Omaha market Feb. 10 with a couple of cars of 1,290-lb high-grade Shorthorn and Hereford steers of four months' feeding which our house landed at the above price, the only cattle to bring the figure that week.

$6.55 L. E. McFarlane, Charles Mix county, S. D., was represented on the Sioux City cattle market Feb. 15 with 29 beef steers, averaging 1,474 lbs, which our house landed at $6.55, being 55c per cwt higher than any other cattle brought.

$6.50 Andy Nelson, with feed lots at Dawson county, Neb., had two cars of ewes on the South Omaha market Feb. 14 which our house sold at $6.50, averaging 123 lbs. This price is extreme top for season and also best price paid since April, 1908, when $6.70 was realized.

$6.50 On Feb 8 John Wilkinson, Hall county, Neb., had a car of 104-lb wethers on the South Omaha market which our house sold at this top figure. He also had a car of ewes that sold at $6.00, averaging 93 lbs.

$6.25 We sold the 50 head of 99-lb ewes at the top price of $6.25 at Chicago on Feb. 10, they belonging to J. J. Minot, Union connty, S. D.

$6.25 The first shipment of J. Pick, Cloud county, Kan., was Feb 9 when our South St. Joseph house sold for him 242 western ewes, averaging 99 lbs, at $6.25 being 25c per cwt higher than any other western ewes sold there this winter.

$6.05 A. Ledingham, Kimball county, Neb., was on the South Omaha market Feb. 10 with four cars of his own feeding, his ewes topping the market at $6.05, averaging 92 lbs. The lambs made $8.70, averaging 77 lbs. Our house negotiated tho sales.

$5.85 Was the price we obtained for 16 head of 1,287-lb cows on the Chicago market Feb. 8, highest price paid for a load lot of cows in many months. They were marketed by J. A. Clarke, Hancock county, Ill.

$5.75 Was top for a load lot of heifers at Chicago on Feb. 9. We obtained same for 22 head of 999 lb offerings, belonging to S. W. Streeter, Mercer county, Ill. They were very muddy and this detracted about 10@15c from the price they would have brought had they arrived at the Yards in clean condition.

W. W. Mathew, Cass county, Ill.: "I have been receiving REPORT complimentary for some time and will now pay a part of the expenses for a while."

What They Say About Us.

DENVER.

J. C. Hitt, Boulder county, Colo.: "I received your check and am well pleased with the sale you made."

Z. C. Felt, Conejos county, Colo.: "I thank you for your very careful attention to lambs, and wish to assure you that your handling of the same is entirely satisfactory.'

E. J. Schnebly, Larimer county, Colo.: "Check for $1,476.46 for car of lambs received, which is very satisfactory in every way. That cleans up all my lambs for this season. They made me good money. This was my first experience in the lamb feeding business, but I will be after it every season from now on. I wish to assure you that I appreciate the manner in which you so ably looked after my shipments and will remember you when I have anything else for the market."

SOUTH ST. JOSEPH.

W. C. Barber, Harlan county, Neb.: "Am well pleased with the sale. Will speak a good word for you to my neighbors."

SIOUX CITY.

Abe I. Spotts, Ida county, Ia.: I received load of cattle and must say I am well pleased with them. I believe you can get better cattle and buy them cheaper than I could if I came myself for them. Will write you later on when to buy another load."

HOW ARE YOUR HOGS?

Dangerous policy to let them get wormy and out of condition while feed costs money.

VESEY'S STAR ANTI-CHOLERA does the work and pays big to feed. No herd is safe without it. Used and recommended by large hog feeders everywhere. Try it. If you are not satisfied money will be paid back. Price $9.00 per dozen bottles; $5.00 per half dozen bottles.

ANTI-CHOLERA CO., Union Stock Yards, Chicago

GET MY PRICE The Lowest Ever Made

Buy direct from the biggest spreader factory in the world. —My price has made it. No such price as I make on this high grade spreader has ever been made before in all manure spreader history. I save you $50. Here's the secret and reason: You pay me only for the actual material and labor at cost and one small profit based on my enormous factory capacity of 30,000 spreaders a year. And I pay the freight right through to your station. Any farmer can afford to have a spreader when he can get in on a wholesale deal like this on a

GALLOWAY

Get my brand new proposition with proof. Lowest price ever made on a first-class spreader. My agreement to pay you back your money after a 12 months' trial if it's not a paying investment. How's that for a proposition? You know if I didn't have the best spreader, I wouldn't dare to make such an offer. 40,000 farmers of America have stamped their O. K. on it. They all tried it **thirty days free** just like I ask you to try it. Get out your pencil. Drop me a postal saying, "Galloway, send your new proposition and big spreader book free." Ask about the new, complete steel gear 70 bushel spreader.

H. Guthberson, Gladbrook, Iowa. "Works fine. Spreads all kinds of manure better than any spreader I ever saw. So simple, nothing to get out of repair as compared with other spreaders."

T. F. Stice, Oswega, Kans. "Often pull it with my small buggy team. Does good work. Have always used the —— before. Galloway much the best. If going to buy a dozen more they would all be Galloways."

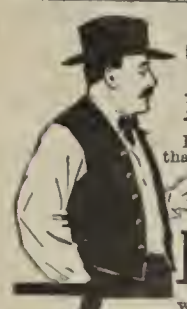
Get My Price—FIRST

Freight Prepaid—30 Days' Free Trial



I want to quote you a price that will cause you to sit right up and take notice on the grandest, best plow that ever turned a furrow. I can do it because we are the *actual manufacturers*, and sell *direct to you*. We don't have traveling salesmen—don't sell to dealers nor even to catalogue houses. You save those expenses and profits when you order direct from our factory. But that isn't all. You get a *better plow*. I say to you that the

MONMOUTH Sulky or Gang PLOW

Get My Free Book

Lightest Draft Plow Made

will prove easier for you to handle, easier on your horses and will do your work better than any plow you can buy, regardless of price. Tell you why the draft is lighter. It's positively the only plow that actually carries the beams on top of the frame. No pressure on bottom of furrow—no friction against bank of land, can't be, for there's no land side. Don't need any. The plows *ride on the wheels*—wheels, frame and driver can't ride on the plows as they do sometimes with other makes. Besides, we have a Direct Beam Hitch, Single Ball and Horse Lift; and "Point First" action, which is easiest and quickest going into and coming out of the ground. I'll give you a chance to prove every one of these claims, and we'll pay the "damages"—freight *both* ways—if we "fall down" in a single assertion.

I want to tell you all about these plows and our other implements—Walking Plows, Cultivators, Tongueless Disc Harrows, Spike Tooth Harrows, Harrow Carts, Harrow Attachments for Plows, and Farm Gates—all sold at factory prices. Satisfaction guaranteed. Just write a postal for our complete catalog. It's free. Write to me, The Plow Man, with

MONMOUTH PLOW CO., 539 South Main Street, Monmouth, Illinois

Victor Incubators and Brooders

Quality tells in the hatches. Right principles, right materials, right building, right ventilation, right regulation, means more chicks and greater profit. Victor quality costs but little more and the difference on one or two hatches more than pays it. Write us first. Our book "About Incubators" will be sent free. It has important information for incubator buyers.

GEO. ERTEL CO., 165 Kentucky St., Quincy, Ill.

LATEST BOOK "Profitable Poultry." Best published. Describes most successful Poultry Farm. 45 Varieties pure-bred poultry, beautiful, hardy and money makers; thousands to choose from. Lowest Price on fowls, eggs, incubators, etc. Sent for 4 cents.

Berry's Poultry Farm, Box 94, Clarinda, Iowa

Mayer WORK SHOES

It is not necessary for a work shoe to look clumsy to give good wear. Have your dealer show you the good looking, comfortable, well-fitting, Mayer Work Shoes.

Made of tough stock, heavy soles, solid counters, double leather toes, double seams. Made solid and will last longer than any other shoes you can buy.

MAYER WORK SHOES

To be sure you are getting Mayer Shoes, look for the Mayer Trade Mark on the sole. Your dealer will supply you; if not, write to us.

FREE—If you will send us the name of a dealer who does not handle Mayer Work Shoes, we will send you free, postpaid, a beautiful picture of George Washington, size 15x20.

We also make Honorbilt Shoes for men, Leading Lady Shoes, Martha Washington Comfort Shoes, Yerma Cushion Shoes and Special Merit School Shoes.

MILWAUKEE Mayer CUSTOM MADE

F. Mayer Boot & Shoe Co.
MILWAUKEE, WIS.

Sold $13,000 Hogs off 92 Acres.

Present prices for hogs connt up fast. There is big money in hog raising, if you know how to get the most out of them. Some feeders make from $2.00@3.00 more per hog than others.

It is not what the hog eats; it is what he digests and assimilates that makes the money. You want the benefit of the man's experience who is able to make over a dollar for corn fed to hogs. The knowing how. to keep hogs healthy, get greatest growth in quickest time and biggest profits, is the desired knowledge.

The story of how one man made a big success and sold over $13,000 worth of hogs from a 92-acre farm in a year is well worth careful study, as he has had the experience of over 30 years and made a big success in this line. It is interesting and profitable to a practical farmer.

The principal cost of producing pork is the feed. Prof. Dietrich says: "90% of the farmers have nearly everything to learn about how to feed a hog to get the most out of him at the least cost." We can help every one who will be helped to this knowledge. One secret of success is to prevent disease. The sick hog is a losing proposition. Another is to get more gain and growth out of your feed. We have new conditions to meet with higher priced feed.

For $1.00 we will send you the American Swineherd, the aggressive and progressive acknowledged up-to-date leader, devoted to the swine industry, for four years and give you as a premium the "Progressive, Scientific Feeding Formula" for increasing the gain while feeding fattening hogs, a half pound per day a hog, over the customary way of feeding from the same feed given. This hygienic secret made the discoverer a fortune fattening hogs. It is simple, sensible, and just as easy feeding as the old way. It has been proven so conclusively that we will agree to make good or give your money back, making you absolutely safe. It will make you a hundred dollars fattening 50 hogs.

If this offer is accepted within ten days will also give as additional premium, copy of the Pig Feeder's Manual worth the dollar itself. The paper stops at the time paid to. All our efforts concentrated on this business, naturally attains highest success which you can share with us. Address

WHAT THEY SAY ABOUT US

EAST BUFFALO.

W. H. Fritch, Lapeer county, Mich.: "Enclosed I found draft for car of sheep, which was very satisfactory."

C. S. Brown, Genesee county, N. Y.: "I expect to ship a load of cattle to you. I am well pleased with your treatment."

F. A. Fowler, Wyandot county, Ohio: "My cattle were sold by you at $6.40, with a 25c per cwt break in market. As these cattle got there too late for Monday trade, they were held over, and I am very much pleased with the deal."

A. J. Lovejoy, Hillsdale county, Mich.: "Account sales of lambs at hand. You did exceedingly well. I was nervous over the outcome, knowing they were mediums and would be hard to place, only upon a strong market, but your returns show that you were not cornered, and the returns are all I expected upon a much stronger market than you had to contend with. Thank you."

KANSAS CITY.

D. S. Atwater, Cloud county, Kan.: "I think you made a splendid sale of the cattle, and I thank you very much."

M. F. Stamate, Dade county, Mo.: "Received cattle you bought for me all right and I am well pleased with them."

O. P. Turner, Kearny county, Kan.: "I was quite well pleased with the sale and thank you for way you handled this car of lambs."

Geo. S. Linscott, president of Linscott State Bank, Jackson county, Kan.: "I wish to thank you for return of overcharge of freights, of which I knew nothing whatever. But for you I would never have known it, or had it. I have found that shipments to you are taken care of and handled to the best advantage to bring the best price, and you seem to look after your customers' interests in all things."

SOUTH ST. PAUL.

M. E. L. Wilk, Houghton county, Mich.: "Very well pleased with sale."

H. D. Kisor, Rice county, Minn.: "I was on your market Jan. 7 with a load of hogs and you obtained the highest price ever paid there. I was well pleased."

John E. Stewart, Redwood county, Minn.: "Received your market letters and am well pleased with same. If I ship to St Paul will consign to Clay, Robinson & Co. Was well pleased with the sale of the last bunch, especially the fill, so you have got me."

FOR SALE

The American Sheep Breeder Co.,
149 Michigan St., Chicago, Ill.

WATCHES AND Cream Separators

There are some sensible dairy farmers who buy $1.—, $5.— and $10.— watches, because they serve the purpose of a watch and waste nothing while they last.

But would any of these sensible dairy farmers put their money into and carry a $1.—, $5.—or $10.— watch if it cost them from 25 cents to $1.—that they might otherwise save EVERY DAY to do so?

Most assuredly they would not.

Then why should any dairy farmer buy a cream separator of the $1.—, $5.—or $10.—watch kind where its use DOES mean a WASTE of from 25 cents to $1.— every day, in quantity and quality of product, that a DE LAVAL cream separator would SAVE?

THAT'S the all important DIFFERENCE between POOR SEPARATORS and POOR WATCHES, —one's good enough while it lasts but the other wastes twice a day from the time its use begins.

A De Laval catalogue is a separator education to be had for the asking.

Coupons Pouring In!

Everybody Buying at the New Cut Prices

Your Coupon Is in the Lower Left Hand Corner of This Page. Fill It Out NOW!

We believe the Economy Chief is the best and most satisfactory cream separator on the market today, regardless of price. We believe it to be the best in design, the closest skimming, the easiest running, the quickest cleaning; in short, the greatest separator value that money can buy. We have absolute confidence in the Economy Chief and we want every owner of cows to share this confidence with us. We want everyone interested in buying a cream separator to have an opportunity to find out for himself which is the best machine, which is THE SEPARATOR TO BUY.

Here Is the Challenge Offer That Is Bringing in the Orders by Every Mail

Deposit in your local bank the price of the Economy Chief Cream Separator you want to try, or

Send us a letter of reference from your banker stating that you are a reliable person; then

We will ship to you at once, freight prepaid, the separator you order, with the understanding that you are to set it up and try it on your farm for sixty days. Give it the hardest kind of a test; if possible try it alongside some other well known standard make, such as the Empire, United States or De Laval. Compare our machine in actual operation with any other. Note the amount of cream you get from each. Compare ease of running, time consumed in cleaning, and make any other comparisons you can think of. Never mind about the price; what you want from a cream separator is CREAM. If any other machine selling even as high as $85.00 or $90.00 will do better work, will skim closer, will give better satisfaction than our Economy Chief at $42.50, our advice to you is, buy the other machine and send ours back.

When you have finished your sixty-day test, if you are perfectly satisfied that you have the best separator on the market, write us saying that you want to keep the machine, and we will send you a bill for your separator and the freight charges we paid on it.

If at the end of sixty days you are not satisfied that the Economy Chief is the world's best separator, you don't need to even tell us the reason for your dissatisfaction unless you wish to; just drop us a line saying you don't want the machine. We will then send you a return address card to tack on the box **and we will not only return all money sent us, but also pay you for your time and trouble in setting up the machine, repacking it and hauling back to the station. We don't want you to lose one penny in trying out the Economy Chief for sixty days.**

Reduced Prices for 1910

WE RECOMMEND THE BIG 600-POUND SIZE

No. 23T51 New 1910 Economy Chief. Capacity, 250 to 300 pounds, or 120 to 145 quarts per hour. Price reduced to	**$27.90**
No. 23T52 New 1910 Economy Chief. Capacity, 350 to 400 pounds, or 170 to 195 quarts per hour. Price reduced to	**33.80**
No. 23T54 New 1910 Economy Chief. Capacity, 600 pounds, or about 290 quarts per hour. Price reduced to	**42.50**

If you want to send cash with your order, as most of our customers do, you won't lose any of the benefit of the above CHALLENGE OFFER, for if at the end of sixty days you decide you don't want the machine, if you think after a sixty days' trial you can get along just as well without a separator, or if you have seen a separator in operation giving better results than the Economy Chief, just send it back at our expense, tell us how much we owe you for freight charges, hauling from and to the station, setting up and repacking, and we will promptly send you every cent of the purchase price, plus your bill.

This Is Our Challenge Offer and Our Whole Cream Separator Proposition!

We think our Economy Chief Separator is the best machine in the world. We want to sell you an Economy Chief if you think the same as we do, not otherwise, and we make this challenge offer to give you a chance to find out all about the Economy Chief **at our expense** and to prove our confidence in our own machine.

IF THE MAKER OF ANY OTHER CREAM SEPARATOR IN THE WORLD BELIEVES IN HIS MACHINE AS WE BELIEVE IN OURS, LET HIM MAKE YOU THE SAME PROPOSITION WE DO.

That's all—Now fill out the Coupon!

FILL OUT THIS SPECIAL ORDER BLANK

☐ **CASH WITH ORDER.**
If you are enclosing the full price, simply write the amount in this square.

☐ **CASH IN BANK.**
You can deposit the purchase price of the separator with your local banker, to be held by him for a month while you are trying it. If you follow this plan make an X mark in this square and enclose your certificate of deposit signed by your banker.

☐ **BANK REFERENCE.**
If you prefer not to send us the money, or to hold it in the bank subject to our order, make an X mark in this square and enclose a letter of reference signed by your banker, telling us that you are a responsible property owner.

☐ **FREE DAIRY GUIDE.**
Nearly everybody has a copy of our big General Catalog or our Cream Separator Catalog but if you have not and want more information before ordering, make an X mark in this space.

Live Stock Report (Please write plainly and carefully.)

SEARS, ROEBUCK AND CO. CHICAGO

Clay, Robinson & Company's LIVE STOCK REPORT

Vol. 20 — Chicago, Friday, February 25, 1910 — No. 8

Hogs Highest Since Civil War.

Not since the civil war have hogs cost slaughterers as much money as this week. On Wednesday the bulk sold at $9.50@9.60, a remarkably narrow range. The top at $9.70 stood the highest ever known in February, and it is necessary to go back to 1865 to find a time when hogs sold higher Moday. In that year they reached $12.75, with $10 as the lowest price. Packing plants were going out of business then on account of high prices and scarcity of money. Only a few slaughterers who had contracts to fill were buying. These prices did not endure long, as rates were down to $6.00 and $7.00 in 1866. It is problematical as to how much higher prices will ascend. Some say the $10 mark will be reached. One thing is certain and that is good brood sows and thrifty young swine will be mighty profitable animals to have on the farm for some time to come.

Below will be found top prices for hogs on the Chicago market in the high and low years since 1881, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

YEARS WHEN TOP WAS ABOVE $7.00.

Year.	Month.	High.	Low.	Month.
1910	Feb.	$9.50	$8 35	Jan.
1909	Dec.	8.75	5.60	Jan.

Year.....	*$9.70	$8.75	$7.60	$7.25	$7.00	$6.45	$6.30

*Highest since 1865, when $12.75 was recorded.

Cattle Prices Working Higher.

Cattle feeders are displaying some impatience over the lack of pyrotechnics in cattle trade, after witnessing the wonderful display in the hog and sheep markets. However, we believe they have no need to worry. Since the low time of one month ago prices have been gradually working upward, and now stand 75c@$1.00 above then. There is no talk emanating from the packers of big stocks of beef in their coolers. They are being kept busy to supply a broad consumptive demand. It will not be many weeks before a real shortage of cattle will be very apparent. Usually 5,000 to 6,000 meal-fed Texas cattle are received weekly at Kansas City, South St. Joseph and East St. Louis at this time of the season, but none are coming now. This has created a hungry demand for low-priced steers and cow stuff, and these have shown far greater price gains than the fat heavy beeves. However, the latter grades will soon come into their own.

TOP PRICES FOR BEEF STEERS.

Monthly top prices for beef steers at Chicago for seven years, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	1910	1909	1908	1907	1906	1905	1904
January.....	*$8 40	$7.50	$6.40	$7.30	$6.50	$6.35	$5.85

Year.....	*$8.40	†$9.50	$8.40	$7.60	$7.90	$7.00	$7.65

*Obtained by Clay, Robinson & Co.

†Record price on open market and 20c per cwt higher than previous best price in 1882, being obtained by Clay, Robinson & Co. for load of 1,518-lb grade Hereford branded Wyomings.

Sheep Meeting With Better Sale.

There has been a complete reversal of conditions in the sheep market as compared with one year ago. Packers now seem hungry for fat sheep at $6.75@7.65, while a year ago they were indifferent buyers at $5.00@5.50 for practically the same class of offerings. Top price at $7.85, obtained by Clay, Robinson & Co. for prime fed-western wethers Wednesday, is a record price on the Chicago market. It would prove no surprise if sheep sold even higher than now. Fewer ewes and wethers are being fattened this winter than usual. This was due in part to the adverse market conditions surrounding fat sheep in recent years and also to the larger number being carried over out on the western ranges.

TOP PRICES FOR SHEEP.

Monthly top prices for sheep (yearlings not included) at Chicago for seven years, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	1910	1909	1908	1907	1906	1905	1904
January.....	$6.35	$5.85	$5.75	$6.00	$6.25	$5.85	$4.75
February.....	*7.85	5.80	5.75	6.00	6.25	6.25	4.75

Tops.....	*$7.85	$6.90	$7.00	$7.25	$6.50	$6.35	$6.00

*Highest on record, obtained by Clay, Robinson & Co.

Colorado Lambs $9.20; Year Ago $7.75.

A twelve-load shipment of Northern Colorado-fed lambs was on the Chicago market Monday, the first to arrive here this season. Clay, Robinson & Co. sold 924 head of them, averaging 88 lbs, at $9.20, top of the market for Colorados by 5c per cwt. The owners were G. F. Plumb of Brush and D. A. Hamlet of Fort Morgan.

For February $9.20 is record price for Colorado-fed lambs. Barring June, 1909, when Clay, Robinson & Co. landed them at the unheard of price $9.90, and May of the same year, when they made $9.80, and in June, 1907, when Clay, Robinson obtained $9.25, the above price was never before paid for Colorado lambs. The top Colorados one year ago were going at $7.75, or $1.45 under the pinnacle Monday.

TOP PRICES FOR COLORADO-FED LAMBS.

Monthly top prices paid at Chicago for Colorado-fed lambs for seven years, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

Months.	1910.	1909.	1908.	1907.	1906.	1905.	1904.

Year.....	*$9.20	†$9.90	$8.35	$9.25	$7.75	$8.20	$7.50

*Highest since June, 1909, obtained by Clay, Robinson & Co.

†Obtained by Clay, Robinson & Co., being a record price.

First Texas Cattle Trade of Season.

The first trade in cattle in Texas for spring delivery to be recorded was consummated recently. R. R. Russell bought 6,000 of the Tom Waggoner three and four year-old steers at what is believed to be between $30@35 per head. They will be taken to the Osage country in the spring. The Waggoner cattle are among the best in Northern Texas.

Clay, Robinson & Company's
LIVE STOCK REPORT

Issued every Friday at Union Stock Yards, Chicago.

R. P. FALES.....Managing Editor
GUY FRIDLEY.....Associate Editor

Local and long-distance Telephone "Yards 4194."
Cable address "Kelso," Chicago.

This paper will be sent to anyone, whether a customer of Clay, Robinson & Co. or not, upon receipt of 50c to pay postage for one year.

If you receive the paper for a time without having ordered it, please understand that it is sent you with compliments of Clay, Robinson & Co., to keep you posted on the markets.

When requesting change of address always give old as well as new postoffice.

Advertising rate $2.80 per column inch, each insertion. Special low rate for live stock sale advertising. If you intend holding a public sale write for prices on quarter-page, half-page or page space.

Address all communications and make all remittances payable to THE LIVE STOCK REPORT, Union Stock Yards, Chicago.

Good Comes From Bad.

Inability of railroads to handle live stock with normal dispatch during the past many weeks has demonstrated the practicability of the five-day market plan at Chicago. Cattle that have been shipped with the intention of having them on the Monday market did not arrive until Tuesday, while those intended for the Wednesday trade did not get in until for the Thursday and sometimes the Friday trade. However, the demand has been the most reliable in years, although heavy beeves continued to sell to best advantage on Monday and Wednesday. Slaughterers rearranged their buying schedules to meet the new conditions, and a good five-day market resulted. Thus good has come from an otherwise deplorable condition of railroad traffic affairs, as well as being a means of preventing a congestion of cattle, hog and sheep supplies, one of the worst things that can happen to the shippers.

Now that the feasibility of the five-day market has been so amply demonstrated, it is to be sincerely hoped that the country will adopt same as a permanent basis of marketing. Unquestionably the stock marketed during the past few weeks under this forced distribution of supplies has netted the owners a great deal more money than would have been the case under the old "two-day-week" market plan. While the buyers will ordinarily clear the heavy receipts on a Monday or Wednesday, provided they can buy them cheap enough, they take into consideration when making their bids the necessity of holding surplus stock anywhere from one to three days on high-priced feed. They can well afford to pay materially higher prices when the cattle can be slaughtered or shipped the day they are purchased and will do so if they can depend on an equable supply that will enable them to proceed on that basis. Instead of 28,000 or 30,000 cattle on a big Monday, an ideal condition for all concerned would be a run of 20,000 or 23,000, followed by say 10,000 Tuesday, 15,000 Wednesday, 10,000 Thursday and 3,000 to 2,000 Friday, or in that ratio.

Nebraska Beeves Top Chicago Market.

J. P. Smith, prominent feeder of Blair, Neb., was on the Chicago cattle market Monday with 17 head of 1,423-lb beef steers which we sold at $7.75, top of the market. They were grade Herefords, branded and two-thirds fat. Mr. Smith bought these cattle at South Omaha on Sept. 7, averaging 1,108 lbs. They were fed ear corn and alfalfa until the first of the year, when the ration was changed to shelled corn, oil meal and prairie hay. Mr. Smith said that owing to the lack of alfalfa he was forced to change to the prairie hay and believed that the cattle would have put on 50 lbs more flesh had the alfalfa been available.

"This is my first shipment to Clay, Robinson & Co., and I want to go on record as stating that the handling of the cattle, the price they brought and treatment given me was A. 1. In addition to all this, the cattle weighed 23 lbs per head more than I expected.

"We have had very severe winter weather out our way. As a result we have lost a great deal of roughness and much corn has rotted in the fields. Feeders are paying 48@51c per bushel for corn, and $13 per ton for hay, in spite of the big hay crop realized. There are not many cattle on feed and matured hogs are scarce, with far from the normal number of young swine on hand."

Top Hay-Fed Cattle at $6.15.

On Tuesday of this week our South Omaha house sold 43 head of 1,207-lb hay-fed steers at $6.15, top price there for the season. They were marketed by the Vinton Live Stock Co. of Crook, Colo.

Employes Hold Banquet.

The second annual banquet of the Chicago employes of Clay, Robinson & Co. was held in the banquet hall of the Saddle and Sirloin Club at the Union Stock Yards on Saturday, Feb. 19. There were about one hundred present. The firm was represented by Messrs. Charles O. Robinson, C. A. Kleman and F. H. Connor. Ample justice was done to the following menu, which was fully up to the usual high standard of service maintained by the club management:

CREAM OF TOMATO

CELERY OLIVES

PLANKED WHITEFISH
DUCHESSE POTATOES

FILET OF BEEF BORDELAISE
POTATOES AU GRATIN

ICE CREAM ASSORTED CAKE

ROQUEFORT CHEESE
TOASTED CRACKERS

COFFEE

The following program was carried out under the direction of one of the three original employes of Clay, Robinson & Co., H. Woods Robinson, Toastmaster, whose service with the firm covers practically a quarter of a century:

ILLINOIS QUARTET

"THE FIRM" - - - - N. H. Sutherland
"A STRAIGHT STEER" - - - Miles Dodd

RAY WEED, Monologist

"PIGS IS PIGS" - - - - Frank E. Scott
"WHY WE ARE SHEEPISH" - - Ben D. Cook

ILLINOIS QUARTET

"THE OFFICE" - - - - Jas. A. Weir
"ROOKS FROM THE ROOKERY" - W. A. Zimmerman

JACK LANIER, "Our Little Colored Friend."

"OUT IN THE YARDS - - - Tom Chittick
"THE ADVERTISING END" - - R. P. Fales

ILLINOIS QUARTET

Music for the occasion was furnished by a string band composed of native Hawaiians who chanced to be filling an engagement in the city and were engaged by members of the firm as their special contribution to the evening's enjoyment. They rendered a number of instrumental and vocal selections with great skill and acceptance. The musical part of the program was further supplemented by a regular orchestra, and the Illinois Quartet. Among the latter's selections was an original song written by one of "the boys," Mr. Frank Prosser, words of which are reproduced below:

(Tune: "The Wearing O' The Green.")

Some forty years or so ago,
'Fore most of us were born,
A firm I'll name got in the game
To toot its little horn.
Its name was J. M. Robinson,
I believe that I have heard,
From all accounts of old timers
It surely was a bird.
They started in to make a hit
In this great big business,
And scored a bull's eye the first shot;
You'll agree with me I guess.

Then came from far across the sea
A Scot from old Scotland
To stick a finger in the pie
And also lend a hand.
He met a Yankee brave and bold,
A great deal like that Scot,
Whose aim in any kind of game
Is landing at the top.
A short time after they had met
The country came to know
There was a new firm in the field,
CLAY, ROBINSON & CO.

They jumped out with whoop and shout
To win the country trade,
And left most all their rivals
Far behind them in the shade.
They set a gait a horseman calls
"High, wide and fancy,"
And he that didn't take their dust
Was surely a dandy.
For both this Scot and Yank well know
How best to win first place
In either selling live stock
Or any other race.

They keep a tight rein o'er their men,
The same as o'er a horse,
And none but a pure thoroughbred
Will do for them of course.
Of thoroughbreds there were but five,
They tell me, at the start
And now there are three hundred odd;
Each does his little part.
They top the market every day,
Or something of that sort,
If you won't take my word for it,
Read the LIVE STOCK REPORT.

As will be noted from the photograph opposite, the ladies this year lent the charm of their presence to the occasion. At the conclusion of the banquet the "class song," words of which appear below, was rendered by the quartet, and the chorus joined in by all present:

CLASS SONG.

(Tune: "Pony Boy.")

Oh, John Clay one fair day so they say,
'Bout twenty years or so ago,
Struck the yards, took two pards,
And they hung up a new shingle,
And the plans that they laid got the trade
And it stayed—and the firm expanded,
And from one point then
It has reached out to ten,
As you will hear!

Chorus:

Chicago, Chicago, Kansas City, Omaha,
Buffalo, South St. Joe, Sioux City and St. Paul;
Denver too, East St. Lou'; Fort Worth last of all,
Let 'er go, let 'er go, let 'er go boys,
Clay, R. & Co.

Members five, in the hive, all alive,
Make a combination hard to beat,
They are true, thro' and thro'
And they're all first rate good fellows;
Every boy they employ, says its joy, no alloy,
To work for men like they,
And the tone is the same
At all points in the game,
As you will hear!

There is one, who's a son of a gun,
When it comes to selling cattle high,
"Red Horse Jim," they call him,
And he knows how to clear the alley.
Little Miles, by his wiles and his smiles,
Twice has lost his little heart away,
But you bet he can sell,
And do it right well,
At any point!

And there's Art, bless his heart, plays the part,
Of selling bulls and butcher stock,
He can ride, he can glide,
Thro' the stock yards like an arrow,
And I hear, drawing near, sounds I fear
Very much like wedding bells, oh dear,
And a nice little wife,
Will fill up Artie's life,
And we wish him joy!

There are rams, there are dams, there are lambs,
For Bennie Cooke to work upon,
He can sell, do it well,
For he loves the baby lambkins,
But some day, he will say, "let's away,"
And he'll stray with his little lamb away,
So each little peach,
Better keep out of reach,
When Ben's around!

Now, my song may be long, but it's wrong,
To overlook the fair stenogs tonight,
So a cheer, for them here,
And may they never leave us!
Then to all, great and small, short and tall,
Let us drink a little toast tonight,
And with might and main,
Sing out the refrain,
Just once again!

Our Calendar.

In case any readers of the REPORT have failed to receive our handsome "American Beauty" souvenir calendar for 1910 and will kindly drop us a line to that effect, we will gladly mail them one. We want every customer and friend of Clay, Robinson & Co. to receive one of these, and if you have not had one it is waiting for you upon request. Here are a few characteristic comments upon our calendar taken at random from hundreds of similar tenor received during the past few weeks:

D. J. Berkey & Son, Iowa City, Ia.: "Your calendar is the finest I have ever seen. It will have a place in our parlor for many years. We shall consign to Clay, Robinson & Co. when we ship, as we are well pleased with the treatment at your hands."

E. B. Funk, cashier Lake City Bank, Warsaw, Ind: "Your beautiful calendar received and we wish to express our appreciation and thanks. It surely is a fine piece of work and holds an appropriate place in what we call our art gallery, which is the place we hang calendars received."

A. M. White, Solon, Ia.: "Yesterday's mail brought to us two grand pictures, namely, your 'American Beauty' calendar and the 'Sheep Shearers'. They are certainly very fine and we are highly pleased. We shall have the 'Sheep Shearers' framed. I have the picture of the 'Hunting Scene' which you sent us some years ago framed. Many thanks for your kindness. When I have stock to market Clay, Robinson & Co. will assuredly handle the shipment.'

Northern Colorado Lambs Sell Well.

Practically the first lambs of any number to be shipped out of Northern Colorado this season were on the South Omaha market Thursday of last week. In the shipment were 1,680 westerns of 90 lbs average, belonging to L. Frantz, C. G. Hoffman and F. A. Metzler, all of Timnath. They were sold by Clay, Robinson & Co. at $8.85, showing 95c advance over the February tops at Chicago last year. The owners expressed themselves as very well pleased with the prices. The high cost of lambs when put into the feed lots and dear costing feed renders it imperative that Northern Coloradoans get $8.50 on the Chicago market for lambs this season, if they are to be remunerated, according to one of the leading feeders there. He says the shortage in feeding operations is around 50 per cent from last year, and is of the belief that if the owners market their lambs conservatively they will most likely have their accounts on the right side of the ledger.

Hay-Fed Cows at $5.30.

On Feb. 18 our Kansas City house sold a string of hay-fed cows and heifers from the North Park country in Colorado at $5.30. This is among the top sales for such stock on that market thus far this season. The offerings averaged 1,031 lbs.

No Complaint in Seventeen Years.

Chas. H. Thex, Otter, Mont., writes our South Omaha house: "I wish to thank you for your good services rendered the last season. I have been patronizing your house for something like 17 years, and have never had cause to complain, and that is a reputation that any one should feel proud of. I also thank you for the REPORT, as I find it very interesting."

Producers Need not Be Uneasy.

John E. Law, Weld county, Colo., writes us to following effect: "Not infrequently I find matters of interest in the REPORT. That letter of Mr. McCarthy states quite clearly the situation in regard to high prices and cost of living from the standpoint of live stock grower and farmer. Things eaten by people are produced at a very much greater expense, but Mr. McCarthy and the farmer need not be uneasy. We have our 'downs' as well as our 'ups.' However, lambs and mutton and what the farmer can produce will be wanted. The less we are forced to produce by conditions affecting our immediate business, so long as same conditions affect all producers, the higher will eventually be the prices paid for what we produce."

D. M. Yoder, Douglas county, Ill.: "There is not much stock on feed of any kind here."

SECOND ANNUAL BANQUET OF CHICAGO EMPLOYES OF CLAY, ROBINSON & CO.

Fewer Cattle on Feed in Oklahoma.

W. H. Weeks, traffic manager of the Kansas City Stock Yards Co, after a trip through Oklahoma, says that there has been a marked reduction in cattle feeding there this year. "Last year the M. K. & T. Railroad had 51,000 on feed at the oil mills on its line," said Mr. Weeks. "This year 7,600 were put on feed and half of them have been marketed. The other lines are in the same situation and there are 60 per cent less cattle being fed corn. Oklahoma grass cattle will probably come in about the usual numbers. The cause of the big drop in feeding was the high cost of meal products and corn, as well as cattle."

Enormous Shortage of Meats.

"If we had not had 4c hogs two years ago we would not be having 9c hogs now." This is the conclusion of Patrick Cudahy, the great packer. "My advices from the western packing points indicate a shortage of 25 to 35 per cent in the hog supply," he further stated. "And this will continue through the season. There is a shortage of 800,000,000 lbs of hog products in the United States from one year ago. We are bound to have high prices for some time."

Our Reports Again Verified.

During the railroad blockade those who had bearish ideas were loudly proclaiming that there was a great accumulation of hogs in the country. The blockade has been raised for two weeks or more, yet the rush of hogs has not occurred. Nor will it. They are not in the country to be rushed. This only goes to verify our claim all along that there is a shortage of hogs. We did not make this prediction from hearsay, but from reliable information gathered by our houses at East Buffalo, Chicago, East St. Louis, South St. Joseph, Kansas City, South Omaha, Sioux City, South St. Paul and Denver. Clay, Robinson & Co. never make a market prediction until all the facts are gathered and carefully weighed. That's the reason our market reports are so widely quoted in the leading live stock and agricultural papers and why stockmen all over the country place so much credence in them.

Reduced Cattle Supply in Panhandle.

"Young cattle are very scarce in the Panhandle country of Texas," remarked Judge O. H. Nelson of Amarillo. "Cows are only a fraction of the number that were on hand five years ago. There will be a greatly reduced supply that cannot be made up for some years. Higher-priced land and spaying of heifers have been the chief reasons for the cutting down of the herds. In spite of the severe winter the cattle are generally in first-class condition."

Sullivan Bros. of Marengo, Ill., will hold a sale of 100 head of fine horses in that city Feb. 26. They have for several months been selecting horses especially for this sale and believe they have offerings that will please any prospective buyer.

Are Still Setting the Pace.

Our Kansas City house continues to lead in the race for top prices in the sheep department. On Feb. 21 they topped the market for all classes. Their sales follow:

$8.95 — Obtained for 231 lambs of 71 lbs average for J. D. Hall, Bent county, Colo. This price was 15c per cwt higher than any lambs sold by any other firm, the sales at $8.85 and $8.90 being made by our house.

$8.40 — Landed 506 yearlings, averaging 68 lbs, at this figure, as high as any yearlings ever made on that market. Colt & Rhodes, Bent county, Colo., were the shippers.

$7.00 — Is a record price on the Kansas City market by 10c per cwt. Our house sold 20 head of 73 lbs average at the figure for A. Haggard, Conejos county, Colo.

$6.75 — Proved 25c per cwt higher than any ewes ever made on the Kansas City market. This sale was negotiated by our house for Leatherman & Leasure, Prowers county, Colo. The lot included 944 head, averaging 83 lbs.

Among Our Patrons.

Mrs. M. Mayfield, Cooper county, Mo., on Feb. 18 shipped our East St. Louis house 79 hogs which they sold at $9.40, averaging 223 lbs.

W. F. Gieske, Lyon county, Minn., was represented on the Chicago lamb market Feb. 16 with 219 westerns of 91 lbs average which we sold at the top price of $9.15.

M. Weinberg & Co., Schuyler county, Ill., had 135 hogs of 183 lbs average on the East Buffalo market Feb 19 which our house sold at $9 65 straight, top for their weight.

H W. Broasch, Cherokee county, Ia , was represented on the Sioux City hog market Feb 22 with 59 head of 309 lbs average which our house landed at the top price of $9.15.

Among the high sales on the South Omaha market last week was a lot of very nice steers of 1,462 lbs average which our house sold at $6.75 for Fred Westby, Boone county, Neb.

Summit on cattle at Denver last week was $6 00 at which price our house landed three cars of 1,236-lb steers from the Colorado Stock Feeding Co.'s feed lot in Boulder county, Colo.

John Bahr, Carroll county, Ia., was on the Chicago market Feb. 21 with 183 hogs, averaging 218 to 243 lbs, which we landed at $9.35@9.45, the latter price being top for butcher weights

F. J. Oliver, Sedgwick county, Kan., had in 552 lambs, averaging 64 lbs, at Kansas City on Feb. 14. Our house sold them at $8.65, being 5c per cwt higher than any other lambs brought.

Ingham county, Mich., was represented on the East Buffalo market Feb. 14 with 135 lambs, averaging 82 lbs, which our house landed at $9.10, top by 10c per cwt. They were marketed by C. Risch.

Extreme top for cows and heifers on the South Omaha market for several weeks was $5.70, secured by our house on Feb. 17 for a load of 1,124 lbs average, sent in by P. D. Smith, Jr , Boone county, Neb.

Oscar Samson was on the South Omaha market Feb. 17 from Burt county, Neb., with a load of 1,475 lb beef steers for which our house obtained the top price of $6.85. They were a very nice lot of steers.

At South St. Paul $8 00 proved top for steers on Feb. 14. Our house obtained this price for a load of 1,294 lbs average. These cattle originated from Minnesota, were grade Herefords and of very good quality.

B. G. Eaton, Weld county, Colo., was represented on the South St. Joseph lamb market Feb. 14 with a double-deck of native Colorados, averaging 77 lbs, which our house landed at $8.75, summit by 5c per cwt.

The highest price ever paid on the South Omaha market for hogs up to and including Feb. 18 was $9.05, which figure our South Omaha house obtained for a load of 248 lbs average, marketed by John Flynn, Mills county, Ia.

Oscar Samson, a prominent stockman and farmer of Burt county, Neb., was on the South Omaha market Feb. 17 with a car of good 1,465-lb cattle of his own raising and feeding which our house sold at $6.85, summit by 10c per cwt.

Our Kansas City house Feb. 17 made a new record in the sheep department on that market when they sold for E. T. Maddox, Chase county, Kan., 212 yearlings of 68 lbs average at $8.40 and 37 wethers, averaging 73 lbs at $6.90.

On Feb. 17 our South Omaha house secured $5.70 for a car of cows and heifers, averaging 1,124 lbs, fed and marketed by P. D. Smith, Jr., Boone county Neb. The price was the highest paid there in several weeks for anything of the sort.

The load of 70-lb lambs which brought $8.50 at South Omaha on Feb. 17 were fed by Charles Hilgren, Fillmore county, Neb., and sold by our house. These lambs made a pretty good gain, as they averaged under 50 lbs when bought on that market.

Putnam county, Ill., was represented on the Chicago sheep market Feb. 17 with 63 head of 110-lb wethers which we landed at $7.25, up to then as high as sheep had made on the Chicago market since May, 1888. They were marketed by O. Weber.

D. Crook, Grundy county, Ill., was represented on the Chicago sheep market Feb. 16 with 180 western wethers of 135 lbs average which we sold at $7.25, summit that day for wethers by 10c per cwt and as high as any wethers had made since May, 1888.

The 249 head of 81-lb western lambs which brought $9.00 at Chicago on Feb. 16 were handled by us and marketed by J. A. Simpson, Kossuth county, Ia. This price was extreme top of the market and 5c per cwt higher than any other western lambs made.

The 212 fed-western lambs of 83 lbs average which brought $9.25 at Chicago on Feb. 21 were sold by us and marketed by Chris Schrunk, Monona county, Ia This figure was 25c per cwt higher than any other western lambs from this side of Colorado brought.

Summit of the native lamb market at Chicago on Feb. 22 was $9.00, this price being obtained by us for 148 head of 81 lbs average, belonging to Faux & Seagley, Lagrange county, Ind. The figure was 25c per cwt higher than any other native lambs brought that day.

On Feb. 16 our Chicago house sold 82 western yearling ewes of 89 lbs average at the record figure of $8.00. They were marketed by A. Longnecker, Lagrange county, Ind. On the same day we also sold for him 43 native lambs, averaging 72 lbs, at $9.00, pinnacle for natives.

The good sales recently made by our South St. Joseph house for John McNaught, Bent county, Colo., caused him to return to that market Feb. 14 with two double-decks of western lambs, averaging 74 lbs, which our house landed at $8.65. He was again delighted with the result."

A sale quite out of the ordinary was made by our South Omaha house on Feb. 16 for M. E. Roberts, Dawson county, Neb., when they landed 33 Polled Angus feeding cattle at $5.75, averaging 919 lbs. This is a record-breaking price for feeders of this weight on that market.

Our house topped the cattle market 25c per cwt at South St. Joseph on Feb. 21 with 22 steers, averaging 1,147 lbs, at $7 00. These cattle belonged to McKee & Romjne, Harlan county, Neb. They also sold for the same people 27 steers and heifers of 810 lbs average at $6.50, top for their class.

George S. Henderson, Pocahontas county, Ia., marketed through our firm at Chicago on Feb. 21 a load of 98-lb native lambs at $9.30. This price was extreme top by 10c per cwt, 30c per cwt higher than any other native lambs brought and a record figure for natives by 15c per cwt up to that date.

Buying Price $3 50; Selling $7.25

Granville, Ill , Feb. 21, 1910.

Clay, Robinson & Co.,
Chicago.

Gentlemen:

Returns for deck of sheep arrived O. K. and were quite a surprise to me, as I looked for the wethers to sell 50c below the top. (The wethers were on the market Feb. 17, averaging 110 lbs, and made $7.25, extreme top.) They had been bought by you as culls around $3 50 the last of November and had been scant fifty days on full feed. Many thanks to your buyer and salesman.

Yours truly,
O. WEBER.

I. G. Weigand, Otero county, Colo., was on the South St. Joseph market Feb. 14 with two double-decks of western lambs, averaging 72 lbs, which our house sold at $8.65. Mr. Weigand mentioned that this was his first trip to that market in seven years, and he was much pleased with the way his lambs were sold.

Topping the cattle market 55c per cwt is not very often recorded. Our Sioux City house turned this trick on Feb. 16, when they sold for Carl Fessel, Woodbury county, Ia., a load of 1,628-lb steers at $6.55, next highest sale that day being $6.00. These cattle were fed about four months, were about two-thirds fat and very coarse.

G. M. Pearson, Fillmore county, Neb., was represented on the South Omaha market Feb. 17 with a car of 102-lb ewes which our house landed at the top of the market—$6.75—as well as the highest price paid there this season up to that date. This is his first attempt at sheep feeding and he is to be congratulated upon his success.

"This is our initial shipment to Clay, Robinson & Co. and we want to say that we were very well pleased all around." This was the way R. J. Curtis and Geo. B. Neff, both well known feeders of Pottawattamie county, Ia., expressed themselves at Chicago Monday. We sold Mr. Curtis' steers at $7.25 and Mr. Neff's steers at $6.60 and his heifers at $5.65.

P. Spence was on the South Omaha market Feb. 18 with 36 beef steers of 1,375 lbs average which our house landed at $6.90, top that week and also for season up to that date. These cattle were of nice quality and had a good fat top, although they ran down to several that were considerably off in flesh. Mr. Spence was delighted with the price his cattle brought.

Colt & Rhodes, Bent county, Colo., captured three top loads at Kansas City on Feb. 14 through our house. They marketed 482 yearlings of 72 lbs average at $8.15, summit by 5c per cwt; 175 head of 82-lb wethers at $6.75, pinnacle by 15c per cwt and highest price on record there for this class of stock, and 105 ewes, averaging 77 lbs, at $3.35, extreme top.

The fed-western lambs from Colorado which sold at the top price of $9.20 at Chicago on Feb. 21 were handled by us, pinnacle for these offerings that day by 5c per cwt and up to that day highest since June, 1909, when we sold Colorados at the record-breaking price of $9.90. The sales follow: For G. F. Plumb, Brush, 469 of 88 lbs average and B. A Hamlet, Fort Morgan, 455, averaging 88 lbs.

M. E. Biehl, Stevenson county, Ill., was on the Chicago market Feb. 14 with 84 ewes of 123 lbs average which we landed at the top of the market—$6.75. We bought these sheep on the Chicago market in September at $4.00, which was $2.75 under the price we obtained for them. Regarding the sale, he said: "I am more than pleased with the price and the way you handled them. They made me good money."

The Colorado Stock Feeding Co , Boulder county, Colo., were represented on the Denver market Feb. 14 with three cars of fair to good native steers which our house landed at $6 00, which was 20c per cwt above anything sold on the open market this year. Mr. Hogarty, who accompanied the shipment, expressed himself as well pleased with the results, also with the manner in which the cattle were handled.

Our Denver house Feb. 14 sold for Grundle Bros., Eagle county, Colo., seven cars of steers, averaging 1,080 lbs, at $5.50 as feeders, and two cars, averaging 936 lbs, at $4.85. These cattle were hay feds and were good quality southerns. They also had in a car of hogs, which is the first shipment of hogs from that section. Mr. Grundie, who accompanied the shipment, expressed himself as very well pleased with the results of his winter feeding.

Payne & Roembach, Sedgwick county, Kan., through the selling services of our house, have the market topping habit at East St. Louis. Hardly a week passes but that they have several top sales to their credit. On Feb. 17 our house sold 530 head of 75-lb lambs at $8.90, top price and 221 yearlings of 76 lbs average at $8.55, highest price ever obtained for such offerings this side of Buffalo. On the following day our house obtained the respective prices for Payne & Roembach's lambs and yearlings, also the tops that day.

Our East St. Louis house Feb. 27 sold 530 lambs, averaging 75 lbs, at $8.90, top of market that week by 5c per cwt. They were fed and marketed by Payne & Roembach, Sedgwick county, Kan. Next highest price that day was $8.85, which our house also obtained for 532 head, averaging 75 lbs, they belonging to M. A. Rogers, Sedgwick county, Kan. Also on that day our house made a new price record on any western market up to that date for yearling wethers when they sold for Payne & Roembach 221 yearlings of 76 lbs average at $8.55.

W. E. Moore, Columbia county, Wis., was on the Feb. 21 market at Chicago with a load of hogs which we sold at $9.42½. "These hogs cost me $7.00@7.10 in my neighborhood during October and November," remarked Mr. Moore. "I needed them to follow my cattle in the feed lot. I was reluctant to pay the price until articles on the hog situation in the LIVE STOCK REPORT assured me that buying shotes in the country at that time would undoubtedly prove remunerative. The hogs made me big money and I am glad that I followed the advice of Clay, Robinson & Co."

I. W. Seaman, who resides in Davison county, S. D., and who owns 4,000 acres of farming and ranching land near Running Water, S.D., was at our office consulting with us in regard to the future cattle market situation. Mr. Seaman was on his way home after a trip to California and Canada. He has been a resident of South Dakota for 39 years, ranching and feeding cattle for 25 years and shipping to Clay, Robinson & Co. for about 15 years. He is a fancier of Angus cattle and for the past four years has topped the Chicago market through our firm with his black cattle every year either in the steer or she department.

Notice.

We shall appreciate it very much if any of our readers who by mistake are receiving more than one copy of the REPORT, or whose paper is erroneously addressed, will immediately advise us. In cases where, by reason of a difference in the spelling of the name or any other cause, a reader receives more than one copy it of course entails upon us a double expense for postage without being of any benefit to the recipient. Our readers will confer a highly appreciated favor by thus assisting us to keep our mailing list corrected. In case you are getting two copies please send us the wrappers from both so we may locate the error.

LIVE STOCK & CROP CONDITIONS

REPORTS GATHERED AND RECEIVED BY CLAY, ROBINSON & CO.'S HOUSES AT THE TEN LEADING LIVE STOCK MARKETS.

STOCK LOOKING WELL IN MONTANA.

J. Duncan, Valley county, Mont.: "We are having plenty of winter, but thus far stock is looking and doing very well."

LITTLE MARKETABLE STOCK IS LEFT.

Clark Stewart, Blackford county, Ind.: "From all indications there will be very little stock shipped to market from this part of the state this season."

MANY SHEEP ON FEED IN OHIO.

W. P. Thomas, Guernsey county, Ohio: "There are not many cattle on feed for the spring market, but a good many sheep. Hogs are scarce and high."

IOWA HAY AT $20 PER TON.

H. Abels, Grundy county, Ia.: "Corn is worth 55c per bushel here and hay $20 per ton. Matured hogs are all gone. There are hardly any cattle in the feed lots.

FAT STOCK SHIPMENTS NEAR END.

J. A. Schwendinger, Dubuque county, Ia.: "Shipments of fat stock are about at an end in this district. There are but a few more cars of hogs left in the neighborhood."

TRYING TIMES ON FEEDERS.

T. L. Karns, Marion county, Ia.: 'These are trying times on the feeders, with corn at 60c per bushel and hay at $16 per ton, along with the hardest winter in years."

CORN DID WELL IN MINNESOTA.

Theo. Jansen, Lyon county, Minn.: "There is but little stock on feed in my section, especially of hogs. Corn and wheat crops were good, but barley did not turn out so well."

SEVERE WINTER IN COLORADO.

A. A. Stewart, Kiowa county, Colo.: "We have had an exceedingly severe winter, which, following the one of last, has caused me to dispose of most of my cattle on account of feed shortage."

FAVORABLE CONDITIONS IN SOUTH DAKOTA.

James T. Craig, manager of Western Ranches, Butte county, S. D.: "The weather still continues favorable for stock in this part of the country, although there is a good deal of snow in the northern part."

ONE OF WORST STORMS OF SEASON.

A. C. Russell, prominent live stock dealer of Cass county, N. D., writes under date of Feb. 15: "We are having one of the worst wind and snow storms of the season here today. There are not as many cattle on feed here as usual."

IOWA CATTLE NOT DOING SO WELL.

J. S. Hermon, Madison county, Ia.: "There are a few cattle on feed in this locality, perhaps 125 head. Old corn is worth 75c and new corn 60c. Conditions seem very unfavorable, cattle not putting on flesh with any promise of profit."

STEERS DOING WELL IN NORTH DAKOTA.

W. Gibb, Montraille county, N. D.: "We are having a very fine winter here and stock is doing better. There has been an absence of bad storms. Cows and yearling stock are being fed, but steers can rustle their own living and are doing well."

AVERAGE SUMMER FEEDING IN MISSOURI.

John W. Cochran, Saline county, Mo.: "There is about 75 per cent of cattle and hogs to be shipped from here before June 1, as compared with 1909. Summer feeding will be about an average, but more will be marketed in June and July than usual."

FAT STOCK SCARCE IN PENNSYLVANIA.

J. M. Lacock, Douglas county, Pa.: "We are in the midst (Feb. 14) of the biggest snow storm of the winter. Fat stock is scarce. Feed is high, corn 75@85c per bushel and hay $16 per ton. This winter will clean up most of the rough feed in this locality."

LITTLE FEEDING IN WISCONSIN.

L. S. Fosberg, Pepin county, Wis.: "Stock in my neighborhood is very scarce; in fact, I know of nothing on feed within a radius of ten miles except one car of cattle. Our crops yielded well, wheat averaging 28 bushels to the acre, while barley went 30 bushels."

HIGH-PRICED CORN REDUCES IOWA FEEDING.

J. B. Price, Appanoose county, Ia.: "Owing to scarcity and high price of corn, there has been a big reduction in the feeding of cattle and hogs from late years. There is plenty of roughage. Corn is worth 65c per bushel and hay $16 per ton. Snow is all gone. Owing to scarcity of help, farming operations are greatly hampered."

FEED PLENTIFUL IN NORTH DAKOTA.

Richards & Arnett, prominent stockmen and bankers of Stark county, N. D.: "We have had a very steady winter thus far. There have been no severe blizzards. It has been cold but an even temperature. This is particularly true in the northern part of the state, but conditions in the southern part have not been so good and some losses of stock are reported there. Feed is plentiful."

KANSAS CATTLE FEEDERS MARKETING EARLIER.

J. R. Ralston, Butler county, Kan.: "Owing to the bad weather in our country, feeders are shipping cattle out one to two months earlier than usual. Thus there will not be many cattle to come from my section for April and May markets. Corn is selling at 60c per bushel and alfalfa hay at $9.00 per ton in the stack. Our hog crop is greatly reduced, due to liquidation in 1908 and high price of corn."

POOR RAILROAD SERVICE IN MINNESOTA.

Edward Merricks, of the extensive shipping firm of Merricks Bros., Watonwan county, Minn., was at South St. Paul on Feb. 15 with a car of cattle to our house, and said: "There is considerable stuff in our immediate country to move in the next two months, but the car situation is very bad and in consequence shipments have been materially curtailed. We were obliged to wait eight weeks before being able to get a car for the cattle which we had on today's market."

RECORD PRICE FOR YEARLING SHEEP.

Photo of the Mexican yearling wethers which Payne & Roembach of Colwich, Kan., had on the East St. Louis market Feb. 17 and which our house landed at the record-breaking price of $8.55. This price has never before been reached on any market east of Buffalo. The sale included 221 head of 76 lbs average. On Feb. 15 our house sold for the same firm 246 yearlings, averaging 74 lbs, at $8.45, being top that day by 10c per cwt. They also sold for them on Feb. 14 a double-deck of the yearlings of 76 lbs average at $8.35, up to then 20c per cwt higher than any yearlings ever made on that market.

HOGS AND LIGHT CATTLE NOT AVAILABLE.

A. D. Long, Shelby county, Mo.: "Hogs cannot be bought in this county at any price for the reason that they are not here. There are not ten loads of cattle within ten miles of Clarence to go in the next sixty days, and this is one of the best shipping points on the Hannibal & St. Joseph Railroad. Light cattle cannot be secured at any price. I have been feeding and shipping for 35 years and I have never seen fat stock to be more scarce for this time of the season than now."

FEWER CATTLE ON FEED IN VIRGINIA.

N. F. Adams, Fauquier county, Va., was at Chicago buying stock cattle through our firm. "While it has not been very cold this winter," said Mr. Adams, "we have had the most snow in many years. Owing to high price of feed—corn at 80c per bushel and hay at $17 per ton—there are not many cattle on feed in my section of the state. For instance, in my county alone 16,000 are usually fed during winter, while the number has been reduced to 10,000 or 12,000 this year. We sell a great many cattle right off grass in April and May on export account, but there will not be as many available this year as usual."

PLENTY OF HAY IN WYOMING.

W. M. Spear, vice president of Spear Bros. Cattle Co., Sheridan county, Wyo.: "We had a hard winter from Nov. 19 to Jan. 10. Since the latter date it has been fine winter weather. Snow was about twenty inches deep on the south end of our ranch and ten inches on the north. We have about all of our cows and calves on feed and on the cold days it takes 80 tons of hay per day to fill them up. There has been no loss of cattle to speak of between Powder River and the Big Horn and with an average spring every cowman in the above mentioned country will have enough hay, or can get it, to feed out to green grass."

CATTLE PRICES HIGH IN COLORADO.

W. L. McClain, Logan county, Colo.: "Prices for cattle here are higher than I ever saw them. To give you some idea of same, I will quote you a few recent sales. One hundred young dehorned cows at $24 per head. They were mostly with calf, and were Hereford and Shorthorn crossed. Some two-year-olds $28 and yearlings, about half calves, at $21 25, while yearling heifers and calves fetched $14.10. Last fall some 1,100 southern steers were unloaded here. The threes sold for $30 and twos $26. The winter has been very severe and up to Jan. 15 was the worst on record. If there had been anything like the usual number of cattle here the loss would have been a heavy one."

Receipts for Year to Date.

Total receipts of cattle, hogs and sheep at six main western markets for year ending last week, and same period last year, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

Markets.	1910.	1909.	Gain.	Loss.

*Net loss. †Net gain.

Most men who practice exclusive grain farming have small interest in a permanent agriculture. Mixed farming, which involves stock, is the most successful and permanent system for the corn belt.

It's The "Clay, Robinson & Co. Way"

Some Iowa cattle feeders, finding it impossible to obtain stock cars and the feed bill mounting higher and higher, at last appealed to Clay, Robinson & Co. for help. Their request was quickly complied with. Our South Omaha house ordered four cars and put a heifer in each one. The railroad company was instructed to stop shipment enroute,—the point where said shippers were unable to secure cars—where the cars were filled out. The shippers were on the Chicago market Monday, after waiting for cars since the first of the year. The only extra expense they incurred was $2.00 for extra switching charges. We handled their stock. It was their initial shipment to us, and they were loud in their praise of the "Service That Satisfies." They also said that it certainly pays to transact business with a firm that is represented at all of the leading markets, and thus in a position to lend a helping hand at a critical time.

NATIVE BEEF STEERS.

Range of prices and bulk of sales of native beef steers this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Range.	Bulk.
This week.....	$4.75@8.10	$5.75@7.15
Previous week.....	4.50 7.90	5.60 6.80
Year ago.....	4.50 7.00	5.50 6.35
Two years ago.....	4.00 6.00	4.85 5.85

Thursday's run of cattle was 7,443. Beef steers were active sale at prices strong to 10c higher. Trains delayed in arriving, yet buyers took the offerings about as fast as they were ready to be shown. Receipts Friday 3,098. Market was again active at prices steady to strong, lighter weights being in especially good favor. Top was $6.90. As compared with close of last week sales showed 15@25c advance.

The week started out with total receipts of 22,008. Beef steer buyers made it apparent from the outset that they were determined to stop the upward trend of prices. Result was a steady to strong trade. The market had fairly good life, with all classes of buyers seemingly wanting offerings. Train service was considerably improved over late weeks. Light and medium weight offerings met especially good favor from local dressed beef men. Top beeves went at $7.75, Clay, Robinson & Co. obtaining this price for 17 grade Herefords of 1,423 lbs average from Nebraska, they being branded and two-thirds fat. The next highest price was $7.45 and 1,346-lb Kansas made $7.25. Bulk of sales were at $5.75@7.00. Tuesday supply 6,984. There was a good call for beef steers and prices held fully steady. Best beeves on hand brought $7.25, averaging 1,341 lbs. Marketing of cattle Wednesday 15,000. Beef steer trade had fairly good life at prices steady to strong with the previous day and strong to 10c higher than Monday, light and medium weight offerings going to best advantage. Top beeves at $8.10, paid for 41 head of choice 1,547 lbs average.

Revised quotations for all grades of native beef steers:

Extra choice to prime steers.....	$8 35	@ 8 70
Good to choice steers.....	7 60	8 25
Medium to good steers.....	6 40	7 50
Plain to fair short-fed steers.....	5 90	6 25
Common to fair steers.....	5 25	5 75
Extra choice to prime yearling steers.....	7 60	8 00
Good to choice yearling steers.....	7 10	7 50
Medium to good yearling steers.....	6 40	6 90
Plain to fair short-fed yearlings.....	6 00	6 25

Two years ago.....	3.65 4.90	2.15 2.85	3.40 4.25

Thursday trade in cows and heifers was strong to 10c higher. Steady to firm rates prevailed for bulls. Strong market for calves. Steady trade in cows and heifers Friday, with prices 10@20c higher than last week's close. Bulls held steady and showed 10@15c advance over like day a week ago. Calf prices unchanged and 25@50c higher than finish of previous week.

Supply of cows and heifers on the initial market day this week was smaller than usual, which, along with the strong demand, enabled sellers to get rid of their offerings in good order at prices strong to 10c higher. Buyers favored the offerings of value good enough to go above $4.50. Bull market was 10@15c higher, call for bolognas being especially urgent. Calf market was generally steady, with a light run and quality considerably poorer than late last week. Generally a steady trade in cows and heifers Tuesday. Packers appeared to need all of the cows they could get. Bulls steady sale. Calf prices generally 25c higher, with several fancy lots reaching $9.90. Prices for cows and heifers rnied 10c higher Wednesday. Bulls sold steady as did also calves.

Revised quotations for all grades of butcher stock and calves:

STOCKERS AND FEEDERS.

Top price and bulk sales of stockers and feeders this week, with comparisons, as complied by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Top Feeders.	Bulk Feeders.	Bulk Stockers.
This week	$5.85	$5.00@5.50	$4.50@5.00
Previous week	6.00	4.90 5.50	4.35 4.90
Year ago	5.50	4.50 5.15	4.15 4.60
Two years ago	5.00	4.10 4.75	3.65 4.15

There was a strong demand for stockers and feeders Thnrsday and prices were boosted 10c. Steady market Friday and 25@35c higher than finish of last week.

It was generally a 10c higher trade in stockers and feeders at the start of this week. The supply was the smallest noted on Monday in a long while. Slaughterers bid prices for anything possessing decent flesh, irrespective of quality, that feeder buyers were unwilling to pay. It seems evident that country holders of thin cattle are now of the opinion that if they are going to feed for the summer market they had better feed what they have now rather than ship and take chances of buying later in the season, considering them worth as much in the conntry as they are on the market. Rates for stockers and feeders Tnesday ruled strong to 10c higher. General demand continued strong and fresh arrivals were of small proportions. Prices are 50@75c higher than early this month. Strong to 10c higher rates were in force for stockers and feeders Wednesday. Demand was the most urgent of the year.

Revised qnotations for stocker and feeding cattle:

Good to choice feeders	$5 25 @ 5 60
Poor to medium feeders	4 85 5 10
Good to choice stockers	4 75 5 00
Plain to medium stockers	4 25 4 65
Inferior to common stockers	3 75 4 10
Good to choice stock heifers	3 35 3 85
Common to medium stock heifers	3 00 3 25
Plain to good thin yonng cows	3 00 3 60

MILKERS AND SPRINGERS.

Revised quotations for milkers and springers:

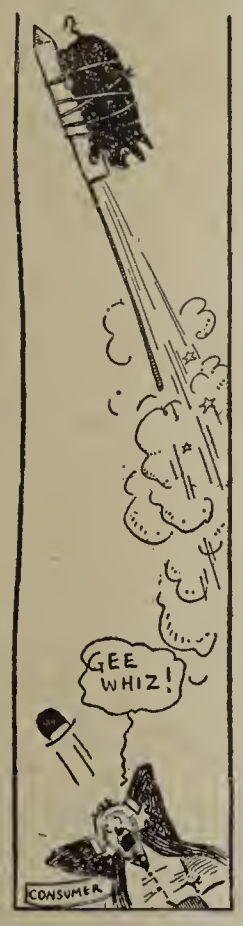
Choice to prime	$50 00 @ 60 00
Medium to good	40 00 45 00
Common to plain	30 00 37 50

Hogs.

Bulk sales of hogs of respective weights this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Bulk 200 to 250 lbs.	Bulk 260 lbs and heavier.	Bulk 135 to 195 lbs.
This week	$9.35@9.50	$9.45@9.60	$9.10@9.35
Previous week	0.00 9.30	9.05 9.35	8.00 0.20
Year ago	6.20 6.55	6.25 6.60	6.15 6.45
Two years ago	4.25 4.50	4.25 4.50	4.20 4.45

Marketing of hogs Thursday totaled 20,835. Speculators and shippers made the early market, paying prices 10@20c higher. After the eastern appetite was appeased, the market quickly weakened, with late sales 10c under morning prices, packers refusing to follow the pace set in the earlier trade. Top $9.40 and general bulk of all weights made $9.15@9.30. Receipts Friday 19,648. Opening 5@10c higher, market had a weak spot in the middle and finished about 5c under the morning's best rates. Average market was strong to 5c np from previous day. Summit was $9.47½ and sales in main at $9.20@9.40. Snpply Saturday 11,939. Market, as a whole, was 5@15c lower than Friday, good offerings snffering most depreciation. Top $9.35 and bulk $9.15@9.25. Prices were 25@30c above last week's close.



Marketing of only 37,136 head at the start of the week, after last week's sensational prices, went to prove to packers that the country has small holdings of matured swine. Trade on the whole was brisk at prices 10@15c higher, a new high trade for the year. Pit trade lent encouragement, rates going back near to high water mark early. A new top at $9.50 was made, highest since 1869. Most of the trading was at $9.30@9.45. Offerings weighing a little better than 200 lbs reached $9.40 and pig mixed went as high as $9.25. Transportation service was the best in some time. Tuesday run 16,686. Market was very uneven. Opening steady, trade developed strength with 5c advances, but closed weak, with 5c loss from general market. Twenty-five prime 306-lb offerings reached $9.52½, a new figure for the year. Otherwise the top was $9.50, and $9.30@9.45 bought the bulk. Run of hogs Wednesday 20.000. Market opened 10@20c bigher, but after urgent shipping orders were satisfied, trade became sticky and stal sales showed loss of at least half of the morning advance. Top $9.70, a new high fignre, and bulk of sales $9.50@9.60.

Revised qnotations for all grades of hogs:

Fair to choice heavy shipping	$9 60 @ 9 70
Fair to choice butchers	9 50 9
Fair to choice medium weights	9 45 9 60
Good to choice assorted light shipping	9 45 9 60

*Obtained by Clay, Robinson & Co.

Opening 10c higher, Thursday market for sheep and lambs closed weak. Eastern ontlet was narrower, due to relatively higher rates than in the East. A city butcher paid $9.25 for prime fed westerns from Michigan, but big packers wanted a similar class on the late market at $9.00. Choice fall-shorn lambs bronght $8 50. Fancy lamb weight yearlings were qnotable np to $8.50. Summit on wethers was $7.25, secured by us for westerns. Choice shorn wethers landed at $6.50. Marketing Friday 4,006. Prices were strong to 10c higher. As compared with close of last week sheep showed 25@40c advance, with yearlings and lambs 15@25c np. Quotable tops were: Lambs $9.25, yearlings $8.50, wethers $7.25 and prime heavy ewes $7.25.

On the first market day of this week receipts totaled 13,249. While sheep and yearlings met active sale at prices strong to 10c higher, there was less activity in the lamb market and rates were no more than steady. Clay, Robinson & Co sold a load of 98-lb Iowa lambs at $9.30, a record price by 15c per cwt for natives. We also landed a double-deck of 83-lb Iowa fed-westerns at $9.25, pinnacle for westerns by 25c per cwt. The first Northern Colorado-fed lambs of the season to arrive here inclnded 88-lb offerings, for which we secured $9 20, highest Colorados have made since June, 1909, when we obtained the record price of $9.90. Shorn western lambs made $8.00@8.40. Prime 116-lb western wethers brought $7.50, as high as ever paid here. Shorn western wethers of 107 to 111 lbs average brought $6.25@6.50. Best yearlings on hand were 91-lb westerns at $8.10. Two loads of 91-lb shorn western yearlings reached $7.60. Tuesday supply 12,718. All of the buyers were hungry for sheep and readily paid prices strong to 10c higher. Prime 152-lb western wethers made the record price of $7.65 and 93-lb shorn wethers $6.60, and prime 130-lb native ewes went at $7.40. A fancy lot of 72-lb western yearlings reached $8.40. Opening steady, the lamb market closed weaker. Top lambs made $9.25, paid for 89-lb westerns. Clay, Robinson & Co. sold Colorado-fed lambs at $9.20, top for these offerings, and landed natives at $9.00, being 25c per cwt higher than any other natives brought. Wednesday run 14,000. Prices ruled steady to 10c higher. Top lambs $9.35, paid for westerns, a record price for such offerings in February and obtained by Clay, Robinson & Co. A new high price was recorded for sheep when we sold fed-western wethers at $7.85.

Revised quotations for all grades of sheep and lambs:

SHEEP.

Wm. McDonald, Columbia county, Wis.: "Enclosed find 50c for which send me your REPORT. It tells me what I want to know."

Notice the advertisement elsewhere in this issue of Shoo Fly Horn Paint. This remedy has been on the market for the past six years and has given entire satisfaction. Some of our largest customers speak of it very highly, and the stockmen throughout the country, who have used it, say it heals the wound very rapidly, prevents blood poison, stops shrink and prevents the wound from fly infection, no matter how thick the flies are, and they never have lost an animal from dehorning when using this remedy. If your druggist does not keep it, write the manufacturer, H. B. Read, Ogalalla, Neb., mentioning this paper.

Farm Lands Bought and Sold.

We are making a specialty of farming lands, representing both purchasers and sellers. If you desire to buy or sell, write us for information, and submit your desires.

Clip Farm Horses In the Spring

Do it before putting them at the heavy spring work. Take off the thick winter coat that holds the sweat and dirt. You would not care to stand at night with a wet suit on. Neither do your horses. Clip them, and if required, blanket them when standing.

Clipped horses dry off fast, rest well, and do more and better work.

The Stewart No. 1 Ball Bearing Horse Clipping Machine

Costs Only $7.50

Every gear in this splendid y made machine is cut from the solid steel bar and is file hard so that it outwears anything else of the kind ever made. Gears are all enclosed and protected from dust and dirt and run in oil. It turns easy and clips last.

Machine is guaranteed for 25 years. Clips a horse in 30 minutes.

Get one from your dealer now or send $2 to us and we will ship C. O. D. for the balance. Write for big new catalogue showing world's largest line of horse clipping and sheep shearing machines.

Now is the time.

Chicago Flexible Shaft Company

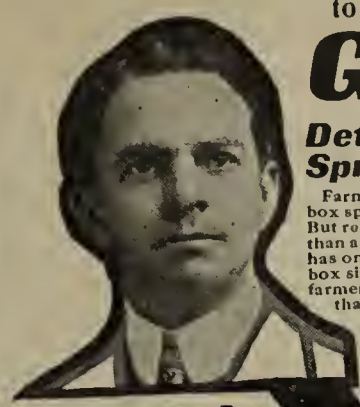
Write Today---Let Me Prove

to you at my risk that the

Grinnell

Detachable is the Best Spreader in the World



Chas. F. Chase, Pres.

Farmers are writing me continually that other wagon-box spreaders are too small. They are right about it too. But remember, the Grinnell is nearly two feet longer than any other wagon-box spreader on the market. It has one-fourth more capacity. Regular standard wagon box size. Just right for two horses. Just right for every farmer. Try it. Has more new, distinct and original features than any other spreader made. I tell about a few of them here, and I will tell you all about them in my new catalog. Get it. Here are the two biggest improvements ever made. Read about them.

Our new steel gearing does away with the old clumsy, mud clogging drive sprockets used on all other makes.

$89.50 Freight Prepaid

Our No 4A all complete ready to hitch to—includes spreader box, special 28x40 steel wheel cut under trucks with oscillating front bolster, adjustable bolster stakes, tongue, whiffle trees, neck-yoke.

THESE GREAT NEW INVENTIONS
HAVE SOLVED THE SPREADER PROBLEM FOR ALL FARMERS

Our Detachable Gearing Cage--- Nothing else like it on the market. Can be easily removed in a few minutes' time by one man, saving the spreader box, trucks and all for other uses on the farm. The only spreader made that has this possibility. It takes three to five men to remove the heavy, clumsy box of other makes with all the gearing attached and then they save you only the trucks.

Our New Steel Gearing Can't be equalled. It's a wonderful improvement in manure spreader construction. Simple, complete, all gearing attached to gearing cage; perfectly adjustable; never wears out. Does away with the trouble of mud clogging the drive chains No chains to jump sprockets here. Fits any size wheels. Beats anything you ever saw.

Here's My Proof

That the Grinnell is the best spreader you can put to work on your farm. It's the only steel gearing wagon-box spreader. It will fit any size standard, narrow or wide tread farm trucks. It has no mud clogging drive sprockets. It's the only spreader that saves the wagon box, trucks and all. It's regular standard farm wagon box size. It will take a regular top-box, with or without the gearing attached. It's the lightest draft—two horses will pull it easily. Largest capacity. One-fourth more capacity than any other wagon box spreader made. I guarantee it. There are a lot more world-beating features all told in my catalog.

Sold Direct To You-Freight Prepaid-30-90 Days Free Trial

That's the way I sell it. Right direct to you and save you every cent I can. Then I say to you, try it at my risk. Test it out any way you please, in any kind of manure, in every sort of weather---either as a manure spreader or farm wagon. Can be used either way. Saves you $25 to $90 on your investment. It's entirely in a class by itself. If you don't say it's the best spreader made after you try it---send it back---I will refund your money and pay the freight. You take no risk on my plan. Try the Grinnell first. It will fit any standard farm truck. Sold with or without the trucks

The Feed Stuff Market

reports are issued each day by the Stock Yards papers and can be obtained free by addressing

Geo. B. Smith & Co.

This company are known as the National Feed Distributors. They have established a system of distributing stations to supply feeders with feeds that are recommended by United States Experimental Stations. By their system the feeder can now secure practically any guaranteed feed delivered at their station at a very great saving, as cheap as the dealer can buy, and can get the stock just as they want it.

This system is a great boon to the farmers and they have been very quick to grasp the opportunity presented. Address their main office 842 Exchange Ave., Union Stock Yards, Chicago, ask them anything you want to know about feeds, their cost and delivered prices to your nearest station. In all cases when quoted answer by wire at the Company's expense.

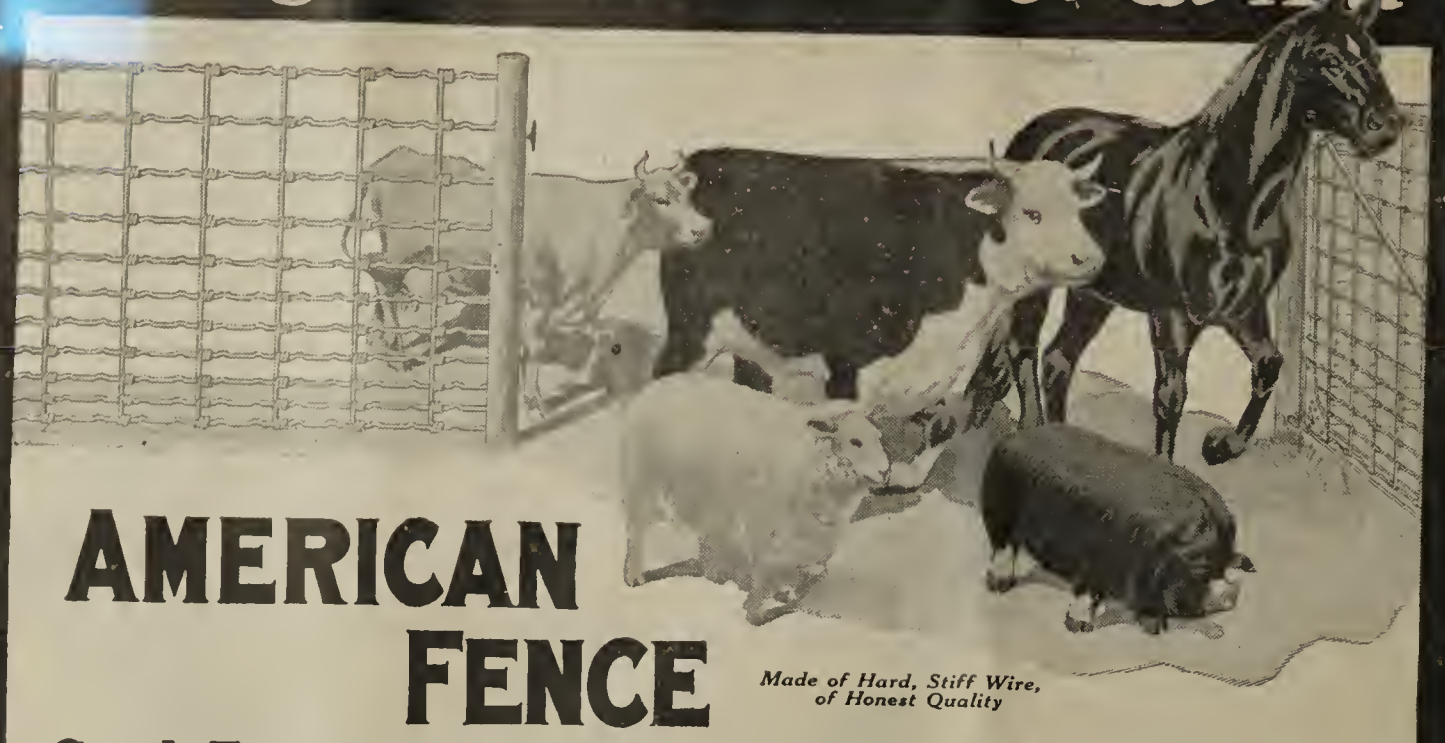
Through the Gate or Not at All



AMERICAN FENCE

Made of Hard, Stiff Wire, of Honest Quality

Good Fences are a farm investment that bring the most returns for the least money

ARE you losing money? If you had a hole in your pocket, out of which you were losing hard-earned dollars, would you sew it up? The time has arrived when a fence around the farm is as much a necessity as a cultivator.

If you are feeding 60c or 70c corn to hogs in a dry lot, allowing good, green feed to go to waste on other portions of your farm, you have a hole in your pocket, out of which you are losing good, hard-earned dollars. Sew it up.

Look up an American Fence dealer and let him show you how a few dollars invested in fence will yield a big big rate of interest on feed saved.

American Fence is made of hard, stiff steel. It is made of a quality of wire drawn expressly for woven-wire-fence purposes. Galvanized by latest improved process—the best that the skill and experience of years has taught. Built on the elastic, hinged-joint (patented) principle, which effectually protects the stay or upright wires from breaking under hard usage.

The real test of a fence is the service you get out of it. Test, judge and compare American Fence under any and all conditions, and you will find that the steel, the structure and the galvanizing are equal in durability, strength and efficiency to the hardest usage.

Berry's Poultry Farm, Box 94, Clarinda, Iowa

HOW ARE YOUR HOGS?

Dangerous policy to let them get wormy and out of condition while feed costs money.

VESEY'S STAR ANTI-CHOLERA does the work and pays big to feed. No herd is safe without it. Used and recommended by large hog feeders everywhere. Try it. If you are not satisfied money will be paid back. Price $9.00 per dozen bottles; $5.00 per half dozen bottles.

ANTI-CHOLERA CO., Union Stock Yards, Chicago

Are You Looking for a Home?

No farmer should think of buying a home before seeing a copy of THE FARM AND REAL ESTATE JOURNAL. It contains the largest list of farm lands, city property and stocks of goods of any paper published west of Chicago. It reaches 50,000 readers each issue, 85 per cent of whom are farmers. Everyone who has any property they wish to advertise will find this journal one of the best advertising mediums published. Advertising rates, 2c per word each insertion. Send 75c and we will mail you the journal for one year or for 10c in silver or stamps we will send it for two months on trial and stop it at the end of the two months unless you renew your subscription.

GALLOWAY

Get my brand new proposition with proof. Lowest price ever made on a first-class spreader. My agreement to pay you back your money after a 12 months' trial if it's not a paying investment. How's that for a proposition? You know if I didn't have the best spreader, I wouldn't dare to make such an offer. 40,000 farmers of America have stamped their O. K. on it. They all tried it **thirty days free** just like I ask you to try it. Get out your pencil. Drop me a postal saying, "Galloway, send your new proposition and big spreader book free." Ask about the new, complete steel gear 70 bushel spreader.

H. Guthberson, Gladbrook, Iowa. "Works fine. Spreads all kinds of manure better than any spreader I ever saw. So simple, nothing to get out of repair as compared with other spreaders."

T. F. Stice, Oswega, Kans. "Often pull it with my small buggy team. Does good work. Have always used the —— before. Galloway much the best. If going to buy a dozen more they would all be Galloways."

The William Galloway Company, 859 Galloway Station, Waterloo, Iowa

WANTED

A home-bred registered or high grade draft stallion Percheron preferred, and a few good young mares, as part payment on a quarter section (160 acres) of choice farm land with running water on it situated in Emmons county, North Dakota.

I would like to get horses from Southern Illinois or Northern Missouri as I want them to stock my land in Missouri. Address

D. H. YEATER, Braddock, North Dakota.

Shoo-Fly Horn Paint

Endorsed by stockmen throughout the country for preventing fly infection when dehorning in warm weather; heals rapidly. 75c per pint, sufficient for 50 head. Send for circular and testimonials. Manufactured by H. B. READ, Ogalalla, Neb.

Cotton Seed Meal, Cake, Hulls and Cow Peas

Try our superior brands, cheapest and best feed on earth. Special prices delivered any point. Wire or write us before buying. Quick shipment our motto.

What They Say About Us.

CHICAGO.

R. C. Young, Kosiciusko county, Ind.: "Returns of lambs received. All is satisfactory."

William Roehrs, Martin county, Minn.: "I am well pleased with the price you got for my load of feeders."

D. M. Clump, Emmet county, Ia.: "We have decided to favor you with our first shipment of cattle."

F. H. Graham, Champaign county, Ill.: Thank you for market reports. If I ever have any stock to ship will favor you with same."

O. Harris, Lenawee county, Mich.: "Was well pleased with what you got for my sheep. Hope I will be able to send you a better bunch next fall."

W. T. Cooper & Son, Jo Daviess county, Ill.: "We thank you very much for your information and were well pleased with the sale of our cattle."

D. D. Hume, Bourbon county, Ky.: "Cattle reached here in good shape. They were better than I expected at the price. Thank you for past favors."

J. W. Evans, Fulton county, Ind.: "C. G. Campbell, Pickaway county, Ohio, spoke well of you and thought you would do me good if I shipped to you."

Joseph Mullikin, prominent real estate dealer, Vigo county, Ind.: "We received cattle all right and wish to thank you very much. They suit us exactly."

Alvah Almond, Mahaska county, Ia.: "Thank you for the way you handled and sold my lambs. If I feed next winter you can look for some more coming from me."

J. K. Smith, president of Wayne National Bank, Wayne county, Ind.: "Cattle arrived in good condition. To say that I am well pleased does not fully express my feelings satisfactorily. Thank you for your efforts in getting me a bunch of young cattle so good in quality. Will certainly come to you again when in need of more."

EAST BUFFALO.

Ed. Logan, Washtenaw county, Mich.: "I am well pleased with sale of lambs."

E. L. Horner, Fayette county, Ind.: "I was well satisfied with sale of lambs."

W. Stewart, Shiawassee county, Mich.: "You made a good sale of our lambs. Mr. Dodge and I were both well pleased."

George Hall, Mercer county, Ohio: "Am satisfied with sale of wethers. They were not good and sold for 60c per cwt more than I expected."

W. J. Niles, Genesee county, Mich.: "Your draft and account sales of double-deck of lambs received all O. K. I am well satisfied that you made me some money. That sale of 17 sheep, 17 of them ewes, at $6.25 is certainly going some."

KANSAS CITY.

Thos. Sutton, Russel county, Kan.: "Thanks for price on load of steers. It is more than I expected."

H. A. Knight, Dickinson county, Kan.: "I am very much pleased with the price you got for cows and heifers, being more than I expected."

SIOUX CITY.

L. Wieman, O'Brien county, Ia.: "Not being able to get cars to ship to Chicago, I sent my cattle to you and you did the right thing by me, although I struck a poor market. Thank you for your information."

SOUTH ST. PAUL.

J. L. Record, Hennepin county. Minn.: "Have account sales of sheep. Thanks for your prompt returns and manner in which you handled the business."

SOUTH ST. JOSEPH.

Dr. J. O. Hoffman, Harlan county, Neb.: "The sale of hogs was a good job. Many thanks for your efficient service."

Other Cream Separators Merely Discarded or Abandoned De Laval Inventions

It is interesting and instructive to know that nearly, if not quite, every cream separator that has ever been made, and certainly all that are being made at this time, are merely copies or imitations of some type of construction originally invented or developed by the De Laval Company, and either not used by it because of something more practical or else discarded and abandoned in the course of De Laval progress and utilization of later improvements.

As earlier patents have expired some of their features have one after another been taken up by different imitators, so that at all times, as is the case today, every separator made in the United States or elsewhere in the world, utilizes some type of construction originally owned and developed by the De Laval Company, though some of them have never been commercially used by the De Laval Company because of their inferiority to other types of construction used by it.

The De Laval Company has always been forging ahead, with its many years of experience and the best of experts and mechanics the whole world affords in its employ, so that before any expiring patent might permit the use of any feature of construction by imitators the De Laval Company had already gone so much beyond that type of construction that it was then old and out-of-date in the modern De Laval machines.

All cream separator inventions by others have been of immaterial details or variations, upon which patents have been taken, if at all, more for the sake of the name than by reason of any real value or usefulness attaching to them.

The first practical continuous flow centrifugal Cream Separator was the invention of Dr. Gustaf de Laval in 1878, the American patent application being filed July 31, 1879, and issuing as Letters Patent No. 247,804 October 4, 1881.

This was the original Cream Separator—of the "Hollow" or empty bowl type—and it has been followed from year to year by the various steps of cream separator improvement and development, all De Laval made or owned inventions, the American patent applications being filed and letters patent issued as follows:

The original hand Cream Separator of the "Bevel Gear" type; application filed October 2, 1886, issuing as Letters Patent No. 356,990 February 1, 1887.

The original hand Cream Separator of the "Spur Gear" type; application filed January 17, 1887, issuing as Letters Patent No. 368,328 August 16, 1887.

The original Steam Turbine-driven Cream Separator; application filed December 8, 1886, issuing as Letters patent No. 379,690 March 20, 1888.

The original "Tubular" shaped "hollow" bowl Cream Separator; application filed April 19, 1886, issuing as Letters Patent No. 372,788 November 8, 1887.

The original "Disc" bowl Cream Separator; application filed May 12, 1890, issuing as Letters Patent No. 432,719 July 22, 1890.

The original vertical curved or interlocking "Blade" Cream Separator bowl, covered likewise by the application filed May 12, 1890, issuing as Letters Patent No. 432,719 July 22, 1890.

The original "Bottom Feed" Cream Separator bowl; application filed July 24, 1889, issuing as Letters Patent No. 445,066 January 20, 1891.

The original "Suspended" bowl Cream Separator; application filed August 21, 1893, issuing as Letters Patent No. 512,203 January 2, 1894.

The original "Star" or "Pineapple Cone" shaped series of cylinders Cream Separator bowl; application filed August 24, 1893, issuing as Letters Patent No. 521,722 June 19, 1894.

The original "Curved Disc" Cream Separator bowl; application filed January 18, 1905, issuing as Letters Patent No. 892,999 July 14, 1908.

The original "Split-Wing" Tubular Shaft Cream Separator bowl; application filed April 29, 1898, issuing as Letters Patent No. 640,358 January 2, 1900—which invention, with a series of later improvements, is the type of bowl construction used in the De Laval machines of today, and still covered by protecting patents which prevent its appropriation by would-be competitors.

The patents thus enumerated are but a few of the more important of the more than 500 original Cream Separator patents owned, controlled and developed by the De Laval Company during its thirty years of creation and development of the Cream Separator industry throughout the world. They are recited because they show in the most illustrative and conclusive manner possible De Laval originality and leadership from 1878 to the present day.

In addition to these patent-protected features, the De Laval machines have within two years been mechanically re-designed and re-constructed in every part, from top to bottom, so that the new and improved line of De Laval machines are today, even more than at any past period, fully ten years in advance of any other cream separator made.

These are the rock-of-Gibraltar-like separator facts against which the mere "word claims" of would-be competitors fade away like the mists of night before the rays of the morning sun.

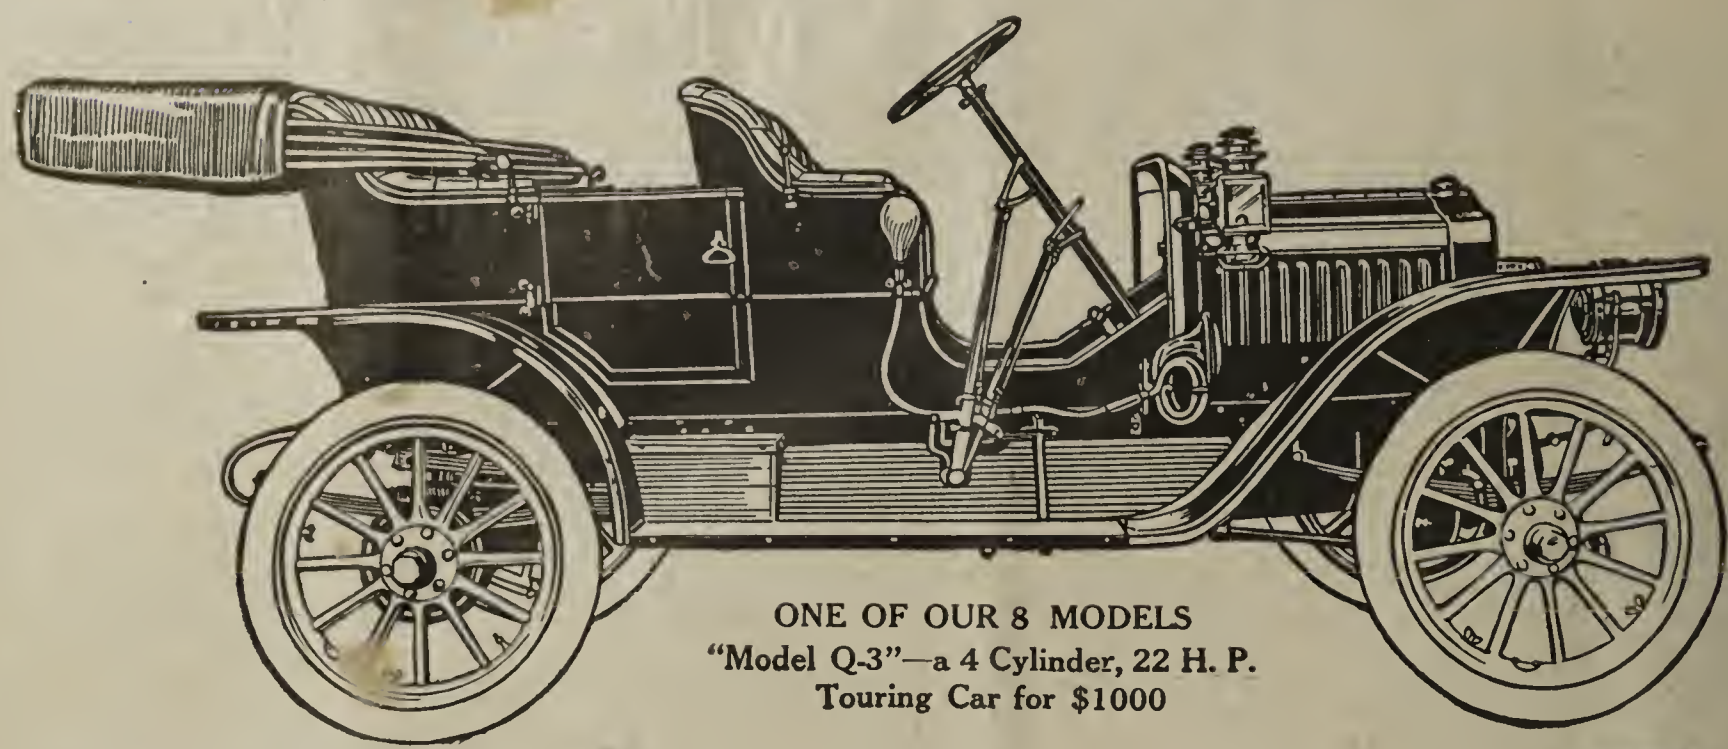
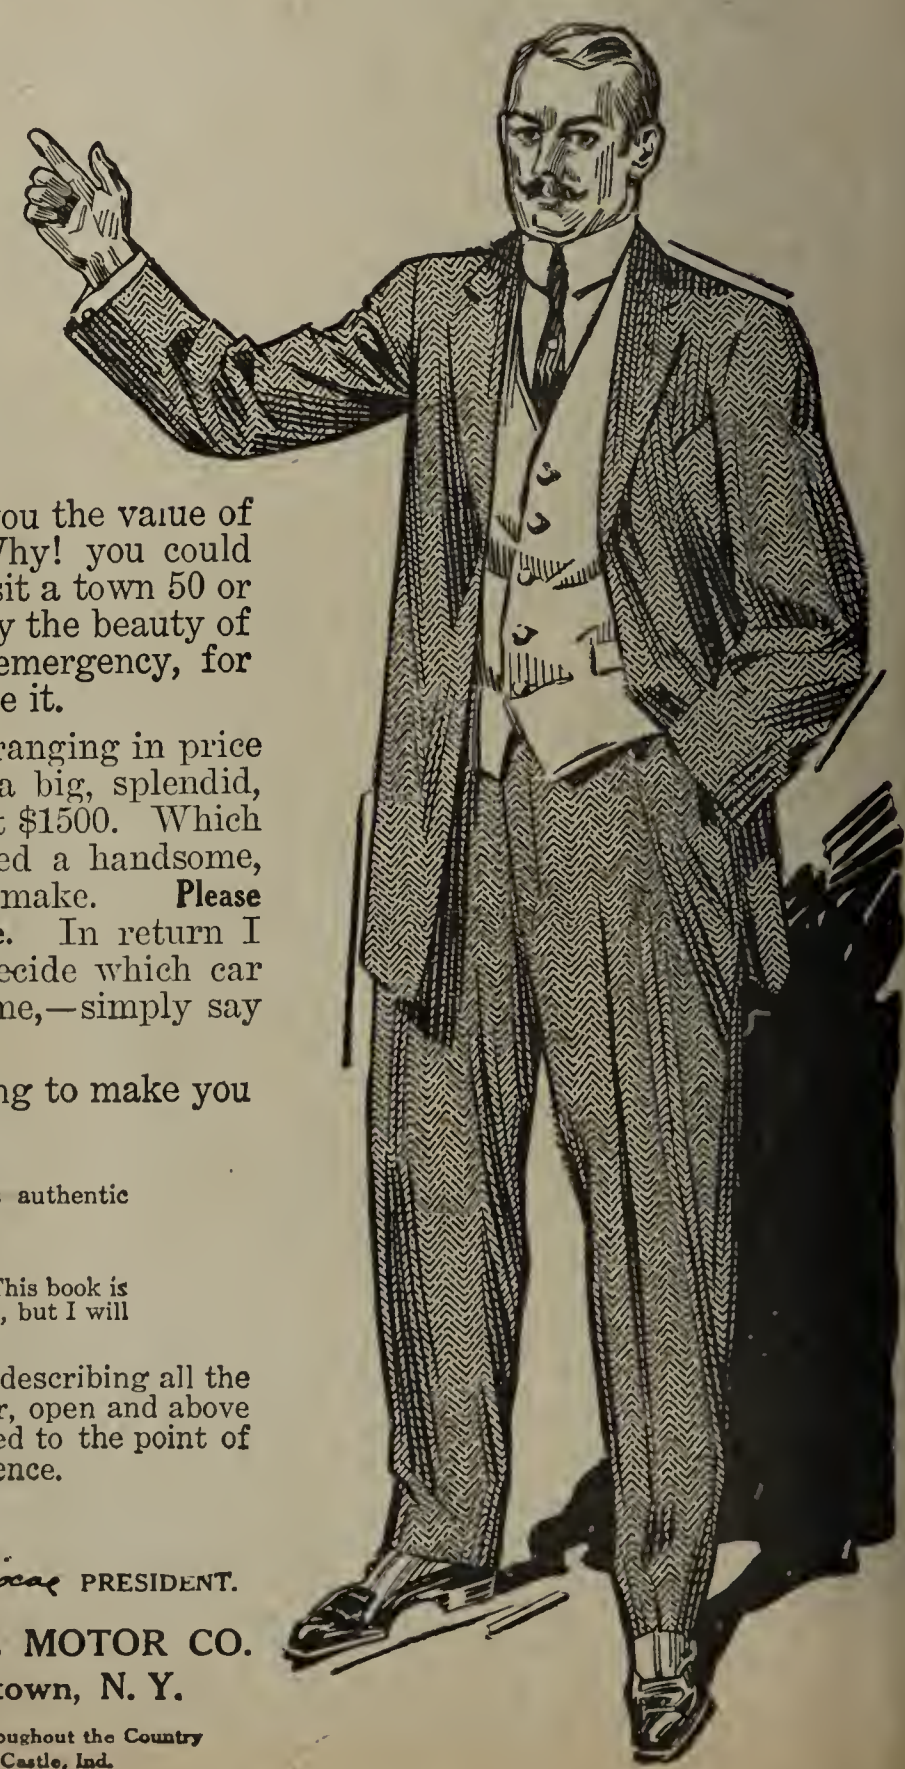
Ride in This Automobile At My Expense



ONE OF OUR 8 MODELS
"Model Q-3"—a 4 Cylinder, 22 H. P.
Touring Car for $1000

Be My Guest



I INVITE YOU and your family to take an automobile ride at my expense. There are no strings attached to this offer—no obligation to buy—it is simply my idea to get you and the Maxwell acquainted. I mean exactly what I say. I want you to ride in the Maxwell, and it shall not cost you a penny. I will give you a personal letter of introduction to the nearest Maxwell dealer and will request that he take you for a ride in a Maxwell automobile.

WHY YOU SHOULD TAKE THIS RIDE. It will prove to you the value of a Maxwell, its power, its comfort, it radius of action. Why! you could view the crops for miles around in a day, you could visit a town 50 or 100 miles away and return by night, you can see and enjoy the beauty of your country by automobile as in no other way. For emergency, for pleasure, for business, as a time saver, there is nothing like it.

WHICH MAXWELL WILL YOU TRY? We make 8 models, ranging in price from a 2-passenger, 12 horse-power runabout at $600 to a big, splendid, luxurious 4-cylinder, 30 horse-power family touring car at $1500. Which model will you try? To help you decide I have published a handsome, illustrated booklet, describing every automobile we make. **Please cut off coupon, carefully fill in your name and address and mail to me.** In return I will send this booklet without cost. When you get it, decide which car you will try, tear out the page, enclose it in a letter to me,—simply say "I want to ride in this automobile as per your offer."

THESE BOOKS FREE. When you send this coupon, I am going to make you a present of two additional books.

"THE CO-OPERATOR"

We publish a bright, newsy, handsomely illustrated magazine. It gives authentic information on automobiles. I will send it to you free of charge.

"HOW TO JUDGE AN AUTOMOBILE"

I have secured the entire edition of "How to Judge an Automobile." This book is worth money to you if you want to be posted on this subject. It is not for sale, but I will gladly send you one—fully illustrated of course.

PLEASE UNDERSTAND when you mail the coupon you get the leaflet describing all the Maxwell models, also these two books absolutely free. This is a fair, open and above board proposition with no obligations attached. If you are interested to the point of mailing coupon I will do the rest and promise you a valuable experience.

MR. BENJ. BRISCOE, Prest. C.R.L.R.

Dear Sir: Please send me without cost, the books as per your offer.

Clay, Robinson & Company's LIVE STOCK REPORT

Vol. 20 | Chicago, Friday, March 11, 1910 | No. 10

ATTENTION, COLORADO FEEDERS!

We advise cautious shipping of sheep and lambs the balance of the season. Coloradoans have the situation in better control than usual. Make an equable distribution of supplies from week to week. We are satisfied that if the Colorado feeders will follow this plan all of them will be greatly benefitted, and enable salesmen to hold the market on a high basis.

Iowa-Fed Beeves Bring $8.40.

Foster Bros., the extensive shippers and well known feeders of Earlham, Ia., were represented on the Chicago cattle market March 7 with quite a shipment, which was handled by Clay, Robinson & Co. Included in the same were 33 head of 1,598-lb beef steers which sold at $8.40, being 35c per cwt higher than any other firm sold cattle, highest since January and never before paid in March during modern packing times, and 51 head of 1,487-lb offerings which brought $8.20, the next best price of the day. These cattle were grade Herefords, with a few Shorthorns among them, and were branded westerns. They were purchased on the Kansas City and South Omaha markets. The Messrs. Foster started them on feed the first of October, but not until the middle of November where they put on a full feed. The cattle made an average gain of 75 lbs per head per month during the time they were on feed.

Colorado-Fed Lambs at $9.65.

On March 9 our Chicago house sold two different strings of Colorado-fed lambs at $9.65, the highest price obtained for lambs since June, 1909, and never before duplicated at this time of the season. This made the third consecutive day this week that we topped the lamb market, the offerings being Colorados. Our sales at $9.65 Wednesday follow: For G. C. Belmont of Brush, Colo., 732 head of 78 lbs average and R. M. Haythorn of Eaton, Colo., 500 head.

Utah Sheep Fed Corn on Range.

L. H. Jensen, an extensive flockmaster of Boxelder county, Utah, who is marketing six loads of lambs through our Chicago house, says that they had the hardest winter in his part of Utah in twenty years. Sheep that were on the open range had to be fed corn, something that never before occurred there. There are bound to be more or less losses. About the usual number of sheep were wintered.

Missouri-Fed Beeves Brought $8.15.

J. F. Allgaier, extensive feeder of Shelbina, Mo., was represented on the Chicago market March 2 with 18 head of grade Shorthorn beeves, averaging 1,440 lbs, which Clay, Robinson & Co. landed at the top price of $8.15. Up to that time this was the highest price paid for cattle since January, when we obtained $8.40, and was also the highest ever known for March during modern packing times.

Regarding the sale, Mr. Allgaier wrote as follows: "I am more than pleased with the sale you made of my cattle Any time I can do anything that would be of benefit to your house, I will certainly do it."

NEW HIGH FIGURE FOR HOGS.

On March 1 our South St. Paul house sold a load of 269-lb hogs at $9.70, being shipped by E. E. Thompson of Starbuck, Minn. This figure was top by 10c per cwt and highest ever realized at that point for a car of hogs up to that time. The next best sale was $9.60, which they also obtained for a load of 232 lbs average, shipped by Henry Heaney of Olivia, Minn.

RECORD PRICE FOR LAMBS.

Photo of the 497 lambs of 79 lbs average which our Kansas City house sold at $9.20 on Feb. 24, up to then never before reached there. Ed. Leatherman, of the firm of Leatherman & Leasure of Lamar, Colo., the feeders and owners of the lambs, is standing at the right side.

NEW HIGH PRICE FOR SHEEP.

Photo of 189 western wethers of 119 lbs average which our Kansas City house sold at $7.50 on Feb. 24, up to that time a record figure for sheep there. Dickerson Bros. of Peabody, Kan., were the owners and feeders. Mr. Horseman, head buyer for Cudahy Packing Co., is standing at the right side.

Iowa-Fed Hogs at $10.20.

On Monday of this week it was necessary to go back forty-five years to find a time when hogs sold as high as $10.20 on the Chicago market. That was during the civil war, or before modern packing times, when $12.75 was registered. Clay, Robinson & Co. obtained $10.20 at the start this week for 71 head of 261-lb Chesterwhites crossed with Duroc-Jerseys. They were raised and fed by Harry R. Thompson of Grimes, Ia. They were April pigs, and, barring some tankage and oil meal, had attained their flesh condition by following cattle in the feed lot. This was Mr. Thompson's second shipment to C. R. & Co. and he said he would soon return with a shipment of cattle to us.

Highest Pea Feds Ever Brought.

Wallace & White of Monte Vista, Colo., had 288 lambs, averaging 72 lbs, on the East St. Louis market March 7 which Clay, Robinson & Co. sold at $9.45, being 10c per cwt higher than any other sale there that day and also highest price ever obtained on that market for Colorado pea-fed lambs. Our house also sold for D. J. Gibbs of Monte Vista, Colo., 266 lambs, averaging 68 lbs, at $9.25, which was next highest sale there Monday.

Bell Nebraska Beeves Reach $7.15.

Top cattle at South Omaha on March 7 were furnished by R. M. Bell, a prominent stockman and farmer of Lexington, Neb. There were only 9 head of these steers in the car with cow stuff, and were landed at $7.15 by Clay, Robinson & Co., averaging 1,374 lbs. The price was top for the season and were the only cattle at the figure.

A Record Price for Lambs.

A new record at South St. Paul was established by our house March 1 when they sold a bunch of lambs, averaging 84 lbs, at $9.00, belonging to A. P. Orth of Redwood Falls, Minn.

Clayton Nebraska Steers at $7.10.

S. T. Clayton, well-known farmer and stockman of Central City, Neb., was on the South Omaha market March 3 with a very nice load of steers of 1,376 lbs average which Clay, Robinson & Co. landed at $7.10, highest price paid on that market this season up to that date. The steers were high-grade Herefords and were bred, raised and fed by Mr. Clayton.

Omaha House Obtains Record Price.

It was March 3 that Clay, Robinson & Co. at South Omaha sold 921 Mexican lambs, averaging 74 lbs, at $9.35. This price was the highest ever paid for lambs on that market. Farr & Dix of Kersey, Colo., were the feeders and shippers of these lambs.

Big Decrease from Year Ago.

A party who returned from a two week's trip to Iowa and Illinois said: "In Southern Iowa I found a 25 per cent shortage of both cattle and hogs from one year ago, a falling off of 25 to 50 per cent in hogs and 25 per cent of cattle in Central and West Central Illinois. Corn in Iowa was selling at 48@54c per bushel and in Illinois at 52@58c. Hay was bringing $17@20 per ton in both states."

New High Price at Buffalo.

Jedele & Devine of Dexter, Mich., had the pleasure as well as the great honor of having their lambs sell on the East Buffalo market March 4 at $9.85, up to that time the highest price ever paid there. There were 190 head in the lot, averaging 80 lbs, and they were sold by Clay, Robinson & Co.

Clay, Robinson & Company's LIVE STOCK REPORT

Issued every Friday at Union Stock Yards, Chicago.

R. P. FALES.....Managing Editor
GUY FRIDLEY.....Associate Editor

Local and long-distance Telephone "Yards 4194."
Cable address "Kelso," Chicago.

Address all communications and make all remittances payable to THE LIVE STOCK REPORT, Union Stock Yards, Chicago.

It is Up to Colorado Feeders.

Never before have such lofty prices been paid for sheep as this week. Rates for lambs have also made some aeroplane stunts, going within 25c per cwt of the record price of $9.90 in June, 1909. Semi-famine supplies have been responsible for the remarkably high market. Packers are doing a hand-to-mouth business, buying only under stern necessity. And they are paying more attention to quality, in the endeavor to widen the spread between the partly-fatted and well-fatted lots. During the next sixty days the Colorado feeders will have the market more under their control than usual. They have the bulk of offerings back. It will pay them well to watch the market closely and see to it that supplies are not congested at any time, for if they are prices will suffer.

Branded Nebraska Beeves at $7.90.

A. Ouren represented Macedonia, Ia., on the Chicago cattle market March 2 with 36 head of 1,475-lb beeves which Clay, Robinson & Co. sold at $7.90, which price, according to Mr. Ouren, was 40c per cwt above his expectations. They were branded westerns and were bought on the South Omaha market in October at $4.75, averaging 1,160 lbs. They were on feed about five months. The cattle were started on snapped corn and clover hay and held on this feed for about two months, when they were changed to shelled corn and alfalfa hay. In company with Mr. Ouren were Adolph Melskeit with two loads of cattle which we sold at $7.10, with 15 out at $6.40, and E. Lawson with three loads for which we obtained $7.20. These cattle were of their own feeding and both gentlemen expressed themselves as well pleased with the sale of their cattle.

Record Price for Yearling Sheep.

C. E. DeLong of Rocky Ford, Colo., was on the South St. Joseph sheep market March 3. Our sales for him including 349 yearlings, averaging 81 lbs, at $8.50, as high as yearlings ever sold on that market; 510 ewes, 90 lbs, $7.25, and 46 lambs, 77 lbs, $9.10. This shipment was a clean-up of his winter feeding of ewes and yearlings, and we put them over the scales straight with not a single head out. He was agreeably surprised by the prices we secured for his stock.

Howard Nebraska Beeves Make $7.10.

John C. Howard of Orchard, Neb., was on the Sioux City market March 8 with 18 head of 1,381-lb beef steers for which our house obtained the top price of $7.10. These cattle had been fed about 150 days, were of fairly good quality and carried a good amount of flesh for the length of time they had been fed.

Kansas Yearling Sheep at $8.75.

It was March 8 that our East St. Louis house sold for Payne & Roembach of Colwich, Kan., 255 lambs, averaging 80 lbs, at $9.25, extreme top of the market, and 246 yearlings of 74 lbs average at $8.75, highest price on record for yearlings on that market by 20c per cwt.

Dakota Range Heifers at $5 65.

The range she stock on the Chicago market Tuesday made most excellent prices, going at $5.25@5.65 for fair to good heifers and $5.40 for rather calvy cows. All of them were horned and had been on a light feed of corn, with hay as the principle ration, through the winter. The sales were consummated by Clay, Robinson & Co. and the owners were Reid & Boehmer of Fulton, S. D.

Handling range cow stuff in this manner is most profitable in spite of the high cost of feed. The wonder is that more do not take up this work. Last season thousands of old range cows sold at $3.00@3.25 that could have been fitted for the winter and early spring market, when she stock is so scarce and high in price, and sold at a very good profit.

Illinois Hogs at $10.10.

Robert Barr of Colusa, Ill., was the raiser, feeder and shipper of the 68 head of 281-lb hogs which brought $10.10 at Chicago on March 2, up to that time the highest price paid since 1863. Clay, Robinson & Co. handled the shipment.

The Highest Prices For Cattle.

The lots of cattle which sold on the Chicago market March 4 at $7.75, $7.60 and $7.30 were handled by Clay, Robinson & Co. The former price was 45c per cwt above the highest price obtained by any other firm, secured for 16 head of 1,406-lb beeves marketed by G. Wiese, Ida county, Ia. The next highest figure—$7.60—was obtained for 21 head of 1,390 lbs average for Oliver Olson, Valley county, Neb., who also had in the 38 head, averaging 1,278 lbs, which brought the next highest price—$7.30.

"I Receive Best of Atttention," Says a Small Feeder

Hinton, Iowa, Feb. 19, 1910.

Clay, Robinson & Co.,
Sioux City, Iowa.

GENTLEMEN:—

Yours of 18th inst. at hand, also account sales of hogs, which you handled for me on that date. This sale is so very satisfactory that I feel it my duty to reply. I find, although I am a small feeder, that I receive the best of attention by consigning to you people. I wish to thank you for this sale and also for past favors.

Hoping to favor you with future consignments, I remain

Yours truly,
O. W. CROUCH.

Cattle Shortage Among Small Feeders.

From our Denver house comes the following: "We have made a careful inquiry among the best posted men regarding the amount of cattle on feed in the feed lots tributary to this market as compared with this time a year ago, and they are all pretty well agreed that at this time there are not more than 50 per cent as many. This shortage is largely among smaller feeders, who have been short both on pulp and on hay. The larger feeders have been able to make better arrangements for feed, and some of them will be able to hold on for a late market. Since the sugar factories have been operating the alfalfa acreage in this state has been greatly reduced, and pulp contracts are being more and more concentrated each year, and all but the larger feeders had their pulp supply cut off some weeks ago.

"Cattle did very little good in the feed lots up to Jan. 1. Since that time they have made rather satisfactory gains, the weather having been fairly good, with the exception of two or three cold snaps."

We Are at Your Market.

You may not ship to Chicago, nad you don't need to in order to have the benefit of the "Clay, Robinson & Co. service." You men of Michigan and Ohio will find our East Buffalo house a "chip of the old block" in every respect. Try them and see. Or, if you ship to South St. Paul, our northern-most house, East St. Louis, or Fort Worth on the extreme south, you will find Clay, Robinson & Co. "on the spot" and ready to handle your business in a way that will win your approval. And so we might go through the entire list of ten markets where we operate. If you are in the habit of consigning to Clay, Robinson & Co. at any market, and circumstances render it advisable to turn your shipments to another point, you don't need to look up another firm, simply tell your railway agent when loading, "Clay, Robinson & Co. for mine." And if you are not a patron of "the big firm" at any market, the quicker you form the habit the fatter your purse will be. "There's a reason." In fact, there are many reasons, and among them are salesmen, organization and methods, all of the very best.

Top for Beef Steers.

Boosting The Market.

On page 12 of this issue we present a rather striking showing of market-boosting prices obtained by Clay, Robinson & Co. during the past few days, yet essentially nothing unusual in itself, as we are doing practically the same thing so far as topping the market in the various branches is concerned, every week in the year. Our salesmen are paid for that grade of work and they are the kind that can "make good." The striking feature is the boosting process. Every time we have established a new price-record for cattle, hogs or sheep, and these times have been many, especially of late, it has lifted the market a notch higher, and made it possible for others to obtain the same price. It is always the pioneers who blaze the trail, and the trail of Clay, Robinson & Co. for the past twenty-five years has been marked by demolished price-records in cattle, hogs and sheep.

Amoug Our Customers.

Our East Buffalo house March 3 sold for E. R. Storer, Davison county, S. D., a deck of hogs, averaging 208 lbs, at $10.20, top of the market.

C. J. Boyles, Wheeler county, Neb., had a good load of steers on the South Omaha market March 2 that our house sold at $6.75, averaging 1,243 lbs.

E. S. Leavenworth sent in two double-decks of Mexican lambs for the South Omaha market March 4 and our house landed them at $9.25, top by 25c per cwt.

W. E. Grishaw on March 3 had on on the Chicago market 201 head of 81-lb western lambs from Howard county, Ind. We sold them at the top price of $9.35.

D. J. Gibbs, Rio Grande county, Colo., on March 3 had 516 lambs, averaging 66 lbs, on the East St. Louis market which our heuse landed at top price of $9.25.

Our South Omaha house March 1 had two doubles of 75-lb western lambs from A. Wilkinson, Custer county, Neb., that they landed at $9.05, top for westerns.

Pinnacle for hogs at Chicago on March 3 was $9.95, this price being secured by us for 51 head of 274 lbs average, bslonging to P. Bartholome, Winneshiek county, Ia.

Charles Olson on March 4 had on the Chicago market 70 head of 196-lb hogs from Mercer connty, Ill., for which we secured the top price of $9.87½ for light weights.

B. J. Atkinson, Dawson county, Neb., had 16 heifers on the South Omaha market March 3 that our house sold at $6.00, averaging 967 lbs, top for anything of this sort.

Top by 5c per cwt for hogs at South St. Paul on March 4 was made by our house when they sold a load of 259 lbs aversge for P. A. Johnson, Kandiyohi county, Minn."

John Wilkinson & Son, Hall county, Neb., were represented on the South Omaha market March 1 with a car of western yearling that our house sold at $8.40, top for the week.

P. S. Markel, a prominent farmer and stockman of Mills county, Ia., had a car of good 253-lb hogs an the South Omaha market March 4 that our house sold at $9.75, top of the market.

H. V. Hunt, Stephenson county, Ill., was the owner and we the sellers of the 28 head of 194-lb hogs which brought the top price of $9.80 for light weights on the Chicago market March 3.

The 63 head of 285-lb hogs which were on the Sioux City market March 8 and brought record price of $10 were handled by our house and marketed by Demme Bros., Dixon county, Neb.

On Maroh 2 our South Omaha house had a shipment of nine cars of hay-fed steers from Beckwith, Quinn & Co., Uinta county, Wyo., that sold to the packers at $6.35, averaging 1,176 lbs.

The 178 wethers of 117 lbs average which brought $7.95 at Chicago on March 4, top that day by 20c per cwt, were sent in by T. P. Chester, Champaign county, Ill., and were handled by us.

W. F. Thompson, Hall county, Neb., sent in three donbles of 65-lb Mexican lambs March 3 for the South Omaha trade for which our house obtained $9.00, cleaning up his operations for the season.

C. L. Hover, Boulder county, Colo., marketed 272 head of 73-lb lambs at Chicago on March 3. We obtained $9.30 for them, being 20c per cwt higher than any other Colorados brought that day and up to then top for season.

W. R. Milnes, Whiteside county, Ill., was on the Chicago market March 2 with a load each of steers and butcher stock, most of which were of his own raising and feeding. He was highly pleased with the prices we secured for his offerings.

On March 2 at East St. Louis D. J. Gibbs marketed 532 lambs of 67 lbs average at $9.25 and A. D. Mathias 288 head, averaging 65 lbs, at same figure, our house handling both lots. These two sales were the extreme top by 25c per cwt. Both parties were from Rio Grande county, Colo.

William Darner, well and favorably known shipper of Mahaska connty, Ia., was at Chicago on Monday with two loads of cattle which made satisfactory prices, according to him. They were handled by us. Since Dec. 1 he has been here every week with anywhere from two to thirteen loads of stock.

John Crook represented Grundy county, Ill., on the March 3 sheep market at Chicago with a shipment, which was handled by us. Included were 111 western wethers of 104 lbs average which brought $7.65 and 95 western ewes, averaging 101 lbs, $7.35, latter sale being top for western ewes that day.

O. T. Olsen, one of the prosperous farmers of Hardin county, Ia., was on the Chicago market in person Thursday looking after the sale of shipment of stock which we sold to his entire satisfaction. This is Mr. Olsen's first consignment to Clay, Robinson & Co. and he expressed himself as very well pleased with treatment received.

Our South Omaha house March 3 handled two doubles of Mexican lambs for E. S. Leavenworth, Hall county, Neb., at $9.25, averaging 69 lbs. On the same day they also sold for him a car of yearlings at $8.35, averaging 75 lbs. There were no other lambs there that sold at $9.10, except those handled by us at $9.25 and $9.35.

Boone county, Mo., was represented on the Monday cattle market at Chicago with 14 head of 1,498-lb grade Angus beeves which we sold at $8.10, or 5c per cwt above the best price any other firm secured. A. J. Tribble was the owner of these cattle, as well as the 37 grade Angus heifers and steers of 1,155 lbs average that we landed at $7.50.

At South St. Joseph our house sold March 1 for C. B. Gridley, Richardson county, Neb., 229 western lambs, averaging 75 lbs, at $9.00, these being the clean-up of his year's feeding. They bought these lambs for Mr. Gridley on Oct. 19, averaging 53 lbs, at $6.10. The lambs did exceedingly well, and Mr. Gridley was greatly pleased with the buying and selling of same.

Top of the lamb market at Chicago on March 2 was $9.25. We obtained this price for three different lots, which follow: For John Blanchard, Columbia county, Wis., 100 head, 86 lbs; W. F. Gieseke, Lyon county, Minn., 218 head, 85 lbs, and F. L. Bishop, Rio Grande county, Colo., 554 head, 77 lbs. Up to then the latter price was the highest price paid for Colorado-fed lambs this year.

It was March 1 that our East St. Louis house sold for D. S. Gibbs, 532 lambs, averaging 65 lbs, at $9.25. They also sold for Wallace & White, 141 lambs of 77 lbs average at $9.25. These two sales were 5c per cwt higher than any other sale of lambs there that day. The next highest sale made was $9.20, which price our house obtained for 81, averaging 63 lbs, belonging to James A. Kelley. All of the above parties were from Rio Grand county, Colo.

R. H. Norton, one of our South St. Joseph house's regular patrons from Mitchell county, Kan., was on the market March 1 with two double-decks of 79-lb western lambs which they sold at $9.00. Mr. Norton bought these lambs through our house there in November, and he stated that, considering the extremely bad weather which they had at the beginning of the feeding season, his lambs did well and made a satisfactory gain. He expressed himself as decidedly well pleased with the sale of his lambs.

Last week the summit of the lamb market at Chicago was $9.35. On March 4 we obtained this price for two different lots, pinnacle that day by 5c per cwt. The sales follow: For Stevenson Bros., Saint Joseph county, Mich., 194 head, 86 lbs, and V. L. Briner, Lyon county, Ia., 111 head, averaging 77 lbs. The next highest price was $9.30, we landing at this figure for W. F. Gieseke, Lyon county, Minn., 229 of 84 lbs average and for Charles Long, Shiawassee county, Mich., 465 head, averaging 80 lbs.

A. Swallow of Dallas county, Ia., was on the Chicago market Monday with 22 head of Panhandle beeves of 1,402 lbs average for which we secured $8.10 being 5c per cwt higher than any other firm obtained. Mr. Swallow bought these cattle about five months ago at $5.00, averaging 986 lbs. They were on full feed only three months. Their ration consisted of fodder and snapped corn, 5 lbs of cottonseed meal per day per head and 1½ lbs of oil meal per day per head, with clover hay added the last three months.

At the start this week R. M. Haythorn of Eaton, Colo., was at Chicago with 501 Mexican lambs. Clay, Robinson & Co. sold them at $9.50. Up to then this was a new high price for lambs this year by 10c per cwt, was a record one for March, stood the highest since June, 1909, and was top Monday by 25c per cwt over the next best price for lambs secured by any other firm. The next highest price—$9.30—was also obtained by us for Colorados, which sales follow: For George Belmont of Brush, 491 Mexicans, 76 lbs average, $9.30, and Farr & Crosier of Greeley, 476 westerns, 79 lbs, $9.30.

"This is my first shipment to Clay, Robinson & Co. and I certainly am well pleased with the results," said J. G. Thompson, prominent in feeding circles of Warren county, Ill., who was on the March 2 market at Chicago with 80 head of 1,309-lb branded beef steers which we sold at $7.15. These cattle were bought by our South Omaha house in April at $5.20, averaging 900 lbs. Mr. Thompson grassed these cattle until Nov. 23 when they were put on a feed of cut fodder for a short while, then changed to corn fodder and ear corn for about one month, after which the ration consisted of corn and clover hay.

It is more difficult for men to behave well in prosperity than in adversity.—Rochefoucauld.

THE LIVE STOCK REPORT,
Union Stock Yards, Chicago.

Enclosed find 50c to cover postage on the LIVE STOCK REPORT for one year.

Name .....

P. O. .....

State .....

Rural Route .....

Is Victory for Iowa Stockmen.

The Interstate Commerce Commission has decided that the hog rates from Iowa points to Chicago be reduced from about 300 different stations, the cattle rates from 700 and the sheep rates from abont 1,000. The saving on hogs will amount to about $20,000 per year and on cattle abont $40,000. It is probable that the total saving, including the feeding-in-transit rates, will be in the neighborhood of $100,000 per year. In addition to the regrouping of the cattle and sheep rates, a reduction of from half a cent to a cent and a half is made in the rates from the northwest corner of the state.

John Mack is Dead.

After a short illness with pneumonia, John Mack, the popnlar live stock agent at the Chicago Stock Yards for the Chicago Burlington & Quincy Railroad, passed away last Friday night. Mr. Mack had been agent for the road ever sinoe an office was established at the Yards, and his term of service extends over a period of more than forty years. He was born in Argyle, N. Y., 64 years ago, and came to Wisconsin when 12 years old, and later lived at Somanauk, Ill. From there he came to Chicago to represent the C. B. & Q. He was very popular with live stockmen all over the country, and no doubt enjoyed a wider acquaintance with them than any other railroad agent.

LIVE STOCK & CROP CONDITIONS

REPORTS GATHERED AND RECEIVED BY CLAY, ROBINSON & CO.'S HOUSES AT THE TEN LEADING LIVE STOCK MARKETS.

NOT MANY BUTCHER CATTLE LEFT.

E. J. Baughman, Macon county, Ill.: "Hogs and butcher cattle are very scarce here."

WEIGHTY FEEDING CATTLE SCARCE.

V. E. Spangler, Adair county, Ia.: "Weighty feeding cattle are all gone from this section."

FAT HOGS ABOUT ALL GONE.

H. W. Gibbs, Hardin county, Ia.: "Fat hogs are about all shipped out of this part of the country."

NOT ENOUGH HOGS TO FILL CAR.

L. T. Gray, Muscatine county, Ia.: "Not many cattle on feed in this vicinity. Impossible to find enough fat hogs to fill a car."

FAT STOCK GOING TO BE SCARCE.

Orr Bros., Keokuk county, Ia.: "Fat cattle and hogs are going to be very scarce in this part of the country this spring and summer."

PLENTY OF HAY IN COLORADO.

Frank Harker, Rio Blanco county, Colo.: "We have had a hard winter here, but not much loss as yet, as almost everyone has plenty of hay."

FEWEST CATTLE IN TWENTY-FIVE YEARS.

Jas. O. Burch, Cedar county, Mo.: "There are fewer cattle on feed in south St. Clair and north Cedar counties than I ever saw, or at least in 25 years."

FEWER CATTLE FOR THE MARKETS.

W. I. Wolco't, Poweshiek county, Ia.: "There are not many long-fed cattle left in this vicinity and not many cattle being fed for May and June markets."

STOCK CATTLE SCARCE IN LINN CO., IA.

W. D. Foreman, Linn county, Ia.: "Stocker and feeder cattle are very scarce. Hogs are healthy, but very few on feed, with breeding stock in scant supply and hard to get."

WILL MARKET LAMBS MORE FREELY.

Dr. Curtis Atkinson, Larimer county, Colo.: "After talking to several of the feeders here, I believe there will be a good many lambs shipped out within the next thirty days."

HARD WINTER IN IOWA.

J. C. Pieak, Montgomery county, Ia: "I don't believe there is over one-half as many cattle or hogs on feed here as usual at this time of the year. We have had a very hard winter."

IOWA OLD CORN SCARCE AND HIGH.

Frank Geis, Union county, Ia.: "There are not many cattle or hogs being fed here. Lots of farmers are buying hogs to kill. Corn is scarce and high, old corn selling at 75c per bushel."

LITTLE FEEDING IN FULTON CO., ILL.

J. F. Lawyer, Fulton county, Ill.: "There are not as many cattle on feed as usual in this part of the state and not more than one-half as many hogs as some years, with but few sheep available."

STOCK HOGS SCARCE IN MICHIGAN.

R. P. McMahon, Branch county, Mich.: "There are a limited number of cattle and only a few hogs and sheep on feed here. Corn is 60c per bushel. Young cattle and stock hogs are rather scarce."

INDIANA BROOD SOWS AT $50.

C. W. Anderson, Emmet county, Ind.: "Fat hogs are about all gone from this vicinity. Stock hogs are scarce. Brood sows are selling at $50 each, and scrub stock at that. Cattle are scarce. Milch cows are selling at $50@87.50."

LOOKS LIKE WINTER IS BROKEN.

Nelson Fish, Meade county, S. D.: "We had our first snow Nov. 12 and it is still here. It has been a long winter, but hay was plentiful. Cattle well and everyone can stand another month of feeding, but at this time (Feb. 28) it looks as though the winter had broken."

EXCELLENT WEATHER IN WYOMING.

William Dawson, manager of the Swan Land and Cattle Co., Laramie county, Wyo.: "We are having excellent weather here now, and have had for fully a month. Sheep and cattle are in first-class condition for this time of the year. Should we not have any more severe weather we will come out in lovely shape in the spring."

STEERS THIN IN SOUTH DAKOTA.

James T. Craig, Butte county, S. D., writing John Clay & Co. under date of March 3: "The weather continues mild and snow is all gone in the valley, excepting the drifts. In the Little Missouri country there is lots of snow yet, but some ground is showing up. We are picking some thin steers up. In three day's riding our men saw four dead cattle. Steers are going to go on green grass thin, but if we have a good spring the losses will not be heavy."

Receipts for Year to Date.

Total receipts of cattle, hogs and sheep at six main western markets for year ending last week, and same period last year, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

Record Prices for Feeding Cattle.

During the meat boycott there was a temporary slump in prices for stocker and feeding cattle. However, it did not last long. The advance since then has been $1.00@$1.25. A rising fat cattle market, a paucity of desirable offerings and keen bidding by killer buyers for anything possessing decent flesh were the forces that brought about the high and bounding market for thin cattle.

Record prices have been recorded for feeding steers during the past week or so. It is problematical how much higher they will go by the time pastures are clothed in green. A load of assorted 1,127-lb grade Shorthorns sold on the Chicago market recently at $6.60 on Pennsylvania account, 20c per cwt above the previous high figure here on the open market. At South Omaha hay feds of 1,140 lbs average went out to Iowa at $6.40, a new high price there, and 1,010 lb Idahos at $6.30 on the Kansas City market. At Denver a string of 940-lb Colorados sold at $5.60 recently, a record price there up to that time. Numerous lots of selected fleshy feeders have made $6.00 and higher at all of the leading markets. Of course these cattle were well worth the money to slaughterers.

The 900 to 1,050-lb steers that have cost $5.35@5.75 on the Chicago market recently have lacked the right kind of breeding. Corn-belt feeders have paid $5.65@6.00 for many range-bred cattle at Kansas City lately and numerous Wyoming and Nebraska hay-fed offerings have been taken out from South Omaha at $5.50@5.90, while one party paid $5.90@6.10 for over 100 steers averaging only around 900 lbs. And stocker steers have also climbed to a comparatively high basis. The class of stockers of 700 to 800 lbs average that cost $4.75@5.00 at Chicago did not possess attractive quality. So buyers are not only facing a high feed bill, but also a growing scarcity and deterioration in the quality of thin cattle.

Were it not for the favorable outlook for the fat cattle trade, prevailing prices for stocker and feeder cattle would indeed look out of all reason. The movement of feeder cattle to the country from all of the leading markets for January and February is the smallest in many years. In addition to this, barring Chicago and East Buffalo, which report about the same number, the houses of Clay, Robinson & Co. at the nine main points tell of a 25 to 50 per cent decrease in the number of cattle on feed in their respective territories as compared with one year ago.

TOP PRICES FOR FEEDING CATTLE.

Monthly top prices for feeding cattle at Chicago for seven years, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	1910	1909	1908	1907	1906	1905	1904

Some Sound, Sensible Reasons Why You Should Send Your Orders For Stocker and Feeding Cattle To

CLAY, ROBINSON & CO.

Because we have buyers on the ten leading markets.

Because every one of our buyers is an expert

Because if we cannot fill your order according to instructions we will tell you so

Because we can get you the best cattle at the lowest market price possible

Because our service—the very best—costs no more than the poorest

Because we work as hard to satisfactorily fill a small as a large order

Because there is no need for you to come to market and incur a great deal of unnecessary expense, as all you need to do is to write any one of our houses what class of cattle you want—quality, weight, etc.—and your order will be filled strictly to the letter or not at all

CHICAGO MARKETS.

Cattle.

NATIVE BEEF STEERS.

Receipts Thursday of last week 8,505. Although prices were generally 10@15c lower, buyers seemed to want the offerings at the decline. A load of very choice 1,494-lb Angus beeves went on New York account at $8.25. It was largely a $5.75@6.50 market for plain to pretty decent killing steers, averaging 1,100 to 1,250 lbs, while a fair number of good beeves, weighing up to 1,300 lbs, went at around $7.00. Steers which sold under $6.00 were really better suited to be put on feed than taken off. Marketing Friday 3,480. Prices strong to 10c higher. Top made $7.75, obtained by us and 45c per cwt higher than any other firm obtained for cattle, the sales at $7.60 and $7.30 being made by us. Week closed with prices 25@30c higher than previous week's finish.

At start of this week 23,992 head arrived. There was good undertone from the outset. Good weighty beeves made a firm range and lighter weights sold steady to weak, late sales showing weakness. Exporters were light buyers, but eastern shippers, as well as local dressed beef men, were good bidders, especially for offerings of quality and weight. Pinnacle was $8.40, obtained by Clay, Robinson & Co. for 33 branded western beeves of 1,599 lbs average from the Foster Bros. feed lot at Earlham, Ia. This price was 35c per cwt higher than any other firm obtained for cattle, the sales at $8.10 and $8.20 being made by us. Tuesday receipts 5,900. A slow but about steady trade. It was the first Tuesday in many weeks when keen competition was lacking. Liberal purchases the previous day was probably responsible for this condition. Best beeves offered at $7.70, paid for a load of 1,300 lbs average. Run Wednesday only 13,000. Prices shot up 10@15c. Market active, with all buyers anxious to secure their quota of the offerings. Top beeves $8.35 and sales largely at $6.25@7.75.

Revised quotations for all grades of native beef steers:

Extra choice to prime steers.....	$8 60	@	8 85

BUTCHER STOCK.

It was a 10@15c lower deal for cows and heifers Thursday of last week. General demand slackened up considerably. Bulk of offerings sold at $4.75@5.25, with prime heifers up to $6.75 and fancy heavy cows at $6.00. Bulls steady to 10c down, bolognas showing the loss. Calf trade was unchanged. Cows and heifers went weak to 10c lower Friday, leaving rates around 15c higher than close of previous week. Slow trade in bulls, with prices about steady with one week ago. Choice calves steady sale and medium kinds weak. Fancy vealers reached $10, as high as any time this year.

A steady to strong trade in cows and heifers on initial market day this week. Supply moderate and general demand good. Good to choice lots were shown most favor. Bulls went on a stronger basis. Calves steady sale. Cows and heifers made a strong range Tuesday, good outside demand toning up the market. Buyers are claiming that she stock is showing remarkably high cost, and they are anxiously waiting for a chance to pound the price list hard. Bull market uneven, but mostly weak to 10c down. Market for calves unchanged. Uneven market for cows and heifers Wednesday. Good kinds strong to 10c up, but cows around $3.75 and under dull and lower sale. Bulls steady. Calves also unchanged sale.

Revised quotations for all grades of butcher stock and calves:

Extra choice to prime yearling heifers.....	$6 50	@	7 00
Choice to prime heifers.....	5 75		6 50

SALES MADE BY CLAY, ROBINSON & CO.

Wednesday, March 2—2 export heifers, 1,135 lbs, $5.60; 3 export cows, 1,226 lbs, $5.50; 3 export cows, 1,193 lbs, $5.45; 4 yearling heifers, 654 lbs, $5.10; 8 calves, 457 lbs, $5.00; 12 good cows, 1,120, $4.85; 4 fair to good cows, 1,070 lbs, $4.70; 18 plain heifers, 718 lbs, $4.65; 24 cowy heifers, 842 lbs, $4.55; 6 fair cows, 1,090 lbs, $4.50; 8 fair cows, 975 lbs, $4.45; 11 dairy cows, 950 lbs, $4.15; 13 dairy cows, 960 lbs, $4.10; 17 common dairy cows, 915 lbs, $3.90; 15 common cows, 963 lbs, $3.85; 5 cutter cows, 800 lbs, $3.65; 15 cutter cows, 930 lbs, $3.50; 4 cutter cows, 800 lbs, $3.40; 8 canners, 825 lbs, $3.10.

Thursday, March 3—2 good cows, 1,200 lbs, $5.80; 3 dairy cows, 1,180 lbs, $5.20; 6 good dairy cows, 1,040 lbs, $4.60; 13 cowy heifers, 900 lbs, $4.60; 15 dairy cows, 1,050 lbs, $4.40; 4 fair cows, 980 lbs, $4.40; 6 dairy cows, 970 lbs, $4.10; 8 stock heifers, 700 lbs, $4.00; 9 common cows, 1,000 lbs, $3.75; 6 common cows, 900 lbs, $3.50; 6 dairy cows, 930 lbs, $3.65; 7 cutter cows, 800 lbs, $3.40; 14 cutters, 983 lbs, $3.35; 7 canners, 830 lbs, $3.10.

Monday, March 7—37 Missouri heifers and steers, 1,155 lbs, $7.50; 4 good heifers, 820 lbs, $5.75; 3 good cows, 1,326 lbs, $5.60; 7 good cows, 1,170 lbs, $5.50; 4 good cows, 1,115 lbs, $5.20; 3 good cows, 1,087 lbs, $5.15; 3 fair heifers, 875 lbs, $5.15; 13 yearling heifers, 500 lbs, $5.10; 3 good cows, 1,030 lbs, $5.00; 17 yearling heifers, 650 lbs, $4.90; 12 good cows, 1,120 lbs, $4.85; 5 fair cows, 1,140 lbs, $4.65; 10 fleshy heifers, 506 lbs, $4.50; 7 plain heifers, 750 lbs, $4.40; 5 fair cows, 1,075 lbs, $4.40; 5 fair cows, 875 lbs, $4.25; 6 fair cows, 970 lbs, $4.20; 5 common cows, 934 lbs, $3.75; 5 stock heifers, 600 lbs, $3.75; 6 cutter cows, 900 lbs, $3.65; 5 dairy cows, 850 lbs, $3.50; 14 cutter cows, 990 lbs, $3.50; 7 cutter cows, 870 lbs, $3.35; 4 canners, 800 lbs, $3.00.

Tuesday, March 8.—2 yearling heifers, 825 lbs, $6.25; 4 heifers, 820 lbs, $5.65; 5 cowy heifers, 1,034 lbs, $5.50; 24 Dakota cows, 1,102 lbs, $5.40; 9 yearling heifers, 732 lbs, $5.40; 4 yearling heifers, 900 lbs, $5.25; 7 cowy heifers, 920 lbs, $5.25; 8 good cows, 1,110 lbs, $5.25; 3 good cows, 1,060 lbs, $5.25; 4 dairy cows, 1,200 lbs, $5.25; 12 yearling heifers, 720 lbs, $5.00; 4 good cows, 1,180 lbs, $5.00; 5 cowy heifers, 790 lbs, $4.85; 11 Dakota cows, 1,036 lbs, $4.75; 6 dairy cows, 1,035 lbs, $4.35; 4 fair cows, 1,050 lbs, $4.40; 6 fair cows, 970 lbs, $4.20; 6 dairy cows, 1,120 lbs, $4.15; 5 dairy cows, 970 lbs, $4.00; 11 cutter cows, 880 lbs, $3.60; 7 cutters, 800 lbs, $3.40; 7 canners, 900 lbs, $3.25; 4 canners, 740 lbs, $3.15.

STOCKERS AND FEEDERS.

The supply Thursday of last week was small and buyers were forced to pay steady rates in spite of the decline in fat grades. Order buyers said they could have used a liberal number of assorted heavy fleshy steers around $6.00, but they obtained very few of these, owing to killers paying a premium over prices offered by feeder buyers. Strictly good stockers and feeders met good demand Friday, while plain, light kinds went on a weaker basis. Week closed with rates 10@15c higher than close of previous week.

An active demand and meager supplies enabled sellers of stockers and feeders to secure prices strong to 10c higher on the first market day this week. Slaughterers competed against feeder buyers for good 900 to 1,000-lb steers and in most instances paid a premium for these kinds. Good quality stockers and fleshy feeders were badly wanted

Tuesday, but the supply was short and prices held firm. Other kinds, however, showed weakness. Few strong weight steers were available, owing to successful bids of killers. Strong market for stockers and feeders Wednesday, general demand being brisk.

Revised quotations for stocker and feeding cattle:

Good to choice feeders	$5 50 @	5 75
Poor to medium feeders	5 25	5 40
Good to choice stockers	4 85	5 15
Plain to medium stockers	4 35	4 75
Inferior to common stockers	3 75	4 20
Good to choice stock heifers	4 00	4 40
Common to medium stock heifers	3 40	3 75
Plain to good thin young cows	3 35	3 80

MILKERS AND SPRINGERS.

Revised quotations for milkers and springers:

Choice to prime	$55 00 @	65 00
Medium to good	42 50	52 50
Common to plain	35 00	40 00

Hogs.

Marketing on Thursday of last week 19,381. That saying, "What goes up must come down," fitted in the trade nicely. Opening 10c lower, it was not long before 15c lower deals were in force, and at the close sellers were forced to do sums in subtraction to the amount of 20@25c. All buyers appeared to be limited both as to price and number. Top $9.95, as compared with our sale of $10.10 the previous day, which up to then stood the highest since 1865. Most trading at $9.70@9.85. Supply Friday 15,794. Market closed easy, after opening 10c higher than previous day's finish. The 10c hog rooted back in the market again and $9 75@9.95 took most arrivals. Saturday supply 7,398. Market active and prices generally 5c higher. Packers' eagerness for hogs at the week-end indicated that they needed supplies badly. Top $10 05 and bulk $9.80@9.95, which showed generally 25c advance over closing day of previous week.

Short supplies everywhere and a good demand crowded hog prices over the "hill" on the initial market day this week. Local supply 29,768. Offerings that did not command as much as 10c per pound were underweight mixed or pigs, with extremes showing 10@20c advance from Saturday's general trade. The average market was 15c higher. Top at $10.20 was obtained by Clay, Robinson & Co. Receipts Tuesday 10,372. Speculators bought a few offerings early at prices strong to 5c higher. Then the market slowed up. Shipping orders were scarce and packers did nothing for two hours. Later on both outsiders and local buyers came into the market and it became a steady to strong deal. Practical top $10 25, with 15 head at $10.30. Bulk of business at $10.00@10.20. Wednesday run dropped to the famine total of 16,000. Opening 15 @25c higher, buyers seemed to go crazy for supplies and the market closed 40@45c up. Top $10.70, a new high price for the year, and most sales at $10.25@10.55.

Revised quotations for all grades of hogs:

Fair to choice heavy shipping	$10 55 @	10 70
Fair to choice butchers	10 50	10 65
Fair to choice medium weight	10 45	10 55

Pigs, 110 lbs and under	9 00	9 75
Stags	10 25	10 85
Boars	5 75	7 00
Governments	4 00	6 50

Sheep and Lambs.

The Thursday run of last week was 8,687. Generally speaking it was a strong trade in both sheep and lambs, although there were cases where 10c gains were recorded. Demand was very good from all sources. A lot of 80 prime 131-lb western wethers went on export account at $8.10, a new high price, and a small lot of fancy 162-lb native ewes on local account at $8.00. Best yearlings at hand, averaging 86 lbs, were Colorados at $8.00. Summit on lambs was $9.35, this price being obtained by us for Indiana-fed westerns. Colorados at $9.30 were also handled by us, highest price of season up to then. Run Friday 4,737. It was a steady deal in sheep and lambs. Top lambs went at $9.35, highest of week, Clay, Robinson & Co. obtaining the price for both Michigan and Iowa-fed westerns. Summit for sheep was $7.95, we landing at this figure fed westerns. As compared with close of previous week sheep and yearlings went 15@25c higher, while lambs showed a basis steady to strong.

At the start this week arrivals totaled only 9,818. Good to choice lambs were generally 10@15c higher, while other kinds, as well as sheep and yearlings, sold steady. Summit on lambs was $9.50, obtained by Clay, Robinson & Co. No other firm secured within 25c per cwt of this figure for lambs, sales at $9.30 being made by us for Colorados. Shorn lambs went at $8.25@8.45. Western yearlings reached $8.60, with shorn lots at $7.25@7.60. Pinnacle on wethers was $8.00, paid for westerns, and shorn western ewes made $6.50. Supply Tuesday 15,480. Barring shorn lambs, which sold strong to 10c higher, it was a steady deal. Top lambs—$9.50 for wooled and $8.60 for shorn—were handled by us. Shorn yearlings made $7.40. Wethers reached $8.00, with shorn at $7.00@7.15. New high prices were paid for feeders when westerns went back to the country at $6.95 for wethers and $5.00 for ewes. Receipts Wednesday 12,000. Barring good to choice handy weight lambs, which sold 10@15c higher, the general market was on a steady to strong basis. Top lambs at $9.65 and sheep at $8.00 were handled by us.

For "That Glad Feeling"

Colusa, Ill., March 7, 1910.

Clay, Robinson & Co.,
Chicago, Ill.

GENTLEMEN:

I cannot help but think of the good sale you made on my hogs. You certainly have fine salesmen and they have always been able to get me a good price, for which I feel very grateful to you. The sale you made for me last Wednesday has left a good impression in this neighborhood as to your ability to sell. With best wishes I am,

Yours truly,
(Signed) ROBERT A. BARR

Ship To "Clay, R. & CO."

yearlings $8.60, with a few wetners up to $7.85, and ewes made $7.00@7.50.

East St. Louis Markets.

[Special telegram from Clay, Robinson & Co.]

National Stock Yards, Ill., March 8.—Supply of native cattle first two days this week was heavier than for some time. Monday's market was about steady, while Tuesday's trade, with top beeves at $7.65, dragged some at prices 10@15c lower than close last week. Heifer trade was slow at 10c lower prices and cows generally steady, best kinds showing some strength. Stock cattle active. Southern supply fair, offerings being mainly steers, meal feds selling at $6.50 and grassers at $5.80.

Hog market 25@30c higher than last week's close. Top $10.32½ and bulk at $10.00@10.20. Best light weights of around 160 lbs went around $10.00. Pigs brought $8.00@9.50, according to weight and quality.

Fairly liberal supply of sheep and lambs thus far this week and prices about steady with close last week. Best Colorado lambs made $9.35, secured by us for 288, averaging 72 lbs, belonging to Wallace & White, Monte Vista, Colo. Clipped lambs at $8.25@8.50. Yearling wethers reached $8.75, a record price, sold by us for 246, averaging 74 lbs, belonging to Payne & Roembach of Colwich, Kan. Bucks at $5.00@5.50.

BEEF STEERS.

Wednesday, March 2.— 20 Oklahomas, 1,120 lbs, $6.40; 24 Oklahomas, 897 lbs, $6.00; 26 Missouris, 893 lbs, $5.40.

Thursday, March 3.—27 Missouris, 566 lbs, $4.50; 6 Missouris, 596 lbs, $4.50.

Monday, March 7.—27 Missouris, common to fair quality, short-fed, 1,017 lbs, $6.25.

Tuesday, March 8.—Forty-two Missouris, fair to good flesh, 1,214 lbs, $7.05; 123 Missouris, common quality, fair flesh, 934 lbs, $6.05; 20 Wyomings, fed in Missouri, branded, coarse, 1,284 lbs, $6.75; 22 Missouris, 428 lbs, $4.35.

Well Bought; Equally Well Sold.

Charles F. Schrunk of Mapleton, Ia., writes our Chicago house: "Those 212 head of 83-lb lambs you sold for me Feb. 21 at $9.25 were bought by your South Omaha house at $6.15 about Sept. 14, averaging 51 lbs. They were a nice, uniform bunch and were well bought and I think equally as well sold. Thank you for the service."

WHAT THEY SAY ABOUT US

CHICAGO.

Homer Morris, Cass county, Ind.: "Was well pleased with sale of lambs."

E. R. Morton, Dickinson, Ia.: "Your service has been very satisfactory to me."

Walter S. Mapes, Macon county, Mo.: "You sold my last cattle to my entire satisfaction."

A. E. Buck, Branch county, Mich.: "I was well pleased with the way you handled my lambs."

J. C. Barntrager, Saint Joseph county, Mich.: "I am well satisfied with the sale of lambs."

A. Trumbo, Linn county, Mo.: "Received the $2.42 overcharge on freight. Many thanks.

Charles Atkins, Dane county, Wis.: "I got the statement of my cattle and am well satisfied."

Osborne Bros., Iowa county, Wis.: "We shipped you a load of lambs and your sales were O. K."

Harvey Pidgeon, Henry county, Ia.: "We wish to thank you for keeping us posted on the markets."

D. W. Peck, Buchanan county, Ia.: "I shipped a load of lambs to you and was well pleased with sale."

Harm Abels, Grundy county, Ia.: "Was very much pleased with the price you got for my load of cattle."

James Jennings, Jackson county, Mo.: "I am glad to say your sales of sheep and hogs have been satisfactory."

G. W. Slater, Crawford county, Ia.: "I have always been well pleased with Mr. C. O. Robinson's cattle sales."

L. P. Rayburn, Champaign county, Ill.: "Thank you for the good sale you made of our four loads of sheep."

A. L. Balentine, Fairfield county, Ohio: "Received returns for two cars of cattle and I thank you for the sale."

C. H. Billinger, Kankakee county, Ill.: "We were very much pleased with the sale of the Jarvis-Billinger cattle."

E. H. Frazer, Henry county, Ia.: "I appreciate the market reports you have sent me. Many thanks for same."

Amos Payne, Fanquier county, Va.: "Cattle came and I like them. Just the weight I wanted. Thank you very much."

David Conrad, Knox county, Ill.: "Received account sale of butcher stock, which was highly satisfactory. Good work."

George W. Rowlands, Delaware county, Ohio: "Thanks for sending me your market letters, as they have furnished me valuable information."

Ben Voikens, Pottawattamie county, Ia.: "Thank you very much for the sale you made of my two loads of cattle, which brought 25 per cwt more than I expected."

G. Hutchendorf, Woodbury county, Ia.: "I want to thank you for the way you handled my last shipment of cattle. I was well pleased. Will ship more soon.

M. L. Watkins, Boone county, Ill.: "Load of stock cattle arrived all O.K. I think they will make some money for me. They are a nice even lot for so many. Thank you very much for your trouble."

Frank Logan, Washtenaw county, Mich.: "Car of feeding steers you bought for H. Logan, one half of which were for me, arrived all right. They were of a good kind and everything is satisfactory. Thank you for the 'service that suits.'"

G. A. Herrick, Dixon county, Neb.: "Your account sales of my cattle sold Feb. 8 for $7.75, top price that day, received. We are very much pleased with sale. The cattle had been fed corn about 120 days. Thank you for good treatment given us."

J. S. Gale, of Gale & Farr, Weld county, Colo.: "We are in receipt of your account sales of lambs. This we consider A1 in every way and wish to state that we appreciate the results that you obtained for us. Thank you for your kind attention."

George E. Dick, Dekalb county, Ill.: "Just received the bill of sale of last double deck of lambs. I was sorry I had to ship these lambs so soon, but you know the reason, for I had planned to feed them thirty days longer. However, the extreme high sale you made was so satisfactory that I am glad I shipped when I did."

E. Stacy, Dallas county, Ia.: "Those cattle were in the cars too long. They weighed 25,195 lbs at Kennedy Station and you people made them weigh 24,180 lbs. So you see if I had shrunk them here 1 per cent that only makes them shrink 40 lbs per head, and that is not bad for so long a haul. I am well pleased to get out that easy. Thank you."

E. Stacy, Dallas county, Ia.: "Received returns for load of cattle I sent you. They were weighed at the station where they were loaded after we had driven them 2½ miles, weighing 26,030 lbs and you made them weigh 25,570 lbs, making a shrink of only 23 lbs to the head. You must have gotten a good fill on them, but that is the reputation you people have of doing. I was well pleased with the price—$6.15."

EAST BUFFALO.

J. V. Hamilton, Saint Joseph county, Mich.: "I was well pleased with the way you handled my car of lambs. Thank you for the same and past favors."

Gey. B. Fisher, Calhoun county, Mich.: "Was very much pleased with sale, as $7.00 for ewes is certainly going some. You may look for me again."

Fred Bartell, Hillsdale county, Mich.: "Am well pleased with sale of sheep and way you handled them. There was a very light shrink. Thank you very much."

W. E. Allamong, Williams county, Ohio: "We sincerely thank you for the manner in which you handled our sheep, as we know they were not first class."

Robert C. Early, Hardin county, Ohio: "I think the sale of cattle was good. Thank you very much for same and also for past favors, market information, etc."

Jacob Macklin, Jay county, Ind.: "Was very well pleased with way you handled the load of cattle. Think I will have in another load and will be sent in your care."

Baldwin & Dirk, Wood county, Ohio: "We are shipping you a mixed load of stock, two bulls, a cow, sheep, hogs and calves. We liked the way you sold our last load."

H. C. Munger, Lenawee county, Mich.: "I sent a load of lambs to you and was very well pleased with the sale. Thank you for what good you have done for me in the past and what you may do for me in the future."

Harris F. Pomerey, Genesee county, Mich.: "I received the REPORT O.K., and certainly pleased with it, as it gives such good information. I also get your letters, which I thank you for. In regard to my lambs, they have done fine and I expect to ship them in your care, hoping to become better acquainted with you in the future."

SOUTH OMAHA.

Frank F. Graves, Buffalo county, Neb.: "I received returns for sheep and am more than pleased with same."

John Meikle, Knox county, Neb.: "I was very well pleased with price you got for the heifers. If the Railroad had done their work as well as you, I would have had no cause for complaint."

KANSAS CITY.

L. D. DeCamp, Lyon county, Kan.: "Two cars of steers arrived in fine shape. They are all good and am well pleased. I certainly appreciate your efforts in selecting them. Thank you."

R. M. Jewell, Pike county, Ill.: "I shipped my cattle to you and they sold for more than I expected. I receive the REPORT with great interest. It tells things right. Thank you for the market letters."

SOUTH ST. JOSEPH.

J. W. Hayes, Furnas county, Neb.: "Received my draft all right. Was very well pleased with the sale of my cattle."

SOUTH ST. PAUL.

Ole Farder, Clay county, Minn.: "Note that you succeeded in receiving $30.30 from the G. N. R'y. Co., for which I send you my thanks for your kindness and trouble."

Fowler Farm Co., Cass county, N. D.: "The two carloads of steers that we bought through you look good. They certainly are a fine bunch. We are having a long, hard winter for feeding stock."

STOCK FARM

880-acre farm, Chippewa County, Wisconsin, 2¾ miles from station on C. & N. W. R. R. Rich clay loam soil; no stone; no waste land. Practically level; 65 acres under plow, 320 acres of meadow. Market report by able correspondents. Per year 75 cents, $1.00 for 2 years.

THE SHEPHERD'S JOURNAL,
125 LA SALLE ST., - - CHICAGO, ILL.

BIG PROFIT on HOGS

The 9-cent hog counts up fast. Some feeders make from two to three dollars more per hog than others.

It isn't what the hog eats, it is what he digests and assimilates that makes the money.

You want the benefit of the man's experience who is able to make the most out of hogs. The knowing how, to keep hogs healthy, get greatest growth in quickest time and biggest profits, is the desired knowledge.

The principal cost of producing pork is the feed. Prof. Dietrich says: "90% of the farmers have nearly everything to learn about how to feed a hog to get the most out of him at the least cost." We can help every one who will be helped to this knowledge. One secret of success is to prevent disease. The sick hog is a losing proposition. Another is to get more gain and growth out of your feed. We have new conditions to meet with higher priced feed.

For $1.00 we will send you the American Swineherd, the aggressive and progressive acknowledged up-to-date leader, devoted to the swine industry, for four years and give you as a premium the "Progressive, Scientific Feeding Formula" for increasing the gain while feeding fattening hogs, a half pound per day a hog, over the customary way of feeding from the same feed given. This hygienic secret made the discoverer a fortune fattening hogs. It is simple, sensible, and just as easy feeding as the old way. It has been proven so conclusively that we will agree to make good or give your money back, making you absolutely safe. It will make you a hundred dollars fattening 50 hogs.

If this offer is accepted within ten days will also give as additional premium, copy of the Pig Feeder's Manual, worth the dollar itself. The paper stops at the time paid to. All our efforts, concentrated on this business, naturally attains highest success which you can share with us. Address

Startling Facts!

PROF. HOLDEN MAKES PUBLIC TEST OF SEED CORN--FINDS ONLY 8 EARS OUT OF 100 FIT TO PLANT

CORN CROP FAILURE

IS CERTAIN UNLESS YOU TEST YOUR SEED CORN

Realizing the gravity of the situation the Des Moines Daily Capital, arranged for a public test of seed corn that they might impress upon their readers the absolute necessity of testing their seed corn this year. This was announced in their issue of January 26th. The test was made under the supervision of Prof. P. G. Holden, the world's greatest corn expert, and his assistant, Prof. G. A. Stayner.

One hundred ears, selected from different sections, were used in this test, and the result is given in the reproduction opposite, which was clipped from their issue of February 1st.

Out of the 100 ears, Prof. Holden found only 8 that were fit to plant, 33 sprouted but were too weak and would have produced only nubbins or no ears at all, 59 were absolutely dead.

FARMERS; what does it mean to you if you plant corn of which from 30 to 90% is dead? There is only one way to prevent it—test absolutely every ear of seed corn before you plant it.

Each ear of corn (1,000 kernels) should produce 1,000 ears or 12½ bushels, and the extra crop from two ears discarded and good ears planted in their stead will pay for a No. 1 Holden's Ideal Tester, price $10. It takes over 10 ears to plant an acre, and you will find more than 2 bad ears in every 10. In other words, the increase of the crop from one acre pays for the tester, and the increase of the rest of the field will be extra profit. On an 80-acre field the tester will pay for itself 80 times if you find but 2 bad ears per acre, and that is conservative. The Capital's test averaged 9 bad ears per acre.

Can you afford to get along without a tester? No! Order one at once.

The time is here for you to decide. Will you heed the warning—test your seed corn—make sure of a good crop—or will you select your seed corn the old way—by looks, and then realize after it is too late that your crop is a failure—that your time and labor are wasted? And instead of having full corn cribs, like your neighbor who has tested his seed, you have half a crop or less just because you failed to take the few minutes necessary to test your seed.

From Des Moines C[illegible], February 1st

CAPITAL'S TEST OF CORN SHOWS WARNING NEEDED

Out of 100 Ears Tested Under Direction of Prof. Holden, 59 Are Found to Be Worthless.

ONLY EIGHT EARS WERE FIRST CLASS.

Result of the seed corn test made in The Daily Capital office under the direction of Professors P. G. Holden and G. E. Stayner of the Ames Agricultural college:

Number of ears tested	100
Result:	
Strong ears	8
Weak ears	33
Worthless ears	59
Total	100

[illegible] the Iowa farmer

Holden's Ideal Tester

PAYS FOR ITSELF ON EVERY ACRE PLANTED

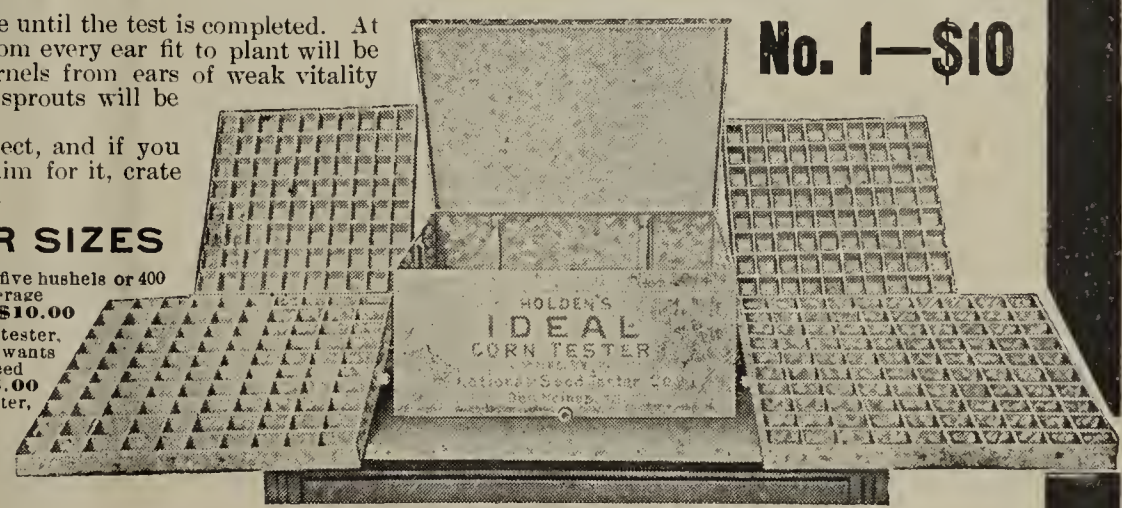
The cost is so small, the work it does so important, the increased profit so great, that no farmer can afford to continue planting corn by guess work. Farming, like any other business, must be conducted along business lines—guess work, uncertainty, indifference, are poor standards for the business man, and doubly so for the farmer. You want to be right on your seed corn this year.

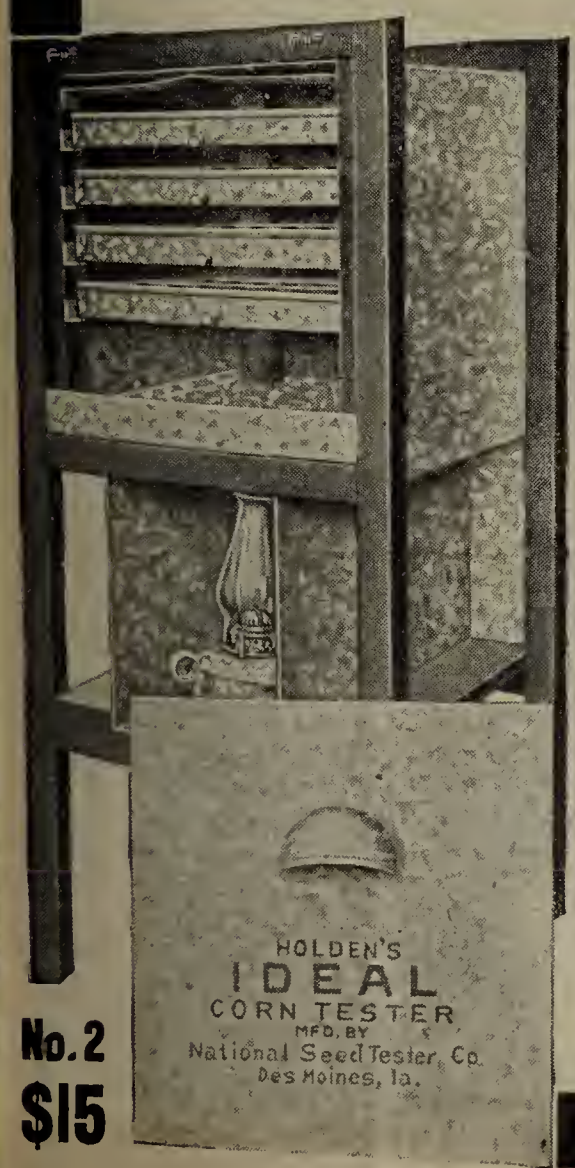
Get one of Holden's Ideal Testers. They are clean—compact—practical—accurate—made of galvanized iron and will last a lifetime. They do the work safer, surer, better than anything of the kind in the world. It is the only water process tester made, which is absolutely the best and surest method for developing the germinating vitality of the seed.

It takes but an hour or so to fill the tester, and your work is done until the test is completed. At the end of three or four days open up your tester and the kernels from every ear fit to plant will be nicely sprouted. Save those ears and throw the rest out. The kernels from ears of weak vitality may easily be detected, as there will be little or no roots and the sprouts will be very weak.

Remember, we guarantee Holden's Ideal Testers in every respect, and if you purchase one of these testers and find it does not do all we claim for it, crate it up and ship it back to us and we will return your money at once.

No. 1—$10





No. 2 $15

MADE IN FOUR SIZES

No. 1. Has a capacity of testing five bushels or 400 ears at a test. Just what the average farmer needs. Price **$10.00**

No. 2. Is a five bushel cabinet tester, especially made for the man who wants to do his testing in the barn or seed house. Price **$15.00**

No. 3. Is a ten bushel cabinet tester, for the man who plants a large corn crop. Price.. ....**$30.00**

No. 4. Is a 2½ bushel tester, for the man who has the time and can test in smaller quantities. Price.....**$5.00**

Don't Wait!

A Little Work Now Will Bring You Hundreds of Dollars More Profit From Your Increased Corn Crop This Fall

Thousands of reports of poor seed corn are coming in every day. One farmer at Altoona tested 60 ears and saved but 19 of them for seed. Another farmer tested 100 ears and saved but 5. Another in northern Iowa tested 128 ears and found 16 good, strong ones. These are only samples. Your corn is just as bad. The only way to be sure is to test every ear.

Prof. Holden says: "If I could give but one order to every corn grower in the corn belt, it would make a thorough germination test of the seed corn intended for planting."

Prof. Chappel, head of the Iowa Crop and Weather Service, says: "This is the worst condition farmers in Iowa have been menaced with in a long period of years. The greatest danger is that farmers will persist in picking out fine looking ears that appear all right. A farmer might as well plant a lot of lead bullets as frost-bitten corn."

Wallaces' Farmer says: "We insist that our readers test their corn for this season's planting."

Mr. John Sunberg, president of the Iowa Corn Growers' Association, took the prize at the Iowa Corn Show for having raised 153 bushels of corn per acre. He tested every ear of seed with Holden's Ideal Tester.

Hundreds of farmers testify as to increased crop after using our tester and they would not do without the tester for ten times its price, and we can give you their addresses if you wish.

CUT OUT THE COUPON TO-DAY

Fill it out and send it by next mail. Don't lay this paper aside with the intention of doing it to-morrow, but do it to-day—**NOW.**

Send remittance of $10 for No. 1, or $15 for No. 2 at once, and we will fill your order promptly. When it arrives, if it is not all we claim and not perfectly satisfactory, write us at once and we will refund your money.

You take no chances. We are absolutely reliable. Investigate us by writing any agricultural paper, or any bank or business house in Des Moines.

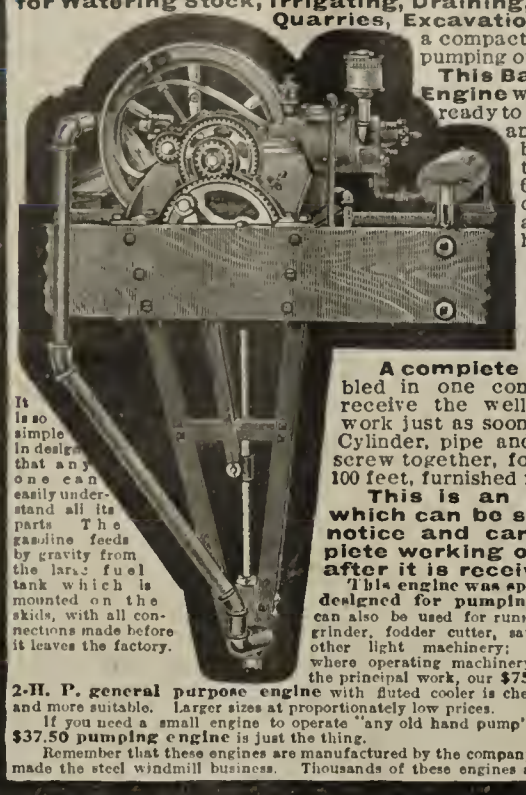
GASOLINE PUMPING ENGINE

A Special Machine for a Special Purpose

A Lot of Power for a Little Money

This is the Engine for Pumping Large Quantities of Water for Watering Stock, Irrigating, Draining, Pumping out Mines, Quarries, Excavations or other places where a compact, powerful and low priced pumping outfit is wanted.

This Back-Geared Pumping Engine with Stuffing Box, as shown, ready to receive pipe connections, and capable of raising 260 barrels of water per hour to an elevation of 25 feet, 66 barrels to an elevation of 100 feet, or proportionate quantities to any height. F. O. B. Chicago



$100

A complete pumping outfit assembled in one compact machine ready to receive the well connections and go to work just as soon as they can be attached. Cylinder, pipe and rod all fitted ready to screw together, for any lift from 25 feet to 100 feet, furnished for $45.

This is an emergency outfit which can be shipped on an hour's notice and can be set up in complete working order within an hour after it is received.

It is so simple in design that any one can easily understand all its parts. The gasoline feeds by gravity from the large fuel tank which is mounted on the skids, with all connections made before it leaves the factory.

This engine was specially designed for pumping. It can also be used for running a grinder, fodder cutter, saw or other light machinery; but, where operating machinery is the principal work, our **$75.00 2-H. P. general purpose engine** with fluted cooler is cheaper and more suitable. Larger sizes at proportionately low prices.

If you need a small engine to operate "any old hand pump" our **$37.50 pumping engine** is just the thing.

Remember that these engines are manufactured by the company which made the steel windmill business. Thousands of these engines are in use.

AERMOTOR CO., 2508 12th St., CHICAGO

Clip Your Horses In the Spring

In the spring when your horses are soft and you put them at the hard spring work they sweat a great deal. Their heavy winter coat holds this sweat and it dries out slowly. If left to stand they take cold easily and at night they chill and are liable to all kinds of complaints. If you clip them they dry off fast and there is no question but they stand much less chance of taking cold when dry than if wet. You would not like to stand on a raw spring day or on a chilly spring night with a heavy wet suit on. Neither do your horses. It pays to clip them and blanket, if necessary on cold nights. Your horses dry off much faster, they feel better, rest better, get more good out of their food and do better work. They are better all around. Is it the humane and profitable thing to do. The quickest, least expensive and most satisfactory way to clip is with

The Great Stewart Ball Bearing Clipping Machine

The price, all complete ready for work is only..... **$7.50** This machine turns easy, clips last and will last a lifetime. We guarantee it for 25 years because the gears are all cut from the solid steel bar. They are made file hard. They are enclosed and protected safe from dust and dirt and they run in an oil bath. Friction and wear are practically done away with. It is the only ball bearing clipping machine. It has 6 feet of high grade flexible shaft and the famous Stewart one nut tension clipping knife. This is the noted knife that will stay sharp longer and clip more horses than any other clipping knife ever made. Price of the complete machine all ready to use is only $7.50. Get one from your dealer or send $2 and we will ship you a machine C. O. D for the balance.

No—You Weigh Them

USE the same good judgment in buying fence. *Weigh it* and see what you are getting for your money. In Ellwood Fence you will find good value by this test.

The close 2-in. and 4-in. truss-brace mesh of the Ellwood Fence distributes strain over a wider area than do fences of more open construction, making a long-life fence. Also the hinged-joint construction at every second cable effectually protects the cross or mesh wires by throwing the shock upon the heavy cable wires.

Clip Your Farm Horses This Way

Authorities on horses say that clipped horses keep in better condition, give better service, are less liable to take cold, and are easier cleaned than unclipped horses. This is because a heavy, sweaty coat of hair exhausts the strength and energy and does not dry quickly like the short-clipped coat.

Buy a Stewart No. 1
Ball Bearing Horse Clipping Machine

AND CLIP YOUR HORSES.

We have made this machine so simple that any horse can be clipped by merely guiding the knife while the crank is turned. The clipping is done faster, cleaner,—better in every way—than was ever possible with hand clippers.

Lasts a Lifetime

We have made the Stewart the most durable machine as all working parts are inclosed and run in oil and all gears are cut from the solid steel bar and are made file hard. There is practically no friction or wear. It not only lasts, but is useful a lifetime.

Costs $7.50 The Stewart No. 1 is very simple in construction. There is no delicate mechanism to keep in working order and it sells for only $7.50. Order today from your local dealer or send $2.00 and order direct to us and receive machine C. O. D. for balance. Catalog sent free.

Report Pays Advertisers.

D. H. Yeater, Emmons county, N. D., who has been running a small advertisement in the REPORT, writes: "Enclosed find check for $5.60 for my advertisment. Your paper is all right as an advertising medium. I have received a number of replies to my ad."

Letter Box.

C. W. Moore, Mahaska county, Ia.: "Cattle, hogs and sheep are scarce in this part of the country."

L. T. Gray, Muscatine county, Ia.: "Enclosed find $1.00 for which extend my subscription two years. I am glad you continued sending the REPORT, as I had not noticed that my time had expired."

E. E. Haines, Clinton Co., Ohio: "I saw a copy of the REPORT today for the first time and thought I would like the market reports, as I handle a good deal of stock, and therefore enclose herewith $1.00 for two years."

Dr. Earl R. Steen, Will county, Ill.: "I have been receiving the REPORT gratis since November and like it very much. I now enclose $1.00 for which send me the paper one year and also send it to John E. Dunn, Knox county, Ind."

G. H. Moore, Gunnison county, Colo.: "I have had the REPORT free of charge for the last six months and like it so well that I do not want my name taken from the list, and therefore enclose 50c to cover postage for coming year."

N. P. Moody, Saguache county, Colo.: "I truly enjoy the market information which you have so faithfully furnished. Of course whenever I ship the stuff goes to your firm. Enclosed find $1.00 to cover postage on the REPORT two years."

J. O. Bratton, Franklin county, Tenn.: "Enclosed find $1.00 for which send REPORT to Ernest Baker and myself. I have been receiving the REPORT for some time complimentary and as an evidence of appreciation wish to begin paying postage."

H. Handley, Kiowa county, Colo." Enclosed find $1.00 for which send REPORT two years to H. H. Helver, Russel Springs, Kan. I am already a subscriber to your paper, having accepted your clubbing offer for REPORT and Breeder's Gazette. I would not be without either of these papers for three times their cost."

D. W. Brooks, Gosper county, Neb.: "I had thought to get along without the REPORT, but made up my mind that it is too good to dispense with, and therefore enclose $1.00 for two years and expansive file. I thank you very much for your kindness in sending me the REPORT so long free. You have been very good to me. You will get my trade when I have any. Thanks for your calendar, which is a beauty."

DE LAVAL
Cream Separators
NOT THE "MAIL ORDER" KIND

The World's Standard De Laval Cream Separators are not sold in the "mail order" way and therefore not advertised with the big newspaper space and big "word claims" used to sell low grade separators in that manner.

Part of the money spent in costly advertising and catalogues to sell inferior separators in the "mail order" way is put into vastly better made machines in the case of De Laval separators, and part of it into commissions to local agents who look after the setting up of the machine and the instruction of the buyer in its proper use, as well as the prompt supplying of any needed parts for it in the years to come.

That's the difference in the method of sale between the De Laval and most other makes of cream separators, of which the De Laval buyer gets the benefit instead of the newspaper and printer.

If you don't know the nearest De Laval agent to you send for a catalogue and his address.

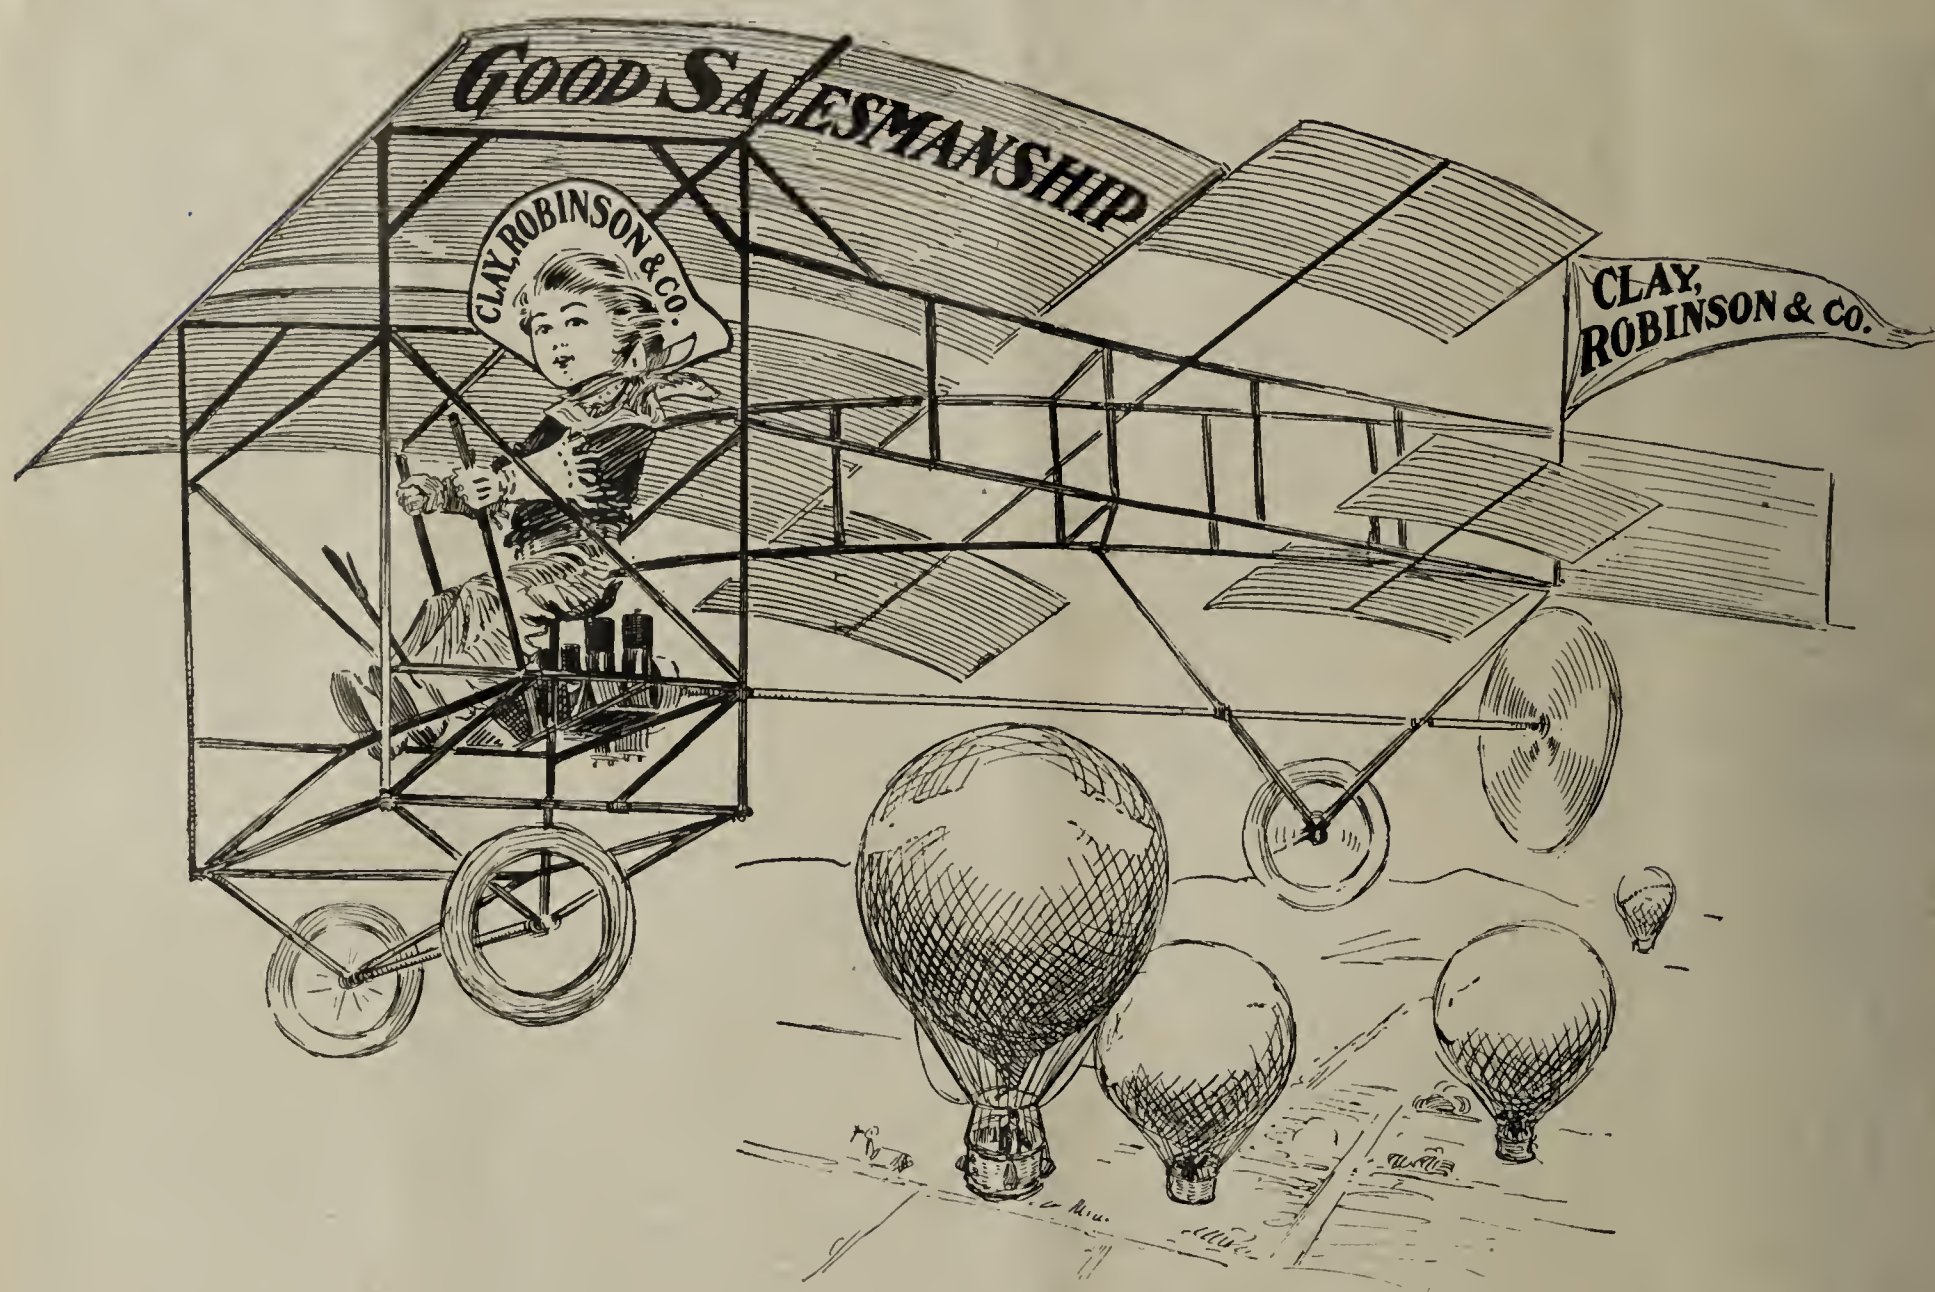
"Going Some"—Get Aboard!



$10.20

Monday, March 7, we sold at Chicago for Harry R. Thompson, Grimes, Iowa, 71 head of 261-lb hogs at above price, which was the first time this figure had been reached since 1865.

$9.65

Wednesday, March 9, we sold at Chicago for R. M. Haythorn, Eaton, Colo., and G. C. Belmont, Brush, Colo., lambs at above price, which was the highest paid on the Chicago market during March for many years, besides scoring the highest point since June, 1909.

$8.40

Monday, March 7, we sold at Chicago for Foster Bros.' Earlham, Iowa, 33 head of 1,599-lb branded western beeves at above price, which was 35c higher than any sale made by any other firm (the next highest cattle, at $8.20 and $8.10, also being sold by us) as well as highest since January, and highest March price in many years.

Just to show that this is our regular gait we mention a few of our "selling stunts" of the preceding week, as follows: ***$10.10*** for hogs, first to reach that price since 1865; ***$9.35*** for lambs, top for week; ***$8.15*** for cattle, first time that price had been scored since January; ***$7.95,*** record price up to that time for sheep; ***$7.90,*** top for week on number of branded cattle; ***$7.10,*** highest for heifers since October, 1909, and many other top and near-top sales.

WHAT WE ARE DOING FOR OTHERS WE CAN DO FOR YOU.

CLAY, ROBINSON & CO.

Clay, Robinson & Company's LIVE STOCK REPORT

Vol. 20 | Chicago, Friday, March 18, 1910 | No. 11

Prosecution or Persecution?

New York, March 12.—John Clay, of Clay, Robinson & Co., live stock commission merchants of Chicago, arrived here tonight from Europe full of indignation against what he called the "outrageous" indictment of the National Packing Company and its directors.

"Mr. Armour,' he said, "is as good a man as you are. The packers have no control over the market. Prices of meat, like prices of everything else, are governed by demand and supply. Higher prices of beef are due to increased cost of land, feed and labor. There will be no cheaper meat until we have a big corn crop.

"In my opinion, to remove the tariff would not do mnch harm, and it wouldn't do much good."

The above, from the Chicago Tribune of March 13, is a very crude statement as reported by a newspaper man while the writer was trying to get his baggage through the New York customs. It voices in a general way my sentiments. This baiting of the packers is getting not only tiresome, but very injurious to onr live stock interests. It is time to cali a halt. I don't see any of onr Washington solons investigating the farmer who gets 11c for his hogs. Oh, no! That would be poor politics. Instead of attempting to raise subsidies for steamships, giving vast sums to waterways and other grafting schemes, give us better farmers, help us to raise more corn, foster in every way agriculture, which is the heart of the prosperity. Build up, do not forever be trying to pull down.

J. C.

Sheep Receipts Dwindling Fast.

Arrivals of sheep and lambs are dwindling fast. Receipts at the six leading western markets thus far this year display a decrease of more than 60,000 from the corresponding period of 1909. The shortage will be felt most after April. The great bulk of the offerings back in the feed lots are in Northern Colorado, and these will have been well sent out by that time. Reports from Kentucky and Tennessee tell of heavy losses of lambs owing to a hard winter and of very dry weather in Arizona cutting down the supply in that quarter. After April it looks like famine supplies nntil grassers come from the western ranges.

$1.00 Per Cwt More Than Expected.

Guy Secrest, the well-known feeder of Downey, Ia , was on the Chicago market March 9 with two loads of 1,323-lb steers which Clay, Robinson & Co. landed at $8.15 "The price you obtained for my cattle," remarked Mr. Secrest, "was around $1.00 per cwt more than I expected. At home everybody told me that my cattle wonld bring about $7.35, but I did not anticipate even that much money. This makes my second shipment to you. Last winter I made my initial consignment to you and had such good success that I determined to come to you again. I am certainly glad that I did."

These cattle were grade Angus, Herefords and Shorthorns. Some of them were bought on the Sioux City market. At the time they were put on a full feed, which was Nov. 1, they averaged 1,040 lbs, showing an average gain of 233 lbs in about four months. Crushed ear corn, two pounds of cottonseed meal per head per day and hay made up the ration.

Weiss Iowa Beeves Top Market.

Jacob Weiss & Sons, one of the most successful feeding firms of Iowa, with headquarters at Denison, had 34 head of beef steers on the Chicago market March 10. They were handled by Clay, Robinson & Co. In the shipment were 17 head of 1,501 lbs average which brought $8.25, top of the market by 10c per cwt, and the other 17 head, averaging 1,367 lbs, went at $8.05.

One-Third of Colorado Lambs Marketed.

F. J. Schroeder of Fort Collins, Colo., who is one of the most extensive feeders and buyers of lambs in Northern Colorado, was on the Chicago market with a string of lambs which were sold by Clay, Robinson & Co. to his entire satisfaction. "At the start of the season there were in round numbers 300,000 sheep and lambs put in the feed lots of Northern Colorado, as against 430,000 last year," said Mr. Schroeder. "Abont one-third of this total have been sent out. The Greeley and Eaton districts have about cleaned up their feed lots. The supply will be well strung out the balance of the season, as the owners are bullish on the future market and besides they have plenty of feed. By April 1 all of the northern-bred lambs will have been marketed. Fully 75 per cent of the lambs put on feed were Mexicans This of course means quite a shortage in the amount of meat, as the Mexicans usually weigh 10 to 15 lbs less than northern lambs."

Good Work at South St. Joseph.

The accompanying cut shows a drove of 57 head of Poland China hogs, 11 months old, averaging 299 lbs, sold by our St. Joseph honse on Thursday, March 10, at

$10 55, being 10c higher than any other hogs sold on that market and the record price (up to that time) for Missouri River points. These were raised, fed and shipped by F. H. Connelly of Milford, Neb.

The next highest price on above date was $10.50 and this was also obtained by our house for a drove averaging 277 lbs. The same day they also topped the light hog market by 5c with the sale of 60 hogs, averaging 198 lbs, at $10.30.

On Friday, March 11, they again topped the market with 50 hogs averaging 318 lbs at $10.50, these being shipped by A. J. Marsh of Shenandoah, Ia.

Anthony Ege of Verdon, Neb., for whom our South St. Joseph house recently sold a consignment of hogs, wrote them on March 9 as follows: Account sale of hogs received and was exceptionally well pleased with same. We thank you very much for what you have done for us."

Steady Shipper Since 1895.

R. M. Haythorn of Eaton, Colo., was at the REPORT office last week and paid $1.00 so that the REPORT would reach him regularly for two years. "I want the REPORT to be a permanent fixture with me as I am with Clay, Robinson & Co.," said Mr. Haythorn. "I have been feeding lambs since 1895 and, barring one load, which I shipped to another firm at the very beginning, I have marketed all of my stock through, Clay, Robisnon & Co., either at the River markets or at Chicago. The service rendered me of course has been first class in every respect. I have the highest regard for the business ability of Clay, Robinson & Co.'s houses at any one or all of the markets."

Hess Iowa Hogs Bring $10.90.

Up to and including March 10 it was necessary to turn the pages of hog market history back to 1865 to find a time when hogs sold as high as $10.90 on the Chicago market. This price was also the highest ever recorded in modern packing times. On Thursday of last week Clay, Robinson & Co. sold two lots of swine at this figure for A. W. Hess of Plower, Ia. The shipment included 44 head of 233 lbs average and 12 head of 333 lbs average.

Great Record at St. Joseph.

Our Sonth Joseph house March 9 sold for Johnson Bros. of Las Animas, Colo., 470 blackface native Colorado lambs, averaging 79 lbs, at $9.40, which up to then was 15c per cwt higher than fed lambs ever before sold for on that market.

Highest Hogs at Kansas City.

The highest price for hogs in the history of the Kansas City market up to March 8 was $10, obtained by our house on that date for 68 head, averaging 264 lbs, sent in by O. W. Jones of Barretts, Kan.

Jensen Nebraska Beeves at $7.45.

Wm. Jensen, a prosperous farmer and stockman of Bennett, Neb., was on the South Omaha market March 10 with a car of grade steers, principally Shorthorns, which Clay, Robinson & Co. sold at $7.45, averaging 1,416 lbs. This was high price for the day and only a nickel under the season's highest figure. These cattle had been on feed of corn and clover hay less than five months, and made a very satisfactory gain, considering the extremely bad weather all winter.

First Lambs to Reach $10.

The first lambs to ever reach $10 west of the Buffalo market were handled by Clay, Robinson & Co. at Chicago on March 14. There were 488 head of 78-lb Mexicans in the shipment and the price was 10c per cwt higher than any other lambs brought. They were marketed by G. C. Belmont of Brush, Colo. The next highest price was $9.85, Clay, Robinson & Co. also obtaining this figure for 504 head of 84-lb westerns, sent in by Drake & Bartels of Fort Collins, Colo.

Oliver Kansas Lambs at $9.35.

Up to March 8 the highest price ever obtained for lambs at Kansas City was $9.35, which our house secured for 572 head, averaging 59 lbs, consigned by F. J. Oliver of Wichita, Kan.

Best Figure at St. Louis.

James A. Kelley of Monte Vista, Colo., March 15 marketed at East St. Louis 302 lambs, averaging 60 lbs, which Clay, Robinson & Co. landed at $9.70, being top by 10c per cwt and also the highest price ever obtained for Colorado lambs on this market. They also sold for Cramer & Sutherland of the same place 262 lambs of 67 lbs average at $9.60, next highest price.

The Bayes Lambs Make New Top.

The 496 head of 76-lb Mexican lambs which sold on the South Omaha market March 10 at $9.45, a record price up to that time, were fed and marketed by S. M. Bayes of Ault, Colo., and handled by Clay, Robinson & Co.

More than Million Hogs Shy.

Marketing of hogs at the six leading western markets for the year thus far show upwards of a million decrease from the same period of 1909. At the eleven points the falling off is upwards of 1,600,000. It is thought that the loss will total two million in a few more months. Chicago alone is more than half a million hogs shy now. The shrinkage in numbers at all of the marts will be more acute when farmers are busy with their spring work.

Future Hog Supply is Less.

Careful inquiry covering wide and varied sources of information affords seeming foundation for expectancy of a continuation of diminishing supplies of hogs at various market centers. From practically every source there is unanimity of expression that supplies of swine in farmers' hands are at low water mark; that is, low mark for some years past. In making calculation as to prospective supplies at leading market centers due allowance must be made for the probable number of hogs diverted to small interior packing houses, which are most aggressive in periods of ascending prices. But in attempting a forecast of probable marketing for a period extending from March 15 to June 15 this feature would seem to be worthy of less consideration since values are now at an abnormally high range. Calculated therefore on a multiplicity of reports from varied sources, it would seem warrantable to conclude conservatively that supplies of hogs at leading markets for the ninety days ending June 15 will be approximately one-third less than for the corresponding time in 1909. For the same period of 1909 as compared with 1908 supplies decreased approximately 16 per cent, thus indicating receipts for this year practically one-half less than for the corresponding period March 15 to June 15 of 1908. These conclusions are based upon reports from our own houses at nine leading markets, who have made careful inquiry and investigation in the territory contiguous to their respective markets. Estimates of decrease as reported from our several houses range from possibly 25 per cent at Denver, where aggregate supplies of swine are smallest of any market reporting, to 50 per cent at Kansas City, where supplies are largest outside of Chicago. East St. Louis calculates on an even greater decrease, while at Chicago it is expected the supply will show 35 to 40 per cent loss. Reports from our several houses are as follows:

CHICAGO—Wide inquiry and conservative conclusions, based upon the results from such investigation, enforces the deduction that hog receipts March 15 to June 15 will fall 35 to 40 per cent below totals received at this point during same period of 1909. Somewhat of late reduction in receipts, it is conceded, must be chargeable to anxiety to get corn out of fields in Iowa, Minnesota and South Dakota, where picking was prevented during the fall and winter. Swine thus withheld from market should come forward during the period under consideration. Due allowance is made for this condition in arriving at conclusions as to probable receipts as above indicated.

KANSAS CITY—Receipts are running about 40 per cent under year ago. There are very few hogs to come within the next ninety days. Reports from all parts of the country are that supplies will continue very light for some time. Quality is much better than last year and weights somewhat heavier. Quite a number of pigs that are apparently healthy and many breeding hogs are being marketed on account of prevailing high prices. We believe receipts will run 50 per cent short of one year ago during the late spring and summer months.

SOUTH OMAHA—In our opinion 35 per cent fewer hogs will arrive here from now until June 15 than a year ago. The "talent" gives a very wide breadth, reporting anywhere from 20 to 40 per cent decrease, with majority running about 30 per cent.

EAST ST. LOUIS—We have been talking to a great many of the shippers from Illinois and north of the Missouri River and their general opinion is that there will not be more than one-third the supply of hogs to come to this market during the next thirty days as compared with a year ago. There are a good many hogs going on feed, especially in Northern and Southern Missouri and Arkansas, that will be ready for market along in June. South of the Missouri River the hogs came to market about 60 days earlier this year than last. Consequently that supply is nearly gone and it is almost impossible to get a load of stock hogs from that country at this time.

SIOUX CITY—We have been keeping close tab on the probable number of hogs to be marketed from this territory between now and June 15 and believe same will be 30 to 40 per cent less than a year ago, and would not be surprised to see more of a decrease during June. High prices have induced many farmers to let go of light hogs which should not be marketed until that time.

SOUTH ST. PAUL—We believe that the number of hogs which will be shipped to this market from now until June 15 will decrease 25 to 35 per cent from year ago. Some of our informers tell us the falling off will be as much as 50 per cent, while conservative ones place their estimates at 25 per cent. Thus far this year receipts show a decrease of 50 per cent from year ago. This has been due largely to extreme bad weather conditions throughout the Northwest the past two months and poor railroad service. We look for a fair run of hogs the next month or so. By that time farmers will commence seeding and we anticipate a decided shortage of supplies until the fall season opens up.

EAST BUFFALO—We do not look for over 50 per cent of the hogs to arrive here between now and June 15 as compared with year ago. Last year we had a considerable number of western hogs, but owing to relatively higher prices at Chicago and other western markets, very few of such hogs are arriving here as the shrink, with swine at $11 per cwt, costs so much that 35@50c per cwt margin will not pay them to pass by the nearby markets. The supply in Ohio, Indiana and Michigan is very light. Receipts for February were 50,000 head shy of corresponding month of 1909.

DENVER—Receipts here for year thus far show a decrease of about 25 per cent from year ago. Supplies will continue to show a decrease of around 25 per cent and possibly more. Last year we received during March and April quite a few hogs from the Arkansas and San Luis Valleys. This year practically all the hogs in the San Luis Valley are being bought by San Francisco packers, and the local packing houses at Albuquerque and Pueblo have taken care of the hogs raised in the Arkansas Valley to a large extent.

Nebraska Hogs at New Price.

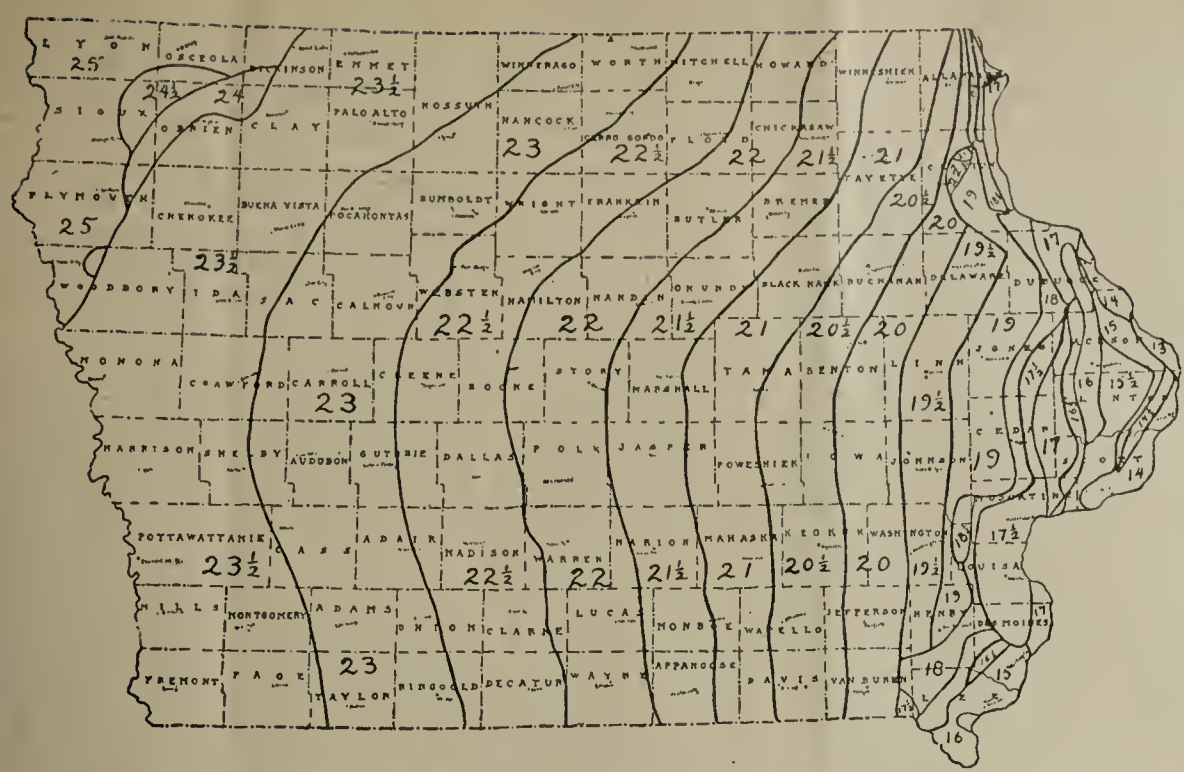
C. A. Swedeburg of Hampton, Neb., had the pleasure as well as the honor of having his hogs sell at $10.45 on the South Omaha market March 10, up to then highest price ever paid on that market and also 35c per cwt above previous day's top. There was a car of these hogs and they averaged 331 lbs. They were sold by Clay, Robinson & Co.

He who follows his own advice must take the consequences.—Addison.

CLAY, ROBINSON & CO. SOLD WISCONSIN AGRICULTURAL COLLEGE CATTLE.

On March 8 the Wisconsin Agricultural College had on the Chicago market, in charge of Prof. J. L. Tormey, 9 steers, eight of which are shown in the above picture. This photograph was taken on the college grounds at Madison and the new pavilion appears in the background. Three of the steers were pure-bred Shorthorns, three were Aberdeen-Angus and three Herefords. They were used all winter in class room work at the college. Feeding commenced Oct. 28 and during the period from then until March 7 total gain was 2,452 lbs, or an average of 272 lbs per head. When first put on feed the steers were run in a paddock for about two weeks and fed cornmeal and bran, equal parts by bulk, 6 or 7 lbs each per day, and also given a little corn stover and all the hay they would clean up. They were put on full feed about Christmas, getting 8 lbs each of the above mixture and 15 to 20 lbs of roots, also 15 to 16 lbs of ensilage and about 12 lbs of mixed hay, all these items being fed twice daily. They were sold by Clay, Robinson & Co. at $7.65, averaging 1,338 lbs. The steers would have brought considerably more money had they been of uniform weight and quality, but they were very uneven in these respects, weights ranging from 1,250 to 1,630 lbs. At that they sold within 5c of the extreme top of the market. The shrink from home weights was about 56 lbs per head. The average daily gain per head was something over 2 lbs. There were also 2 cows which we sold at $6.25, as high as cows have sold for here this year. The cattle were fed by O. J. Delwick, the barn foreman.

The above picture gives a good idea of the fine new pavilion, which was completed shortly before last Thanksgiving. It seats somewhere around 3,000 and has an arena 165x65 feet. The building is constructed of reinforced concrete, with brick veneer front and side walls. It contains, in addition to the arena, the offices of the horse breeding, veterinary science and pharmaceutical departments, offices of the professor of animal husbandry, superintendent and barn foreman. Under the arena are box and open stalls sufficient for all horses kept on the farm, also storage in the rear for corn and hay. A portion of the top floor is now being fitted up for gymnasium purposes.



THE NEW CATTLE AND SHEEP (DOUBLE-DECK) RATES.

In last week's issue of the REPORT we told of the reduction the Interstate Commerce Commission ordered in the railroad rates on cattle, hog and sheep shipments from Iowa points to the Chicago market. The rates as shown on this map have been ordered by the commission. Except that in the 24½ and 25c section, in the North-west corner, it is ordered that there shall be two groups, one taking a 24c rate and the other a 24½c rate.

Highest Ever Known for Colorado Cattle.

The Beggs & Ballantine Co., one of the largest feeding and ranching concerns in the West, had 145 head of 1,287-lb steers on the Kansas City market March 16. Clay, Robinson & Co. landed them at $7.75, highest price ever paid for Colorado fed steers. This company's feeding plants are at Rocky Ford and Sugar City, Colo.

New Record Made at Omaha.

It was March 16 that Clay, Robinson & Co. put the price for lambs on the highest basis ever recorded there. On that day they sold for E. S. Leavenworth of Wood River, Neb., 597 Mexicans of 68 lbs average at $9.85.

New High Price for Western Ewes.

It was March 14 that Clay, Robinson & Co. sold 400 head of 104-lb western ewes at $7.85, up to then the highest price ever recorded for such offerings. They were marketed by the Winnecook Land and Live Stock Co. of Pontiac, Mont.

Illinois Shorn Wethers at $7.50.

J. L. Killam of Shelbyville, Ill., marketed at Chicago on March 14 a shipment of 88 head of 90-lb shorn western wethers which Clay, Robinson & Co. landed at $7.50. Up to then this was the highest price ever paid for such offerings.

Two Record Prices at Omaha,

On March 10 Clay, Robinson & Co. at South Omaha sold both yearlings and ewes at new high prices up to that time. They obtained $8.75 for 80-lb yearling sheep, $7.95 for 176 head of 94-lb wethers and $7.70 for 211 head of 95-lb ewes, all of these offerings belonging to Theodore Jacobson of Goodrich, Colo. On the same day L. A. Farwell of the same place had in 107 head of 103-lb western ewes which our house sold at $7.70. Up to that day the above prices were the highest ever realized on that market for the respective offerings.

Hampton Shorn Yearlings at $8.00.

It was March 10 that our Chicago house sold 81 shorn western yearling wethers, averaging 74 lbs, at $8.00 for A. Hampton of Springville, Ia. Up to then this price was never before paid for shorn yearling stock on this market.

Proved Highest Price Ever Paid.

A. D. Mathias represented Monte Vista, Colo., on the East St. Louis market March 14 with 257 shorn lambs, averaging 80 lbs. Clay, Robinson & Co. obtained $8.85 for them, which price up to then was the highest ever paid on that market for shorn lambs.

Record Price for Native Ewes.

A. J. Cooley represented Garretson, S. D., on the Chicago sheep market March 10 with 167 head of 110-lb ewes which Clay, Robinson & Co. sold at $8.00. Up to then this price was never before paid on this market for a straight load of ewes and was top of the ewe trade that day by 50c per cwt for a load lot.

Dickerson Bros. Sheep at $7.75.

Peabody, Kan., was represented on the Kansas City sheep market March 7 with 190 head of 118-lb western wethers which our house sold at $7.75, up to that time a new high price for sheep there. They were fed and marketed by Dickerson Bros.

High Sales at Denver.

On March 11 our Denver house sold for C. L. Walker of Longmont, Colo., 502 Wyoming-fed ewes, averaging 90 lbs. at $7.00, which was the highest price paid for ewes on that market up to that time. On March 12 they sold for J. F. Carlson of Masters, Colo., 239 fed native Colorado lambs, averaging 72 lbs, at $8.60, also the extreme top.

They also sold on March 12 for H. W. Moore of Brush, Colo., 90 fed Colorado Texas steers, averaging 1,136 lbs, at $6.60, extreme top for beef steers on that market up to then. These steers were just fair quality and in fair to good flesh.

Sold Highest Lambs at St. Joseph.

On March 15 Clay, Robinson & Co. sold on the South St. Joseph market 518 Mexican lambs, averaging 77 lbs, at $9.75, top of the market that day by 10c per cwt and up to then the highest ever known on that market by 5c per cwt. The lambs were fed and marketed by F. R. Sylvester of Scotts Bluff, Neb.

Was Best Price for Ewes.

Andy Nelson, Lexington, Neb., had a load of 121-lb ewes on the South Omaha market March 13 for which our house obtained $7.85, being up to that time the top for western ewes for the season. Mr. Nelson marketed a double more of his ewes on March 15 and our house secured the above price for them.

Initial Shipment; Highly Pleased.

F. Weible, prominent merchant and extensive feeder from Winside, Neb., was at Chicago Monday with 68 beef steers which we sold at $7.40@7.50. "The prices were more than 15c per cwt higher than I even thought of securing," said Mr. Weible. "This is my first shipment to Clay, Robinson & Co., having patronized another firm steadily for the past eighteen years." These cattle were grade Shorthorns and branded Sandhills. Mr. Weible says they have had fine weather during the past six weeks in his part of the country. There are not half as many cattle on feed and a very small crop of hogs."

Contracting Spring Lamb Crop.

O. C. Strocher, prominent dealer in live stock of Harrison county, W. Va, writes our Chicago house: "Lambs for July and August are about all engaged here at 75c@$1.00 per cwt higher than last year. Stock cattle are going to be very scarce this spring."

PERSONAL

If YOU, who are now reading this item, have been receiving the LIVE STOCK REPORT free for six months or longer, your name will be dropped from the mailing list in the revision now in progress

unless you send 50 cts to cover postage for one year. We don't want to drop anybody, but the demand for the REPORT is so great that we are really unable to carry anyone on the free list longer than six months on account of the enormous expense of postage. All we ask is that after having received the REPORT free six months or longer and are acquainted with its merits, you will, if you consider it of value, send 50 cts to cover actual postage for the next twelve months. This entitles you to a full year from the time your payment is received. Over ten thousand readers gladly do this. A single issue of the REPORT may give you information worth many times its cost for a year. If you have had the paper for some time free, please show your appreciation by complying with this request NOW—as we don't want to drop any of our old readers if it can be helped.

STAY ON THE LIST—It means that you will not only get the REPORT regularly, but also our beautiful calendars and the various useful advertising novelties, important market information, etc., which we send out from time to time.

If you are a paid subscriber and your subscription has expired or is about to expire, please renew at once or your name will be dropped in the revision.

Among Our Customers.

C. W. Lucas, Weld county, Colo., had two doubles of 79-lb lambs on the South Omaha market March 15 and our house sold them at $9.65.

C. H. Mannon, Henry county, Ill., had in 75 hogs of 192 lbs average on the Chicago market March 14 and we sold them at $10.85, top for light weights.

Harry Eaton, Hall county, Neb., had 1,192 Mexican lambs on the South Omaha market March 13 that our house sold at $9.55, extreme top by 5c per cwt.

Our house at South St. Joseph on March 14 sold for Haskins Bros., Harlan county, Neb., two doubles of Wyoming lambs, averaging 73 lbs, at $9.50.

Extreme top for heifers at Kansas City on March 10 was $6.60, obtained by our house for 18 head, averaging 804 lbs, shipped by Rankin Bros., Furnas county, Neb.

J. T. Klinger, Marshall county, Ia., marketed 60 head of 203-lb hogs on the Chicago market March 9 which we landed at top price of $10.62½ for hogs of that weight.

E. S. Leavenworth, Hall county, Neb., marketed three cars of his Mexican lambs on the South Omaha market March 10, averaging 67 lbs. Our house sold them at $9.40.

J. J. Edgerton represented Keokuk county, Ia., on the Chicago market March 9 with 31 shorn native lambs of 82 lbs average for which we obtained $8.65, up to then top of year for shorn stock.

On March 9 our Kansas City house obtained $7.45 for 40 yearling and short two-year-old Galloway steers, shipped by D. P. Wagoner, the well known Galloway breeder of Dickinson county, Kan.

George C. Belmont, Morgan county, Colo., had 245 head of 79-lb lambs on the Chicago market March 11 which we sold at the top price of $9.65. The next highest figure was $9.60, secured by us for 125 head of 70 lbs average, belonging to A. W. Wrigley, Shiawassee county, Mich.

G. L. Slocum, Richardson county, Neb., was on the Kansas City market March 8 with 19 yearling steers, averaging 1,049 lbs, which our house landed at $7.40 and 11 heifers, 646 lbs, at $6.85. These were top prices and furnish a good illustration of the care given to small lots by our house.

The Beggs & Ballantine Live Stock Co., Otero county, Colo., had the following cattle on the Kansas City market March 8, for which our house secured top prices for their respective classes: 20 steers, 1,309 lbs, $7.50; 24 steers, 1,174 lbs, $7.40; 32 heifers, 1,014 lbs, $6.75; 17 heifers, 916 lbs, $6.50 and 24 cows, 1,008 lbs, $5.75.

J. Orton Finley, well-known sheep feeder of Knox county, Ill., was on the Chicago market March 9 with 124 western wethers, averaging 143 lbs, which we sold at $8.00, top of market by 10c per cwt. Next best price—$7.90—was also obtained by us for 179 of 128 lbs average, belonging to David Crook, Grundy county, Ill.

G. W. Obenour and K. Kanell, both prominent stockmen of Hardin county, Ohio, were at Chicago this week buying feeding cattle through our firm. "We have patronized Clay, Robinson & Co. at East Buffalo quite liberally," said Mr. Obenour, "and we have always received first-class service." These gentlemen reported quite a shortage of cattle on feed in their part of the state and not half as many hogs on feed as one year ago."

William Smith, Ida county, Ia., was a mighty well pleased man. On March 14 he had on the Chicago market 55 head of 1,258-lb beef steers for which we secured $7.60. Forty-eight head of these cattle were bought on the Sioux City market by Clay, Robinson & Co. at $4.15 last August, averaging 950 lbs. They were run on grass until Oct. 21 when they were given a feed of snapped corn and clover hay. By Nov. 21 they were gotten on full feed, the only change in the ration being about half of the corn being shelled.

We greatly enjoyed meeting our old friend and customer, Henry Meseck of Crawford county, Ia., who was on the market Monday with 20 steers of 1,201 lbs average that made $7.40. Mr. Meseck had not been in before for about a year and was surprised to see our new and commodious quarters. Hale and hearty at an age when most men are thinking of retiring from active business, Mr. Meseck is a fine type of the solid, substantial German-American farmer, who has done so much to develop the agricultural resources of this country. He has been a customer of our firm for many years and there is none whose patronage we appreciate more highly. While here he evidenced his appreciation of the REPORT by leaving $1.00 to keep it coming two years more.

What of the Future?

Eleven cent hogs, and what of the future? Every mail brings letters of inquiry from anxious producers and feeders. The ten cent quotation, booked by bullish traders to arrive some time during 1910, got into market history sixty days ahead of the schedule prepared by those most inoculated with "bull fever." When the ten cent hog was put over chronic "bulls," who can always see better prices ahead, set their peg for eleven dollar swine. That price, like its predecessor, was recorded in such short order as to render him speechless, as it were, for the minute, but he soon recovered and now expectancy of another dollar addition to rates is occasionally voiced, though not in a loud voice it must be admitted. With prevailing prices highest since the close of the civil war, higher considering the present purchasing power of the coin of the realm, anxiety as to future prices is but natural and to be expected. A careful study of the situation appears to warrant conclusion that remunerative prices for hogs for months yet to come are a practical certainty, as nearly certain as future commercial conditions can be calculated. Swine prices of unusual marketward magnetism have prevailed for so long it is useless to contend the supply in producers' hands is not now of minimum aggregate. So positive is this conviction that alarm is manifest as to the ability of raisers to restore production to near normal proportions short of an extended period. At ten to eleven dollars per cwt shotes are drawn into the capacious maw of packing houses, brood sows bring more dollars than the milch cow and the premium for stags brought the knife into play on sires in such numbers as to warrant really serious alarm as to swine supplies for near future at least. Frequently during the past year we sought to encourage swine production and swine feeding. Those who heeded the admonitions thus promulgated can give best evidence as to the profits which resulted. We reiterate this advice. It is ill advised to suggest the withholding from market of matured hogs, but young hogs, shotes and brood sows should be retained on the farm. Give them a chance and your bank account will later afford evidence of your wisdom. Keep vigorously awake to the possibilities before the producer of swine. There's money in it.

Greater Cost of Making Beef.

William T. Sneadle, Ogle county, Ill., writes our Chicago house as follows: "Your cattle market letter of March 1 received. I notice the decrease in number of cattle on feed, in your investigation, runs from 25 to 60 per cent from last year. It really needs to be that or more in order to get pay for feeding cattle this winter, with the price we had to pay for cattle in the fall and high prices for all kinds of feeds, and the winter has been quite different from former years. To get pay for feeding, cattle must bring the prices that hogs are selling for at this time. It costs more to make a pound of beef than it does to make a pound of pork."

"A Good Day's Work."

Joseph D. Sturgis, Sturgis, Mich., wrote our Chicago house as follows: "I received the six copies of the REPORT containing the sale and photo of my deck of lambs at $9.35 and wish to thank you for same. I will send them to my friends. Those lambs just net me an even $70 better than best price at home. Rather a good day's work. Your firm will get all my stock from this on. The man that raises corn and hay certainly deserves all there is in the stock business and Clay, Robinson & Co. will see that he gets it if they are given the chance."

Feeding Cottonseed Products to Hogs.

A. C. Van Norman of Naperville, Ill., a most successful feeder of cattle and hogs, was on the Chicago hog market Tuesday of last week with 62 head which we sold at $10.10. Mr. Van Norman has been feeding cottonseed to live stock for 15 years and in reference to use of the same said: "The results of feeding cottonseed products to cattle are most desirable, but when it comes to hogs I cannot say as much. The hogs which I marketed followed the 110 steers which got 400 lbs of cottonseed cake per day, along with shocked corn. I have found that hogs cannot profitably follow cattle fed cottonseed products for more than two to three months. After then their lungs seem to clog up, they lose flesh and one or more die from day to day."

Impaction of Cattle Stomachs.

Nebraska—Is there any cure for "Corn Stalk Disease?" I have lost several head of cattle with it. They seem to get blind and can't walk without staggering. I cut one of them open after she died, and found her food all in the same condition in which it was taken into her body. I tried drenching them as soon as I noticed that they were sick, but it did no good.

REPLY—No cure for true corn stalk disease has been found, but that disease is comparatively rare. In many cases of the supposed disease the cattle simply are suffering from impaction of the third stomach and sometimes for impaction of the paunch. Some of these cases may be relieved by giving at one dose a pound to a pound and a half of castor oil shaken up in milk, or a pound and a half of epsom salts dissolved in three pints of warm water to which add half an ounce of ground ginger root, one dram of fluid extract of nux vomica and five drops of croton oil. If the paunch is impacted it may have to be opened by an expert. This is the operation of rumenotomy and sometimes succeeds. A stalk field should be tested by turning in a runt steer or two and if they stand the feed then put in the cattle. It is important to supply succulent feed, plenty of salt and abundance of pure drinking water to cattle going upon stalk pasture.

W. T. Hufford, Sandusky, Ohio: "Not much stock feeding in this section on account of high price of feed. Hogs about all gone."

Clay, Robinson & Co. this week scored a number of new price records for wooled and shorn Colorado lambs at Chicago. On Monday we sold for Geo. C. Belmont, Brush, Colo., 488 head (part of which are shown in above picture) averaging 78 lbs at $10.00, being the first time that figure had ever been reached—and the only lambs at the price.

This was put in the shade, however, by our sales on Wednesday, March 16, of several strings of Colorados from around Eaton, as follows: A. J. Carlson, 473 lambs, 81 lbs; F. B. Shattuck, 256 lambs, 73 lbs; R. M. Hutchinson, 251 lambs, 71 lbs; all at $10.25.

We also sold on Wednesday for Fred Gross, Fort Collins, 251 shorn lambs, averaging 88 lbs, at $9.30, a record price for clipped stock.

NATIVE BEEF STEERS.

Range of prices and bulk of sales of native beef steers this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Range.	Bulk.
This week.....	$5.50@8.65	$6.50@8.00
Previons week.....	5.15 *8.40	6.15 7.75
Year ago.....	4.50 7.35	5.35 6.60
Two years ago.....	4.25 6.65	5.40 6.40

*Obtained by Clay, Robinson & Co.

Thursday supply 8,134. Market steady to 10c lower. Trading very uneven. Top beeves $8.25, paid for a load of 1,501 lbs average, handled by us for Jacob Weiss & Sons of Denison, Ia. This price was 10c higher than any other cattle brought. Run Friday 1,382. Slow and weaker trade. Best beeves offered, numbering 34 head and averaging 1,531 lbs, at $8.00. Week closed with prices 10@15c higher than finish of previous week and at high point of year.

This week started out with a total of 20,821 head. The market was fairly active at rates steady to strong. Demand on local dressed beef and eastern shipping account brisk. Summit $8.30, paid for 16 head of 1,469 lb Herefords. Sales largely at $3.50@7.85. Marketing Tuesday 4,836. Very satisfactory beef steer trade, showing a firm basis. Pinnacle $8.25, paid for 35 head of 1,345 lbs average. Marketing Wednesday 13,000. Trade brisk from start to finish at prices 10@15c higher. Top beeves $8.65.

BUTCHER STOCK.

Bulk sales of beef cows and heifers, canners and cutters, and bulls this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Bulk cows and heifers.	Bulk canners and cutters	Bulk bulls.
This week.....	$4.65@6.00	$3.00@3.75	$4.85@5.60
Previous week.....	4.50 5.90	3.00 3.75	4.75 5.50
Year ago.....	4.00 5.00	2.25 2.85	3.60 4.50
Two years ago.....	3.75 5.00	2.10 2.85	3.50 4.40

All price changes for cows and heifers Thursday were towards weakness. Bull market 10c lower. Rates for calves strong to 10c higher. Generally steady trade in cows and heifers Friday as compared with close of previous week. Offerings good enough to go above $3.75 were 10@15c higher, while other kinds were lower if anything. Dull trade in bulls at prices no more than steady with one week ago. Calf market was active at prices strong to 25c higher than then.

The week started out with an active demand from all sources for cows and heifers and prices ruled 10@15c higher. Strong market for cows and heifers Tuesday. Bulls held the Monday basis. Calf prices went highest in local trade history, sales of prime assorted being made at $10.40@10.50, although practical top was $10.25. Market largely 25@50c above like day week ago. Generally a 10@15c higher deal in cows and heifers Wednesday.

Revised quotations for all grades of butcher stock and calves:

Extra choice to prime yearling heifers.....	$6 75 @	7 50
Choice to prime heifers.....	6 00	6 60
Fair to good heifers.....	5 20	5 80

[Special telegram from Clay, Robinson & Co.]

Last week closed with beef steers 10@25c higher than finish of previous week, common and medium grades showing most advance. Bulk offerings selling under $5.90 were more suitable for feeding purposes than any other. Best beeves available was a load of 1,353-lb offerings at $7.65, best price of year. Bulk good 1,200 to 1,400 lbs average brought $7.00@7.50, with decent to good 900 to 1,050-lb steers at $6.75@7.10. Several loads of heifers reached $6.50, with top cows at $6.25. It was a 10@15c higher deal in stockers and feeders. The 825 to 875-lb feeders went at $5.25@5.50, with good stockers up to $5.50.

Advance in hog market last week amounted to 75c. Top was $11.00 and bulk of sales at close made $9.50@9.80.

Sheep and lambs last week went on highest basis in history of market. Most arrivals were lambs and yearlings from Colorado. Top lambs made $9.50, wooled yearlings went up to $8.75 and shorn at $8.50. Most native offerings lacked quality.

National Stock Yards, Ill., March 15.—Best native beeves reached $7.90, with general trade about 10c higher than close last week. Butcher cattle active, heifers selling up to $7.00 and cows at $6.35. Market 10@20c higher. Medium weight feeders sold at $6.00. Southern trading in best grades shared in the advance. One train of light weight grass Texas beeves made $5.90, fed Oklahoma beeves $6.65 and Oklahoma bulls record at $6.00.

Top hogs today $10.90. Market opened steady and closed 25c down. Early bulk made $10.50@10.75 and late $10.40@10.60.

Top lambs today at $9.70, which price we secured for one car of San Luis Valley Colorados averaging 60 lbs. Clipped western lambs, fed in Illinois and averaging 85 lbs, sold at $9.10, highest price on record here. Bucks sold from $6.00@6.25.

Among the representative sales made by Clay, Robinson & Co. during the past week were:

BEEF STEERS.

Wednesday, March 9.

25 Missouris, common quality, 577 lbs, $4.25.

Monday, March 14.—3 Missouris, 1,160 lbs, $6.65; 6 Missouri yearlings, 909 lbs, $6.50.

Tuesday, March 15.—26 Missouris, 987 lbs, $6.35.

Bulk of hogs went at $10.50@10.60, with the latter price obtaining the best.

Top lambs $9.00, yearlings $8.00 and ewes $7.00.

LIVE STOCK & CROP CONDITIONS

REPORTS GATHERED AND RECEIVED BY CLAY, ROBINSON & CO.'S HOUSES AT THE TEN LEADING LIVE STOCK MARKETS.

FEW MARKETABLE SHEEP ON HAND.

James H. Johnson, Cedar county, Ia.: "There are not many cattle on feed in this part of the state and very few hogs, while the number of sheep to be marketed is very small."

YOUNG SWINE SCARCE IN ILLINOIS.

Wm. Hoult, Edgar county, Ill.: "Not so many cattle on feed as last year, with fat hogs and also pigs are very scarce. We have to buy shotes one or two in a lot just as we can get them."

HAVING FINE WEATHER NOW.

W. M. Richardson, Sully county, S. D.: "We are having fine weather here. Had lots of snow but no bad storm this winter. Not many cattle in this locality, but what there are look fine."

SCARCITY OF HOGS CUTS INDIANA CATTLE FEEDING.

O. M. Petra, Hendricks county, Ind.: "There are only about half as many cattle on feed this season here as compared with last year, due to scarcity of hogs. I wish to thank you for sending me the REPORT and also weekly market quotations."

FARMERS SHORT OF HAY AND STRAW.

L. H. Terhill, Redwood county, Minn.: Stock has been pretty well shipped out of our section. This is due largely to the fact that farmers have run shy on hay and straw, as the weather has been extremely cold and of rather long and even endurance. Our crop yield was good."

OHIO SHEEP SOLD FOR MAY DELIVERY.

B. S. Campbell, Carroll county, Ohio: "Not enough cattle on fesd here to supply home demand. Stock cattle high and scarce. Too many calves soid for veal. Don't believe there is one hog here for each man in this county. Quite a few sheep on feed, mostly soid for May delivery at $5.00. Most of the lambs are gone. Hay is worth $16 per ton and corn 74c per bnshel."

FAVORABLE FOR FEEDING IN SOUTH DAKOTA.

A. E. Johnson, prominent stock raiser and farmer of Walworth county, S. D., was represented on the South St. Paul market March 7 with a car of cattle to our house, which soid to Mr. Johnson's entire satisfaction. He remarked that the weather has been most favorable for feeding in his section this winter and that there is a fair qnota of stock in his neighborhood at this time. Mr. Johnson is qnite a fancier of Duroc Jersey hogs and has topped the market quite frequently with his shipments.

OREGON HAD HARDEST WINTER IN YEARS.

D. S. McCumsey, Malheur county, Ore.: "We have had one of the hardeat winters for years, according to the old timers. At present, however, it is raining and the snow is melting. Most of the sheepmen have fed for almost ninety days. The loss in sheep will reach at least 20 per cent. Some may lose more than this, for most of the stock is weak and the mud will be about as bad as the deep snow has been. But we have plenty of feed, and when the snow is gone, along with an early spring, it may not turn out so bad. There has been heavy losses of range cattle and horses. Corn or any kind of grain costs us 5½c per ponnd down here, which makes a sheepman's daily expenses pretty heavy."

Change in Quarantine Regulations.

The Department of Agriculture will soon issue new regulations governing the movement of cattle from the area under quarantine on account of Texas or tick fever. These regulations will become effective about April 1, and will permit the movement of cattle from the quarantined area provided they are properly dipped under Government supervision. The new regulations differ from those hitherto in effect in that they provide for the employment of an arsenical dipping fluid as well as for crude petroleum which has heretofore been used for the destruction of the ticks that transmit the disease. Experiments by the Bureau of Animal Industry in dipping cattle in an arsenical solution indicate that the methods of treatment is sufficiently effective to be permitted for cattle intended for interstate movement for purposes other than immediate slaughter.

The territory under quarantine for Texas fever embraces the whole states of Louisiana, Alabama and Florida, and parts of California, Texas, Oklahoma, Missouri, Arkansas, Tennessee, Mississippi, Georgia, South Carolina, North Carolina and Virginia. The area under quarantine has been reduced by more than 80,000 square miles within the last three years as a result of the campaign being waged by the federal and state authorities for the extermination of the ticks, and as this work progresses the quarantine will be removed from additional territory.

Weekly Receipts at Six Markets.

Following shows receipts, in round numbers, of cattle, hogs and sheep at six leading western markets last week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

Do You Want Goats?

The season of the year when the "brush cleaners" are in demand is at hand. In the spring, when the sprouts are tender, they do their work best, although usefni later on. Our

KANSAS CITY

house does quite a large business in goats each year, and can give you any desired information, and fill your orders. Last season they filled orders for ten cars of goats in a single day, a total of 2,092 head, these going to eight different towns in Iowa, Illinois, Kansas and Missonri.

If you are on the other side of the market and have goats to ship, you certainly cannot do better than to consign them to

Clay, Robinson & Co.

at Kansas City. Our house there has always kept in close touch with this trade, both as regards the outlet for killers and for goats for brush-cleaning or other purposes.

In case you are interested either as a shipper or as a possible buyer of goats our Kansas City house will be glad to hear from you and give you any desired information.

Utilize Cheaper Cuts.

The cheapest meat is that which supplies the user the most nutriment for the least money. The common saying that "the best is the cheapest" does not apply to meats, if by the best we mean that which has the finest appearance and the most agreeable flavor and is sold at the highest price. The cheaper cuts of meat in many instances have as high a food value as the more expensive ones. The cheaper cuts are just as wholesome, just as nutritious, and in every way just as good as the more expensive cuts except that the latter give greater gratification to the palate. A systematic endeavor to teach our people the true relative nutritive values of the different cuts of meat would do more than any one influence to reduce their cost of living. One of the chief reasons for the high price of beef is the fact that most consummers, being ignorant of the exact nutritive value of the different cuts, insist on having only the so-called best or high-priced cuts, leaving the main portion of the beef as a drug on the market.—Harper's Weekly.

The Success Winners.

Some interesting and significant figures appear in a recent issue of the Juvenile Court Record. The compiler of these figures took a list of 1,000 successful men of the nation, and made an investigation of their antecedents, including a list of the first jobs which these men held. The list is not made up exclusively of money makers, but of men who have helped raise our civilization to a higher level. Their first foot hold in work is a study full of human interest.

Two hundred started as farmers.

Two hundred started as messenger boys.

Two hundred were newsboys.

One hundred were printers' apprentices.

One hundred were apprenticed in manufactories.

Fifty began at the bottom of railway work.

Fifty—only fifty—had wealthy parents to give them a start.

Apparently busines training—or in other words, the necessity of "getting a job" is the best incentive toward a successful life.

Laying Eggs by Schedule.

Hens are now laying eggs by schedule. A scientific farmer who raises poultry for bird fanciers and sells specially-bred eggs for specially-made prices has worked out a scheme for keeping a record of the ancestry of each egg that is laid. The various breeds of chickens are segregated in their respective runways, and each nest in each runway is duly numbered. To the leg of each hen is attached a numbered metal ring. A boy watches the hens as they enter the nest to lay their daily eggs, and on a time recorder stamps the hour the egg is laid, the number of the nest and the number of the hen. The high prices that the eggs command is ample proof of the increased value which such a system gives them.

WHAT THEY SAY ABOUT US

CHICAGO.

Henry Knock, Iowa county, Ia.: "Was well pleased with sale of cattle. Thank you."

J. A. & J Orton Finley, Knox county, Ill.: "Returns for hogs and sheep at hand. We are much pleased with sales."

EAST BUFFALO.

Geo. Robinson, Lenawee county, Mich.: "I was well pleased with sale of lambs."

A. Frye, Washtenaw county, Mich.: "I am well pleased with price for lambs and thank you for handling my stock so well."

L. A. Rainey, Hillsdale county, Mich.: "Well pleased with the way you sold the lambs. Expect to ship you some more later."

W. Stewart, Shiawassee county, Mich.: "You made a good sale of our lambs. They were our last load and we wanted to clean the barn and so we put everything in. If we are in the feeding lamb business next winter we will give you our shipment."

SOUTH ST. PAUL.

William C. Wilson & Co., extensive feeders of Racine county, Wis.: "Five cars of wethers arrived. They are just as you represented them to be. If they feed out as we expect, your Chicago house will undoubtedly secure top prices for them when finished. Glad you saved us the exchange charges by asking us to remit Chicago draft."

SOUTH OMAHA.

W. H. Farr. Weld county, Colo.: "You sold the lambs at $9.35. I am more than pleased."

R. M. Bell, Dawson county, Neb.; "I am well pleased with sale of cattle. Have more of same quality to market later and will consign to you."

CHANTILLY (2.784)

Owned by Wm. Beckley, Royal Center, Ind., whose young son, Eugene, appears in the picture. This stallion weighs 2,140 lbs and was imported from France in 1900 by J. Crouch & Son, Lafayette, Ind. A team of mares sired by Chantilly, raised in above neighborhood, sold for $1,650.

Herefords for Sale

Twenty head of yearling heifers, granddaughters of Disturber. Also eight head of bulls coming two years old.

R. J. McCORMACK,

Save $30

GET MY PRICE The Lowest Ever Made

Buy direct from the biggest spreader factory in the world. —My price has made it. No such price as I make on this high grade spreader has ever been made before in all manure spreader history. I save you $50. Here's the secret and reason: You pay me only for the actual material and labor at cost and one small profit based on my enormous factory capacity of 30,000 spreaders a year. And I pay the freight right through to your station. Any farmer can afford to have a spreader when he can get in on a wholesale deal like this on a

Only Successful Wagon Box Spreader Ever Built

GALLOWAY

Get my brand new proposition with proof. Lowest price ever made on a first-class spreader. My agreement to pay you back your money after a 12 months' trial if it's not a paying investment. How's that for a position? You know if I didn't have the best spreader, I wouldn't dare to make such an offer. 40,000 farmers of America have stamped their O. K. on it. They all tried it **thirty days free** just like I ask you to try it. Get out your pencil. Drop me a postal saying, "Galloway, send your new proposition and big spreader book free." Ask about the new, complete steel gear 70 bushel spreader.

H. Guthberson, Gladbrook, Iowa. "Works fine. Spreads all kinds of manure better than any spreader I ever saw. So simple, nothing to get out of repair as compared with other spreaders."

T. F. Stice, Oswega. Kans. "Often pull it with my small buggy team. Does good work. Have always used the —— before. Galloway much the best. If going to buy a dozen more they would all be Galloways."

The William Galloway Company, 859 Galloway Station, Waterloo, Iowa

Price all complete, with our improved shearing head and 4 sets of cutting knives, is ONLY— $9.75

DON'T SHEAR SHEEP WITH HAND SHEARS

It is slow—you don't get all the wool—you cut the sheep—and you make hard work of it for yourself.

Do your shearing with this STEWART No. 8 SHEARING MACHINE

This is the great enclosed gear shearing machine you hear so much about. Every gear is file hard, is enclosed, protected and swims in oil, doing away almost entirely with friction and wear. This machine turns easy, shears fast and gets all the wool. IT MEANS 20 CENTS WORTH MORE WOOL FROM EVERY SHEEP.

Your dealer can supply this machine, or send $2.00 and we will ship C.O.D. for balance. Write for our new 1910 book, "More and Better Wool." It is FREE. Send for a copy today.

It must please and satisfy you or you can return it and we will refund all you paid.

FREE A SHETLAND PONY AND OTHER PURE-BRED LIVE STOCK FREE

The Grandest Opportunity You Will Ever Have. No Other Such Chance In All the World for You. Don't Lose a Moment In Sending us the Coupon Below.

Thornburg, Iowa, Feb. 12, 1910.
FARMERS' TRIBUNE,
Sioux City, Iowa.

DEAR FRIENDS:—
I received my pony this day-noon and I must say he is a dandy. I think you could not have suited me any better. I thank you a hundred times for him, and I certainly will try and work for you again.

I have a very hard territory to canvass but I wrote a great many letters, so I got a good many that way. May I ask how old he is and what is his name?

Oh my, I am pleased. As soon as I can I will take him to What Cheer and get his and my picture taken and send you one. He came through in fine shape, and I have a fine warm stall in papa's new barn. I think his color fine, and his pretty white feet.

Again thanking you for him, I remain, as ever,

Your friend,
LEO MORTON.

The live stock which we are going to give away, absolutely free, is the best to be had. No better stock is found anywhere. The breeders furnishing this stock are known from the Atlantic to the Pacific and from Mexico to Canada. Let us tell you how to secure it.

Additional Live Stock Absolutely Free.

In addition to the Shetland pony, the following live stock will be given away:

HEREFORD BRED HEIFER from breeders of Hereford cattle, E. M. & R. W. Cassady, Props. of Walnut Ridge Stock Farm, Whiting, Iowa.

POLAND-CHINA BRED GILT from a breeder of Short-horn cattle, Poland-China hogs, Shropshire Sheep and Black Langshan chickens. A. L. Mason, Prop. of Greenbush Stock Farm, Early, Iowa.

BERKSHIRE BRED GILT is from a breeder of Percherons, Short-horns, Berkshires and Jerseys. W. S. Corsa Prop., Gregory Farm, White Hall, Illinois.

NORTH STAR RAM comes from the originator and breeder of North Star Sheep, W. W. Bell, Valley Springs, South Dakota.

A SCOTCH COLLIE is furnished by M. A. McCready, Sioux City, Iowa.

THE TRIO OF WHITE PLYMOUTH ROCK CHICKENS is furnished by E. B. Babcock, Prop. of Morningside Poultry Yards, Sioux City, Iowa.

WE WANT YOU to have some of the stock and we are going to help you to get it.

SEND US IMMEDIATELY your name and address in the coupon below. This information as well as the live stock is free. Tear out the coupon and send it to us at AT ONCE.

FARMERS' TRIBUNE, 318 Iowa St., Sioux City, Iowa.

Please send me at once pictures and descriptions of the live stock you are going to give away. Let me hear from you immediately, as I want to get some of your live stock.

Avoid peg or spring-teeth attachments. They merely slide over ground in tough soils. Prices to suit every farmer. Write at once for illustrated Folder No. 64 It's free, and gives Special Introductory price.

THE KRAMER CO., Paxton, Illinois

Clip Your Horses In the Spring

In the spring when your horses are soft and you put them at the hard spring work they sweat a great deal. Their heavy winter coat holds this sweat and it dries out slowly. If left to stand they take cold easily and at night they chill and are liable to all kinds of complaints. If you clip them they dry off fast and there is no question but they stand much less chance of taking cold when dry than if wet. You would not like to stand on a raw spring day or on a chilly spring night with a heavy wet suit on. Neither do your horses. It pays to clip them and blanket, if necessary on cold nights. Your horses dry off much faster, they feel better, rest better, get more good out of their food and do better work. They are better all around. Is it the humane and profitable thing to do. The quickest, least expensive and most satisfactory way to clip is with

The Great Stewart Ball Bearing Clipping Machine

The price, all complete ready for work is only.. .. $7.50 This machine turns easy clips fast and will last a lifetime. We guarantee it for 25 years because the gears are all cut from the solid steel bar They are made file hard. They are enclosed and protected safe from dust and dirt and they run in an oil bath. Friction and wear are practically done away with. It is the only ball bearing clipping machine. It has 6 feet of high grade flexible shaft and the famous Stewart one nut tension clipping knife. This is the noted knife that will stay sharp longer and clip more horses than any other clipping knife ever made. Price of the complete machine all ready to use is only $7.50 Get one from your dealer or send $2 and we will ship you a machine C. O. D for the balance

Mayer Special Merit SCHOOL SHOES

"WEAR LIKE IRON"

They wear best where the wear is hardest. Made of selected leather specially tanned to resist exactly the kind of wear a healthy boy or girl will give them.

Two layers of leather are sewed in at the tip instead of one, to prevent the toes kicking out. The soles are of extreme toughness.

Mayer Special Merit School Shoes are made to fit a child's foot in a comfortable, natural way that will prevent foot trouble in later years, yet they are stylish and good looking. Only the genuine have the Mayer Trade Mark stamped on the sole.

FREE—If you will send us the name of a dealer who **does not** handle Special Merit School Shoes, we will send you, free, postpaid, a handsome picture, size 15x20, of George Washington.

We also make Honorbilt Shoes for men, Leading Lady Shoes, Martha Washington Comfort Shoes, Yerma Cushion Shoes and Work Shoes.

$27.90 to $42.50

The Lowest Prices Ever Quoted for Practical Dairy Separators.

We do not advertise or sell small capacity kitchen separators made to set on a table. Some dealers are representing such toys as practical dairy machines. Our Economy Chief Separators are all big, strong, solid, substantial machines, built for the business of dairying, guaranteed to do the work and produce the profits. Every one is mounted on its own solid base and is of the finest and most substantial construction. Even the smallest Economy Chief, at $27.90 complete, has a skimming capacity of 300 pounds, or 145 quarts per hour. It will skim any quantity from 1 gallon up. Sixty days' trial to every buyer. Fill out this coupon for our free Dairy Guide, the book that tells you all about the Economy Chief Separator.

J. Mackle, secretary Canadian Hereford Breeders' Association.

In addition to the foregoing prizes, if the Grand Champion load of cattle, either fat or feeders, at the American Royal Live Stock Show or the International Live Stock Show in 1910, or at the Fort Worth, Texas, Live Stock Show, or the Denver, Colo., Live Stock Show in 1911, are Herefords, $500 will be added to the awards.

New Book on "Swine."

From the Breeder's Gazette press has just been issued a thoroughly up-to-date, practical book entitled "Swine" by Prof. Wm. Dietrich, chief in Swine Husbandry at the Illinois Experiment Station. It contains more than 300 pages and is fully illustrated. All breeds are historically considered and their commercial merits discussed. All breeding problems and practices are subjected to an edifying analysis, with applicable deductions. Economical pork production is the author's central thought, and in working that subject into a practical system he has incorporated a mass of new and original data. Chapters on feeds and feeding form a large part of the book, and the new information developed in these searching studies represents the most thorough and extended experimental swine work ever undertaken. The management of breeding herds, feeding for market, house plans and diseases are adequately treated. Very readably printed on high-grade paper and strongly bound, the physical make-up of the volume is in consonance with the high character of its contents. For breeders, feeders, farmers and students it is a most useful work.

Orders for the book will be filled by the Breeder's Gazette, 358 Dearborn St., Chicago, at $1.50 postpaid.

SHEEPMEN!

ADVERTISE IN THE LIVE STOCK REPORT. IT PAYS.

The Simplest, Strongest And Most Convincing Of
CREAM SEPARATOR ARGUMENTS

We cannot believe that there is a sensible man living who would put his own money into the purchase of any other than a DE LAVAL cream separator, for his own use, if he would but first avail of the opportunity open to everyone to SEE and TRY an improved DE LAVAL machine before buying any other.

It is hardly possible to say more than this. It is hardly possible to put the simple truth in plainer words. It would hardly seem possible to say it more convincingly.

The TRIAL of a DE LAVAL machine is free to every responsible man thinking of buying a cream separator. We have agents in every locality for this purpose. If you don't know the agent in your neighborhood send to us for his name and address and it will be a pleasure to give your inquiry prompt and courteous attention.

The HARVEST

How the Farmer Controls the Cost of Living

THE cost of living depends on the volume and cost of production. The farmer can determine only partially the amount nature will permit her soil to produce, but he can regulate the cost of his crop by the machines he uses in tilling and harvesting.

The markets of the world are now watching for the results of the grain harvest of the farmers of America. Prepare properly against delays and waste and you will reap rich reward.

The responsibility for wasted grain and profits rests with you.

Choose your harvesting equipment—make your selection before the rush comes—take no chances—avoid experiments either in machines or binder twine.

From experience hundreds of thousands of farmers endorse the adaptability of the I H C line of harvesting machines.

Champion McCormick Osborne Deering Milwaukee Plano

Hundreds of thousands of farmers, hard-headed business men, with the same problems that confront you, have had their problems solved by some one of these machines. They didn't buy because they were prejudiced in their favor—they bought because they were convinced that these machines represented the highest standard of excellence in harvesting-machine construction, because these machines met their requirements, because they thought they were getting the greatest return on their investment.

The experimental period has passed, and efficiency, durability, simplicity, dependability and absolutely interchangeable parts are now at your order. Improvements in time and labor-saving features, finer materials, more skilled and painstaking workmanship are now strictly carried out in the manufacture of these six lines of machines, so that all element of risk on your part is eliminated. With any machine in the I H C line you are safe—for smooth, rapid, uninterrupted, perfect work at harvest time.

Materials, workmanship and quickly available interchangeable I H C parts are backed by the most responsible and trustworthy guarantee in the farm-machine world today. Such perfection would not be possible if the manufacturer did not have available ore mines, steel mills, timber lands and saw mills so as to make sure of the raw materials, and if the buying power and large output did not insure the first choice of raw materials from all other sources—and the ability to employ the right men to work up these materials, and to furnish these men with the most perfect facilities in the world—all this is of equal importance to you. It is these resources, insuring the highest degree of efficiency in every machine turned out, that means the lessening of your responsibility at harvest time, the elimination of most all the risk, the freedom from anxiety and worry and discouragement. Profit by the experience of hundreds of thousands of others who reap all their harvests and all the profit with one of the six leading machines. See the International dealer at once. Take your choice. The quality is the same in all—the best possible. The lines include grain and corn harvesting machines, haying machines and tools.

From the I H C dealer you can get repairs that fit when repairs are needed. Repairs having the I H C standard of excellence can be secured at almost every cross roads or village. This availability is not only a great convenience, but also saves valuable time, which means money to the busy farmer in case of accident in the harvest field.

Don't experiment with binder twine, either. Get one of the seven perfectly dependable brands of twine and be sure. Choose Champion, McCormick, Osborne, Deering, Milwaukee, Plano or International in Sisal, Standard, Manila and Pure Manila brands.

If it is not convenient to see an International dealer, write for full information and the catalogue you want.

Clay, Robinson & Company's LIVE STOCK REPORT

Vol. 20 | Chicago, Friday, March 25, 1910 | No. 12

Highest Cattle Sale of Year.

Holbrook, Neb., was represented on the South St. Joseph cattle market March 17 with 15 grade Hereford steers, horned and dehorned, averaging 1,300 lbs. They were sold by Clay, Robinson & Co. at $8.00 and were marketed by A. C. Remington. The price was extreme top that day and also highest realized for cattle at any of the Missouri River markets for a load of steers of their weight. Up to that date the figure was the highest ever paid on that market in the month of March.

Anticipates Heavier Cattle Runs.

D. D. Cutler, live stock agent of the Northwestern Railroad, with headquarters at Chicago, said that for the first time since last January the Northwestern is in a position to furnish all of the cars that stockmen want. "The blockade that lasted so long has been removed," remarked Mr. Cutler. "We are in a position now to fill all orders for stock cars and move the same to market in good order. We anticipate a more liberal run of cattle from Iowa now. The great bulk of these cattle will be short fed. The number of long-fed cattle in Iowa is the lightest in many years. High-priced feed deterred many from holding their cattle on feed as long as usual, while the attractive prices on the market also contributed to this condition. Iowa is 25 to 35 per cent short of hogs as compared with one year ago. The fed-western sheep have been pretty well marketed from Iowa, but the native flocks are more numerous than ever before."

Record Lamb Price at St. Paul.

At South St. Paul $9.45, which proved top by 10c per cwt and highest ever realized there for lambs, was obtained by Clay Robinson & Co. March 16 for a bunch of 77 lbs average, belonging to W. S. Pattinson of Lake Wilson, Minn. He also had some 111-lb ewes in this shipment which they landed at $7.50, being 25c per cwt above any other firm's sale of ewes. R. Harmsen of the same point had in 91 head of 82-lb ewes to our house on the same date for which they secured $7.50.

Expects Normal Range Cattle Run.

Chas. O'Donnell, the big feeder and rangeman of Billings, Mont., was at our South St. Paul house and speaking of conditions in Montana stated that the winter had been rather uneven, being extremely bad in parts and exceptionally fine in other sections. He judged that the stock loss east and north of Billings would be only normal, while in Billings proper and south the mortality rate would not exceed 10 per cent on the whole. While there are not as many big bunches of cattle as formerly he thought that shipments this coming fall would be about on a par with a year ago, but expected to see the cattle average lighter in weight.

Colorado Lamb Feeders Wrought Up.

Northern Colorado sheep feeders are wrought up over the action of the State Board of Equalization of Colorado, which requires the assessor to list lambs as assessable property in accordance with a recent Supreme Court decision," remarked W. A. Miner, prominent lamb feeder of Greeley, Colo., who is selling a big string of lambs through Clay, Robinson & Co. at Chicago. "This will prove a big detriment to the sheep feeding industry in Colorada. We buy our lambs on the range, where the raisers are supposed to pay the taxes in their respective states, and bill them through to the Missouri River markets or Chicago, feeding in transit. The lambs are in Colorado for only a period of 90 to 120 days. Previously in Weld and Larimer counties they were not, as they are now, considered the property of the feeders, who act only as the middlemen. Most of the feeders operate on capital furnished by the banks, and as the banks pay taxes on their surplus, the listing of the lambs, it seems to me, would in reality be double taxation. It can only result in every feeder getting his offerings out of Colorado before the first of April, when the assesement begins, and finish them in some other state. It is bound to take out a great deal of money from Colorado that otherwise would be left there. The listing of lambs as assessable property is an injustice to one of Colorado's greatest industries. Adding taxes to the present high prices of corn and alfalfa will be a great blow to the Colorado feeders, and will only add to their many other troubles."

A "GOOD ROADS" ARGUMENT.

Colorado Shorn Lambs at $9.75.

Gale & Farr of Greeley, Colo., had 252 head of 84-lb shorn lambs on the Chicago market March 23. Clay, Robinson & Co. landed them at $9.75, highest price ever known for this stock east of the Buffalo market.

Highest Ever Known For Sheep.

Never before was $9.00 obtained for sheep on the Chicago market until March 22, when Clay, Robinson & Co. sold 90 head of 117-lb western wethers at this price for D. Crook of Minooka, Ill. The previous high price was $8 85, paid last week. Next highest price for sheep on Tuesday was $8.75, Clay, Robinson & Co. selling for Mr. Crook 148 western wethers of 116 lbs average at this figure. Clay, Robinson & Co. also topped the ewe market on that day by landing 31 head of 109 lbs average at $8.25, these belonging to George Crook of the above place.

Indiana Wethers Top Trade.

Up to and including March 17 the highest price ever obtained on the Chicago market for a load of shorn wethers was $7.90. Clay, Robinson & Co. negotiated a sale at this price with 411 shorn western wethers of 110 lbs average, belonging to J. W. Appleman of Stroh, Ind. The next highest figure was $7.85, which they also secured for 191 shorn western wethers, averaging 117 lbs, marketed by A MacQueen of Silver Creek, Neb.

Holding More Brood Sows.

Our South St. Joseph house writes us as follows: "Relative to comparative hog receipts here, we would say that there was a shortage in the month of January of 15 per cent as compared a year ago and February shows a shortage of 26 per cent and for the coming three months we believe, from the best reports obtainable, the shortage will be somewhere from 25 to 40 per cent. This does not necessarily mean the shortage of so many hogs in the country, but the fact must be taken into consideration that many more sows are being held now than a year ago, which affects the shortage on the market now more than in the real supplies.

NOTICE!

Our "complimentary" mailing list has become so large that it is no longer possible to print the enormous editions required to cover same—to say nothing of cost of postage and other expenses.

It therefore becomes necessary to immediately cut off several thousand names, and these are now being taken from those who have been receiving the paper free for six months or longer.

From now on we can send the paper REGULARLY only to those who enroll as paid subscribers. Non-subscribers may continue to receive occasional copies, but the only way to insure receiving every issue is to subscribe. The subscription price is fixed at only 50 cents per year, which barely covers cost of postage. Payment of this nominal sum, however, will show us that you appreciate the paper and make it worth while for us to send it to you.

As a special inducement to send in your subscription at once, we will, provided you forward same as promptly as you conveniently can after reading this notice, send you, free and post-paid, a useful little premium.

This, if you have not heretofore been a paid subscriber, will entitle you to the paper for A FULL YEAR FROM NOW—no charge for the time you have already received it. This does not apply to renewals sent in by persons who are already subscribers. Such renewals of course date from the subscriber's expiration date.

Cattle Highest in Thirty Years.

How much higher are prices for cattle going and what will be the decrease in receipts during the next two or three months? These are the paramount questions with both Stock Yard traders and cattle feeders. Quality considered, the market for beef steers, barring the prime kinds, is the highest in nearly thirty years. As compared with one year ago prices are around $1.25@1.50 higher. With the general demand so good and with assurance that pork and mutton will continue high in cost, is it not logical to anticipate a continuation of a strong, if not still higher, market? That stocks of beef in packers' coolers have been heavily drawn upon is evidenced by their buyers' activity in the trade. Eastern shipping demand is of the hungry and insistent sort, not far from 50 per cent of last week's total arrivals going on this account. And eastern buyers are just as keen bidders this week. The broad outlet for beef is only a reflection of the prosperous condition of industrial affairs in both the East and the Middle West. And there is no perceptible cloud on this clear, bright horizon. Another bullish feature is that Lent is practically over. There seems to be no fear of any great increase in receipts at Chicago for the good and sufficient reason that most of the forced liquidation is at an end and those who have cattle in the feed lots are very bullish. The other leading markets, as we have stated before, report a shortage of cattle on feed of 25 to 50 per cent from one year ago. If there are any cattle traders who have bearish ideas they are not voicing them at this time.

Record Prices for She Cattle.

Never before have such high prices been realized for cows and heifers as this week. It is true that $8.25 was paid for fancy heifers in July, 1902, but we are speaking of the prices the great bulk of arrivals are making. As compared with the famine supply months of July and August, 1902, the previous highest months for cows and heifers, current rates for the low-grade and medium kinds are anywhere from 50c@$1.50 higher than then, canners and cutters displaying most gain. Barring the prime heifers, other classes are going around 25c up from the above months. How much higher prices will ascend depends upon the ability of consumers to foot the meat bill. There seems to be no relief for the buying interests, as supplies are down to very low levels in the country and the trend of beef steer prices is upward. Reflecting the high basis to which the market for cows and heifers has climbed, we cite a few representative sales at $6.25 and higher made by Clay, Robinson & Co. during the first half of this week:

No.	Kind.	Av.	Price.
21	heifers and steers	1034	$7.75
15	heifers and steers	1025	7.35
25	heifers and steers	1117	7.25
14	heifers and steers	1103	7.15
5	cows	1382	7.25
22	heifers	710	7.10
6	cows	1350	7.00
6	Montana hay-fed heifers	755	6.90
2	cows	1200	6.85
17	heifers	920	6.75
16	cows	1110	6.75
6	cows	950	6.65
5	heifers	897	6.65
1	cow	1310	6.55
6	cows	1200	6.45
5	heifers	663	6.40
8	cows	1220	6.25

Record Figure at Buffalo.

H. B. Lewis of Stroh, Ind., was on the East Buffalo sheep market March 17 with 159 wethers, averaging 120 lbs, for which Clay, Robinson & Co. secured $8.80. Up to that day this figure had never before realized on that market for wethers.

Landed Nebraska Beeves at $8.40.

William M. Stephens, prominent farmer and feeder of Harvard, Neb., was on the Chicago market March 17 with 42 beef steers of 1,508 lbs average which Clay, Robinson & Co. sold at $8.40, a price that was highly satisfactory to Mr. Stephens. These cattle were branded Sandhills and were rather coarse. When Mr. Stephens put these cattle in the feed lot they averaged around 1,200 lbs and cost him $4.00. They were on feed about five months, although on full feed only about three and one-half months. Snapped corn and alfalfa consisted of the ration. Mr. Stephens was accompanied by his son, Master James, who took keen interest in the handling and selling of the cattle.

Colorado Lambs Bring $10.10 at Omaha.

J. H. Nix was on the South Omaha lamb market March 18 with 515 Mexicans of 75 lbs average. Clay, Robinson & Co. sold them at $10.10, up to then highest price ever paid on that market for lambs.

Cost $4.85 and Brought $7.75.

J. L. Tull represented Arapahoe, Neb., on the South St. Joseph cattle market March 17 with 49 branded western beeves, averaging 1,257 lbs, for which Clay, Robinson & Co. obtained $7.75, top of trade for their class. These cattle were fed by Mr. Tull and were bought on the Denver market last October by Clay, Robinson & Co. at $4.85, freight paid to the River. They had been on full feed but three months. Mr. Tull expressed himself as highly pleased with the results of the purchase and sale of the cattle.

Farmers Holding More Corn.

According to the Government crop report, the quantity of corn in farmers' hands March 1 was 1,050,865,000 bushels, as against 1,047,760,000 bushels March 1, 1909, largest for any similar date since 1907, when 1,297,979,000 were recorded. The average for the past ten years is 925,386,000 bushels. It is estimated that about 23.1 per cent of the crop will be shipped out of the counties where grown, as compared with 21.3 per cent of the 1908 crop and against an average of 20 per cent for the past ten years. The proportion of the total crop which is merchantable is estimated at 82.6 per cent of the 1909 crop, which, barring 1908, is the smallest since 1904 and compares with a ten-year average of 83.6 per cent.

Kansas Shorn Lambs Sell High.

E. L. Lemert of Severance, Kan., marketed 273 shorn lambs of 82 lbs average at South St. Joseph on March 16 and Clay, Robinson & Co. sold them at $8.75. Up to that day this figure was the record by 45c per cwt. Mr. Lemert says that it paid him well to clip these lambs, as he realized an average of about 6 lbs of wool per head, which is easily worth $1.50 and his lambs would not have realized more than $9.75 there that day with the wool on.

Colorado Yearlings at New Price.

The record price for yearling sheep was smashed to smithereens at Kansas City on March 17 when Clay, Robinson & Co. sold 447 head, averaging 73 lbs, for Colt & Son of Las Animas, Colo., at $9.40. The previous high mark up to then was $9.00, also obtained by our house March 15.

Previous Lamb Price Records Smashed.

Thaxton Bros. of Las Animas, Colo., were represented on the South St. Joseph lamb market March 17 with 699 Mexicans of 74 lbs average. Clay, Robinson & Co. landed them at $10.10, up to then highest price ever obtained for lambs on that market.

The Colorado of Today.

Sheepman of Old School.

Alex MacQueen of Silver Creek, Neb., was on the Chicago sheep market last week with a string of wethers which sold at $7.50@7.85, we handling the offerings that brought $7.75@7.85. He expressed his entire satisfaction with the prices we obtained for his offerings. At the start of this season Mr. MacQueen had in his feed lots 1,500 wethers and 2,500 lambs, and since then has taken on 1,500 more lambs. He is a feeder of the old school, having been associated with some of the most renowned flockmasters in Scotland, and his fame as a finisher of sheep in this country is widespread. Mr. MacQueen is of the opinion that the sheep feeding business is fast getting into the hands of the party who handles a small flock and raises most of his own feed, the big feeder being at too big an expense and taking on too much risk to continue operating extens'vely many more years.

Silage-Fed Cattle Do Well.

G. R. Clayton and S. L Johnson, prominent breeders of pure-bred Herefords, as well as successful farmers and feeders of Monon, Ind., were on the Monday market at Chicago with cattle to Clay, Robinson & Co., who sold the heifers and steers mixed, including five steers, of 1,025 lbs average at $7.35, a cow at $7.25, top of the market, and a bull at $6 50, also a top price. Both gentlemen agreed that the heifers and steers brought $1.00 per cwt more than they expected and the cow $1.25 per cwt more than they anticipated. All of the cattle had been fed corn silage since Nov. 1, which was in the nature of an experiment. Broken corn and wheat straw were the other feeds These gentlemen said that they were enabled to cut the regular corn ration without silage down fully 50 per cent and besides the cattle made the best gain they ever recorded in the face of one of the worst winters in their experience. Both Mr. Clayton and Mr. Johnson have been regular patrons of Clay, Robinson & Co. for the past four years.

Few Sheep Being Fed at Twin Cities.

Redmond Bros. had on the Chicago lamb market Monday a string of 1,362 shorn westerns from New Brighton, Minn., which Clay, Robinson & Co. sold at $9.40. On March 19 Sam Redmond marketed 1,048 shorn westerns, averaging 74 lbs, Clay, Robinson & Co. selling them at $9 60, up to then highest price shorn lambs had ever made. All of the above lambs were purchased late in October by Clay, Robinson & Co. at South Omaha at $5.80@6.10. They averaged more than 5 lbs of wool per head and wool sold at 25½c per lb. James Redmond, who accompanied the Monday shipment, said that they did not expect over $9.25 for either shipment of the lambs.

"There is a very scant number of sheep and lambs on feed at the New Brighton and Wyman Yards," remarked Mr. Redmond. "We are the only ones feeding there this season. Only a few years ago the number on feed reached 200,000 head. The decrease has been brought about by the great advance in the price of screenings and the elimination of the big sheep feeder. At the South St. Paul Yards I understand there is only around 5,000 head on feed, as against 250,000 a few years ago. At both the New Brighton and Wyman Yards the fences are being pulled down and the gronnd planted to potatoes and corn."

Good Many Losses in the West.

John C. Burke of Pocatello, Idaho, was a pleasant caller at our office. Mr. Burke was one of the pioneer commission men on the Chicago market, having engaged in the live stock business here in 1871 and continued in same nntil 1900, when he was forced to go west in search of health. He is now one of the most prominent cattlemen in Idaho and ships liberally to Clay, Robinson & Co. every season.

"The western country was in the grip of the worst winter in many years," said Mr. Burke, "and a great many losses occnrred in both cattle and sheep. Heavy falls of snow and sleet rendered it impossible to get feed to live stock in many sections. Wyoming and Montana were the greatest snfferers. The losses in Idaho were not so great, as both cattlemen and sheepmen were better prepared to take care of their stock. The small cattle owners were the ones to snffer the most loss. There will be qnite a decrease in the lamb crop throughout the western range country on account of the hard winter, as well as a redneed clip of wool, although the sheepmen will not be seriously hurt financially, owing to most of them being in a most prosperons condition. We are having most excellent weather now and both the cattle and sheep interests are assured of lots of feed and water. Never before was so much hay fed in the West and there are not very many hay stacks to be seen at this time."

Quarantine for Sheep Scab.

As a result of the efforts of federal and state authorities to eradicate the disease known as sheep scab, an order has been issued by the Secretary of Agriculture, effective March 15, releasing from quarantine Washington and large portions of Oregon, Nevada, Utah, Colorado and Arizona, as follows: That portion of Oregon lying east of the Cascade Mountains; the counties of Lincoln, Clark, and Nye, in Nevada; the connties of Beaver, Piute, Iron, Garfield, San Juan, Washington and Kane, in Utah; all of Arizona except Navajo and Apache oounties, and all of Colorado except the connties of Conejos, Rio Grande, Saguache, Huerfano, Castilla, Las Animas, Baca, Bent, Prowers, and portions of the counties of Montezuma, La Plata, Archuleta, Pueblo, Otero, and Kiowa. The release of so large an area at this time indicates the good progress made during the past year in the work of stamping out this disease, which is a great handicap to the sheep industry.

Stock Raiser Discusses Hog Situation.

"Patrick Cudahy strikes the keynote when he says if there had not been 4c hogs two years ago there would not be 11c hogs now. There was no oversupply at that time. Had they paid prices that would have given the farmer a fair price for his corn hogs could be bought in Chicago today not to exceed 9c. Packers took advantage of the panic, which by the way was a blessing in disgnise to them. Had they been able they would not have allowed the farmers 10c per bushel for their corn. At that time many of the farmers went out of the hog business and said if the packers wanted large droves of hogs they would have to raise them themselves as far as they were concerned. It will take more than one season of high prices to get them to try it again. I raised 200 shotes that year and in August and September I felt rather proud of them, but later on when I had fed nearly all my corn to them and they weighed 230 lbs at eight months old and tried to sell them I thought I never wanted to see another hog. I sold them for $4.27½ and the shipper lost nearly $100 on the bunch. I then had 30 fine brood sows and cut them down to 10 sows. Men who kept about 15 brood sows cut them down to one, two and some not keeping any. When we were all feeding 50c corn the packers' men were around that fall predicting 3c hogs inside of 60 days. It showed what they wanted to do if they could, and when you look at the price they sold ham and bacon at in 1909 you would naturally think they had paid a fair price for hogs the fall before."

J. M. Kyle, a prominent stockman and farmer Merrick county, Neb., was on the South Omaha market March 16 with stock that our house sold at quite a satisfactory price.

Notice.

We shall appreciate it very much if any of our readers who by mistake are receiving more than one copy of the REPORT, or whose paper is erroneously addressed, will immediately advise us. In cases where, by reason of a difference in the spelling of the name or any other canse, a reader receives more than one copy it of course entails upon us a donble expense for postage without being of any benefit to the recipient. Our readers will confer a highly appreciated favor by thus assisting us to keep our mailing list corrected. In case you are getting two copies please send us the wrappers from both so we may locate the error.

Many Kentucky Lambs Lost.

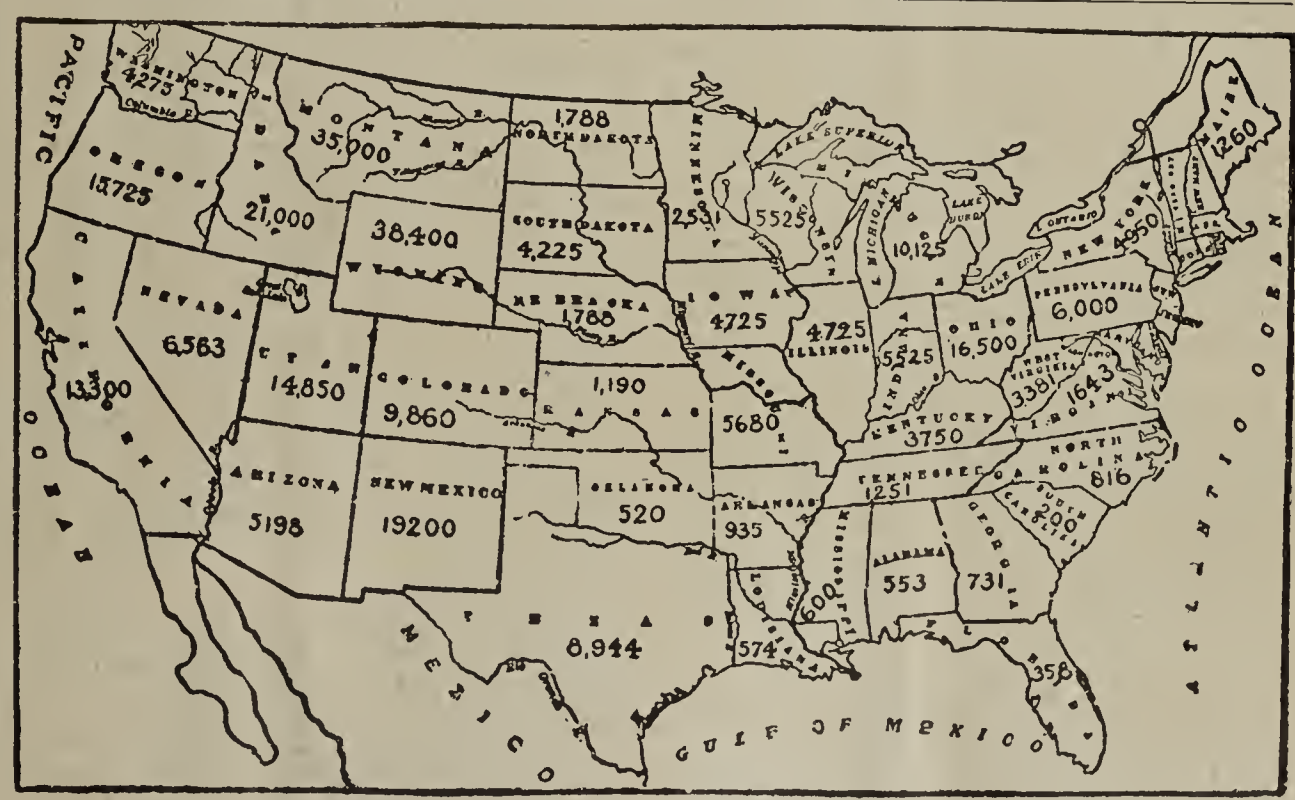
John T. Bowles & Co., prominent sheep dealers of Louisville, Ky., write our Chicago house as follows: "In regard to our lamb crop in Kentucky, the raisers have lost fully 30 per cent of the lambs that have been dropped and about 15 per cent of the ewes have died. Tennessee has not lost many, being about 10 per cent in lambs and very little loss in ewes. The traders here are paying $7.00 for June delivery of spring lambs and $6.50 for July. A good many farmers will not price their lambs at present."

For Permanent Sheep Show.

An effort is being made to establish a permanent International Sheep Fair, to be held in Chicago in September or immediately after the fair circuit is over. The show is to be exclusively for sheep, with all breeds represented, and to include goats, collie and sheph rd dogs, wool and mohair exbibits, sheep butchering contest, sheep dipping and a lot of other exhibits that will make it interesting and educational. It will not be a fat stock show, although feeding experiments will be conducted in a limited way by the agricultural colleges. In conjunction with this show will be a combination sale for show, breeding and carload lots of sheep. It is an affair that merits the support of everyone interested in the sheep industry, and it is hoped that the show will be held this coming fall.

Going Home Much Pleased.

George Belmont, the well-known feeder of Brush, Colo., writes our Chicago house as follows: "I want you to know that I have absolute confidence in your judgment and want you to order those lambs in whenever you feel so disposed, or keep them out another month if the market does not look good. I am going home feeling very mnch pleased with your week's work. It was well done."



WOOL PRODUCTION IN UNITED STATES FOR 1909

The above map prepared by the national association of wool manufacturers and issued in their magazine of December 1, shows the wool production in states and territories of the United States for the year 1909. The numbers represent pounds production, three 0's being omitted. Owing to the small scale of map, the figures for the following states are illegible in the accompanying reproduction: New Hampshire 434,000 pounds, Vermont 1,170,000, Massachusetts 210,000, Rhode Island 40,000, Connecticut 190,000, New Jersey 242,000, Delaware 40,000, Maryland 625,000.

Among Our Customers.

Albert Wilcox, Dunn county, N D.: "Stock has wintered fine in this part of the country."

Our Sioux City house March 22 sold 18 beef steers, averaging 1,465 lbs, at $8.10, the top price, for O. Plummer, Woodbury county, Ia.

Top for hogs at Kansas City on March 16 was $10 65, obtained by onr house for 53 of 323 lbs average, shipped by Henry Heiman, Mitchell county, Kan.

C. A. Swedeburg, Hamilton county, Neb., had 30 head of 294-lb hogs on the South Omaha market March 17 for which our house obtained $10.60, extreme top for the day.

R. Whistler & Son, Fremont county, Ia., marketed 71 head of 225-lb hogs on the March 21 market at Chicago and we sold them at $10.90, summit for swine of this weight.

W. W. Peters, Scotts Bluff county, Neb., was on the South Omaha market March 16 with a car of western ewes that averaged 88 lbs and onr house sold them at the top price of $7.75.

At Kansas City on March 22 top hogs went at $10.65, this price being obtained by our house for 67 head of 259 lbs average. They were marketed by M. L. Beckman, Riley connty, Kan.

C. A. Forsell, prominent dealer in live stock, Henry county, Ill.: "Cattle and hogs are pretty well cleared up in this part of the country and the cattle that are left are in very strong hands."

J. R. Clements, Ransom county, N. D.: "We have as much stock in our section, if not more, as in previous years, and the same is in good condition. We had an exceptionally fine yield of corn."

A. W. Morris, Nance county, Neb., was at South Omaha on March 16 with a car of 1,243-lb steers which our house sold at $7.35. Mr. Morris was well pleased with the condition of the trade at this time.

J. M. Schell, Pocahontas county, Ia.: "There are not many cattle in the feed lots in this part and hogs that are suitable for market are scarce. The weather is nice and corn picking is on in full swing."

Randolph county, Mo., was represented on the March 21 hog market at East St. Louis with 96 head of 276 lbs average. They were sold by our house at the top price of $11 and were marketed by Wilcox & Littrell.

The 72 head of 230-lb hogs which brought $10.85 at East St. Louis on March 17, or 5c per cwt higher than any other hogs brought, were marketed by Sims & Smith, Cooper county, Mo., and sold by our house.

J. S. Rue, Custer connty, Mont.: "Snow is all gone from here except the drifts in the ravines. The large drifts will keep water holes filled until late in the season. The losses in cattle and sheep will be more than the average here."

On March 16 E. S. Leavenworth, Hall county, Neb., had two doubles of 68-lb Mexican lambs at South Omaha which our house landed at $9 85, extreme top for the day. He also marketed two more doubles on the following day which sold at $10.

Fred Schulte, Pierce county, Wis.: "Fat stock is pretty well shipped out in our neighborhood and I do not believe there will be much of anything moving marketward for some time, as the farmers will commence seeding in the next few weeks."

We topped the Chicago hog market March 17 in both the butcher and light weight departments, landing 68 head of 252 lbs average at $10.85 and 78 head, averaging 199 lbs, at $10.75, the latter being marketed by R. Wistler & Sons, Fremont county, Ia.

Top price for light weight hogs at Chicago on March 16 was $10.75 and our sales at this figure follow: For Richards & Fisher, Rock Island county, Ill., 60 head of 195 lbs average, and Thompson Bros., Whiteside county, Ill., 67 head of 197 lbs average.

On Monday our Chicago house topped both the butcher and light weight hog market with the following sales: For W. C. Sorenson, Shelby county, Ia., 70 head of 238 lbs average at $10.95, and for William Mann, Rock county, Minn., 22 head, averaging 199 lbs, at $10.87½.

C. E. Woodall, Cherokee county, Ia.: "Fat cattle are pretty well cleaned up around here and stock cattle are scarce and hard to get. Parties are buying other kinds of stock to fill up on at all kinds of prices. There is a shortage of brood sows. Corn that was out all winter is poor stuff."

W. Widick, Webster county, Ia., was on the Monday market at Chicago with a load each of cattle and hogs. Mr. Widick is a prominent shipper, being on the market every week with several loads of stock. He is a regular patron of Clay, Robinson & Co., having shipped to us for many years. He believes in letting well enough alone.

J. E. Murphy, Clinton county, Ia., was on the Chicago cattle market March 16 and included in his shipment were 17 Angus steers of 1,323 lbs average which we sold at $8 10. This was his initial shipment of cattle to Clay, Robinson & Co. and he was extra well pleased with the handling and selling of same. Mr. Murphy is a prominent breeder of pure-bred Angus cattle.

James R Burr of Matador Land and Cattle Co., Dewey county, S. D.: "The weather cleared on the first of the month and has been fine ever since. Snow is nearly all gone, cattle are filling up and there is an abundance of fine grass, being as good as it was last fall, having been in 'cold storage' all winter We need fine weather from now on and if given same we will get through in good shape."

William C. Wilson, Chouteau county, Mont.: "The weather is fine and stock looks good. There is plenty of feed on the ranges yet, both hay and grass. You will find a shortage of fat cattle from here next fall, for they were cut very close last fall, the shortage being mostly in four-year-olds and cows. Four-year-olds ought to be fine if the summer is favorable, as they will go out with a good coat on them. It is very warm at present."

Help Those Who Help You

The firm that is able to put prices for cattle, hogs, sheep and lambs a notch higher is a benefactor to the feeding interests in many important ways. The chief one is that the market is put on a higher basis for all kinds. When tops are boosted to a higher level, that helps to lift rates for the lower-priced offerings. For a considerable period not a week has passed that Clay, Robinson & Co. have not sold stock in all departments of the trade at new high prices for the year. This renders it possible to get higher prices for the less desirable grades. A good turn deserves another. If you agree with this, then reciprocate by billing that next load by the old reliable route—"CLAY, ROBINSON & CO." at any one of the ten leading markets. There is no good reason why you should not. However, there are many good reasons why you should.

D. O. Wilson, one of Missouri's extensive farmers and raisers of hogs, with headquarters at Rothville, was at Chicago on March 17 with a load of hogs which we sold at $10.67½. "This was my first shipment to Clay, Robinson & Co., and I must say that I am more than delighted with the service rendered me." Mr. Wilson has marketed 640 hogs during the past 14 months and operates a farm of 1,426 acres. He is a fancier of Duroc Jersey hogs.

Carl Bayer, of the well-known Bayer Sheep Co., Natrona county, Wyo.: "The lamb crop will be very small on account of the hard winter. I for my part will do well to get 400 lambs out of 3,000 ewes. I have had about 30 per cent loss so far. There are a good many in the same fix, only most of them won't tell because of having quite a little borrowed money. Enclosed find $1.00 for two years' subscription to the REPORT. I overlooked the expiration date in February."

John Walenta, well-known breeder of Angus cattle and also a prominent feeder and shipper, Winneshiek county, Ia., was at Chicago on Monday with a load of cattle which we handled to his entire satisfaction. This was his initial shipment to us. These cattle were of his own raising and were merely warmed-up, numbered 25 head, averaged 1,109 lbs and brought $6.75. He was forced to market them owing to the inability to get feed because of the wretched condition of the roads.

Thomas Andrews, of the prominent and regular shipping firm of Andrew Bros., Knox county, Ill, was on the March 18 hog market at Chicago with two loads for which we obtained satisfactory prices, according to Mr. Andrews. "There are more than the usual number of brood sows in my part of the country and every effort has been made to bring about a big crop of pigs. Of course it is too early to tell what the outcome will be. There are very few cattle on feed and I never saw stock cattle so scarce as now."

W. E. Parmenter, progressive feeder, Polk county, Ia. was at Chicago on Monday with 25 head of 1,109-lb cattle which Clay, Robinson & Co. sold at $7.50, and also a load of hogs, which made a satisfactory figure. These cattle had not been fed quite five months and he was offered $6.50 at home for same. Mr. Parmenter has been feeding the past five years and during all that time has steadily shipped to Clay, Robinson & Co. with the exception of once, when he strayed away from the straight and narrow path of the "Service that Suits," and lost money thereby.

Peter Johns, Grant county, Wis.: "Both cattle and hogs are extremely scarce in our section. Where formerly it was no trouble to pick up a load of hogs in a day, it now requires three or four to gather up a car. Our crops the last season turned out well. Although quality of corn on an average was not good, we had lots of it, growing from 50 to 60 bushels to the acre, while the oat yield ranged from 35 to 45 bushels. We have had lots of snow and for a time hay was costing up to $20 per ton, owing to the bad condition of the roads. However, good hay can now be had $12@14 per ton."

On March 15 our South St. Joseph house topped the hog market for full loads with 68, averaging 274 lbs, at $10.70, shipped by Jacob Claassen, Gage county, Neb. On the same day they secured the top for light weights by 5c per cwt on 117, averaging 197 lbs, at $10.55, belonging to H. S. Rhoades, Atchison county, Mo., as well as scoring the next highest sale with 64 averaging 199 lbs at $10.50, shipped by Fritz Hanrath, Atchison county, Mo. On the same day they sold for C. G. Comstock & Son, Gentry county, Mo., a load of 216 lbs average at $10.60, being 10c per cwt higher than anything else of their weight.

Colorado Cattle at Record Price.

The Great Western Sugar Co., with headquarters at Denver, Colo., and feeding plants at Sugar City, Eaton and Rocky Ford, Colo., marketed 17 head of 1,344-lb beef steers at Kansas City on March 21 and Clay, Robinson & Co. sold them at $8.00, highest on record for Colorado-fed cattle. Next highest price was $7.90, also being obtained by Clay, Robinson & Co. for 51 head of 1,305 lbs average, belonging to Wilcox Bros. of Brush, Colo.

Wanted $9.50; Got $10.25.

"When I left home I would have been delighted to have been assured of getting $9.50 for my lambs," remarked F. B. Shattuck of Eaton. Colo., who was on the Chicago market last week with 743 head of 73-lb Mexicans, which Clay, Robinson & Co. sold at $10.25. "You may imagine my surprise and elation over the sale of my offerings at $10.25. Clay, Robinson & Co. are certainly O. K. in every respect." Mr. Shattuck is one of the extensive farmers, land owners and lamb feeders of Northern Colorado.

What Jim the Groom Said.

DEDICATED TO JOHN CLAY BY RED HUSSAR.

Man and boy, I've been a "grum" for close on forty year;
Born in the stable, so to speak, and you may think it queer,
That of all the nags I've rode and strapped, I've never seen a 'oss,
As master's bought, but what 'e sold at something of a loss.

He'll give five 'undred sovereigns for one up to his weight,
A 'oss what's sound, and gallops low, and does a five barred gate
With sixteen stun upon 'is back, for that's what master rides,
For if they can't, to me 'e says, "They are not worth their hides."

'E's a bruiser for a big un, so 'elp me bob 'e is,
'E don't want no "jumpin' powder," 'e don't want no bally "fizz,"
But what he want is just a 'oss well up to sixteen stone,
A 'oss what takes 'em in his stride, a 'oss what brings 'im 'ome.

Gord luv me, 'e ain't sittin' up and drinkin' over night,
For 'e's a peep-o'-day boy, allus up afore it's light,
And all through the 'untin' season, a'ore 'e goes to bed,
'E comes and sees the 'osses, that they're all done up and fed.

And the reason why the master allus sells 'em at a loss,
Is just because 'e allus buys a 'oss what is a 'oss,
A 'oss what's worth the money as the master pays for 'im,
And one as lasts a lifetime, just as sure as my name's Jim.

—From Bit and Spur, N. Y.

Montana Hay-Fed Heifers at $7.00.

On March 23 our Chicago house landed Montana hay-fed heifers at the record price of $7.00, as well as obtaining the next highest price ever paid—$6 90. G. W. Spiing of Belgrade, Mont., was the shipper of these heifers, as well as the steers, all of which went on local slaughtering account, barring the 16 head at $6.40, which went on feeding account. The sales of the hay-fed offerings follow:

No.	Kind.	Av.	Price.
21	Montanas	947	$6.85
16	Montana feeders	863	6.40
2	Montana heifers	830	7 00
6	Montana heifers	758	6.90
2	Montana heifers	755	6.00

New High Price for Feeding Lambs.

James Watson of Fort Collins, Colo., was represented on the Chicago lamb market March 23 with quite a string of offerings. Included in the same were 240 head of 70-lb western lambs which Clay, Robinson & Co. sold on shearing account at $9.85, highest ever paid for offerings to go back to the country.

Warm Days; Dead Hogs.

Invariably following first warm days in spring platforms of unloading chutes at stock yards are strewn with dead hogs. Wednesday of this week one car on arrival at Chicago yards contained eighteen "deads." Swine appear peculiarly susceptible to over heating and less able to withstand a sudden rise in temperature in the spring than in mid-summer. Possibly owners exercise more care in handling them in hot weather. It pays to give hogs good care at all times, more especially at the present high range of values. Exercise discretion in moving hogs to loading points, see that they are not worried and heated, in loading have cars clean bedded with sand or cinders and above all do not overload.

Colorado Lambs Make Record Price.

It was March 22 that our South St. Joseph house landed lambs at a record price there. On that day they sold for C. A. Thomas of Las Animas, Colo., 500 Mexicans of 76 lbs average at $10.25, summit over any other firm's sale that day by 15c per cwt. The next highest price was $10.20, secured by Clay, Robinson & Co. for two doubles of 63-lb Mexicans, belonging to Ed. Mascher of the above place.

Wool Contracting in West Has Ceased.

Late advices from Utah tell of inactive trading and the outlook rather uncertain. The growers have suffered more than for ten years past. The clip will be short in weight. It is estimated that around 5,000,000 lbs have been contracted for. Very severe storms occured in Southern Montana and Northern Wyoming and losses are thought to be very heavy. Most of the early shorn Arizona wools have been forwarded on consignment to Boston, according to the American Wool and Cotton Reporter, and a small portion of the early clip brought 20@22c. Owing to the drought and lack of feed shearing was stopped after about one-half of the wool had been taken off. A good many of the lambs died, there not being enough feed to support the mothers, and the sheep were driven back again to the foothills.

Highest Western Lambs Ever Sold.

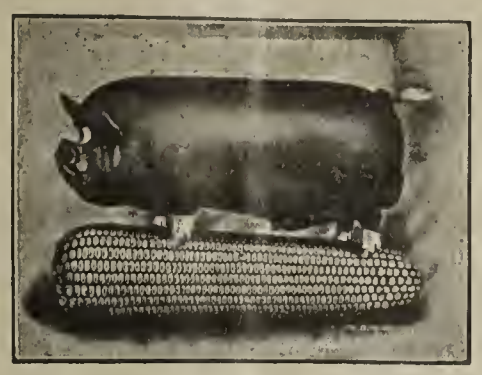
J. F. Carlson of Sublette, Colo., was on the South Omaha market March 22 with a shipment of 79-lb western lambs which Clay, Robinson & Co. landed at $10, highest ever paid there for westerns. On the same day Clay, Robinson & Co. sold for J. L. Nichols of Longmont, Colo., two doubles of 72-lb lambs at $10.25 and for Theodore Jacobson of Goodrich, Colo., three doubles of 88-lb lambs at $9.80.

New High Price for Lambs.

On March 22 Clay, Robinson & Co. sold at East St. Louis for O. T. Mann of Prowers, Colo., 549 lambs, averaging 59 lbs, at $9.90, which is the highest price ever obtained for Colorado lambs on that market.

Kansas Lambs Make New High Price.

Clay, Robinson & Co. on March 21 obtained $10.25 for lambs at Kansas City. This price was 15c per cwt higher than any other lambs made that day and also highest on record. The lambs, numbering 274 head and averaging 56 lbs, were marketed by F. J. Oliver of Wichita, Kan. Clay, Robinson & Co. also sold for Mr. Oliver 38 spring lambs of 32 lbs average at $15, as high as ever paid on that market for springers.



Money Makers.

If you wish to own an auto
That will travel fast and far,
If you have a dear desire
For a splendid private car,
Raise a pig.

If your daughter yearns for jewels
That will make a lurid blaze,
Or your wife would be a leader
Where some other matron sways,
If you wish to give up toiling
And in comfort spend your days,
There's a way—don't overlook it—
Raise a pig.

If you're sick of serving others
And are looking for a change,
If you wish to gaze at wonders
That are far away and strange,
Raise a pig.

If your son would squander money
On a chorus girl,
If you wish to own a castle
Having walls inlaid with pearl,
If your darling daughter wishes
To be married to an earl,
There's a way—don't overlook it—
Raise a pig.

If within the senate chamber
You would like to hold a seat,
If you wish to be untroubled
By the rising price of meat,
Raise a pig.

If you wish to get from under
The big burdens which you bear,
If you wish to go to Wall street
And create a furore there,
If, in short, you have a longing
To become a millionaire,
There's a way—don't overlook it—
Raise a pig.

—S. E. Kiser in the Record-Herald.

For a complete realization of the above, "The Pig" must be shipped to that commission firm having a full knowledge of his worth and possibilities as a market topper.

IT PAYS WELL TO SHIP TO

Clay, Robinson & Co.

Slaughter at Leading Markets.

Below will be found the slaughter of stock at the ten leading markets in 1909 as compared with 1908. The figures were obtained by the LIVE STOCK REPORT from official sources. While most of the points show an increase in cattle and sheep, all of the points, barring Denver and Fort Worth, display a decrease in hogs. Chicago and Denver were the only places to have a decrease in cattle, while Denver, Fort Worth and East Buffalo were the only ones to display a falling off in sheep. Only at two points was there no net gain in the total number of animals slaughtered, these being Denver and Forth Worth.

Slaughter of cattle, hogs and sheep at the ten leading markets for 1909, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

*Net gain. †Net loss.

Dakota Cows Sell at $6.75.

N. M. Poulsen, Vermilion, S. D., had a shipment of cattle on the Chicago market March 22, same being sold by Clay, Robinson & Co. Included in the consignment were 16 cows of 1,111 lbs average which went at $6.75. This price was the highest ever known in March for a full load of cows and was top for the year. The other offerings included 21 heifers and steers mixed, averaging 1,034 lbs, these going at $7.75. The lot included 11 heifers.

No Shipments are Too Small.

That the "small shipper" is aware of the fact that he can get best results from his shipments by sending them to Clay, Robinson & Co. was well illustrated last week by our Kansas City house, which received two consignments by express instead of by freight, as is the usual manner. One consignment consisted of a calf, which came in a crate from Missouri, and was sold at $9.00 per cwt, and the other was a stag hog, weighing 560 lbs, which was also sent in a crate by express from a Missouri point. The express charge on this latter animal was $4.90, but at that the net proceeds from its sale amounted to $42.89. Also our Chicago house Tuesday of this week received a stag by express which they sold at $11.75, the animal weighing 650 lbs.

NATIVE BEEF STEERS.

Range of prices and bulk of sales of native beef steers this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Range.	Bulk.
This week.....	$5.75@8.85	$6.85@8.35
Previons week.....	5.50 8.65	6.50 8.10
Year ago.....	4.65 7.15	5.35 6.60
Two years ago.....	4.85 7.35	5.75 6.85

Marketing of cattle Thursday 4,876. Prices ruled strong to 10c higher, wsighty kinds showing most strength. Demand on eastern shipping and local dressed beef account was good. Top $8.65, paid for very choice 1,417 to 1,443 lbs average. Run Friday 1,733 Good to choice offerings 10@15c lower and other kinds steady sale. Bsst besves at hand went at $7.85 for one load of 1,247 lbs average. As compared with close of previous week the price gain was mostly 25c.

Receipts on initial market day this week 19,645. Market held strong tone. Packer bnyers were lively bidders and shipping demand was broad for fat handy weight and heavy steers. Exportsrs were very small buyers, due to high prices. Last week's export trade amounted to only 262 cattle, smallest nnmber in many years. Top $8.65, paid for 101 head of 1,417 lbs average. Extra choice Kansas yearling steers and heifers mixed made $8.30. Bulk bsef stsers brought $6.85@8.35. Marketing Tnesday 3,724 Prices were generally steady. Few steers were good enongh to go above $7.75 and best at hand bronght $8.25. Receipts Wednesday 15,000, several thousand above all expectations. Market was slow at prices 10@15c lower. Top beeves $8.85.

Revised qnotations for all grades of native beef steers:

Extra choice to prime steers.....	$8 35 @	8 85
Good to choice steers.....	7 60	8 25
Medinm to good steers.....	7 00	7 50
Plain to fair short-fed steers.....	6 40	6 90
Common to fair steers.....	5 80	6 30
Extra choice to prime yearling steers.....	7 75	8 25
Good to choice yearling steers.....	7 15	7 65
Medium to good yearling steers	6 65	7 10
Plain to fair short-fed yearlings.....	6 10	6 60
Common to fair yearlings.....	5 50	6 00
Good to choice stags.....	6 25	7 00
Common to medinm stags.....	5 00	6 00

BUTCHER STOCK.

Bnlk sales of beef cows and heifers, canners and cntters, and bnlls this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Bulk cows and heifers.	Bulk canners and cntters	Bulk bnlls.
This week.....	$4.75@6.25	$3.25@4.00	$4.90@5.75
Previous week.....	4.65 6.00	3.10 3.85	4.75 5.60
Year ago.....	4.15 5.15	2.35 3.00	3.75 4.65
Two years ago	4.35 5.50	2.60 3.35	3.85 4.65

Mostly 10c higher deal in cows and heifers Thursday. Supply was qnite light and found ontlet in hurry-up time. Fat yearling heifers were in urgent call and local buyers ksen bidders for fat, weighty cows. Bull market active at steady prices. Veal calves went 25@50c lower than high time Wednesday, and big buyers rarely paid higher than $9.75 for prime vealers. Trading in cows and heifers Friday was steady with previous day and generally 25@40c higher than corresponding day previous week. Top for week was $7.85, paid for fancy heifers, and prime heavy cows reached $6.75. Generally a steady trade in bulls Friday, with butchers 10@15c higher than Friday of last wsek and bolognas steady. Calf market steady to 25c under lass week's finish.

On Monday of this wesk rates for cows and heifers were boosted 15@25c above last week's close. Run was light and buyers made a rush for supplies. Two head of 1,200-lb heifers made $7.50 and we sold five cows of 1,382 lbs average at $7.25. Bulls 10@15c higher, with top at $6.50, secured by us. Bulk of calves lost 25c, with a few choice vealers up to $10. Active and strong trade in cows and heifers Tuesday. A load of prime South Dakota heifers, averaging 1,224 lbs, reached $7.85 and 16 cows of 1,110 lbs average bronght $6.75, this sale being made by us. Bull market generally steady. Calves sold generally 50@75c lower than corresponding day of last week, with instancss of medium vealers $1.00 off. The practical top was $9.50. Trading in cows and heifers Wednesday was anywhere from 10@25c lower. Bulls lost 10@15c. Calves were 25c lower with the previous day's low point.

STOCKERS AND FEEDERS.

Top price and bulk sales of stockers and feeders this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Top Feeders.	Bulk Feeders.	Bulk Stockers.
This week.....	$7.20	$5.75@6.50	$5.00@5.60
Previous week.....	6.65	5.25 5.85	4.85 5.35
Year ago.....	5.75	4.65 5.15	4.15 4.75
Two years ago.....	5.50	4.85 5.25	4.65 5.00

Supply on Thursday was very slim, demand good and prices firm. Killers again bought away from the feeders the biggest proportion of the steers weighing 800 lbs and bsttsr, providing they possessed decent flesh. Friday market continned active at steady prices with previons day and 15@25c np from previous wesk's close.

Most sales were 10c up at the start of this week Buyers wsre out early aftsr snpplies and the only thing the matter with the market was lack of offerings to go around. Bnyers had to pay fat cattle prices for fleshy grades, owing to keen packer competition for same. All price changes Tnesday tended higher. There were a liberal number of both orders and buyers on the market, with a relatively small number of offerings available. In spite of the lower market for beef steers, stockers and feeders sold steady Wednesday, demand continuing very brisk.

Revised quotations for stocker and feeding cattle:

Good to choice feeders.....	$6 25 @	6 75
Poor to medium feeders.....	5 50	6 00
Good to choice stockers.....	5 40	5 75
Plain to medium stockers.....	4 85	5 20

Two years ago.	5.10	5.65	5.10	5.65	5.05	5.60

Thursday run of hogs 12,744. Opening slow, it was not long before rates were 5@15c higher than Wednesday's last trades. Mixed hogs showed most of the advance. Top $10.90 and bulk arrivals made $10.65@10.85. Fresh arrivals Friday 9,606, which total did not include 10,000 held over from the previous day. Opening prices 15c higher, but it was not long before all of the bloom disappeared. Top $11.05 and most trading at $10 75@10 95. Supply Satnrday 4,283. Opening steady with Friday's best time, market closed 5c lower. Pinnacle $11.05 and bulk $10.80@10.95.

Arrivals at the start of this week totaled 31,528, against popular guesses of 25,000 Saturday. Early trade was 5@10c under Saturday's best prices, but trade weakened still more and late selling was 15@20c off. Top early was $11.00, but $10.85 bought prime later on. Bulk of bnsiness early and late at $10.70@10.90. Receipts of hogs Tuesday 9,531. Market opened slow and after then ruled about steady with previous day's closing qnotations. Top $10.90 and selling in main at $10.65@10.85. Wednes-

day run 14,000. Prices generally 10c higher. Top $11.02½ and bulk $10.75@10.95.

*Obtained by Clay, Robinson & Co.

Supply Thursday 12,303. Market generally firm, although there were instances of 10c advance. Buyers lost no time in taking offerings at prevailing rates. Top lambs $10.25, obtained by us for Colorados, and shorn lambs brought $9.40, this figure also being secured by us. Best yearlings at hand were shorn and sold at $8 50. A prime lot of 137-lb western wethers made $8.25, and shorn western wethers at $7.90 were handled by us. Supplies Friday 1,854. Sales were strong to 10c higher. Bulk lambs were shorn and went at $9.40@9.50, with wooled western wethers at $8.60. On Saturday we sold the Sam Redmond Minnesota shorn lambs, numbering 1,048 head and averaging 74 lbs, at $9.70, up to then the record price by 10c per cwt. The week closed with the general market 50@75c higher than the previous week's finish.

Marketing at the start of this week 14,454. Sheep and yearlings active sale at prices strong to 10c higher. Stronger trade in shorn lambs and wooled stock advanced 15@25c. Top lambs made $10.60, paid for Colorados, and shorn westerns reached $9.65, with bulk of shorn stock at $9 40@9.60. Shearing lambs were taken out at $9.75. One spring lamb, weighing 50 lbs, sold at $15. Best yearlings at hand made $9.00 and bulk sheep were shorn western wethers, which went at $8 00. Tuesday supply 13,295. Sheep sold 10@15c higher, shorn lambs steady and wooled lambs 10c lower. Top lambs $10.50, paid for Colorados, and shorn westerns $9.65, this price being obtained by us. A new record was paid for sheep when we sold western wethers at $9.00. Prime shorn western wethers, averaging 140 lbs, made $8.25. Marketing Wednesday 12,000. Shorn stock active sale at stronger prices and wooled grades dull and weaker. Top lambs $10.50 and shorn $9.75, latter price being a new high one and obtained by us.

SHEEP.

Tuesday, March 15.

C. M. Rufus	504 Colorade lambs	79	$9 65

First Cost $4 85; Brought $8 10.

Clay, Robinson & Co. very frequently have occasion to make mention of cattle bought by them as feeders and sold by them when in fat condition. As a reflection of our excellent work in this line, we cite the sale by our Sioux City house March 22 of 18 steers of 1,465 lbs average at $8.10, highest cattle have sold there this season. These cattle were bought for O. Plummer of Lawton, Ia., by our Sioux City house in October at $4.85. As it will be seen the difference between the buying and selling price nets Mr. Plummer an excellent profit for the length of time he fed these cattle.

On the same day our Sioux City house also sold 25 steers, averaging 1,240 lbs, at $7.85, these cattle being of very good quality but hardly fat enough. They were also bought by our Sioux City house late in October at $4.35, making the owner a good sum of money.

Top St. Louis Cattle Market.

The load of Angus cattle which averaged 1,197 lbs and brought $8.25 at East St. Louis on March 22 was handled by Clay, Robinson & Co. These cattle were of good quality, uneven in size and had an extra good top, but a few bad steers were among them.

Clay, Robinson & Co. Make New Records at Kansas City

THE FOLLOWING NEW HIGH PRICES WERE ESTABLISHED ON THAT MARKET BY OUR HOUSE ON TUESDAY, MARCH 22:

LAMBS AT **$10.10** For C. A. Thomas of Las Animas, Colo., 500 head of 75 lbs average.

YEARLINGS AT **$9.50** Record by 10c per cwt, for Payne & Roembach, Colwich, Kan., 402 of 74 lbs average.

WETHERS AT **$8.50** Record by 25c per cwt, for Payne & Roembach, Colwich, Kan., 112 of 80 lbs average.

CATTLE AT **$8.30** March record, for Ed. Loy, Chapman, Kan., 20 steers and heifers, 1355 lbs average.

EWES AT **$8.15** Record by 5c per cwt, for Lockhart & Huling, Las Animas, Colo., 509 head of 85 lbs average.

Denver Markets.

[Special telegram from Clay, Robinson & Co.]

Denver, Colo., March 22.—Sixteen hundred cattle arrived first two market days this week. Market steady to strong with last week's close. Top beeves $7.25 and bulk $6.75@7.00. Summit on she stock $6.10, with fair to good cows and heifers at $5.25@5.75. Stockers and feeders strong sale with tops reaching $6.50.

Receipts of hogs Monday and Tuesday 1,700. Prices unchanged from last Saturday. Top $10.70 and bulk $10.60@10.65.

Run of sheep and lambs first two market days this week 1,800. Trading showed a strong basis with last week's close. Tops were: Lambs $9.50, wethers $8.00 and ewes $7.50.

Photo of first lambs to reach $9.85 at Kansas City. They were sold by Clay, Robinson & Co. for Drake & Wagner, Lamar, Colo., on March 15.

Kansas City Markets.

[Special telegram from Clay, Robinson & Co.]

Kansas City, Mo., March 22.—Prices for cattle were steady with last week's close. Top today and also a March record was obtained by us when we sold 23 steers and heifers mixed, averaging 1,355 lbs, at $8.30 for Ed Loy of Chapman, Kan.

Selling of hogs displayed 10@15c loss from last Saturday. Bulk at $10.35@10.60. Top at $10.65 was secured by us for 67 head of 259 lbs average belonging to M. L. Beckman of Randolph, Kan.

Steady trade in sheep and lambs as compared with last week's close. Today lambs reached $10.10, yearlings $9.50, wethers $8.50 and ewes $8.15, all of these prices being record ones and obtained by us.

East St. Louis Markets.

[Special telegram from Clay, Robinson & Co.]

National Stock Yards, Ill., March 22.—Supply of cattle first two market days this week has been heavier than for some weeks. Monday's beef steer trade was steady. Today's market opened 10c lower and later showed more activity, with general market averaging steady. Best beeves made $8.45

Butcher trade was steady. Best heifers at $7.50, with good cows at $6.50@7.00. Calves sold about steady with the close last week. Stocker trade firm. Southern supply of cattle has been quite large, with best meal feds selling at $6.80, a shade lower than high time. Several strings of grass steers went at 10c loss.

Hog market 5@10c lower than last Saturday, with pigs and lights 15@25c down. Top today $10.95 and bulk $10.60@10.85.

Sheep and lamb market has shown an advance of 15@25c over close last week. Best Colorado lambs at $9.90, which were not choice, and extra choice would have made $10.50. Choice clippers quotable at $9.65, and early springers at $11.00@15.00. Mutton sheep reached $8.50. Bucks at $5.75@6.25.

Colorado-Fed Ewes at $8.10.

Lockart & Hulling of Las Animas, Colo., on March 21 had at Kansas City 485 ewes of 83 lbs average for which Clay, Robinson & Co. obtained $8.10, up to then the highest price ever realized for ewes there by 10c per cwt.

The "Service That Satisfies."

H. N. Ensign, manager of the Rosemoor Farm, Greentown county, Ohio.: "Cattle came through. The load I sent to Rosemoor is a 'peach.' Your buyer is the best I have ever had, and I have tried all around Chicago, too. He knows what I want, goes after it and gets it. I saw a load bought by another party, weighed behind my load, that I would not have exchanged at 40c per cwt, although he paid 20c per cwt more than your buyer did."

Always Work for Best Results.

What salesmanship means to the stock shipper and how well he is served in this respect when his stock is consigned to Clay, Robinson & Co. had a forcible illustration the past week at Kansas City. Our house had a consignment of bulls, consisting of 21 head. The best bid that could be obtained for the entire lot was $4.45, there being but a limited number of buyers who could handle that many. Our salesmen then peddled these bulls out one and two head at a time, with the result that the average price realized for them was $4.83 per cwt.

Bulk Dakota Shipments Sheep.

E. Deffenbach, live stock agent of the Great Northern Railroad, with headquarters at Dickinson, N. D., was a caller at our South St. Paul house and remarked that he anticipated as many shipments out of North Dakota this coming fall as last, but thought a very large quota of same would consist of sheep. He mentioned that a good many parties were induced to hold their sheep over last winter, owing to the attractively high prices prevailing for wool at that time and the bright outlook for the future.

Fifty Cents Would Have Saved $10

A subscription to the LIVE STOCK REPORT is not an expense, but an investment, and one which pays big returns. H. C. Griswold of Watkins, N. Y., writes us under date of March 12: "Enclosed find 50c for which send me the REPORT one year. If I had had your paper three weeks ago it would have saved me $10." Don't wait until your paper stops to subscribe or renew. The issue that you miss may be one that is worth $10 or more to you. Therefore make sure that your name is on our paid subscription list for a year in advance. See page 1.

From an Old Cow Puncher.

Somehow when persons want to keep in touch with live stock conditions at the central markets, and elsewhere, they instinctively turn to the LIVE STOCK REPORT. This reflection is suggested by a letter received this week from W. H. McKoy, now located at Halkirk, Alta., Canada, who writes: "Enclosed find $1.00 for your valuable paper two years. Back in 1882 I worked in the Yards for Swift and I have 'kept cases' on those old Yards for years by your LIVE STOCK REPORT, which I have run across occasionally at different ranches. But now that I am in Canada I shall have to have it sent direct to me." Mr. McKoy at the close of this letter designates himself as "an old Fort Pierre cow puncher now doing a good thing up this way."

Range Sheepmen Smiling Once More.

J. E. Chapman, secretary and treasurer of the Neponset Land and Live Stock Co., with headquarters in Uinta county, Wyo., writes our Chicago house as follows, under date of March 6: "At last our thaw has come and winter is a thing of the past. Snow is all gone on our range. It seems good to see the sheepmen with a smile on their faces once more. They have been a pretty sad looking lot for several months. I feel very confident the loss here will be very small. From the seven herds—25,000—we have on the desert we have had only 187 pelts up to date. That number includes what mutton we have used also, so you can see our loss has been light. Green grass will soon start if we have a few more days of this weather. This beautiful weather must seem like mockery to those poor fellows who have lost most of their sheep. I put the average loss in this section at about 5 per cent and not to exceed 7½ per cent. Everyone seems to think there will be a poor lambing. It was certainly the worst bucking season we have ever known. Lambs ought to be worth something this fall. We heard of no wool being contracted at present, but we feel we will get a decent price—22 or 23c per pound. I very much hope losses in the middle and northern part of Wyoming will not prove as serious as was anticipated some time ago. This warm weather should help them out wonderfully."

Is Invaluable to Farmers.

A recent bulletin issued by the United States Department of Agriculture, entitled "Replanning a Farm for Profit," deals with principles that are vital to successful farming in the corn belt. Few farmers realize the difference in income that may be produced on their farms by the systematic introduction and rotation of clover or other leguminous crops over the entire area of their tillable land. The planning of rotations to meet certain feed requirements and to grow crops which shall be the greatest income producers under given conditions is a problem that is not easily solved by all the tillers of the soil. The conservation of soil fertility by appropriate rotations, together with applications of manures and fertilizers in such manner as will maintain a permanent system of agriculture, has been largely overlooked by farm owners in the past. Farmers' Bulletin 370 assists the farmer in solving these difficulties. It discusses a run-down farm in Illinois, and plans six different types of farming that may be substituted for the usual one of corn and oats now practiced, so as to raise the income all the way from two to five times as much as that commonly received, and at the same time increase the fertility of the soil. A copy of this bulletin may be had free on application to a member of Congress or the Secretary of Agriculture, Washington, D. C.

Market Corn by Pork Route.

Pork will, in the future, as it has been in the past, be the most profitable manner of marketing the great corn crop of the middle states. This is especially true in the case of the small farmer who understands the importance of maintaining the fertility of his soil by returning to the soil its fertility by the feeding of the crops on the land that has produced them, and who cannot afford to put a large amount of capital and equipment into breeding stock. No other domestic animal will reproduce itself as quickly nor in so great numbers as the hog. Neither will any other domestic animal, except young lambs, make so economical gains during the fattening period as the ordinary porker.—G. F. King.

Do You Want Goats?

The season of the year when the "brush cleaners" are in demand is at hand. In the spring, when the sprouts are tender, they do their work best, although useful later on. Our

KANSAS CITY

house does quite a large business in goats each year, and can give you any desired information, and fill your orders. Last season they filled orders for ten cars of goats in a single day, a total of 2,092 head, these going to eight different towns in Iowa, Illinois, Kansas and Missouri.

If you are on the other side of the market and have goats to ship, you certainly cannot do better than to consign them to

Clay, Robinson & Co.

at Kansas City. Our house there has always kept in close touch with this trade, both as regards the outlet for killers and for goats for brush-cleaning or other purposes.

In case you are interested either as a shipper or as a possible buyer of goats our Kansas City house will be glad to hear from you and give you any desired information.

What They Say About Us.

CHICAGO.

G. F. Gemmill, vice president of the Penuville (Indiana) Bank: "Cattle came in good shape. Am well pleased with them."

George D. Gordon, Vermilion county, Ill.: "Was well pleased with sale you made. Will send you my stock when I have any."

William Jewell, Jo Daviess county, Ill.: "Cattle arrived all O. K. Am well pleased with them. They are better than I expected."

H. W. Baker, Grundy county, Ia.: "Am much pleased with sale of cattle, being above my expectations. Will give you my business hereafter."

Frank G. Kabler, Crawford county, Wis.: "Am well pleased with way you sold my stuff. Thanks for promptness and good management."

W. M. Moore, Clinton county, Ohio: "Cattle just got in and they are a good lot of feeders. I am well pleased and believe by fall that they will make prime cattle."

R. C. Young, Kosciusko county, Ind.: "Received cattle in good shape. They are very satisfactory. When fat I am going to ship them to you. I believe they will do me good."

W. X. Sudduth, prominent in Montana real estate and live stock circles of Montana, with headquarters in Yellowstone county: "C. B. & Q. voucher for $30 came duly to hand. Many thanks."

Joseph D. Sturgis, Saint Joseph county, Mich.: "The sale you made on my lambs will do you some good in the feeder business this fall as everybody seems to have heard about it. Thank you for past favors."

C. M. Marshall, Ingham county, Mich.: "Wethers arrived in good shape. Am well pleased with them. They are a fine lot. Other buyers looked them over and called them a fine bunch. Thanks for good judgment."

Frank Muntz, Greene county, Ill.: "Having been advised by your East St. Louis house that cattle were bringing as much there as at Chicago, hence the shipment there. Sale was very satisfactory. Thanks for your many favors."

DON'T SHEAR SHEEP WITH HAND SHEARS

It is slow—you don't get all the wool—you cut the sheep—and you make hard work of it for yourself.

Do your shearing with this **STEWART No. 8 SHEARING MACHINE**

Price all complete, with our improved shearing head and 4 sets of cutting knives, is ONLY— **$9.75**

This is the great enclosed gear shearing machine you hear so much about. Every gear is file hard, is enclosed, protected and swims in oil, doing away almost entirely with friction and wear. This machine turns easy, shears fast and gets all the wool. IT MEANS 20 CENTS WORTH MORE WOOL FROM EVERY SHEEP.

Your dealer can supply this machine, or send $2.00 and we will ship C.O.D. for balance. Write for our new 1910 book, "More and Better Wool." It is FREE. Send for a copy today.

It must please and satisfy you or you can return it and we will refund all you paid.

Chicago Flexible Shaft Co. 133 LaSalle Ave. Chicago

FREE A SHETLAND PONY AND OTHER PURE-BRED LIVE STOCK FREE

The Grandest Opportunity You Will Ever Have. No Other Such Chance In All the World for You. Don't Lose a Moment In Sending us the Coupon Below.

Thornburg, Iowa, Feb. 12, 1910.

FARMERS' TRIBUNE,
Sioux City, Iowa.

DEAR FRIENDS:—

I received my pony this day-noon and I must say he is a dandy. I think you could not have suited me any better. I thank you a hundred times for him, and I certainly will try and work for you again.

I have a very hard territory to canvass but I wrote a great many letters, so I got a good many that way. May I ask how old he is and what is his name?

Oh my, I am pleased. As soon as I can I will take him to What Cheer and get his and my picture taken and send you one. He came through in fine shape, and I have a fine warm stall in papa's new barn. I think his color fine, and his pretty white feet.

Again thanking you for him, I remain, as ever,

Your friend,
LEO MORTON.

The live stock which we are going to give away, absolutely free, is the best to be had. No better stock is found anywhere. The breeders furnishing this stock are known from the Atlantic to the Pacific and from Mexico to Canada. Let us tell you how to secure it.

Additional Live Stock Absolutely Free.

In addition to the Shetland pony, the following live stock will be given away:

HEREFORD BRED HEIFER from breeders of Hereford cattle, E. M. & R. W. Cassady, Props. of Walnut Ridge Stock Farm, Whiting, Iowa.

POLAND-CHINA BRED GILT from a breeder of Short-horn cattle, Poland-China hogs, Shropshire Sheep and Black Langshan chickens. A. L. Mason, Prop. of Greenbush Stock Farm, Early, Iowa.

BERKSHIRE BRED GILT is from a breeder of Percherons, Short-horns, Berkshires and Jerseys. W. S. Corsa, Prop., Gregory Farm, White Hall, Illinois.

NORTH STAR RAM comes from the originator and breeder of North Star Sheep, W. W. Bell, Valley Springs, South Dakota.

A SCOTCH COLLIE is furnished by M. A. McCready, Sioux City, Iowa.

THE TRIO OF WHITE PLYMOUTH ROCK CHICKENS is furnished by E. B. Babcock, Prop. of Morningside Poultry Yards, Sioux City, Iowa.

WE WANT YOU to have some of the stock and we are going to help you to get it.

SEND US IMMEDIATELY your name and address in the coupon below. This information as well as the live stock is free. Tear out the coupon and send it to us at AT ONCE.

FARMERS' TRIBUNE, 318 Iowa St., Sioux City, Iowa.

Please send me at once pictures and descriptions of the live stock you are going to give away. Let me hear from you immediately, as I want to get some of your live stock.

P. O. _____ State _____

Fred Moran & Son, Genesee county, Mich.: "Car of lambs arrived in good shape and we are well pleased with them. They look to be well worth the money. All who see them say they are a nice lot. Thank you for your good selection."

Ben Garland & Son, Henry county, Ind.: "Car of cattle arrived. Well pleased with them. They were better for the money than we thought we would be able to get at this time. Hope you will be able to get us two more loads soon."

Philip T. Colgrove, member of the prominent law firm of Colgrove & Potter, Barry county, Mich.: "I am in receipt of $649.43 in payment of sworn lambs; $8.80 was certainly a top notcher. I am greatly pleased with my relations to you and will send you more as soon as they are ready."

D. Toler, Union county, Ind.: "We have received the load of stock cattle and are well pleased with them. Thank you for your promptness and selection. Since I got the cattle I have decided that other people can do just like I did—place their order with you and get just what they want."

George C. Humphrey, professor of Animal Husbandry, University of Wisconsin: "I beg to acknowledge your kind favor of the 8th, enclosing account sales and check for proceeds of car of cattle which we shipped to you. We are very much pleased with the results of our shipment."

Letter Box.

Orpheus Bailey, Stark county, Ill.: "The REPORT is a dandy for its size."

I. N. Atkinson, Benton county, Ind.: "Our county is 40 per cent short of cattle and 50 per cent of hogs."

Sol Rosenthal, Lancaster county, Pa.: "Enclosed find $1.00 for two years' subscription to REPORT. I would not be without it at any cost."

Ben Harned, Cooper county, Mo.: "I get much good out of the REPORT and do not want to miss it. Enclosed find 50c to cover postage for one year."

W. M. Garmire, La Grange, Ind.: "I think a great deal of the REPORT; in fact, could hardly get along without it. Enclosed find 50c for year's subscription."

W. E. McFadden, Knox county, Mo.: "Enclosed find 50c for which send me the REPORT for another year. I think it the best paper of its kind I ever saw."

George Horn, Knox county, Ohio: "Enclosed find $1.00 to extend my subscription to REPORT two years. I could not well do business without your valuable paper."

J. O. Gilliam, Hardeman county, Tex.: "I think your paper is what all feeders need. Enclosed find $1.50 for which send REPORT and Breeder's Gazette to my neighbor, Mr. McHorney."

James M. Hettick, Macoupin county, Ill.: "Enclosed find 50c for one year's subscription to REPORT. Every farmer and stockman who is ambitious to succeed should have your paper. I find it very reliable and interesting."

E. F. Reeves, Grayson county, Va.: "Enclosd find check for $1.50 for three years' subscription to REPORT and your expansive file as premium. I think your paper is fine, as it keeps one posted on prices of live stock in general."

D. W. Nichols, Blaine county, Idaho: "Enclosed find 50c to renew my subscription to REPORT. I had simply neglected the matter and thank you for continuing the paper, as it certainly is of great value to anyone who handles livestock."

Harvey D. Jackson, Hamilton county, Ohio: "Enclosed find $1.00 for REPORT, which is a very good paper for me. We have had a hard winter, with lots of snow. Hogs are very scarce, cattle are about 30 per cent less than last year and plenty high enough for those who have to buy."

Cattle Wanted Butchers and farmers in this section will want 3,000 head of cattle this summer. Would like to co-operate with someone west of the Mississippi River to supply them. Cattlemen please investigate. MAPLE SHADE FARM, Millersburg, Ohio.

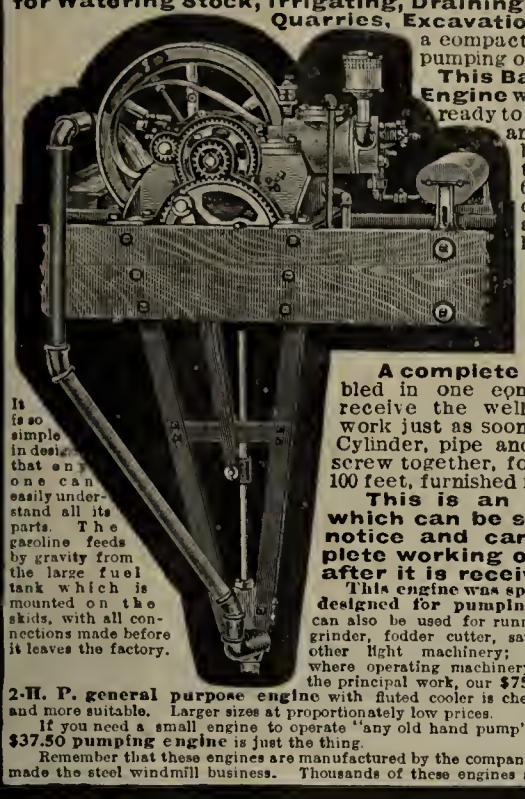
GASOLINE PUMPING ENGINE

A Special Machine for a Special Purpose

A Lot of Power for a Little Money

This is the Engine for Pumping Large Quantities of Water for Watering Stock, Irrigating, Draining, Pumping out Mines, Quarries, Excavations or other places where a compact, powerful and low priced pumping outfit is wanted.



This Back-Geared Pumping Engine with Stuffing Box, as shown, ready to receive pipe connections, and capable of raising 260 barrels of water per hour to an elevation of 25 feet, 66 barrels to an elevation of 100 feet, or proportionate quantities to any height. F. O. B. Chicago

$100

It is so simple in design that any one can easily understand all its parts. The gasoline feeds by gravity from the large fuel tank which is mounted on the skids, with all connections made before it leaves the factory.

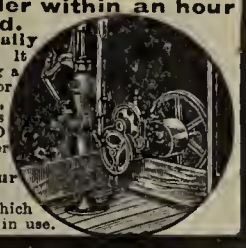
A complete pumping outfit assembled in one compact machine ready to receive the well connections and go to work just as soon as they can be attached. Cylinder, pipe and rod all fitted ready to screw together, for any lift from 25 feet to 100 feet, furnished for $45.

This is an emergency outfit which can be shipped on an hour's notice and can be set up in complete working order within an hour after it is received.

This engine was specially designed for pumping. It can also be used for running a grinder, fodder cutter, saw or other light machinery; but, where operating machinery is the principal work, our $75.00 **2-H. P. general purpose engine** with fluted cooler is cheaper and more suitable. Larger sizes at proportionately low prices.

If you need a small engine to operate "any old hand pump" our **$37.50 pumping engine** is just the thing.

Remember that these engines are manufactured by the company which made the steel windmill business. Thousands of these engines are in use.



AERMOTOR CO., 2508 12th St., CHICAGO

$7.50 Buys the World's Best

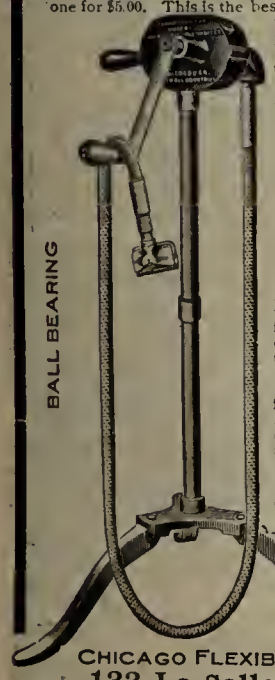
Horse Clipping Machine

Farm horses need clipping occasionally. Horse experts say and prove that. They work better, sleep better, and keep in better condition when the thick coat of hair is removed. They are less liable to catch cold after a hard day's work as they dry out quicker.

$7.50 is for the Stewart No. 1 complete, ready for use, and includes six feet of highest grade flexible shaft and the famous Stewart One-nut Tension Knife.

CLIP YOUR HORSES WITH A STEWART

If you want a low priced machine we can sell you one for $5.00. This is the best machine made except the Stewart No. 1. If you want the BEST VALUE you NEED the STEWART No. 1 BALL BEARING Horse Clipping Machine.



BALL BEARING

Complete for $7.50

We have made the Stewart so that any person can clip horses by guiding the knives over the horse while the crank is turned. We have made the Stewart durable enough to last a lifetime by enclosing working parts away from dirt and dust, and cutting the gears from the solid steel bar and making them file hard. We have made it of so few parts that we can sell it for $7.50, the lowest price ever made on a truly good clipping machine.

Order from your dealer or send your order and $2.00 to us and receive machine C. O. D. for balance. Catalog on request.

ADVERTISE IN THE LIVE STOCK REPORT. IT PAYS.

Made of Hard, Stiff Wire, of Honest Quality

A Heavy American Fence Costs You No More Per Rod Than Lighter Fences of Other Makes

A roll of heavy fence means big wire. Big wire means more strength and longer life. Insist upon the dealer weighing the roll of fence he sells you. This will tell the story quicker than any other way, for you cannot always tell the size of wire by eye. American Fence will stand this test against any fence made, and will prove its greater weight. Why, then, pay the same money for a lighter fence?

Light Wire

American Fence

American Fence is made of hard, stiff steel. It is made of a quality of wire drawn expressly for woven-wire-fence purposes by the largest manufacturers of wire in the world. Galvanized by latest improved processes, the best that the skill and experience of years has taught. Built on the same elastic hinged-joint (patented) principle, which effectually protects the stay or upright wires from breaking under hard usage.

Test, judge and compare American Fence under any and all conditions and you will find that the steel, the structure and the galvanizing are equal in durability, strength and efficiency to the hardest uses.

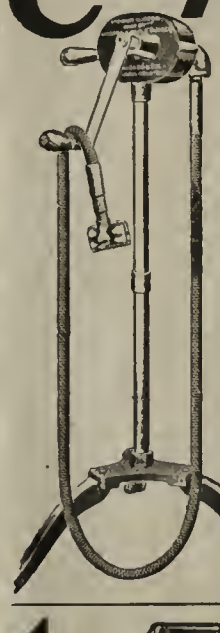
Clip Your Horses In the Spring



In the spring when your horses are soft and you put them at the hard spring work they sweat a great deal. Their heavy winter coat holds this sweat and it dries out slowly. If left to stand they take cold easily and at night they chill and are liable to all kinds of complaints. If you clip them they dry off fast and there is no question but they stand much less chance of taking cold when dry than if wet. You would not like to stand on a raw spring day or on a chilly spring night with a heavy wet suit on. Neither do your horses. It pays to clip them and blanket, if necessary on cold nights. Your horses dry off much faster, they feel better, rest better, get more good out of their food and do better work. They are better all around. Is it the humane and profitable thing to do. The quickest, least expensive and most satisfactory way to clip is with

The Great Stewart Ball Bearing Clipping Machine

The price, all complete ready for work is only.... **$7.50** This machine turns easy, clips fast and will last a lifetime. We guarantee it for 25 years because the gears are all cut from the solid steel bar. They are made file hard. They are enclosed and protected safe from dust and dirt and they run in an oil bath. Friction and wear are practically done away with. It is the only ball bearing clipping machine. It has 6 feet of high grade flexible shaft and the famous Stewart one nut tension clipping knife. This is the noted knife that will stay sharp longer and clip more horses than any other clipping knife ever made. Price of the complete machine all ready to use is only $7.50. Get one from your dealer or send $2 and we will ship you a machine C. O. D for the balance.

FEED MILLS

Clay, Robinson & Company's LIVE STOCK REPORT

Vol. 20 | Chicago, Friday, April 1, 1910 | No. 13

James Frazier Back in the Saddle.

Our Mr. James Frazier of the Chicago cattle selling force, who was recently injured by his horse throwing him off, is back in the saddle again. He is feeling first rate and has fully recovered from the fall. This will be good news to his many friends, who showed such keen concern over his condition.

Record Price for Arizona Lambs.

J. A. Pitts represented Glendale, Ariz., on the Kansas City market March 23 with 485 head of 54-lb spring lambs. Clay, Robinson & Co. sold them at $10.50, being $1.00 per cwt more than any other grass range lambs ever brought on that market up to that day.

New Top for Ewes.

L. P. Peterson represented Tyler, Minn., on the March 28 sheep market at Chicago with a shipment, included in which were 33 ewes of 137 lbs average which Clay, Robinson & Co. landed at $9.00. This is the highest price ever obtained for ewes on this market.

Permits More Stock to Graze.

The amount of stock which will be authorized to graze on the National forests during the season of 1910, in accordance with the decision of the secretary of agriculture, shows an increase in the total number as compared with last year of approximately 200,000 cattle and horses and 500,000 sheep and goats. The total allowance for the coming grazing season is 1,957,000 cattle and horses and 8,323,000 sheep and goats. The most important increases were in Nevada, Colorado, Montana, Utah and Washington.

Except in Nevada, where a million acres have been added to the natural forest area through the creation of the Nevada forest area, the increases are attributed to improved range conditions due to regulated grazing.

Colorado Lambs at High Price.

Up to and including March 24 the highest price ever paid for lambs on the East St. Louis market was $10.25, which Clay, Robinson & Co. obtained for 242 head of 66 lbs average, marketed by Craemer & Sutherland of Monte Vista, Colo.

Modification of Cattle Quarantine.

The secretary of agriculture has issued an order, effective April 1, releasing from the Federal quarantine for Texas fever or tick fever of cattle certain areas amounting to over 48,000 square miles. This action is taken as a result of the good progress made in the extermination of ticks which spread the disease. The territory released follows:

In California, the counties of Fresno, Tulare, Ventura, Los Angeles, San Bernardino, Riverside, and a portion of San Luis Obispo county. In Texas, the counties of Borden, Glasscock, Upton, Crane, and portions of the counties of Pecos and Terrell. Privilege for movement on inspection from the counties of Wilbarger, Baylor, and portions of the counties of Hardeman, Foard, Knox, and Haskell is revoked. In Oklahoma, portions of the counties of Noble, Hayne, Cleveland and Jackson. Privilege for movement on inspection is provided for portions of the counties of Lincoln, Cleveland, Caddo and Jackson, and revoked for a portion of Kay county. In Arkansas, the counties of Benton and Washington. In Mississippi, the counties of De Soto, Tate and Tunica. In Tennessee, the counties of Bradley and James. In Georgia, the counties of White, Habersham and Stevens. In Virginia, Brunswick county.

A Highly Pleased Stockman.

W. J. Cubit, a representative farmer, feeder and shipper of Morning Sun, Ia., was on the Chicago market March 23 with a big string of cattle, which Clay, Robinson & Co. handled and sold in a highly satisfactory manner, according to Mr. Cubit. Last October Mr. Cubit sold his farm. He had lived on the same 46 years and had one of the best improved farm holdings in that part of the country. He sold it at $137.50 per acre, as against a cost of $35 per acre about 46 years ago. The dwelling house has all the modern improvements that a fine city home can boast of. Mr. Cubit has the high honor of being a charter member of the Covenanter Church of Iowa. He is highly respected and liked by all who know him Although he is 70 years old, he is more spry than many young men. He attributes his good physical condition to never having used tobacco and intoxicating liquors, and to always having taken the best of care of himself. Mr. Cubit is one of the oldest patrons of the Chicago market.

Sarah O'Farrell, daughter of O. G. O'Farrell of Greeley, Colo., and her pets.

Shorn Kansas Lambs at New Price.

Turner, Kan., was represented on the lamb market at Kansas City on March 23 with 585 shorn offerings of 67 lbs average which brought $8.75, up to then 15c per cwt higher than any other lambs ever made on that market. The lambs were marketed by J. D. Robinson and the sale was made by Clay, Robinson & Co.

Shorn Mixed Sheep at $8.50.

At Chicago on March 23 Clay, Robinson & Co. obtained $8.50 for shorn yearlings and wethers mixed, up to then highest price ever paid for such stock. There were 83 head of 120 lbs average in the shipment and they were fed and marketed by J. O. Finley of Oneida, Ill.

Look Out for Feeder Swindlers.

We again warn our readers against the gang of unjailed scoundrels operating the "feeder cattle racket" at various Iowa points. Their game, briefly stated, is to advertise in farm papers a bunch of stocker and feeder cattle for sale, which are attractively described and correspondence invited. When the victim answers the advertisement, a price away below market value is quoted by letter as a bait to induce him to come in person. The aim of the gang is to work feeders from a distance, where their reputation is unknown. When the prospective purchaser reaches the place the swindler meets him and the "double-cross" game begins. The party advertising feeders either shows an inferior lot of cattle not at all like the bunch advertised or else tells the victim that the lot in question was sold a day or two before, but that "Mr. So and So" at some distance has just the cattle he wants and at a very low price. He is accordingly driven to the confederate's place and shown cattle which after he decides to purchase are priced much higher than he was led to believe they would be, and outrageous charges for "commission," "livery," etc., are exacted by the first man. Often, too, bare-faced substitution is practiced and cattle different in part or in whole from those that the victim inspected are finally delivered to the railway station. The buyer of course protests, but the swindler has everything cut and dried and if the buyer does not settle the various charges, fees, etc., threatens legal proceedings or actually takes out a writ of attachment just as they are about to be loaded.

One of these scoundrels a short time ago had the audacity to send his lying advertisement to this paper, accompanied by cash remittance to cover. It was immediately returned to him by registered mail with the information that our columns were not open for advertisements of that character. Operations of this gang in the past have been largely around Ottumwa and Fairfield, Ia. The exposures of their methods that have been made, however, will very likely induce them to seek greener pastures. Hence we advise our readers to be extremely careful in purchasing feeding cattle advertised by strangers at a distance, as there is no telling where the game may crop out next. A wise precaution in cases of this kind is to write to the banker at the point where the cattle are said to be, and ask for information as to the reputation and standing of the person advertising them. Your local bank can give you the name of the banker at any town, or if you prefer write to us and we will furnish same.

Wyoming Feeding Steers at $7.10.

M. E. Rhinesmith, prominent western range cattleman, marketed at South Omaha on March 22 a string of 34 head of 1,052-lb steers from Centennial, Wyo. Clay, Robinson & Co. sold them on feeding account at $7.10, highest price ever paid on that market for feeding cattle. They were straight hay-fed westerns, not having had grain feed of any kind. Mr. Rhinesmith, who was delighted with his sale, said that the cattle in his section of the country are not very plentiful and that the number is not near as large as a few years ago.

Better Ship Fat Heavy Beeves Now.

There is no encouragement for holding back fat 1,550-lb and heavier beeves longer than is practicable. They should be marketed as fast as convenient. Warm weather is with us and of course the thermometer will climb to higher levels. Under these weather conditions buyers' fancies are always won over by the handy weight cattle, and we shall hear the oft-repeated "too heavy."

Conditions are such that feeders will be warranted in replacing these heavy cattle with lighter weights. Those who contemplate following this plan and wish to feed for the July and August markets, it would be well for them to put in good quality, thrifty 900 to 950-lb cattle. But those who intend to feed cattle for the September, October and November markets should stock up with good quality 1,000 lb and heavier cattle. If these are gotten in good flesh condition they will not have to compete with the western rangers, which come so plentifully at that time of the season. The only exception to this case is the putting in of very choice yearling and two-year old cattle. If these are made fat they will also escape the above mentioned competition.

The break in the cattle market the past two weeks was not unexpected. Prices have made such a steady and big advance during the past two months, amounting to $2.00@2.50 per cwt, that the consumers of meat were unable to adjust themselves to the remarkably high prices. However, we look for a broader outlet for beef just as soon as the people get used to the increased cost of same. The future outlook is all right. But remember that present and prospective conditions warrant the marketing of fat heavy beeves.

TOP FOR BEEF STEERS.

Monthly top prices for beef steers at Chicago for seven years, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	1910	1909	1908	1907	1906	1905	1904

*Obtained by Clay, Robinson & Co.

†Record price on open market by 20c per cwt, obtained by Clay, Robinson & Co. for a load of 1,518-lb Iowa-fed grade Hereford branded Wyomings.

Nebraska Beeves at $8.60.

The 18 head of 1,533-lb beef steers which brought $8 60 at Chicago on Monday were sold by Clay, Robinson & Co. and marketed by I. N. Jones of Aurora, Neb. This was the top price of the season for Nebraska-fed cattle. They also sold for Mr. Jones 32 head of 1,436 lbs average at $8.25. The cattle were Herefords and Shorthorns and branded westerns. They were bought on the Denver market at $4.90, freight paid to the River. Mr. Jones had fed the cattle about five months on shelled corn and alfalfa hay and they made an average gain of 350 lbs. Mr. Jones is an extensive and successful cattle feeder and has lived in Nebraska since 1881. He has long been a patron of Clay, Robinson & Co. and, as he puts it: "I have always been given service of the highest class."

Market Matured Hogs.

We advise marketing hogs that are in good fat, saleable condition, weighing 235 lbs and upwards. There is nothing bearish in the situation but the price, nothing to discourage faith in the future market beyond the fact that present prices are highest on record, considering the purchasing power of the circulating medium of the country. It is therefore not reasonable to expect such rates to prevail for an indefinite time. It is, however, apparent of late that consumption of pork products is abnormally modest. Last week limited inquiry was not unexpected under the circumstances, as call for fresh meats is always curtailed during Holy Week. Shipping inquiry this week, however, affords little evidence of enlarged volume, all packers reporting small cash trade and light fresh meat demand. This condition is evidenced by their limited purchases of hogs. Warm weather is perhaps responsible to some extent for lighter inquiry for fresh pork. Eggs are cheaper now than meat and the vegetable season is at hand, supplies from southern fields now being offered at reasonable prices. Weather and other farm conditions are responsible for a season of great activity with swine producers. This situation will result in some accumulation of hogs in the country and enlarged receipts, temporarily at least, a little later on. Not a single condition can be cited to warrant the marketing of pigs, shotes and immature hogs, for at present corn prices the hog market could decline $2.00 per cwt and still leave the feeder a good margin of profit. A decline of $2.00 per cwt, while possible, is not at all probable for months. Yet it is always wise to make sure of a good thing, and therefore we advise selling hogs of good marketable condition.

TOP PRICES FOR HOGS.

Monthly top prices for hogs at Chicago for seven years, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	1910	1909	1908	1907	1906	1905	1904

*Highest since 1865, when $12.75 was recorded.

Farm Residence and Buildings of F. E. Bell & Sons, Camp Douglas, Wis.

Highest Since Civil War.

On March 29 Clay, Robinson & Co. at East Buffalo sold for M. Weinberg & Co. of Rushville, Ill., a double-deck of 240-lb hogs at $11.45, which was extreme top of the market and highest that hogs have ever sold for in March on that market and highest since the civil war.

Missouri-Fed Cattle Top St. Louis Market.

Littrell & Wilcox of Renick, Mo., had 18 head of 1,440-lb beef steers on the East St. Louis market March 29 and Clay, Robinson & Co. sold them at the top price of $8.25. These cattle were of fair quality and while fat were not finished.

High Honors for Colt & Son.

Clay, Robinson & Co. obtained high honors for Colt & Son of Las Animas, Colo., at Kansas City on March 28. Their sales for them were: 242 yearling wethers, 73 lbs, $9.50; 47 wethers, 76 lbs, $8.60; 199 ewes 76 lbs, $8.25. The yearlings and ewes sold at the highest prices ever obtained on that market, while the wethers brought 10c per cwt higher than ever before recorded there.

Cows Up to $6.20 at Denver.

Ballantine & Beggs, whose extensive feed lots are at Rocky Ford and Sugar City, Colo., were represented on the Denver market early this week with a load of 987-lb cows which Clay, Robinson & Co. sold at $6.20, extreme top for she stock on that market this season.

"I Will Certainly Come Again."

John Zehr had on the Monday cattle market at Chicago a string of cattle from Amherst, Neb. They were handled by Clay, Robinson & Co. and the sales follow: 102 steers, 843 lbs, $7.50; 26 heifers, 755 lbs, $6.30; 17 cows, 904 lbs, $5.75. These offerings were Oregons and had been on a feed of shelled corn and alfalfa hay, with cottonseed meal used the last forty days. This was Mr. Zehr's initial shipment to Clay, Robinson & Co. and he expressed himself as delighted with the treatment and handling of his cattle and said: "I will certainly come again." Mr. Zehr handles from 500 to 1,000 cattle in his feed lots annually, besides being an extensive buyer of cattle. Considering his operations, he is one of the heaviest cattle dealers in the West for his age, being only twenty-six years old. In addition Mr. Zehr farms on a big scale, having 500 acres in corn last year. He comes of a family that knows the cattle business from A to Z, both his father and uncle being among the heaviest exporters of cattle from Canada.

Kansas-Fed Sheep Sell High.

Clay, Robinson & Co. sold at East St. Louis on March 29 for Payne & Roembach of Colwich, Kan., 268 yearling wethers, averaging 74 lbs, at $9.30, highest price ever secured for yearlings on that market. They also sold for them on the same day 227 lambs, averaging 72 lbs, at $9.90, extreme top for Kansas-fed lambs there that day.

Kansas Hogs Now Ahead.

Kansas hogs took the prize at Kansas City on March 28 in high prices. While there were a great many hogs from several states that sold around $10.90, there were very few that sold for $10.95, which was the price Clay, Robinson & Co. obtained for M. V. Smith of Ransom, Kan. Mr. Smith had in 61 head that averaged 303 lbs. These hogs brought a little better than $32 each, or almost $2,200 for the carload, the largest amount Mr. Smith ever received for a caload of hogs.

To Plant Big Acreage of Corn.

I. D. Clarke, cashier of the prominent banking house of A. W. Clarke, Papillion, Neb., and one of Nebraska's noted feeders, was at Chicago Monday with 84 head of 1,096-lb beef steers which Clay, Robinson & Co. sold at the very satisfactory price of $8.05. These cattle showed an excellent gain and had been on full feed since October.

"Nebraska will plant a big acreage to corn this year," remarked Mr. Clarke. "Where the wheat, meadows and alfalfa have not done well the sod is being broken up for this purpose. The sudden change to extremely cold weather in February killed no small amount of wheat. There are not the usual number of cattle on feed in Nebraska and what are back are in the hands of bullish owners, who are inclined to hold back their offerings when prices show a lower tendency."

Top Prices for Lambs.

Monthly top prices for lambs at Chicago for seven years, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	1910	1909	1908	1907	1906	1905	1904

Clay, Robinson & Company's LIVE STOCK REPORT

Issued every Friday at Union Stock Yards, Chicago.

R. P. FALES.....Managing Editor
GUY FRIDLEY.....Associate Editor

Local and long-distance Telephone "Yards 4194."
Cable address "Kelso," Chicago.

This paper will be sent to anyone, whether a customer of Clay, Robinson & Co. or not, upon receipt of 50c to pay postage for one year.

If you receive the paper for a time without having ordered it, please understand that it is sent you with compliments of Clay, Robinson & Co., to keep you posted on the markets.

When requesting change of address always give old as well as new postoffice.

Advertising rate $2.80 per column inch, each insertion. Special low rate for live stock sale advertising. If you intend holding a public sale write for prices on quarter-page, half-page or page space.

Address all communications and make all remittances payable to THE LIVE STOCK REPORT, Union Stock Yards, Chicago.

Harris Memorial Fund.

The American live stock breeding fraternity is reminded that the friends of the late Senator W. A Harris of Kansas, working through the medium of the Improved Stock Breeders' Association of that state, are endeavoring to raise a fund sufficient for the purpose of erecting, at the grave of Senator Harris, at Lawrence, Kan., a suitable monnment commemorating his great service to the cause of American agriculture, and expressing the appreciation of his fellow-conntrymen for his long and devoted service in their interest.

The Hon. F. D. Coburn of Topeka, Kan., has been designated as custodian of the fund, and will acknowledge and publish the receipt of all subscriptions forwarded in snch connection.

It is to be hoped that responses will be prompt and generons. A good beginning has already been made, and complete success should crown such a worthy effort.

Fewer Southwest Sheep to Come.

In answer to our inqnlry, our Kansas City house writes: "From what we can learn there will be but few fat sheep shipped early from either Arizona or Texas on account of that conntry being so dry. Our Mr. John G. Forrest, who has just returned from Fort Worth, said that they had had some rain in Texas recently, but whether it was enough to do the sheep any good or not is hard to say. We believe the number of sheep to be shipped ont of Texas will be very light as compared with previous years."

One Hog Brings $72.

One hog sold on the Kansas City market March 24 for $72. Several sales of single hogs have been made there this spring at very high prices, but it is believed that this is the top notcher. Dan Hodgess, a well-to-do farmer of Silver Lake, Kan., was the owner of this hog, a stag, which weighed just 800 lbs. Taking off the dock of 80 lbs, the amount received at 10c per lb was $72. The animal was sold by Clay, Robinson & Co., another illustration of the careful attention given to small consignments by our firm.

Decrease in Food Animals.

Economists view with grave apprehensions the decrease of food animals in the United States and the steady upward tendency of high prices for meat, butter and milk. The high point of the cattle industry was reached in 1907, when 72,533,996 cattle were enumerated. Hogs reached their greatest volume of production in 1908, when 58,084,000 swine were reported. The high point in sheep husbandry was attained in 1903, when 63,964,876 head were enumerated. Contrasting the highest point in food animals in the last decade with the current supply there has been a shrinkage of 3,453,996 head of cattle, 6,748,876 head of sheep and 8,302,000 hogs. The aggregate decrease of food animals in the United States since 1903 totals 18,504,872 head, which in itself is sufficiently alarming when one views this enormous shrinkage in seven years, as it affects the food supply and influences the increased cost of living.

Cattle Bought at $3.80; Sold at $7.50.

The two carloads of cattle which Clay, Robinson & Co. at South St. Joseph sold for J. A. Stevenson of Quitman, Mo., on March 23 at $7.50 were bought for him by our house there last fall at $3.80. They were horned, of plain quality and fed four months, gaining 284 lbs per head from the time they left St. Joseph to passing over the scales to the packers, averaging 1,254 lbs. The profit was $25 per head, and Mr. Stevenson was a well pleased customer.

New High Price for Colorado Lambs.

It was March 23 that our East St. Louis house sold 539 Colorado lambs of 60 lbs average at $10, up to then highest price ever paid for Colorado lambs on that market. The feeder and shipper was O. T. Mann of Prowers, Colo.

Fort Worth Texas Horse Show.

Fort Worth is forging to the front in the Horse Show line. They pulled off one of the best shows in the conntry on March 14 to 19, giving an entertainment second only to Chicago, many of our high-class steppers being there. It was a success in every sense of the word, the arena filled to overflowing at every entertainment. The management should feel proud over their success. But how could it be otherwise, with such a manager as our genial and hustling friend, Mr. Warren V. Galbreath, who has been authority in anything pertaining to horse shows during the past fifteen years, having been either manager or a judge at all the shows pulled off at Fort Worth, San Antonio, St. Louis, Kansas City and Denver during that time. He is not only a horse show man, but has been general live stock agent of the Missouri, Kansas and Texas Railroad for the past nine years, with headquarters at Fort Worth, Tex. He is the livest wire in his line of business in the Sunny Sonth, knowing every cattleman and cowboy in that section. I predict a better show at Fort Worth next year, as I think every one went away pleased with the show and the conrteous treatment he received.

WARREN V. GALBREATH.

H. WOODS ROBINSON.

Longest Fleece Ever Shorn.

The Butterfield Live Stock Co. of Weiser, Idaho, won with two Lincoln ewes the Levussove prize for the two longest fleeces shorn at Ogden. Some samples taken from one of the fleeces measure 32 inches, the longest staple ever taken from a sheep, according to Mr. Levussove. The longest mohair ever grown was 28 inches, hence the Butterfield fleece breaks all records for long wool and mohair. This wool is worth anywhere from $5@10 per pound.

Students Enjoys the Report.

Charlotte A. Baker, acting librarian of the State Agricultural College, Fort Collins, Colo.: "We are receiving the LIVE STOCK REPORT and have it on file in our reading room with other agricultural publications. I notice that our students who come from families who are interested in sheep and cattle enjoy looking the REPORT over. We are greatly pleased with your reproduction of the 'Sheep Shearers,' and wish to express our thanks for same."

Not an Expense, But an Investment.

J. L. Wolfley, Goffs, Kan.: "Enclosed find $1.00 two years' subscription to the LIVE STOCK REPORT. It would be cheap at $10 per year."

Many Virginia Lambs Dying.

O. C. Strother of Wilsonburg, W. Va., writes us under date of March 21: "People here have lost a great many lambs. There will not be as many lambs as last season. Most of them were contracted early for July and August delivery at $5.75@6 50. Fat cattle will be scarce and stock cattle are selling very high."

Mostly Scrub Cattle in Cuba.

L. H. Van Dyke, prominent cattleman and butcher of Gordon, Mont., was a pleasant caller at our office while on his way back home from a trip to the South, which extended as far as Cuba. Mr. Van Dyke said that farming was conducted in a very crude manner in Cuba, no modern farm machinery being used by the natives. He found a great many of them an indolent set and thought that there were great opportunities down in that country for the energetic young American farmer with his up to-date methods. Mr. Van Dyke said that 75 per cent of the beef cattle in Cuba were scrub bulls and that the meat served at the hotels was of a very poor kind.

Highest Prices for Sheep.

Payne & Roembach, Sedgwick county, Kan., had on the Kansas City market March 23 a shipment of 211 yearling wethers of 76 lbs average which brought $9.50, and 49 wethers, averaging 77 lbs, which made $8.50. These prices up to then were as high as ever obtained on that market and the sales were negotiated by Clay, Robinson & Co.

NOTICE!

Our "complimentary" mailing list has become so large that it is no longer possible to print the enormous editions required to cover same—to say nothing of cost of postage and other expenses.

It therefore becomes necessary to immediately cut off several thousand names, and these are now being taken from those who have been receiving the paper free for six months or longer.

From now on we can send the paper REGULARLY only to those who enroll as paid subscribers. Non-subscribers may continue to receive occasional copies, but the only way to insure receiving every issue is to subscribe. The subscription price is fixed at only 50 cents per year, which barely covers cost of postage. Payment of this nominal sum, however, will show us that you appreciate the paper and make it worth while for us to send it to you.

As a special inducement to send in your subscription at once, we will, provided you forward same as promptly as you conveniently can after reading this notice, send you, free and post-paid, a useful little preminm.

This, if you have not heretofore been a paid subscriber, will entitle you to the paper for A FULL YEAR FROM NOW—no charge for the time you have already received it. This does not apply to renewals sent in by persons who are already subscribers. Such renewals of course date from the subscriber's expiration date.

Among Our Customers.

A. J. Goodall, Shiawassee county, Mich.: "Am well pleased with sale of lambs."

M. S. Wolfe, Mills county, Ia.: "There is not much stock on feed around here. Weather is fine."

R. S. Duncan, Lawrence county, Ind.: "Cattle arrived in good shape and am well pleased with them."

Frank A. Carruthers, Pottawattamie county, Ia.: "Very few cattle and scarcely any hogs in this locality at present."

A. J. Nelson, Pierce county, Wis.: "Thank you for your good information through your letters and the REPORT."

Morris Kevane, Buena Vista county, Ia.: "Thank you for past favors and if I can ever do you any good I will do so."

H. W. Plumb, Franklin county, Neb., writes our Kansas City house: "Am well satisfied with sale you made for me."

J. M. Kennedy, Ida county, Ia.: "Cattle are hard to buy in this part of the state on account of shortness of cars."

F. E. Wilson, Kalamazoo county, Mich., writes our East Buffalo house: "I was well pleased with your sale of stock."

Pinnacle of light weight hog market at Chicago on March 29 was $10.95, obtained by us for 89 head of 192 lbs average.

M. B. Proper, Hillsdale county, Mich., writes our East Buffalo house: "You made a good sale on my lambs. I am well pleased."

Christian-Lang Co., York county, Neb.: "Our sheep bought last summer through your South Omaha house made us some money."

W. C. Swarts, Mills county, Ia., marketed at South Omaha on March 29 a load of 272-lb hogs which our house landed at top price of $10.85.

W. W. Hall, Bent county, Colo., on March 28 sent our Kansas City house 252 lambs of 70 lbs average which they landed at the top price of $10.

J. D. Lawson, Buffalo county, Neb., writes our South Omaha house: "Thank you for the good prices obtained for hogs. I am yours for good prices."

H. C. Bauman, Polk county, Ia.: "I have been reading the REPORT and think it is a good paper. Thank you for the same and what you have done for me."

On March 23 our Sioux City house topped the hog market 2½c per cwt with 70 head, averaging 249 lbs, at $10.70, for C. Wassink, Sioux county, Ia.

On March 23 A. W. Carlson was on the South Omaha market with a car of good 1,222-lb steers from Dixon county, Neb., that our house sold at $7.90.

W. H. Farr, Weld county, Colo., had on the Chicago market March 29 a string 517 lambs, averaging 75 lbs, for which we obtained top price of $10.25.

Edward L. Lemert, Doniphan county, Kan., writes our South St. Joseph house: "You secured a great price for the lambs. Will have another load for you."

Pinnacle for lambs at Chicago on March 25 was $10.15, which price we secured for 551 head of 67 lbs average, belonging to C. L. Hover, Boulder county, Colo.

W. S. Fay, Pipestone county, Minn., writes our South St. Paul house: "Load of cattle you bought for me arrived in good shape and are looking better every day."

Sims & Smith represented Cooper county, Mo., on the East St. Louis hog market March 25 with 68 head of 300-lb hogs which our house landed at top price of $11.

J. Bringman, Gregory county, S. D., was on the South Omaha market March 23. Mr. Bringman says he has shipped to Clay, Robinson & Co. for thirty-five years.

G. Weiss, prominent farmer and feeder, represented Ida county, Ia., on the Monday cattle market at Chicago with 29 head of 1,413 lbs average which we landed at $8.20.

A. W. Junge, farmer and buyer, York county, Neb., brought in a very nice car of 1,377-lb steers March 21 for the South Omaha trade that our house sold at $8.05.

S. N. Peterson, an extensive farmer and shipper, Hamilton county, Neb., was on the South Omaha market March 23 with stock which our house sold at satisfactory prices.

Our Sioux City house topped the hog market by 5c per cwt March 24 with 62 head of 284 lbs average at $10.85. They were marketed by Fred Frevert, Knox county, Neb.

William Keller, Ogle county, Ill., was the owner and we the sellers of the 40 head of 199-lb hogs which sold on the Chicago market March 25 at $10.80, summit for light weights.

James Fee, Furnas county, Neb., was the owner and our house the sellers of the 15 heifers, averaging 702 lbs, which made the top price of $6.75 at Kansas City on March 28.

The summit for light weight hogs at Chicago on March 24 was $10.85, this price being obtained by us for 54 head of 174 lbs average, belonging to Morris Perkins, Peoria county, Ill.

Eaton county, Mich., was represented on the Monday cattle market at Chicago with 19 head of 1,395-lb beef steers which we sold at $8.25. They were sent in by J. W. Sheldon.

Summit of yearling sheep market at Chicago on March 29 was $8.25, which price we obtained for 48 shorn offerings of 93 lbs average, sent in by A. N. Mitchell, Brown county, S. D.

William Hutson, Hancock county, W. Va.: "Received car of cattle in good order. I am very well satisfied with them. They are better than I looked for. Thank you for past favors."

C. M. Comstock, Gentry county, Mo., writes our South St. Joseph house: "We were well pleased with the sale of hogs and know you got us a top sale. Thank you for your efforts."

SYSTEM

One of the greatest generals this world has known said: "No one will be successful without system, or without bestowing the greatest attention upon it." The forces of Clay, Robinson at the ten leading markets—numbering some 300 men—are not unlike a small army. They are ever watchful, ever keen, ever ambitious for the welfare of our patrons' interests. They have been drilled and instructed for years in the art of rendering the "Service That Satisfies." This is true of the yard men, the salesmen, the clerks, the correspondents, the managers, as well as the members of our firm. At the head of each department is a tried, successful and responsible man. System ever dominates, and great attention is bestowed upon it. That, along with experience and expertness, may explain why Clay, Robinson & Co. are so widely known as "Successful Sellers of Live Stock." This great and perfect system, which makes it possible for us to negotiate the "Sales that Suit" for the one-load as well as the train-load shipper, has been the result of nearly a quarter of a century in the live stock commission business. "Clay, Robinson & Co. are O. K." Try us and be convinced.

S. J. Koch brought in five cars of cattle from Lincoln county, Neb., on March 23 which our South Omaha house sold at quite satisfactory figures, tops going at $7.90 and averaging 1,295 lbs.

Limit for shorn lambs at Chicago on March 29 was $9.50, at which price we landed 1,072 head of 77 lbs average. They were fed and marketed by W. Ray Drake, Larimer county, Colo.

W. L. Richards, Stark county, N. D.: "I have just made a round of the ranches and found everything in fine shape. Cattle are as good as I ever saw them and it looks to me as if we will have early beef."

W. S. & J. D. Dunham, who are among the most prominent and extensive horse firms in Illinois, marketed at Chicago on Monday from Wayne 23 steers of 1,268 lbs average which we sold at $7.45.

A. J. Tribble, Audrain county, Mo.: "Please accept thanks for courteous treatment and prompt returns in handling my three loads of cattle. I hope to give you more business in the future."

Aug. Borgelt, Colfax county, Neb., was on the South Omaha market March 22 with a car of cattle of his own feeding that our house sold at the very satisfactory figure of $7.60, averaging 1,209 lbs.

John Flynn, Mills county, Ia.: "Your South Omaha house sold the remainder of my cattle at very good prices. They obtained $6.35 for one bull and also topped the market with one car of my hogs."

D. C. Richards, Livingston county, Mich., writes our South Omaha house: "Received lambs and every one in finest of form. You can do for me what I could not do for myself. You will hear from me again."

George L. Granger, Isabella county, Mich. "Enclosed find $1.00 for which send me REPORT two years. Your paper is very interesting. Most of the cattle on feed in this part of the state have been shipped out."

Summit of the lamb market at Chicago on March 24 was $10.40. We obtained this price for two different lots, sales of which follow: For A. W. Karr, 249 head of 75 lbs average and for F. P. Rudolph, 270 head of 80 lbs average, both gentlemen living in Weld county, Colo.

Peter Graham, Cedar county, Ia.: "I intend to consign to you for the reason that you make the claim that you do as well by the man who ships only a few loads during the year as for the one who ships several loads."

Joseph Meservey, Brown county, Ill.: "Enclosed find 50c, as I must continue to receive the REPORT. It fills a place that none of the other farm papers do. Success to the REPORT, its proprietors and entire force."

John C. Steilwagen, Wayne county, Mich.: "I am in receipt of remittance for stag hog and thank you for being so prompt. He brought more money than I thought he would and $10@15 more than had I sold him here."

Kent & Burke, who are numbered among the most successful and extensive cattle feeders in the West, marketed at Chicago on Monday from Nance county, Neb., 78 head of 1,318-lb beef steers for which we obtained $7.75.

L. T. Cudney, an extensive farmer and feeder, Hamilton county, Neb., was on the South Omaha market March 22 with a car of cattle of his own feeding which our house sold at $8.05, averaging 1,418 lbs, a very satisfactory figure.

M. L. Dinan, Boyd county, Ky.: "Cattle arrived in good shape. I am more than pleased with them. Two of my neighbors were on the market and one of them bought a lot at $5.00, which were no better than mine at $4.40, and besides he had $22.50 expenses."

Wallace Huidekoper, Meagher county, Mont.: "Cattle in our section have wintered exceptionally well this year and we have had but very small losses. In regard to shipments this fall, I believe that they will average about the same as a year ago, possibly a little less."

Pinnacle for shorn lambs at Chicago on March 28 was $9.60. We obtained this price for two different lots, which follow: For C. A. Bartels, 507 head of 82 lbs average and for E. A. Drake 524 head, averaging 80 lbs. Both gentlemen reside in Larimer county, Colo.

O. E. Hazen, Washington county, Neb.: "I have missed two issues of REPORT and can stand it no longer. Must have the paper, so enclosed find $1.00 for two years. I appreciate you having sent it to me up to the present time, for I have received many pointers from it."

John A. Adams, Johnson county, Mo.: "Thanks for having sent the REPORT. It surely is valuable for its information to growers of live stock. Find enclosed $1.00 for two years' subscription. Weather is fine for March. There is not much stock on feed in this locality."

John F. Healy, well-to-do farmer of Fillmore county, Minn., was on the Monday cattle market at Chicago with a shipment which was handled by us. This was his initial consignment to our house and he expressed himself as being highly pleased with the handling and sale of same.

J. H. Crawford, Pipestone county, Minn., writes our South St Paul house: "I have been busy loading out a load of hogs to Clay, Robinson & Co., Sioux City, and did not write you about cattle. They got here all right. I think they are a class of stuff that will do well on good pasture."

C. W. Hall, Fairbault county, Minn.: "I received your check for 51c for overcharge of freight and I want to thank you for the same, and also for the sale you made on the hogs. I was more than pleased with results and shall be glad to speak a good word for you whenever I get the chance."

F. E. Davey, Henry county, Ia.: "I have been receiving your hog market letter regularly and it is very useful. Thank you for same. There is not a bunch of cattle on feed in this part of the country except mine, as against usually a lot of them, and no hogs to speak of, with the pig crop promising to be very light."

"We are certainly delighted with the price our lambs brought, but this is nothing out of the ordinary, when you consign your stock to Clay, Robinson & Co." This is what James Watson and A. Mitchie, prominent feeders of Larimer county, Colo., said regarding the sale of their shorn lambs at $9.50 at Chicago on March 25.

On March 25 our South St. Paul house landed a lot of 340-lb hogs at $10.75, belonging to O. F. Newman,

Washington county, Minn. This was top by 10c per cwt above any other firm's sale. They also obtained $10.70 on the same date for a Minnesota shipment of 53 head, averaging 286 lbs, being next best price by 5c per cwt.

Our South St. Joseph house sold March 28 for C. E. De Long, Rocky Ford, Colo., 505 Mexican lambs, averaging 74 lbs, at $10.20, top by 20c per cwt. They also sold same day two doubles of lambs, averaging 79 lbs, for W. C. Beaty, Otero county, Colo., at $10 00, next highest sale and 10c per cwt above any lambs sold by any other firm.

J. P. Clancy, Dickey county, N. D.: "Stock is pretty well shipped out of our territory. Farmers have been plowing and seeding the past week. Many of the older settlers are predicting a crop failure this year, stating that during the '80s spring opened unusually early as this season, but later a severe drought developed and heavy losses resulted."

F. P. Rudolph, well-known feeder of Larimer county, Colo., is marketing a big string of lambs at Chicago through our house. "I have been shipping to Clay, Robinson & Co. for the past five years, or ever since I started feeding lambs. I have always thought that I would let well enough alone, so that is the reason that I have been a steady patron of C., R. & Co."

J M. Cartwright, Dodge county, Minn.: "Thank you for keeping me so well posted on the cattle market since January. I was able to market my cattle to much better advantage as a result of same." Mr. Cartwright has been a paid subscriber of the REPORT for the past three years and is one of the many who find it profitable and interesting to read the same.

H. W. Drake, Claiborne county, Miss., writes our St. Louis house: "I am very much pleased with sale of hogs and I was fully aware that the pigs were not only light but had not had as much corn as they should have had. Next season I hope to have more corn in my crib and a better class of hogs to ship, and I shall certainly consign them to you. Thank you for your courtesy."

J. J. Shrader, prominent farmer and feeder of Dekalb county, Ill., was on the Chicago market March 24 with a load of mixed cattle, part of which were of his own feeding. The cattle were handled by us. He said that he was highly pleased with the sale of both the steer and she stock. Mr. Shrader has shipped to us steadily for the past three years, which is positive proof that he received the right kind of service.

Among the prominent shippers who were on the Monday cattle market at Chicago, and who routed their stock by the old and reliable live stock commission line—Clay, Robinson & Co.—follow: A. A. Dorn, Pottawattamie county, Ia.; B. S. Barton, Turner county, S. D.; T. M. Hughss, Hamilton county, Ia.; W. Darner, Mahaska county, Ia.; L. Lewison, Mower county, Minn.; Gyett & P., Nodaway county, Mo.

J. T. Mayhew, Montgomery county, Ia. "The number of cattle on feed here is about 40 per cent of one year ago and of hogs about 35 per cent. Feeding cattle are scarce and high in price. Butcher stuff is not to be found at any price. Corn is all gathered and small grain is being put in rapidly. Plowing for corn has begun, with about the usual amount of sod ground being broken for corn. The indictions point to a light pig crop."

I. Deffenbaugh & Son of Adams county, Neb., were at Chicago on Monday with 77 head of 1,321-lb beef steers which we sold at the pleasing price of $8.05. These cattle had been on feed about 4½ months. They were branded westerns and most of them were bought by Clay, Robinson & Co. at Denver at $5.00. The senior Mr. Deffenbaugh is one of the oldest shippers to the Chicago market, being the first to ship cattle over the Rock Island Railroad from Illinois to the Union Stock Yards.

Included in the many well-known feeders who were represented on the Monday cattle market at Chicago, and who are now fully convinced that "Clay, Robinson & Co. are O. K.," were: G. J. Mullis, Clay county, S. D.; F Boon, Dallas county, Ia.; J. Hanson, Ida county, Ia.; G. J. Harkinson, Adair county, Ia.; E. H. Hayman, Rock county, Minn.; A. N. Mitchell, Brown county, S. D.; Jens Johnson, Union county, S. D.; G. A. Matz, Dawson county, Neb.; Charles Triplett, O'Brien county, Ia.; J. F. Cartright, Genesee county, Mich.; J. F. Kritenbrink, Guthrie county, Ia.

Top Lambs By 35c Per Cwt.

Lamar Colo., was represented on the Kansas City market March 28 with 251 shorn lambs of 75 lbs average. They were marketed by Heath Bros. & Drake and were sold by Clay, Robinson & Co. at $9.10, up to then 35c per cwt higher than any other shorn lambs ever made on that market.

Brand Inspectors' Report.

Number of range cattle inspected at Chicago for the year 1909 follow:

When the "Runts" Were Sold.

One of the Kansas City newspapers states that a middle aged woman went into a clothing store, followed by two robust boys of about twelve years of age. The woman told a clerk she wanted to buy some clothing for the boys. The clerk began laying out various patterns of cheap grades, but none of them appealed to the woman or to the boys, until she came to a blue serge. The price mark read $20. A look of interest now lighted up the woman's features. The rest of the story is best told by the newspaper reporter, as follows:

"How do you like this one, boys?" she asked.

"Just the stuff, ma," they said.

"Now, madam, we have that same thing in a little better quality," from the clerk. He took a few more blue serge samples from the case and placed them on the counter before the three.

"What's the price of this?" she asked, holding one of the coats upward to the light.

"Twenty-three fifty, but if you take two of them I'll make it forty-six even. Now what else for the boys? Shoes?"

"Yes, fit them up with something pretty heavy that will stand the wear. These boys are so hard on their shoes."

After the clerk had added up the bill, which, besides the two suits, included two pairs of shoes, two hats and two shirts, the total was $58.40.

"Well, boys, you have fifteen cents left for candy," the mother said. "You see, clerk, the boys' father had two little runt pigs that he thought would sure die, so he gave them to the boys to raise. They sold these pigs yesterday."

"Boys, if you hadn't cut off their tails for markers you would have had enough money to get you a fancy vest apiece," the clerk said.

Did the Business.

Advertisements in the REPORT usually produce results. Dr. T. J. Haines, Three Rivers, Mich., who ran a small card, advertising for sale his breeding herd of 26 pure-bred Angus cattle, writes us March 8:

"The advertisement brought me a buyer. Accept thanks."

Our Calendar.

In case any readers of the REPORT have failed to receive our handsome "American Beauty" souvenir calendar for 1910 and will kindly drop us a line to that effect, we will gladly mail them one. We want every customer and friend of Clay, Robinson & Co. to receive one of these, and if you have not had one it is waiting for you upon request.

SOUTHERN CATTLE for SPRING DELIVERY

We have for sale 4,000 head of Panhandle two-year-old steers and 1,200 head of two-year-old spayed heifers of the well-known "L F D" brand.

Also 5,000 head of good quality three, four and five-year-old Southern Texas and New Mexico steers, April and May delivery. All grade Herefords with the exception of 1,200 head of Angus. Suitable for Kansas and Oklahoma pastures.

Also 15,000 New Mexico and Arizona yearlings and 7,500 two-year-old steers for May delivery.

Also 2,000 New Mexico cows from three to six years old, in calf, and 700 head of two-year-old heifers. All high-grade Herefords.

1,050 head of mixed Colorado and New Mexico coming two and three-year-old steers, about 75% Whitefaces, all dehorned. Have been wintered and will be kept on hay until April 1st. Can be delivered any time up to May 1st. These steers are good boned, with excellent outcome.

Besides the above, we have 1,600 head of native dehorned steers, two to four year olds, for March 15th delivery. Also several mixed herds of choice native cattle for immediate delivery.

Parties wishing anything in this line will do well to correspond with, or call on,

Clay, Robinson & Co.

NATIVE BEEF STEERS.

Range of prices and bulk of sales of native beef steers this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Range.	Bulk.
This week	$5.50@8.75	$6.75@8.00
Previous week	5.75 8.85	7.00 8.35
Year ago	4.75 7.35	5.60 6.70
Two years ago	4.50 7.50	5.80 7.15

Marketing Thursday 5,558. Trade slow but about steady. Top $8.70, paid for 14 head of of 1,528 lbs average. There were very few sales above $8.00, however. Arrivals Friday 1,247. Trade was listless at prices steady to 10c lower. Best steers at hand made $7.75. As compared with last week's close market was generally 15@25c lower.

This week opened with receipts of 22,273. Market dull from start to finish. Prices broke 10@20c from last week's close and the loss from start of previous week was 25@35c. Offerings which sold at $6.75@8.00 bore the brunt of decline. Eastern shipping outlet was narrowed, exporters were weak props under the market and local dressed beef men were poor buyers until a lower trading basis had been established. Three loads of very choice 1,582 to 1,685-lb beeves brought the top of $8.75. Owing to less competition from feeder buyers, packers got numerous short-fed light weights at $6.25@6.50. General bulk of business at $7.00@8.00. Dull trade on Tuesday at barely steady rates. Run 3,721. Best beeves offered went at $7.65, averaging 1,218 lbs. Receipts Wednesday 15,000. Market was semi-demoralized. The light weights sold 25c lower than Monday and heavy kinds anywhere from 25@40c off. Top beeves brought $8.50.

Revised quotations for all grades of native beef steers:

Extra choice to prime steers	$8 20	@ 8 60
Good to choice steers	7 50	8 00
Medium to good steers	6 50	7 30
Plain to fair short-fed steers	6 10	6 40
Common to fair steers	5 40	5 90
Extra choice to prime yearling steers	7 60	8 10
Good to choice yearling steers	6 90	7 50
Medium to good yearling steers	6 40	6 75
Plain to fair short-fed yearlings	5 65	6 15
Common to fair yearlings	5 25	5 50
Good to choice stags	6 00	6 75
Common to medium stags	5 00	5 80

BUTCHER STOCK.

Bulk sales of beef cows and heifers, canners and cutters, and bulls this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Bulk cows and heifers.	Bulk canners and cutters	Bulk bulls.
This week	$4.65@6.00	$3.10@3.75	$4.75@5.65
Previous week	4.75 6.50	3.15 4.25	4.85 5.75
Year ago	4.25 5.50	2.35 3.00	3.85 4.50
Two years ago	4.00 5.50	2.25 3.15	3.75 4.50

Prices for cows and heifers mostly 10@15c lower Thursday. Choice heifers reached $7.50 and prime heavy cows went up to $7.25. All price changes for bulls Thursday tended toward a lower basis. Bulk of calves showed $1.00 loss from high point previous week. It took choice lots to bring $9 25. Generally 10c lower market for cows and heifers Friday. However, prices stood 15@25c higher than close of previous week. Trade in bulls was in weak shape and sales mostly 25@35c lower than early in the week. A dull and mean trade in calves at prices 75c lower than Friday of previous week.

At start of this week cows and heifers lost 15@25c. Dull trade. Bulls declined 10@15c. Calves steady to 25c lower. There was another price break of 10c Tue day.

Get a Good Balance

in your bank by consigning your live stock shipments to the firm that is interested in them—Clay, Robinson & Co.,—the firm that takes as much pride in getting a top price as you do. Personal interest in our customer's business has been one of the greatest factors in putting us at the head of the list. It pleases us to have our friends say: "It pays well to ship to

Clay, Robinson & Co."

Orders were very limited, buyers claiming that they were having a most difficult time in finding outlet for dressed meat owing to high prices of same. Bulls were weak sale. Calves went mostly 50@75c lower than Tuesday of last week. Tops went at $9.00, a good many of them being sorted. Another 10@15c break in cows and heifers Wednesday. Bulls showed a like decline. Calves steady to strong.

Revised quotations for all grades of butcher stock and calves:

Extra choice to prime yearling heifers	$7 00	@ 7 50
Choice to prime heifers	6 75	7 50
Fair to good heifers	5 30	6 00

STOCKERS AND FEEDERS.

Top price and bulk sales of stockers and feeders this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Top Feeders.	Bulk Feeders.	Bulk Stockers
This week	$6.70	$5.50@6.00	$4.75@5.25
Previous week	7.20	5.85 6.65	5.00 5.75
Year ago	5.50	4.50 5.00	4.25 4.65
Two years ago	5.50	4.60 5.25	4.00 4.60

Barring strictly good to choice offerings, Thursday prices showed 10@15c decline. It was a dull trade Friday at prices 20@35c lower than close of last week, the dry weather and current high prices curtailing demand greatly.

Beef steer market sagging sharply under recent high point and curtailed outside demand brought about a price break of 15@25c for stockers and feeders on initial market day this week. Few sales of feeders were above $6.00, there being little competition against killers in trade for fleshy steers. Prices were again 10@15c lower Tuesday. As compared with recent high time, rates showed 30@50c loss. There was another price break of 10@15c Wednesday. Market ruled very dull.

Revised quotations for stocker and feeding cattle:

Good to choice feeders	$5 75	@ 6 25
Poor to medium feeders	5 00	5 50
Good to choice stockers	5 00	5 40
Plain to medium stockers	4 35	4 75
Inferior to common stockers	3 75	4 25
Good to choice stock heifers	4 40	4 75
Common to medium stock heifers	3 75	4 25
Plain to good thin young cows	3 60	4 20

MILKERS AND SPRINGERS.

Revised quotations for milkers and springers:

Choice to prime	$60 00	@ 70 00
Medium to good	45 00	55 00
Common to plain	35 00	40 00

Hogs.

Bulk sales of hogs of respective weights this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Bulk 200 to 250 lbs.		Bulk 260 lbs and heavier.		Bulk 135 to 195 lbs.	
This week	$10.75@11.00		$10.85@11.00		$10.60@10.85	
Previous week	10.75	10.95	10.80	11.00	10.55	10.85
Year ago	6.85	7.10	6.90	7.15	6.65	7.00
Two years ago	5.95	6.35	5.90	6.30	5.90	6.25

Receipts Thursday 10,080. Opening steady market soon became 5c lower and closed 10c down. Top $11 and bnlk $10.70@10.90. Friday supply 8,318. General market 10c higher than previous day's low finish. Top $11 and sales largely at $10.75@10.95. Saturday supply 3,284. It was a big 5c higher trade, with top at $11.02½ and bulk at $10.85@10.95. As compared with the corresponding day of previous week prices were 5@10c higher.

Receipts on initial market day this week 23,128. A new record price was made, top being $11.20. Speculators opened the market, paying 10@20c above Saturday's general quotations. However, trade weakened owing to slack shipping demand and bearishness of packers, and the close was slow, with fnlly half advance gone. It was impossible to get $11.10 for prime after middle of forenoon. General bulk of sales at $10.90@11.10. Marketing Tnesday 9,283. Trade had a bad case of "spring fever." All buyers had limited orders. Opening 10@15c lower than best time previous day, market closed up like a jack-knife. Early top $11.07½, but $11 bought good ones later on. Most sales at $10.85@11.00. Receipts Wednesday 20,000. Market opened 10@15c lower and closed 15@20c down. Top early $11, but $10.90 was practically unobtainable later on. Bulk of sales $10.65@$10.85.

Revised quotations for all grades of hogs:

Fair to choice heavy shipping	$10 80 @	10 90
Fair to choice bntchers	10 75	10 85
Fair to choice medinm weight	10 70	10 80
Good to choice assorted light shipping	10 60	10 75

Sheep and Lambs.

Following shows top prices and bnlk of sheep and lamb sales this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Sheep Top.	Sheep Bulk.		Yearlings Bulk.		Lambs Top.	Lambs Bulk.	
This week	$9.10	$7.75@8.50		$8.50@9.00		$10.35	$9.25@10.10	
Last week	9.30	7.75	8.40	8.50	9.00	10.60	9.40	10.40
Year ago	6.75	5.50	6 25	6.75	7.30	8.40	7.25	8.25
2 years ago	7.00	5.75	6.65	6.40	7.40	8.35	7.35	8.10

It was generally a strong to 10c higher deal in sheep Thnrsday. While the lamb market was dull, prices were generally steady. Wooled lambs went at $10 15@10.40, latter price obtained by us for Colorados. Shorn lambs sold largely at $9.25@$9.75, with top at $9.80, paid for Colorados. Wooled western wethers at $9.30 and shorn western wethers at $8.60 were tops for sheep. There was no material change in the market for either sheep or lambs Friday. Run 5,277. Market had fairly good life. There was only one lot of wooled lambs on sale, these averaging 67 lbs and going at $10.15. Bulk arrivals were shorn and sold around $9.50, with prime Colorados of 82 lbs average up to $9.80. Best sheep on hand western wethers at $9.00. A small lot of 95-lb shorn native yearlings bronght $8.75, with shorn western wethers at $8 50. As compared with close last week sheep snd yearlings advanced 35@50c and most lambs gained 25c, with instances as much as 40c up.

Supplies at start this week 13,996. Sheep and yearlings went 10@15c lower and lambs were 15@25c down, more sales at the ontside loss than otherwise. A lower market at Buffalo and a dull and sagging dressed meat trade in the East were the bsaring-down factors. Wooled Colorado lambs sold up to $10 35. Most shorn lambs brought $9.25@9.50, with top at $9.60, latter price being obtained by us for Colorados. A small lot of Colorado wethers brought $9.40, with practical top at $9.10, paid for westerns, while most sheep were shorn western wethers and sold at $7.65@8.25. Yearlings were conspicuous by their absence. Market again 10c lower Tuesday. Run 9,320. Wooled lambs sold largely at $10.00@10.25, latter price being top and secured by us for Colorados. Shorn sold at $9.25@9.50, latter figure also being obtained by us for Colorados. Shorn western wethers again made up bulk of sheep offerings and went at $7.85@8.35. Marketing Wednesday 12,000. Sheep in scant numbers and prices held steady. Dull trade in lambs at prices 10@25c lower. Wooled lambs were not wanted.

"Strippings" for Consumption.

B. J. Kendall, M. D., Geneva, Ill., asks us to give publicity to the following:

"The most certain method ever adopted for the cure of the 'Great White Plague' is through the diet used as per directions given below which can be taken at home and comes within the reach of the poor as well as the rich.

"During the last fifteen years I have prescribed this diet in hundreds of instances and where directions have been followed strictly it has raised the weight and increased the strength and vitality of the patient rapidly up to a normal condition.

"The all-important thing is to drink large quantities of milk strippings, the very last of the milking, which is all cream when a proper cow is selected. To get best results a healthy cow should be selected, one that does not cough and one that gives very rich milk. A Jersey cow is preferable. The milk should always be tested, to be sure that there is a large per cent of cream in it.

"The last quart should be milked into a seperate dish which rests in a larger vessel containing warm water just sufficient to prevent the strippings from cooling below blood heat. The cow should be thoroughly cleaned to prevent any dirt getting into the milk so the patient can blow back the froth and drink at once without straining, as this cools it too much.

"Begin by drinking nearly a pint in the morning and the same at night and increase the quantity gradually so that in 10 or 15 days a full quart will be taken twice a day. It should be taken immediately after milking before it has had time to cool any. All should be taken that can be without too much discomfort and then rest two or three minutes and drink more and rest again, and so on until a full quart has been taken as soon as it can be conveniently. In about fifteen minutes the patient should eat at the table such articles of food as are known to agree with the stomach. At noon eat as usual.

"When the strippings are not allowed to cool below blood heat and taken immediately after it is milked a full quart will be transfused into the circulation in a remarkably short time.

"I never have seen a case but could take the strippings without any discomfort worth mentioning when above directions were followed strictly, although some have declared they could not before trying it; but when they delayed taking for half an hour and the milk had cooled ten degrees I have seen half a pint make them very sick. The great secret of success with it is in taking it immediately after milking and not allowing it to cool below blood heat, taking a full quart morning and evening and having milk that is very rich."

Notice.

We shall appreciate it very much if any of our readers who by mistake are receiving more than one copy of the REPORT, or whose paper is erroneously addressed, will immediately advise us. In cases where, by reason of a difference in the spelling of the name or any other cause, a reader receives more than one copy it of course entails upon us a double expense for postage without being of any benefit to the recipient. Our readers will confer a highly appreciated favor by thus assisting us to keep our mailing list corrected. In case you are getting two copies please send us the wrappers from both so we may locate the error.

How to Feed Hogs.

Although corn has always been considered the leading food for the feeding of live stock, it has been proved by the experiment station of the College of Agriculture of the University of Missouri that hogs thrive less upon a diet of pure corn than upon a mixture of corn and other foods. In three separate experiments it was demonstrated that hogs not only grew faster, but their flesh is much more palatable when they have been fed on a ration of corn mixed with other feeds.

In one experiment a hog that weighed 120 lbs lacked but 10 lbs of doubling its weight in 60 days when fed on a mixture of corn and tankage, while another hog of the same weight only increased its weight 68 lbs upon a diet of corn alone. A diet of corn alone has been found to produce too much fat and does not permit the various organs of the hog to develop as when fed a mixture of corn and other grains, such as soy beans, linseed oil meal, wheat middlings or tankage.

These experiments, which have just been published in bulletin form by the college of agriculture, were the work of Prof. R. B. Forbes, formerly of the faculty of the Colledge of Agriculture of the University of Missouri, but now connected with the Ohio Experiment Station. In the experiment several groups of hogs were used.

Each bunch was fed a different mixture of corn and other foods. Those fed on corn and wheat middlings increased 80 lbs in 60 days. The pen fed on a mixture of corn and linseed oil meal increased 105 lbs each in the same length of time. Those fed on corn and soy beans increased slightly more in weight than those fed on corn and linseed oil meal. The herd fed on a mixture of corn and tankage almost doubled in weight in the 60-day period, as was mentioned before.

Another result of the experiment was the effect on the various organs of the body of the hog by the various foods. The explanation of the superiority of the corn and tankage ration lay in the fact that it caused a corresponding increase in the lungs, heart, liver, spleen, tenderloin, kidneys and leaf lard of over-developing one organ at the expense of others, as was shown to be the case with other foods.

In addition to showing the farmer how he can make more money out of his hogs, these experiments demonstrate the fact that if the farmer is to make the most from his investment in general, he must know the specific effects of the various foods upon his hogs and cattle as well as the skilled physician knows the effect of various drugs upon his patients.

The saving of shrink and loss of blood when dehorning by the use of Shoo Fly Horn Paint more than fourfold pays the cost of use. It also prevents blood poison and heals the wound very rapidly. See adv. elsewhere in this issue.

PREPARE NOW

MAKE THE HARVEST CERTAIN

YOUR time and careful judgment cannot be used to better advantage than in preparing well in advance for the proper harvesting of your grain crops.

Take no chances of delays, with experimental harvesting machines. Don't risk the choice of one or two neighbors, because you must buy for many years' service as well as this year's harvesting.

It is necessary that you be prepared with efficient harvesting machines if you are to reap all the profit that your harvest should yield.

Right now is the time to ascertain whether or not you need a new harvesting machine—binder, mower, reaper, hay rake, tedder—it does not matter so much which machine you need, the principle is the same.

You should start today to look over your equipment—ascertain what you will need.

There are many points to be considered in selecting a harvesting machine. If it is a binder you need, you should have a machine that is efficient, dependable and durable, and then the machine should meet your particular requirements—and to do all this it is necessary that you take sufficient time to properly consider the selection of the new machines.

Buy wisely—safely—on the verdict of thousands of farmers of America and all over the world who have cut out the failures and choose from standard makes of the famous I H C Line of Machines.

Champion McCormick Osborne
Deering Milwaukee Plano

Why waste your valuable time—patience—labor, and sacrifice part of your crop this year and every year in experimenting with unsatisfactory machines? Others have taken all the experimental risk for you—if you act wisely now.

Don't wait until you must "buy in a hurry." That is not necessary, because an I H C Dealer is right near you and will, any day, show you just the I H C machine adapted to your particular needs.

He will also take your reservation order for reliable binder twine on which you should take no risk this year. The late market may be flooded with inferior grades of experimental twine. It's important that you investigate these facts and your I H C Dealer has the details to show you—and the proof of quality on all machines and I H C brands of binder twine.

Then, too, remember that with the strongest and most reliable guarantee given on any machines in the world, you also have the satisfaction of knowing that I H C interchangeable parts are quickly at hand—through your I H C Dealer. No waits. No delays. No annoyance. Perfect workmanship and materials of highest quality are guaranteed by the experience of over half a century in I H C machines. Make your harvest certain.

We urge upon you the importance of deciding this matter now; because, if you put it off until a more convenient time, the chances are that you will never give the subject proper attention. You, no doubt, think there is plenty of time—but the harvest season will be upon you the first thing you know. Therefore, consider this harvesting machine question, now, while you have the time to give it proper study. Write for any information you may need to help you make a wise decision.

Ask the I H C dealer for catalogue of the machine you want. If you do not know the dealer nearest you, ask us.

Take your choice of machines. The quality is the same in all—the best possible.

Don't experiment with binder twine, either. Get one of the seven perfectly dependable brands of twine and be sure. Choose Champion, McCormick, Osborne, Deering, Milwaukee, Plano or International—in Sisal, Standard, Manila and Pure Manila brands.

If it is not convenient to see an International dealer, write for full information and the catalogue you want.

FREE A SHETLAND PONY AND OTHER PURE-BRED LIVE STOCK FREE

The Grandest Opportunity You Will Ever Have. No Other Such Chance in All the World for You. Don't Lose a Moment in Sending us the Coupon Below.

Thornburg, Iowa, Feb. 12, 1910.

FARMERS' TRIBUNE,
Sioux City, Iowa.

DEAR FRIENDS:—

I received my pony this day-noon and I must say he is a dandy. I think you could not have suited me any better. I thank you a hundred times for him, and I certainly will try and work for you again.

I have a very hard territory to canvass but I wrote a great many letters, so I got a good many that way. May I ask how old he is and what is his name?

Oh my, I am pleased. As soon as I can I will take him to What Cheer and get his and my picture taken and send you one. He came through in fine shape, and I have a fine warm stall in papa's new barn. I think his color fine, and his pretty white feet.

Again thanking you for him, I remain, as ever,

Your friend,
LEO MORTON.

The live stock which we are going to give away, **absolutely free**, is the best to be had. No better stock is found anywhere. The breeders furnishing this stock are known from the Atlantic to the Pacific and from Mexico to Canada. Let us tell you how to secure it.

Additional Live Stock Absolutely Free.

In addition to the Shetland pony, the following live stock will be given away:

HEREFORD BRED HEIFER from breeders of Hereford cattle, E. M. & R. W. Cassady, Props. of Walnut Ridge Stock Farm, Whiting, Iowa.

POLAND-CHINA BRED GILT from a breeder of Short-horn cattle, Poland-China hogs, Shropshire Sheep and Black Langshan chickens. A. L. Mason, Prop. of Greenbush Stock Farm, Early, Iowa.

BERKSHIRE BRED GILT is from a breeder of Percherons, Short-horns, Berkshires and Jerseys. W. S. Corsa, Prop., Gregory Farm, White Hall, Illinois.

NORTH STAR RAM comes from the originator and breeder of North Star Sheep, W. W. Bell, Valley Springs, South Dakota.

A SCOTCH COLLIE is furnished by M. A. McCready, Sioux City, Iowa.

THE TRIO OF WHITE PLYMOUTH ROCK CHICKENS is furnished by E. B. Babcock, Prop. of Morningside Poultry Yards, Sioux City, Iowa.

WE WANT YOU to have some of the stock and we are going to help you to get it.

SEND US IMMEDIATELY your name and address in the coupon below. This information as well as the live stock is free. Tear out the coupon and send it to us at AT ONCE.

FARMERS' TRIBUNE, 318 Iowa St., Sioux City, Iowa.

Please send me at once pictures and descriptions of the live stock you are going to give away. Let me hear from you immediately, as I want to get some of your live stock.

This enclosed gear Stewart Shearing Machine has had the largest sale of any shearing machine ever made. The gears are all cut (not cast), from the solid steel bar, all file hard and run in an oil bath. The shear is the famous Stewart pattern, as used in all the large sheep countries of the world.

We guarantee this machine to please you in every way or it may be returned at our expense. Get one from your dealer, or send $2.00 and we will ship C. O. D. for balance. Write for our 1910 **free book on expert shearing.** Send today.

CHICAGO FLEXIBLE SHAFT CO. 133 LA SALLE AVE., CHICAGO

Care of Suckling Sows.

For the first weeks of a pig's life the mother's milk is its drink as well as food, and therefore in caring for suckling sows it should be the aim to so feed them that milk of only medium richness will be furnished instead of a limited supply of that which is extremely rich, the latter being less healthful and more liable to cause thumps, scours and unsatisfactory growth. It is only a law of nature that pigs should make more economical gains through the milk of the dams than in any other way, and it is also true that the sow will furnish nurishment for her young at less cost for the raw material than any other animal on the farm. A sow's milk is rich in solid matter, which amounts to 17 to 20 per cent. On a comparative basis of 1,000 lbs live weight a cow giving 3 gallons of milk a day will give in the milk 1 lb of fat and .77 lb of protein daily, while a sow's milk will yield 1.26 lbs of fat and 1.1 lbs of protein a day on an average. In composition sow's milk in comparison with cow's milk is very high in total fats as well as solids. —From Coburn's "Swine in America."

Much Due to Weather.

The condition of the weather will govern the length of time it will be necessary to keep a newly farrowed sow in close quarters, but she should not be denied access to the open air. Pigs should not be allowed out in a cold rain or where they will receive the shock of cold winds. Where they can do so without danger they should be out in the sun within 24 hours after birth, and after that the best practice is to let them run in and out at will. Neither the sow nor very young pigs should be permitted to run in pasture early in the morning if the grass is tall and wet with rain or heavy dew.—From Coburn's "Swine in America."

Europe Has Fewer Sheep.

A great diminution in the number of sheep in Europe is shown by statistics furnished by M. Tisserand, a French agricultural authority. In 1840 France had 32,000,000 sheep, whereas on January 1, 1907, the number had fallen to 17,000,000. But a greater decrease is shown in Germany. Official figures placed the number of sheep in that country in 1870 at 25,000,000; in 1907 it had fallen to 7,000,000. In Austria Hungary there are only half as many sheep as in 1869, when the country possessed 20,000,000. The least variation has been in England. In 1871 there were 33,000,000 sheep there, and today there are estimated to be 31,000,000.

It is for want of application rather than of means that men fail of success —Rouchefoucauld.

The Lowest Prices Ever Quoted for Practical Dairy Separators.

We do not advertise or sell small capacity kitchen separators made to set on a table. Some dealers are representing such toys as practical dairy machines. Our Economy Chief Separators are all big, strong, solid, substantial machines, built for the business of dairying, guaranteed to do the work and produce the profits. Every one is mounted on its own solid base and is of the finest and most substantial construction. Even the smallest Economy Chief, at $27.90 complete, has a skimming capacity of 300 pounds, or 145 quarts per hour. It will skim any quantity from 1 gallon up. Sixty days' trial to every buyer. Fill out this coupon for our free Dairy Guide, the book that tells you all about the Economy Chief Separator.

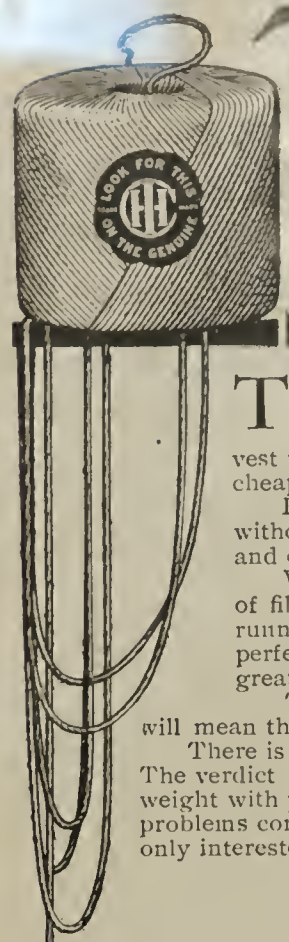
SEARS, ROEBUCK AND CO., CHICAGO



LET THE EXPERIENCE OF THE MAJORITY OF FARMERS BE YOUR GUIDE IN BUYING TWINE

THE time has come to order your binder twine for the 1910 harvest. Twine dealers are placing orders for their season's stock. The mills are running. Now is the time for you to decide the twine question. It is something that requires careful consideration. The success of your harvest will depend on the uninterrupted work of your binder, for no binder can work well if you use a cheap grade of binder twine.

It is our aim to have every farmer who uses I H C twine go through the 1910 harvest season without a break in the field. We have much more at stake than merely selling twine. Your interests and ours are the same.

We know that the raw materials from which I H C twines are spun have the quantity and quality of fibre that insure greater strength than is found in any other twine. They are evenly spun—smooth running—do not tangle in the twine box—work well in the knotter, insuring perfect binding and perfect tying. They insure your being able to work your binder through the entire harvest season with greatest speed and economy and are therefore practical profit insurance.

Those who buy cheap twine will certainly have trouble—delays due to tangles, knots and breaks will mean the loss of valuable time—and every delay at harvest time will cut down your profits.

There is a sure way to avoid this. Let the experience of the past be your guide in purchasing your twine. The verdict of the majority of the farmers of this country is a safe guide. Their decision should have more weight with you than the statement of any twine manufacturer. These farmers know. They have the same problems confronting them that you have. They have no axe to grind. They do not sell twine. They are only interested in results.

I H C Brand of Sisal—Standard Sisal Manila or Pure Manila

Are the twines used by the majority of the farmers of this country. They have been proved to give the best results. Eighty-five to 90 per cent of the farmers use Sisal. It is smooth running and works at steady tension without kinking or tangling in the twine box—insuring perfect binding and perfect tying. Its only equal is the really high grade Manila twines such as bear the I H C trade-mark.

Your interests and ours are identical on this twine proposition. We have more at stake than selling twine. We are vitally interested in the successful operation of hundreds of thousands of binders. On their successful operation depends our success—and we know they cannot operate successfully with poor twine. No binder made can. For this reason we have given the twine problem careful study. When we say "Stick to Sisal or high grade Manila bearing the I H C trade-mark"—we do so because we know them to be the highest standard of excellence in binder twine.

But we don't ask you to do as we say. We want you to be the judge. But your judgment to be right should be based on facts—not on the statement of any twine man. And the fact is—that the majority of the farmers of this country use I H C twine. Sisal or Standard (which is made from pure Sisal) comes 500 feet to the pound; high grade Manila, 600 feet to the pound; Pure Manila, 650 feet. See your local I H C dealer at once and let him know how much you will need. If you want more facts on binder twine, write direct to

Clay, Robinson & Company's LIVE STOCK REPORT

Vol. 20 | Chicago, Friday, April 8, 1910 | No. 14

IN THE ARENA AT FORT WORTH, TEXAS.

Judging in progress, junior Herefords on one side and a class of horses on the other, at the recent National Feeders' and Breeders' Show.

Clay, Robinson & Company's
LIVE STOCK REPORT

Issued every Friday at Union Stock Yards, Chicago.

R. P. FALES.....Managing Editor
GUY FRIDLEY.....Associate Editor

Local and long-distance Telephone "Yards 4194."
Cable address "Kelso," Chicago.

This paper will be sent to anyone, whether a customer of Clay, Robinson & Co. or not, upon receipt of 50c to pay postage for one year.

If you receive the paper for a time without having ordered it, please understand that it is sent you with compliments of Clay, Robinson & Co., to keep you posted on the markets.

When requesting change of address always give old as well as new postoffice.

Advertising rate $2.80 per column inch, each insertion. Special low rate for live stock sale advertising. If you intend holding a public sale write for prices on quarter-page, half-page or page space.

Address all communications and make all remittances payable to THE LIVE STOCK REPORT, Union Stock Yards, Chicago.

A Bigger Paper.

In pursuance of our policy of giving our readers biggest possible value for the nominal subscription price charged for the LIVE STOCK REPORT, we are this week adding four additional pages. We shall hereafter run sixteen pages, instead of twelve, a large part, if not all, of the time. This will enable us to print more pictures, more articles of a general nature, and make the paper more useful and interesting all around. If your name is not on the regular subscription list, insuring receipt of every issue, 50c to cover postage will place it there for one year.

NOTICE!

Our "complimentary" mailing list has become so large that it is no longer possible to print the enormous editions required to cover same—to say nothing of cost of postage and other expenses.

It therefore becomes necessary to immediately cut off several thousand names, and these are now being taken from those who have been receiving the paper free for six months or longer.

From now on we can send the paper REGULARLY only to those who enroll as paid subscribers. Non-subscribers may continue to receive occasional copies, but the only way to insure receiving every issue is to subscribe. The subscription price is fixed at only 50 cents per year, which barely covers cost of postage. Payment of this nominal sum, however, will show us that you appreciate the paper and make it worth while for us to send it to you.

As a special inducement to send in your subscription at once, we will, provided you forward same as promptly as you conveniently can after reading this notice, send you, free and post-paid, a useful little premium.

This, if you have not heretofore been a paid subscriber, will entitle you to the paper for A FULL YEAR FROM NOW—no charge for the time you have already received it. This does not apply to renewals sent in by persons who are already subscribers. Such renewals of course date from the subscriber's expiration date.

THE LIVE STOCK REPORT,
Union Stock Yards, Chicago.

Enclosed find 50c to cover postage on the LIVE STOCK REPORT for one year.

Topped Departments in Sheep Trade.

On April 5 our South St. Joseph house topped the sheep market in every department. They landed Colorado lambs at $9.60, yearlings at $9.00, wethers at $8.00 and ewes at $7.75. In addition to these prices being the summit for their respective classes, no other firm negotiated any sales as high as these in the sheep department that day.

Bulk Colorado Lambs Sent Out.

"There may be isolated cases where Colorado lamb feeders will make big profits, but there are actual cases where feeders have lost money. Of course the rank and file of the feeders should come out with their accounts on the right side of the ledger, providing the market holds up." This is what W. A. Drake, the pioneer and extensive feeder of Fort Collins, Colo., said to a representative of of the REPORT, and who is marketing all of his lambs through Clay, Robinson & Co. "The bulk of the lambs have left Colorado. No more big runs will come from there, although consignments will be strung out until June, owing to the lateness of which some lambs were put in the feed lots. I believe that the new interpretation of the tax law forced out many of the lambs before April 1 and in a measure is responsible for the sharp break in prices at the markets. Colorado feeders certainly need a continuation of high prices if they are to be remunerated for their risks, time and labor expended in preparing the

W. A. DRAKE.

lambs for market. A great many of the lambs cost from $7.00@8.00 per head to put them on the Chicago market, and of course it is imperative that we get better than $8.00 a head if we are to make any money. As will be seen, no abnormal profits will accrue even then. A great many of the lambs have $2.00 worth of corn and $1.00 worth of hay in them per head. They cost around $4.00 a head and freight, shipping and selling charges will amount to $1.00 per head. I look for a relatively light number of lambs to be fed in Northern Colorado this coming winter. A great drawback is the probability of a small crop of alfalfa hay. The long and severe drought of two years ago about ruined our alfalfa fields. Heavy seeding is being done, but it is questionable when we will be able to get a good crop again, although we are in hopes of realizing one at least in 1911. Conditions are as good in Southern Colorado as they are bad in Northern Colorado. However, if the lamb raisers expect Southern Colorado feeders to stock up heavily they will be greatly disappointed. If prices on the range are advanced very much feeders will simply not take the chances."

Big Tumble in Sheep Prices.

Prices for sheep and lambs have taken quite a tumble from the recent high point, or when the market was on a record-breaking plane. The decline was generally 75c@$1.25. The break is attributed to various reasons, namely: A deplorable condition of the eastern dressed meat trade, hot weather, cheap eggs and plentiful supplies of fresh vegetables. Then also the filling to overflowing of the big feeding stations adjacent to the Chicago market with offerings was a big club in the hands of the packers.

Chicago slaughterers are giving wooled lambs a frigid reception. On the other hand buyers at the River markets seem to be taking them readily at current prices there. Also eastern shipping buyers favor the wooled stock, but outlet through this channel is very narrow and unreliable at this time. While present market conditions prevail, along with the fact that shearing dates are pretty well taken up for the next two weeks at the big feed yards near Chicago, we advise marketing stock in fleece at the River points, while owners who intend coming to Chicago with their wooled offerings should make arrangements to shear the same.

This is certainly no time to get panicky. Instead owners should think twice before shipping and also be determined to not make bad matters worse by feeding a sinking market liberally. By all means do not send in anything that lacks excellent finish. Conditions certainly warrant lighter supplies and very cautious marketing during the next two weeks at least. We do not believe that packers will be able to dominate the trade if offerings are judiciously and conservatively sent to market.

Much of Cattle Decline Regained.

The cattle trade presents somewhat of an anomaly these days. It looked as though there was to be a continuous rise in values, when suddenly the props seemed to give way under the beef trade and, despite moderate supplies at the markets, a decline of 25@50c was recorded at the market centers last week. This decline came after, and not before or during, the Lenten season. It was due to a combination of unseasonably warm weather and a practical revulsion against the high prices ruling. However, the decline was not unexpected, for prices had advanced steadily for six weeks to the amount of $2.00@2.50, and besides eastern dealers were unable to find outlet for beef when they endeavored to mark up the price of same proportionately. This week we are again having light supplies and the trade has recovered a considerable proportion of the recent decline. The market, however, has not the outside support it should have and were we to see any material increase in supplies we doubt if the advance would long remain. However, so far as the immediate future is concerned, it would appear as though supplies were to continue moderate, but we are just inclined to anticipate a pretty free movement of cattle to the market before June 1. Feeders have confidence in the future and are not inclined to sacrifice immatured cattle, which is most excellent judgment. We cannot but believe that good quality, well matured cattle are going to command very satisfactory prices. Meantime fat heavy kinds, that is to say, cattle weighing from 1,450 lbs upward, should be shipped, as with warm weather buyers are showing a marked preference for the lighter and handier weights. A study of the receipts at the six leading markets the past three months shows that we have gained 23,000 cattle over the same period last year. This in view of the constant cry of shortage in the country is hard to reconcile, but the figures remain nevertheless. We believe that still better times are in store for the cattle feeders during the next ninety days, when, according to our reports, receipts will drop from the corresponding period of last year. The feeders well deserve higher prices, owing to the high cost of corn and hay and the severe cold weather conditions they had to contend with last winter.

The Ide Illinois Beeves at $8.65.

F. F. Ide of Illiopolis, Ill., was at Chicago on Wednesday with 43 beef steers. In the shipment were 33 head of 1,568 lbs average which brought $8.65, top price for the week and 10 head, averaging 1,380 lbs, which made $8.35. These sales were made by Clay, Robinson & Co. The cattle were Herefords and Shorthorns mixed and branded westerns. They were bought by Clay, Robinson & Co. at Kansas City in October at $4.75, averaging 1,100 lbs. Mr. Ide fed the 43 head of cattle about two months two shocks of late soft corn per day on pasture. During the following four months they were put on a full feed of ear corn and alfalfa, added to which was 1 lb of oil meal per head per day during the last two weeks. Mr. Ide recently sold 50 head of hogs, averaging 320 lbs, which followed the cattle in the feed lot, at $1,680.

Mr. Ide is one of the most progressive and successful feeders in Illinois and has topped the Chicago market the past six or seven years every time he has had cattle on the market. "I have always had Clay, Robinson & Co. handle my cattle shipments. I want to compliment Clay, Robinson & Co.'s buyers and sellers for the excellent deal in the cattle I marketed at Chicago Wednesday. The buying price was below my expectations and the selling price above my anticipations."

Keep Brood Sows, Pigs and Shotes.

Statistically the outlook for hogs is bullish. Heavily diminished supplies at all markets for the entire "regular" packing season now closed and consequent depleted stocks of pork products the world over are not ordinarily encouraging to other than the hope of a "strong" market. Just now, too, there is high beef and high mutton; in fact, most all food stuffs are "high." It is this condition that must be taken into account. There is and has been so much agitation over the high cost of living that consumers everywhere are taking into account depleted bank accounts and seeking means of greater economy in victualing the family table. Hotels, cafes and all manner of eating houses have been forced to preparation of bills of fare involving reduced outlay, the only alternative being advanced rates to patrons or bankruptcy. Conceding that supply and demand rule market prices, it were ill advised to give all consideration to one to the entire exclusion of the other. From a "supply" standpoint there is now, as for months past, much to warrant faith in the hog market. But demand, as represented by the consumer, the court of last resort, must not be overlooked. Prices are too high to warrant investment in pork products. The packer, the jobber, the retsiler and the consumer are buying only for daily needs. If ever there was a hand-to-mouth market for swine we have it now. Except prices fall, the daily consumption of pork products cannot be expected to broaden. The season of reduced meat consumption is upon us, the great American hen is now getting in her best licks and fruits and vegetables will be offered more and more freely at gradually falling prices for weeks to arrive. There is nothing to disconrage hog production, however, in this situation. Conceding that prices for swine have possibly seen the high point, there is yet ample room for a reduction in market values and a liberal profit to the hog raiser. Considering corn prices and general cost of bringing swine to marketable age and condition, producers will know that they can accept much lower prices and take home a good profit. The manner in which the consumer followed the advancing price of pork products the past two years is the best evidence of the popularity and the broad outlet for such food stuffs. Again we advise marketing of swine as fast as ready, but take good care of the brood sows, the pigs and shotes. Keep them on the farm. There's money in it.

Lower Market for Wool.

Trade in wool is very dull throughout the country. Values have been further depressed. For instance a clip from a string of Colorado-fed lambs brought to a big feed lot near Chicago started three weeks ago to sell at 26c per lb. Since then there has been a drop to 25c, then to 23c and lately to 20c, although the latter wool had been dipped. Contracting in the West has practicily closed. Manufacturers seem very indifferent, claiming that the goods market is in a very unsatisfactory condition. It is simly a domestic situation, as all the foreign markets are higher and active. Communications from Silberman Bros., the big wool buyers of Chicago, state that with less political agitation, less talk of tariff revision and fewer labor troubles the wool market situation would brighten considerably and dealers and manufacturers regain that confidence which the general prosperity of the country warrants.

Topped the Omaha Cattle Market.

The limit for cattle at South Omaha on April 5 was $7.75. Clay, Robinson & Co. landed two different Nebraska-fed lots at this price. The owners and sales follow: For P. W. Olsen, Swedeburg, Neb., one load of 1,151 lbs average and for J. Peterson of Hampton, Neb., a load of 1,272 lbs average. The above mentioned gentlemen are prominent stockmen and farmers and the cattle were of their own feeding.

An Old Patron Gone.

Death claimed upon the 4th inst. Mr. Jacob Reif at Burlington, Ia. Mr. Reif had been for many years a valued patron of Clay, Robinson & Co , and in fact had been a customer of the firm of J. M. Robinson & Co. prior to the organization of the former firm in 1886. Of late years he had not been able to carry on his work very actively on account of failing health, but we had the pleasure of seeing him occasionally. Interment occurred at Burlington on the 6th.

Fat Cattle Scarce in Ohio.

Our Mr. B. H. Johnson of the sheep selling department at East Buffalo has returned from a trip in Central Ohio and in part writes us as follows: "There are about 15,000 sheep and lambs within a radius of 50 miles of Springfield which will go to market this month. There is lots of corn in that country and elevators are paying 51@52c per bushel. Fat cattle and hogs are about all shipped out and farmers are anxious for something to put on grass the first of May. They are not anxious to buy at present prices. It looks like there will be a very strong demand from that section of the country for cattle, sheep and lambs this fall."

Record Price for Hay-Fed Cattle.

Mr. Logan, of the firm of Gresley & Logan of Centennial, Wyo., was on the South Omaha market April 5 looking after the shipment of four cars of steers. The cattle were high-grade Herefords and Durhams, mostly twos and threes, with a few four year olds on them. They were very uneven in size and flesh. The shipment was handled by Clay, Robinson & Co. Two cars of the heavy weights sold at $7.30, averaging 1193 lbs, while the lighter steers, averaging 1,005 lbs, brought $6.70. These steers all sold for feeding purposes and the price is the highest ever paid for strictly hay-fed cattle to go to the feed lots. Mr. Logan states these cattle had been on a feed of their native hay, which is very nutritions, for a period of between three and four months, and, considering the age of the cattle, had done exceptionally well.

Spurt of Shipping is Over.

W. A. Miner, Weld county, Colo.: "I was surprised when I got your wire,—$9.40—but was more so on receipt of account sales, as I see you sold this car straight. I had expected some sort, at least a few to be thrown out. I see the sale was within 10c of the top. I want to say right here I think it is a cracker jack sale. I guess the spurt of the shipping to get away from the taxes is over now and the ones left will wait and let things clear up a little."

Grass Getting Green in Montana.

E. E. Deffenbauch, live stock agent of the Chicago & Great Western Railroad, with headquarers at Miles City, Mont., informs our South St. Paul house to the following effect: "Stock is doing fine in Montana now and grass is getting green. The weather is just like summer. We certainly need it, as stock is very thin south of the Northern Pacific Railroad. On the north the snow was not so deep and everything wintered in good shape."

GRAND CHAMPION CARLOAD SWINE AT FORT WORTH, TEXAS.

Fed and shown by T. P. Roberts, Iowa Park, Texas. Grand champions at the recent National Feeders' and Breeders' Show. Bought by J. F. Butz for Swift & Co. at $11.40 per cwt. Average weight 351 lbs.

More Cattle and Sheep.

According to the agricultural statistics issued by the Board of Agriculture of Great Britian, there were 7,220,982 cattle in that country at the close of 1909. This was 115,848 more than previous year. Prevailing high prices in 1909 very probably afforded an inducement to save a larger number of calves and the same reason accounted for the decrease of 54,473 in the number of cattle other than cows and heifers in milk or in cavies from 1907, which represents the class annually drawn upon for slaughter. Number of pigs returned in 1909 was 2,308,887, showing a decrease of 442,595 from 1908. The falling off was attributed to higher price of corn and other feeding stuffs, although it is thought that the domestic demand for pig products tempted owners so slaughter more rapidly, and thus reduce the number at the time of enumeration. Number of sheep returned in 1909 was 27,618,419, largest since 1892 and nearly half a million more than in 1908. Number of lambs returned was comparatively small in proportion to number of ewes, so that a smaller increase, if not an actual reduction, in the total number of sheep will probably be revealed at the next enumeration. Number of breeding ewes has only been separately shown in the returns since 1893, and it is possible that prior to that year a larger number than that recorded in 1909 may have been actually on the farms. However, within the last 17 years the total has never previously reached that returned in 1909.

CHICAGO MARKET REVIEW, AND OUTSIDE MARKETS BY WIRE

Current Comment and Chicago Quotations to Wednesday Noon.

Receipts and Shipments.

Following shows official receipts and shipments of cattle, hogs and sheep at Chicago for the past week:

RECEIPTS.

NATIVE BEEF STEERS.

Range of prices and bulk of sales of native beef steers this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Range.		Bulk.	
This week	*$5.50	*8.65	$6.65@	8.00
Previous week	5.50	8.75	6.75	8.10
Year ago	4.75	7.10	5.60	6.65
Two years ago	4.50	7.25	5.85	7.00

*Sold by Clay, Robinson & Co.

Supply Thursday of last week 4,227. There was improved undertone to the market and prices ruled strong to 10c higher. Betterment in the trade was due to the light supply rather than to broader demand. Best beeves offered brought $8 20, paid for 35 head of 1,420 lbs average. Receipts Friday 676. Demand was indifferent and prices barely steady. Closing rates were generally 40c under the finish of the previous week. The bad beef market was responsible for the decline.

Despite the meager receipts of 10,333 on initial market day this week, sellers found it mighty hard to get even 10c higher rates than last week's close for desirable offerings and were unable to obtain better than steady rates for other kinds. Dullness in trade was a very unnatural situation under such a light supply, but local and eastern buyers' indifference was a reflection of a badly shattered beef trade. No dependence could be placed on the demand from exporters. Top beeves brought $8.65, paid for 32 Kansas offerings of 1,656 lbs average. Bulk of sales at $6.65@7.90. Supply Tuesday 2,488. Dull trade at 10c decline for all offerings except choice ones, these going steady. Best steers offered brought $7.70, 12 head of 1,271 lbs average making the price. Wednesday total 11,000. It was a 10@15c higher deal for desirable offerings and a strong to 10c higher one for other kinds. Demand from both local and eastern sources was considerably improved. Top beeves made $8.65, this price being obtained by us for 33 of the 1,568-lb F. F. Ide offerings from Illinois.

Revised quotations for all grades of native beef steers:

Extra choice to prime steers	$8 40	@	8 85
Good to choice steers	7 75		8 25
Medium to good steers	6 65		7 50
Plain to fair short-fed steers	6 25		6 60

BUTCHER STOCK.

Bulk sales of beef cows and heifers, canners and cutters, and bulls this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Bulk cows and heifers.		Bulk canners and cutters		Bulk bulls.	
This week	$4.75@	6.10	$3.15@	3.90	$4.60@	5.65
Previous week	4.65	6.25	3.00	4.00	4.50	5.65
Year ago	4.25	5.65	2.25	3.00	3.80	4.65
Two years ago	4.00	5.50	2.15	3.15	3.75	4.50

A light supply and better competition from outside buyers brought about a more active trade in cows and heifers Thursday of last week and prices ruled steady to strong. All price changes for bulls tended downward, eastern demand continuing very slack. Very dull trade in canners and cutters. Opening steady, trade in veal calves closed a little lower. Dull trade in cows and heifers Friday, although prices were not quotably lower than the previous day and stood 25@35c under high day of previous week. Market for bulls displayed 20@30c loss from close of previous week. Steady trade in calves with corresponding day of previous week and generally $1.50 down from top point a few weeks ago.

Trading in cows and heifers on initial market day this week was 10@15c higher than last week's close. Most bulls advanced 10c Calves held about steady. A strong market for cows and heifers Tuesday, packers being chief buyers. Bulls sold about steady. Barring a few early sales, prices for calves were mostly $1.00 lower than Tuesday last week Supply largest of year. Packer buyers did very little until after the noon hour. Fancy assorted vealers made $8 75 at start, but $8.25 was soon the practicable top. Brisk trade in cows and heifers Wednesday at mostly 15c advance. Bulls sold steady, as did also calves.

Revised quotations for all grades of butcher stock and calves:

Extra choice to prime yearling heifers	$7 00	@	7 75
Choice to prime export heifers	6 75		7 50

STOCKERS AND FEEDERS.

Top price and bulk sales of stockers and feeders this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Top Feeders.	Bulk Feeders.		Bulk Stockers.	
This week	$6.65	$5.60@	6.15	$4 85@	5.35
Previous week	7.00	5.40	6 00	4.75	5.50
Year ago	5.60	4.75	5.25	4.00	4.65
Two years ago	5.30	4.65	5.00	3 85	4.50

Where there were any changes in prices for common and medium stockers and feeders Thursday of last week the tendency was downward. Good to choice stockers and desirable fleshy feeders, however, met better demand, with prices ruling steady. Dull, weak trade in stockers and feeders Friday, with rates 30@50c down from the close of the previous week. Increased arrivals, dry weather and a lower fat cattle trade was responsible for the big decline.

At the start of this week there was a very meager supply, which, along with an improved demand, brought about 10@15c advance over last week's finish. Most strong weight steers again went for slaughter. A light supply Tuesday went about steady, but considering the good rains the country got the demand was a disappointment. The recent slump in the beef steer market seemed to have put a damper on the country purchaser. Active trade on Wednesday at prices generally 10c higher, with demand good.

Revised quotations for stocker and feeding cattle:

Good to choice feeders	$5 75	@	6 25
Poor to medium feeders	5 15		5 60
Good to choice stockers	5 10		5 40
Plain to medium stockers	4 50		4 90
Inferior to common stockers	3 75		4 40
Good to choice stock heifers	4 40		4 75
Common to medium stock heifers	3 75		4 25
Plain to good thin young cows	3 75		4 40

MILKERS AND SPRINGERS.

Revised quotations for milkers and springers:

Choice to prime	$60 00	@	70 00
Medium to good	45 00		55 00
Common to plain	35 00		40 00

Hogs.

Bulk sales of hogs of respective weights this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Bulk 200 to 250 lbs.		Bulk 260 lbs and heavier.		Bulk 135 to 195 lbs.	
This week	$10.50@	10 80	$10.60@	10.85	$10.40@	10.65
Previous week	10.75	11.00	10.85	11.05	10.60	10.90
Year ago	6.95	7.30	7.05	7.35	6.90	7.25
Two years ago	5.80	6.25	5.75	6 20	5.70	6.20

Receipts of hogs Thursday of last week 9,813. While the market was slow, prices ruled strong to 5c higher than previous day's average. Demand was limited, however, and trade quit after urgent orders were filled. Top $10.95 and most sales at $10.70@10.90. Supply Friday 9,063. Trade opened 5c higher, but closed 10c under opening. Summit $11, with most trading $10.70@10.90. Receipts on closing day 3,472. Very uneven market, but a little better than extreme close of previous day. The limit was $10.90 and $10.70@10.80 bought most of the arrivals. As compared with the close of the previous week prices were generally 15c lower.

This week started out with a light run of 16,385. A dull, sticky market. Outlet was limited and buyers very indifferent. General market was weak to 5c lower than Saturday average, with the closing 10c down. Top $10.95, but $10.85 was the limit for anything after middle of forenoon. Most business at $10 65@10.85. Marketing Tuesday 10,163. It was generally a 10@15c lower deal. Demand was limited from all sources and market very slow. Top $10.80 and bulk business at $10.55@10.70. Supply Wednesday 15,000. Opening steady with the previous day's close, the finish was 10c lower. Top $10 80 and most trading $10.45@10 65.

Revised quotations for all grades of hogs:

Fair to choice heavy shipping	$10 65	@	10 75

*Obtained by Clay, Robinson & Co.

Marketing Thursday of last week 6,314. It was generally a steady deal with the previous day's closing rates. A double of prime 136-lb shorn western wethers reached $8.35, with others going at $8.00@8.15. Best yearlings available were shorn westerns and went at $7.65@7.75. Wooled lambs were a drug on the market and there was no safe outlet for fancy kinds higher than $10. Best available went at $9.40@9.50. Bulk of offerings were shorn and went at $9.00@9.30, latter price being top and obtained by us for Colorados. Run Friday 27,095. Dull, weak trade in sheep, with lambs slow but about steady. Bulk of sheep arrivals shorn western wethers which went at $7.50@7.90. Bulk lamb arrivals shorn and sold at $8 35@9.25, with top at $9.35. A small lot of very choice spring lambs, averaging 40 lbs, went at $12.50. As compared with the close of the previous week prices were generally 50@60c lower, lambs selling to least advantage.

It was a semi-demoralized trade in lambs at start of this week. Price break was 50@60c from last week's close, the worst decline for one day in many years. Sheep lost 10@25c. Run 17,837. Wooled lambs from Colorado were very hard to get rid of at $9.10@9 25, latter price being obtained by us. On the early market we landed shorn westerns at $9.00, but as good offerings as ever walked sold on the late market at $8.65, with bulk going at that figure down to $8.25. Summit on sheep $8.00, this price being obtained by us for shorn western wethers. This class of offerings made up bulk of sheep arrivals and sold at $7.60@7.85. Run Tuesday 11,144. Prices continued on the toboggan, loss being generally 15@25c. The market lacked life. Wooled lambs were Colorados and sold at $9.00@9.40, latter price being obtained by us. Bulk shorn made $8 25@8.75. Summit for sheep $7.75, paid for 107-lb shorn western wethers, with others going at $7.00@7.55. Supply Wednesday 10,000. Trade active at prices strong to 10c higher. Top lambs $9.50, sales being made by us for Colorados. Summit on shorn $8.85. The top shorn yearlings and wethers mixed at $8.10 were sold by us, as well as the top shorn sheep at $7.75.

East St. Louis Markets.

[Special telegram from Clay, Robinson & Co.]

National Stock Yards, Ill., April 5—Very light supply of native cattle first two market days this week. Best beeves sold 25c higher than last week's close. Top for full load $7.95, averaging 1,336 lbs, and 50 head of 1,341-lbs average made $7.85. Medium grades and less desirable kinds hardly show as much advance as above mentioned. Best cows and heifers went 15@25c above last week's close. Top heifers $7.50 and cows $6.75. Calves declined 25c. There has been a light supply of Southern cattle thus far this week and the offerings were

mostly fair to good steers. Meal feds sold up to $8.00 and caked grassers at $6.50. Prices advanced 10@15c over last week's close.

Hog prices broke 10@15c today. Top $10.90 and bulk $10.60@10.80. Very irregular trade in pigs and lights, with prices generally 25c off.

Sheep and lambs went 25@50c off from last week's close, with inferior grades showing even more decline. Spring lambs made $12.00. Shorn lambs reached $8.10. Mutton sheep landed as high as $7.85 and bucks $6.00.

"High Cost of Living."

Those city folks are "Pikers,"
There is no doubt of that,
Just listen to them holler
When the farmer comes to bat;
Through all those years
They've held us up
To ridicule and scorn,
Which caused the boys
To move to town
Instead of raising corn.
When corn went soaring skyward
Cheap piggies had to go,
Then the "ten" bog came back
To score a solar plexus blow.
Now if they want our beef and pork
And mutton, which is nice,
We really see no reason why
They should not pay the price.

D. G. LEAHY.

Shields, N. D.

SOUTHERN CATTLE for SPRING DELIVERY

We have for sale 4,000 head of Panhandle two-year-old steers and 1,200 head of two-year-old spayed heifers of the well-known "L F D" brand.

Also 5,000 head of good quality three, four and five-year-old Southern Texas and New Mexico steers, April and May delivery. All grade Herefords with the exception of 1,200 head of Angus. Suitable for Kansas and Oklahoma pastures.

Also 15,000 New Mexico and Arizona yearlings and 7,500 two-year-old steers for May delivery.

Also 2,000 New Mexico cows from three to six years old, in calf, and 700 head of two-year-old heifers. All high-grade Herefords.

1,050 head of mixed Colorado and New Mexico coming two and three-year-old steers, about 75% Whitefaces, all dehorned. Have been wintered and will be kept on hay until April 1st. Can be delivered any time up to May 1st. These steers are good boned, with excellent outcome.

Besides the above, we have 1,600 head of native dehorned steers, two to four year olds, for March 15th delivery. Also several mixed herds of choice native cattle for immediate delivery.

Parties wishing anything in this line will do well to correspond with, or call on,

Clay, Robinson & Co.

TO PUT AN END TO HOG CHOLERA.

BLEEDING FROM THE TAIL.

The best way to secure serum from a hyper-immune with which to immunize other hogs and prevent spread of disease.

AFTER years of costly experimental work the United States Department of Agriculture has finally perfected the method of using the blood serum from an immune hog with which to protect or immunize other hogs from the disease known as cholera.

The success of the experiments has led several grain-belt states to take steps to popularize this proven method of putting an end to hog cholera. Among these states Iowa is one of the first to arrange to supply serum to hog raisers. Dr. Paul O. Koto, state veterinarian, has leased a farm of 114 acres near Des Moines and has established a serum laboratory on this farm.

Iowa has taken up the work earnestly and officially, the last state legislature appropriating $8,000 for the purpose Out of this sum a laboratory has been provided and equipped and other improvements made. Dr. John M. Vernon is to be superintendent of the farm, under the direction of Dr. Koto.

Under the law the serum must be given to all Iowa applicants at the actual cost of manufacture. Dr. Koto expects this to be about 50c for a dose sufficient to inoculate a hog weighing 150 lbs. The serum is to be used as a preventive and not a cure. One inoculation will last the lifetime of the average hog. Dr. Koto advises persons using it that better results will be secured by having it administered by a competent veterinarian.

It was not until after numerous and conclusive tests that the announcement was made that the serum was efficacious as a preventive of cholera. Previous to the recent experiments at the Kansas City Stock Yards, about 2,000 hogs on fifty different farms were treated by experts from the Department of Agriculture, and several of the state universities and experiment stations (notably those of Iowa, Michigan and Missouri) made experiments. In no case was the ordinary method of combating hog

In the tests made at the University of Missouri Dr. John C. Connoway treated more than 5,000 hogs and reduced the death rate from 95 per cent to 5 per cent. Following an announcement last spring of his success with the serum the members of the Kansas City Live Stock Exchange made a test with ten hogs, which, after having been given injections of the serum, were exposed to cholera. None of the hogs died and Dr. C. J. Sihler, the veterinarian who had charge of the experiment, reported his belief in the efficacy of the serum. The Department of Agriculture then decided upon a final test at the request of the Stock Exchange. Dr. W. B. Niles, a veterinarian of high attainments, was sent from the Iowa Experiment Station to conduct it. He took with him ten hyper-immunized hogs from the herd there to furnish the serum.

The Exchange furnished 35 hogs for the test. Blood taken from hogs in the last stages of cholera was injected into four of them, and 22 were given twenty cubic centimetres of serum each—a light dose—and nine were left untreated to act as checks. Each of the animals was tagged. The four inoculated with cholera blood died within a few days and one after another the checks contracted the disease and on the twenty-second day after the test was begun the last of them succumbed. The immunized hogs, however, took on weight and apparently thrived in the midst of death. They were left in the pen ten days after the others had died. Not one of them showed a symptom of the cholera and the test was closed a 100 per cent success.

A writer in a recent issue of the Technical World Magazine points out how carefully the experiments have been conducted, how the serum may best be administered and the value of the discovery to the hog raisers of America.

"Experiments and research which have covered a period of nearly three years and which have just been concluded in the government tests at the Kansas City Stock Yards, have demonstrated that an absolute preventive and cure for hog cholera has been found," he declares. "It is a serum discovered by Dr. M. Dorset, chief of the biochemic division of the Bureau of Animal Industry in the Department of Agriculture, and while it has been patented, the light to use it is free to all.

"The ultimate aim of Dr. Dorset is the absolute eradication of hog cholera. If, as he says, the serum can be used to protect hogs from cholera, it is reasonable to believe that ultimately the same method may be used wholly to eliminate the disease. Whether that is possible can be determined only by further research and experiments. But even if the disease cannot wholly be eradicated, Dr. Dorset's discovery is of tremendous importance to stock raisers, whose annual loss from hog cholera is estimated variously from twenty to thirty-five million dollars. To the consumer it brings the alluring possibility of a substantial reduction in the cost of his ham and pork chops, and it opens to the middleman a new avenue of profit. In his direction, it means something of a revolution in the stock yards business.

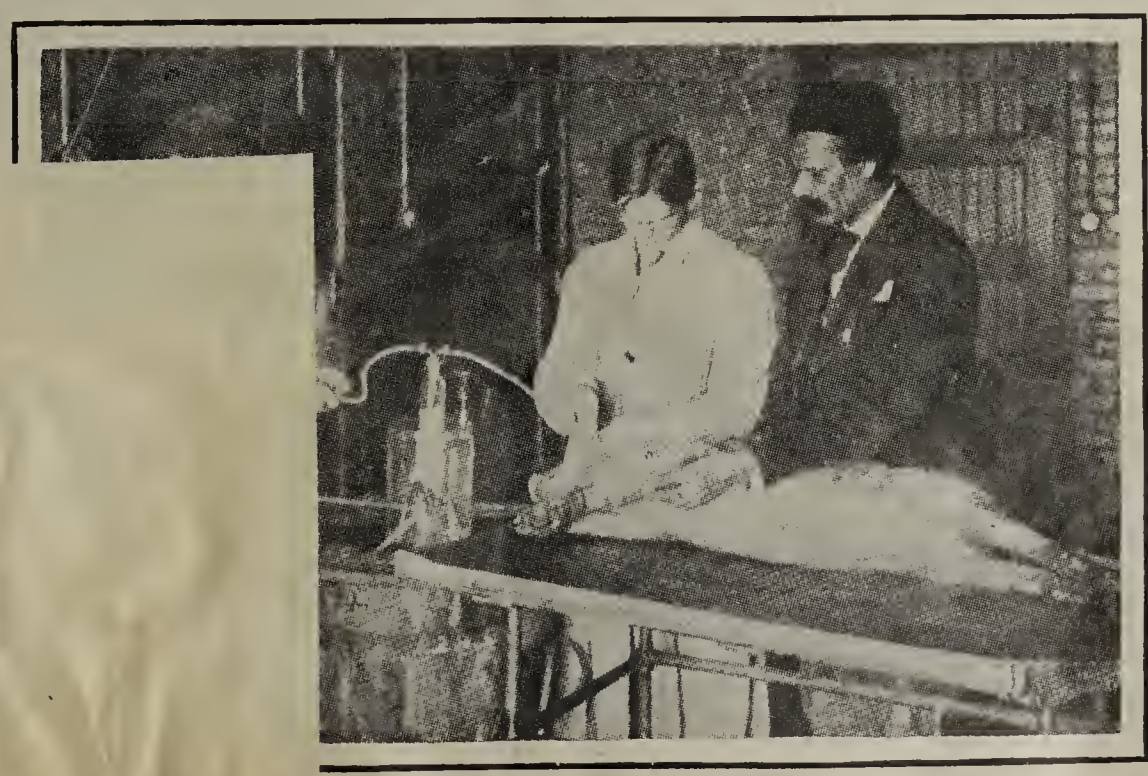
"Under present conditions, the prevalence of hog cholera

POSITION OF PIG FOR INJECTION.

Showing method of holding pigs weighing less than 100 lbs. The crosses mark places for inserting the needle.

has necessitated a Government regulation that once shipped from his happy home wallow to the stock yards, the hog never leaves the yards pen except to go to the packing house. The bill of lading is the death warrant. But with hogs made immune to cholera, they may be handled as a 'stock proposition' to use a stock yards term. That means feeders may then buy immunized hogs at the yards, ship them to the feed lots for fattening and then return them to the yards at a profit. This is a privilege of great value to the stock raiser, because at seasons when stock is scarce and hogs do not make flesh he is often, to save himself from loss, forced to market them. The result is that the market becomes oversupplied and prices demoralized. With feeders permitted to buy hogs, as they now buy cattle and sheep for stocking and feeding, a steadying element of competition between packer and feeder will be introduced which will directly benefit the stockman by giving him better prices.

"It is estimated that the visible supply of hogs in the United States averages about 60,000,000 with an approximate value of $350,000,000. Every year, on the average, the ravages of cholera almost decimates this vast herd. Missouri



INJECTING VIRULENT BLOOD.

is the best place to inject the serum to get the quickest and best results.

[illegible] year has lost $5,000,000 worth of hogs by the [illegible] It was to end this vast economic waste that Dr. [illegible] began his work nearly three years ago. Setting out with the already known fact that hogs which survive an attack of cholera are thereafter immune to the disease, he reached the conclusion that the so called hog cholera bacillus, contrary to popular belief, was not the true cause of the disease, but was rather a secondary invader. He found that the real beginning of the disease was in a virus in the blood. This virus, under certain conditions, will pass through the finest porcelain filter and so far has resisted all attempts at artificial cultivation. Its presence is known only when fluids from sick animals are injected into susceptible hogs. The remedy then, he concluded, lay in producing a serum in immune hogs by a process of hyper-immunization.

"This process is accomplished by taking a healthy, immune hog and pumping him full of virulent blood from a sick hog. This injection produces a merely transitory effect upon the animal, and after ten days the blood is fit to be drawn for serum. The method of obtaining the blood is by cutting off the animal's tail. The blood drawing is repeated three or four times at intervals of a week, after which the animal is bled to death through the carotid artery. After each draft the blood is defibrinated and mixed with a suitable antiseptic solution, usually 5 per cent of a 5 per cent solution of carbolic acid. By collecting a large quantity of serum at one time and mixing it, a standard strength and potency is obtained, and if the serum be preserved in sterilized bottles it will retain its potency for years. The dose found most efficacious is one cubic centimeter of serum to each two pounds in weight. Two methods have been used in treating hogs. In cases where a drove has been exposed to cholera the serum alone is injected while on hogs which never have been exposed it has been found that a simultaneous injection of serum and virulent blood from a diseased hog confers lasting immunity. On hogs which have never been exposed to cholera the use of the serum alone confers only a temporary immunity to cholera, unless the hogs are exposed shortly afterward to the disease. Neither method of treatment, it has been determined in numerous tests, injures the hog in any way."

It should be borne in mind that the serum is a preventive of hog cholera, not a cure. As the Oklahoma Experiment Station points out in a recent bulletin, while the serum will undoubtedly prove a very valuable means of preventing hog cholera it is quite likely for some time to come more will be benefited by keeping their hogs under as perfect sanitary conditions as possible and guarding carefully against all of the ordinary means of spreading the disease than will be benefited by the application of the serum. Hog cholera is an infectious disease and may be carried in a number of ways from infected pens to hogs that are healthy. Running water is a very active means of spreading the disease. Pens along streams make the water dangerous for all other hogs located below them. Outbreaks of cholera can often be followed considerable distance along water courses. The infection may also be carried by the clothing, wagons, crates, or, in fact, by almost all means of communication between farms. A man may often, by closely guarding his hogs when cholera breaks out among them, so handle the disease as not to expose his neighbors to the infection, while if he disregards all ordinary precautions he may easily scatter the infection to neighboring farms. The fall is the season of the year when large numbers of hogs will be brought together from widely scattered localities as exhibits at the various fairs of the state. As a precautionary measure the use of the serum might be suggested as a means of preventing outbreaks of disease when combined with thorough disinfection of premises and animals before they leave for the fairs, or at least before they are turned back into the home herds. In addition to the inoculation no exhibitor should neglect the precaution of keeping hogs in quarantine for three or four weeks before they are allowed the run of the farm and to mix with the stock hogs of the place.

[As we have had a number of inquiries from various parts of the country as to where serum can be obtained for inoculating hogs against cholera we are pleased to present to our readers the information and photo contained in the foregoing article, (which is reproduced from that excellent farm journal, the Iowa Homestead) and to add that Kansas readers can obtain serum or any desired information regarding the same by addressing Professor R. J. Kinzer, care of State Agricultural College, Manhattan, Kan.—EDITOR.]

SHEEP FEEDING YARDS OF HEATH

av, Robinson & Co. for the first time three years ago," rked Mr. Steele, "and then, as well as since that time, we have found 'Clay, Robinson & Co. O. K.'" Mr. Steele remarked that farmers were pretty well through seeding in his part and that they would plant a big acreage of corn. Seed corn is being tested and he says that the results are the worst ever known by him since his residence there—the '70s.

Well Bought; Well Sold.

"My lambs were well bought and equally as well sold." This was the way S. M. Rinker of Malden, Ill., expressed himself while on the Chicago market March 31. He had in 127 head of 78-lb shorn western lambs which Clay, Robinson & Co. sold at $8.75. These lambs were bought by Clay, Robinson & Co. at South Omaha early in January at $7.15, averaging 66 lbs. They sheared about 7 lbs of wool per head. Last September our South Omaha house bought for Mr. Rinker a lot of western yearling wethers at $5.15, which our Chicago house sold at $8.00 in December, topping the market the week that they were here. These yearlings made an average gain of 30 lbs and cleared Mr. Rinker $300. "This is my first dealing with the sheep department of Clay, Robinson & Co. and I want to express my entire satisfaction with the service rendered me," continued Mr. Rinker. "I have had Clay, Robinson & Co. buy my cattle and sell the same for several years and have always been well pleased with the results." In winter feeding sheep Mr. Rinker uses a ration of corn, oats and clover hay. He always sees that good clean bedding is always had. When the sheep are on full feed he keeps them in a shed, with the run of a small yard. He waters and feeds the animals promptly at a specified time every day.

Test the Seed Corn.

Farmers should test their seed corn without delay to learn its germinating power. They should select the best, most shapely ears of corn from their bins, shell off the tips and butts, select a few kernels from different parts of each ear and test them for germination. The Experiment Stations in any state, upon request, will tell any farmer how to treat seed corn for this test. Remember that poor seed means less money and that good seed is cheap at any price.

Got "Service that Satisfies."

Samuel Van Buskirk, Plymouth county, Ia., was on the Monday cattle market at Chicago with two loads of steers of his own feeding. "Last year was the first shipment I ever made to Clay, Robinson & Co.," remarked he, "up to then having shipped to another firm for around fifteen years. This is the second consignment to Clay, Robinson & Co. and I want to state that I have received the 'Service That Satisfies.'" Mr. Van Buskirk is a prominent farmer and feeder. Two years ago he bought at $80 an acre the place on which he is living, farm comprising a quarter section. About one year ago he was offered $125 an acre for the place, but he says he would not take $200 now. He is building a fine nine-room residence, installing all the modern improvements. He will also construct a big modern cattle and hog barn.

The State Fair of Michigan will be "dry," the administration having decided that no liquor shall be sold on the grounds.

Whatever has been attained is attainable.—Sir William Jones.

S & DRAKE, MAY VALLEY, COLORADO

"Clay, Robinson & Co. O. K."

Silas Steele and his son, S. F. Steele, represented O'Brien county, Ia., on the Chicago cattle market on Monday, former having in one load and the latter three loads. Both gentlemen are well-known farmers and feeders, usually feeding 200 cattle annually and from 200 to 500 hogs, and farming 1,000 acres of land. "We shipped

Among Our Customers

William E Matthews, Lenawee county, Mich.: "Car of cattle arrived and I am well pleased with them."

W. E. Guynett represented Dane county, Wis., on the March 30 hog market at Chicago with 78 head.

P. H. Graves, Boone county, Ind.: "Cattle arrived all right and I am well pleased with quality of same."

Charles O'Donnell, Yellowstone county, Mont. "Grass is getting a nice start here now and everything is doing fine."

Jacob Claassen, Gage county, Neb., writes our South St. Joseph house: "I was well pleased with the sale of my hogs."

J. W. Wilson, Noble county, Ind.: "Enclosed find 50c for REPORT, which I cannot do without, as it is the best paper I get."

B. J. Perrizo, Swift county, Minn., frequent shipper, had a load of cattle on the Chicago market March 31, same being sold by us.

J. A. & J. O. Finley, Knox county, Ill.: "We were well pleased with returns for car of sheep. Yours are the 'Sales That Suit.'"

Frank Bawden, Jo Daviess county, Ill., writes our South St Paul house: "The cattle arrived in good shape. I am satisfied with them."

C. L. Valentine, Fairfiel county, Ohio: "Car of cattle arrived all right and I am well pleased with them. Thank you for your selection."

Ed. Moore, Sumner county, Tenn.: "Enclosed find 50c for one year's subscription to REPORT. It's a dandy and very cheap at the price."

C. M. Stitt, Morgan county, Colo., sold through Clay, Robinson & Co. at Chicago on April 5, 259 head of 74-lb lambs at $9.45, the summit.

Brundage & Cobb, one of the largest shipping and feeding firms of Illinois, were represented on the Chicago market March 30 with a shipment of cattle.

D. F. Bitler, Lyon county, Kan., on March 31 sent our Kansas City house 4 head of 1,532-lb steers in a load of cattle that sold at $8.15, top for the day.

On April 1 our house at South St. Joseph topped the hog market with 41 head, averaging 293 lbs, at $10.80, shipped by M. D. Ulmer, Richardson county, Neb.

William S. Roller, Ogle county, Ill.: "I was very well pleased with the sale of my load of hogs, the price being more than I expected for the class of offerings."

F. H. Faust, Whitley county, Ind., was on the Chicago market Monday with 32 head of 1,357-lb beef steers of his own feeding which we sold at $8.00.

W. W. Gallemore, Adams county, Ill., marketed at Chicago on March 30 a load of 228-lb hogs which we sold at $10.90, summit for hogs of that weight.

Kettenring & Armontrout, Mercer county, Ohio: "Load of stock steers arrived in good shape. We are well pleased with them. Thanks to you for your service."

R. M. Hutchinson represented Weld county, Colo., on the Chicago lamb market March 30 with 475 head of 68 lbs average which we sold at top price of $9.75.

R. B. Gordon, Pickaway county, Ohio, marketed 98 shorn western wethers of 115 lbs average at Chicago on April 4 and we landed them at top price of $8.00.

D. C. Danielson, Ringgold county, Ia., had 75 head of 175-lb hogs on the Chicago market April 4 for which we obtained the top price of $10.80 for their weight.

J. Dragt, Graham county, Kan., writes our Kansas City house: "I received returns for load of cattle and will say that I got 65c per cwt more for them than I expected."

J. T. Taylor, Rice county, Kan., was represented on the Kansas City cattle market March 30 with a load 1,495-lb beef steers which our house sold at $8.10, summit that day.

E. P. & R. M. Livengood, Carroll county, Ill., and G. Cheney, Mills county, Ia., had hogs of their own feeding on the Chicago market March 30, same being handled by us.

W. J. Cubit, one of Iowa's extensive shippers, had in several shipments of cattle and hogs to our Chicago house last week and he went home highly pleased with the sales of same.

The 190 shorn western lambs of 90 lbs average which sold at top price of $9.00 at Chicago on April 4 were marketed by John Blanchard, Columbia county, Wis., and sold by us.

William D. Allen, Daviess county, Ind.: "Enclosed find 50c for a year's subscription to REPORT. I like your paper very much and do not think I could get along wi out it."

H. R. Laird, president of the First National Bank a prominent feeder of Tabor, Ia., sold a load of 1,47 cattle on the Chicago market March 30 at $7.90 thr our house.

W. L. Rueber and J. L. Rueber, Fayette county, Ia Johnson, Polk county, Ia.; C. C. Larson, Mitchell co Ia., marketed cattle at Chicago on April 5, the con ments being handled by us.

W. J. Stubblefield, Lee county, Ill., had a shipme 224-lb hogs of his own feeding on the Chicago m March 30. We sold them at $10.75, a most satisf price, according to Mr. Stubblefield.

Joseph Ellenbrook, successful feeder and an ol patron of Clay Robinson & Co., represented Calhoun ty, Ia, on the Chicago hog market March 31 with which we sold at a satisfactory figure.

V. J. Lough, Randolph county, W. Va.: "Cattle reached me all right. I am very much pleased with them. Thank you for the way you treated me. I will give you another order when I want more cattle."

George Olsen, Lyon county, Minn., writes our South St. Paul house: "I seeded my oats last week. I know of but one car of fat cattle in my section, although there are quite a number in stocker and feeder flesh."

Top for yearling sheep on the South St. Joseph market April 4 was $9.00. Our house made the only sale at the price for Colt & Son and Colt & Rhoades, Bent county, Colo., of three double decks averaging 70 lbs.

"GETABILITY"

A prominent Nebraska farmer and feeder, A. T. Wilson of Arcadia, has coined a new and expressive word to describe the Clay, Robinson & Co. kind of salesmanship. He says: "After having tested your firm, both as sellers and buyers, I am glad to testify that they have the 'getability,' both as regards price when selling consignments of fat stock and as to grade and quality when purchasing feeders on clients' orders."

"Getability" can be divided thus, "get-ability," i. e., ability to get good prices. That's what you want; that's what we offer you.

Henry Harmening, Will county, Ill.; H Pickard, Jefferson county, Ia., and R. I. Smith, Iowa county, Ia., all had hogs of their own feeding on the Chicago market March 31. The consignmemts were handled by our house.

The 18 steers and heifers mixed, averaging 775 lbs which brought $7.15, top for such offerings on the Kansas City market March 29, were handled by our house and marketed by C. C. Glandon, Harlan county, Neb.

G. H Swartfager, prominent feeder of Polk county, Ia., was on the Chicago market March 30 with a shipment of heifers and hogs which averaged 520 lbs and 249 lbs respectively and were sold by us at $6.40 and $10.80 respectively.

Our South St. Joseph house topped the hog market by 2½c per cwt March 30 by selling a load, averaging 30 lbs, at $10.82½. The owner, Wm. Sutter, Gage county Neb., stated that he was exceptionally well satisfied wit our services.

John Zehr, the extensive and successful young feeder Buffalo county, Neb., marketed a big string of Oregon raised yearling cattle, fed in Nebraska, on the Chicag market Monday. We sold the top steers at $7.50 an heifers at $6.30.

Included in the prominent cattle shippers on the Chicag market Monday, and who sold their stock through ou house, were: George Royer, Redwood county, Minn.; W F. Widick, Webster county, Ia. and Green & Beatty McHenry county, Ill.

J. Greenlee, Lee county, Ia.; A. E. Marty, Frank county, Ia.; L. A. Roland, Palo Alto county, Ia.; S. Knight, Livingston county, Ill., progressive feeders, w represented on the Chicago cattle market March 31, th shipments being handled by us.

Our East St. Louis house March 30 sold for A. F. Kli keiman, Bent county, Colo., 241 lambs of 73 lbs avera at $10.15, the top price. They also obtained $10.10, next highest figure, for 241 lambs, averaging 71 lbs, the also belonging to Mr. Klinkerman.

ed on the Chicago [illegible] own feeding. The shipments were handled by us.

W. A. Insinger, prominent lamb feeder of Weld county Colo., writes our South Omaha house: "I did not expe the extreme top price for my lambs as they were rath different sizes. You got me a good price. I was w pleased with your sale and also with the average weigh

Our South St. Joseph house sold April 4 for T. M. M tinson, Bent county, Colo., a double deck of Mex lambs, averaging 64 lbs, at $9.60, extreme top. They also made the next highest sale, obtaining $9.50 for two doubles of 64-lb Mexicans for Ed. Masher, Bent county, Colo.

D. L. Toof, prominent stockman and farmer of Hamilton county, Neb., had on the South Omaha cattle market March 30 two loads of 1,446-lb beef steers which our house landed at top price of $7.70, being the only load of cattle to bring the figure. These cattle were fairly well fattened and of fair quality.

A. Schemmel, Lyon county, Ia.; A. T. Jones, Clay county, Ia.; William Cook, Dane county, Wis.; W. L. Bergren, Union county, S. D.; Farmers Mutual Elevator Co., Lyon county, Ia.; Curry & M., Schuyler county, Ill., all had hogs on the Chicago market April 5, Clay, Robinson & Co. selling the shipments.

The Columbus Canning Co., Columbia county, Wis., had 218 shorn wethers of 101 lbs average on the Chicago market March 30 and we landed them at $8.35, top by 10c per cwt. Next highest price—$8.25—was also obtained by us for 300 head of 108 lbs average, these being marketed by Lewis & Gillespie, Lagrange county, Ind.

The sale of our South St. Joseph house on March 31 of 511 Mexican lambs, averaging 81 lbs, for Geo. Evans, Larimer county, Colo., and of 240 Mexicans, averaging 74 lbs, for W. Marlman, Bent county, Colo., both at $9 90, were market toppers by 10c per cwt. This was the third day that week our house topped the lamb market.

J. H. Drake Weld county, Colo., was the owner and we the sellers of the 496 shorn lambs of 86 lbs average which made the top price of $9.30 at Chicago on March 31. Next highest price, as well as top for westerns, was $9.25, which figure we obtained for 227 westerns of 83 lbs average, marketed by W. E. Grimshaw, Howard county, Ind.

Geo. Prettyman, Atchison county, Mo., had two loads of 1,493-lb beef steers on the South St. Jospeh market March 30 and our house landed them at $7.80. They bought these cattle last November for Mr. Prettyman, who is greatly pleased with our work for him. He said the [illegible] satisfactory indeed.

[illegible] hogs. I live 16 miles from the [illegible] weighed them full as we loaded on the wagons, and they [illegible] lost 4½ lbs per head on the entire trip. Price and fill [illegible] satisfactory."

W. E. McCullough, Scott county, Ill.; John Bend, La[illegible] county, Ill.; J. Grill, William Moeller and E. M. Bur-

meister, Scott county, Ia.; G. Cheney, Mills county, Ia; W. E. Daggert, Carroll county, Ill.; Waddell & Breese, Columbia county, Wis.; C. E. Kelly, Ida county, Ia., were among the prominent shippers who were represented on the Chicago cattle market March 30 with shipments, selling the same through our house.

Our South St. Joseph house March 30 sold for C. A. Thomas, Las Animas, Colo., two doubles of Mexican lambs, averaging 76 lbs, at $10.10, topping the market by 10c per cwt and 20c per cwt higher than the sale of any other firm that day. Next highest sale was made by our house for Geo. Evans, Laramie county, Colo., of two doubles of Mexicans, averaging 79 lbs, at $10.

R. W. Belt, one of Missouri's most prominent shippers, represented Carroll county on the Chicago cattle market Monday with three loads. "This is my first shipment to Clay, Robinson & Co. and I certainly am well pleased with the treatment and service afforded me," remarked Mr. Belt. According to him fat cattle and hogs are in smaller supply in that country than in many years. Farmers are well advanced with their spring work, some oats already showing up and some corn having been planted.

John D. Dilmig, progressive and successful German-American farmer and feeder of Cass county, Ia., was at Chicago on Monday with 50 head of 1,343-lb beef steers which we sold at $7.80. He bought these cattle at $4.75, averaging 1,050 lbs. They were on a full feed around five months, corn, oats with clover and timothy hay mixed comprising the ration. "I have shipped to Clay, Robinson & Co. during the past two years and every time they have sold my stock a little higher than the previous shipment," said Mr. Dilmig.

G. M. Watson, well-known farmer, feeder and shipper of Houston county, Minn., was at Chicago on Monday with a load of butcher stuff which we sold at very satisfactory prices. It will be remembered that Mr. Watson bought through Clay, Robinson & Co. the Fowler & Todd Kansas Hereford calves at $50.50 per head, these calves being prize winners at the International Show. He said that the calves were doing fine and that he would exhibit them at the South St. Paul show this coming fall. Mr. Watson has been a steady patron of Clay, Robinson & Co. during the past twenty-five years and has been receiving the LIVE STOCK REPORT since its first issue.

Record Price for Yearling Sheep.

It was March 30 that Clay, Robinson & Co. at East St. Louis sold for Payne & Roembach, Colwich, Kan., 237 yearling wethers, averaging 74 lbs, at $9.40, up to then highest price ever recorded for yearlings on that market.

It is often better not to see an insult than to avenge it.—Seneca.

Big Michigan Stockman Unbosoms.

To The Live Stock Report:

The opening by Clay, Robinson & Co. of an office at the Fort Worth Stock Yards is a boon to Texas Stockmen. Many have long desired to see the "Clay, R." banner floating over the model market, and the cattlemen of the Lone Star State are to be congratulated that the leading Live Stock Commission Firm has found opportunity and time to fittingly recognize, by a representative branch house, this leading southern market. The firm waited their time till the branch should be truly representative. They never make a move till assured of its success.

The writer made the offices of Clay, Robinson & Co. at the Chicago, Kansas City and South Omaha markets, his headquarters for many years, utilizing their splendid service in the handling of thousands of stock cattle, many fat beeves, hundreds of pure-bred cattle and minor shipments for sale and in transit. He feels justified by wide experience, to express an appreciation of the matchless "Clay, R.," service to cattlemen. This service, though unequaled at any given time, we have seen steadily improved so as to at all times, be in the lead of the procession. My admiration of Mr. John Clay began away back in the days of "Bow Park" and "Glen Flora" when I was a child, and has been appropriately recorded elsewhere. It is pertinent to add here that the child's intuition was solidly based. The achievements of Mr. Clay and his business associates, in the live-stock world and kindred interests, eloquently prove it.

That was a great day for live-stock interests when his energy, ability and organizing force, backed by an inherited love of animal husbandry, directed Mr. Clay into the commission business. This means no diminishment of the lustre of the junior partner's light, Mr. Charles O. Robinson. True, when we search for the exact date of the first meeting, it can't be much over twenty years ago, but "Charlie" is such a democratic spirit and such a prince of good fellows, that one has to be in his presence but a few minutes to become possessed of a belief that he has known him a lifetime. Nevertheless and notwithstanding all of Mr. Robinson's indispensable qualities that have endeared him to the trade, not the least of his honors is the outstanding fact that John Clay thought Charlie Robinson's name the fittest to be associated with, in the founding of a nation-wide business that has been an instrument of incalculable good to America's most important industry.

All the foregoing has gratified the writer immeasurably in the stating, but decidedly it is not what he started out to write. We simply intend to say that having had especially wide experience with the firm of Clay, Robinson & Co., in the three biggest markets with cattle, we lately returned to our old home state of Michigan where in the natural course of transportation currents we have to deal with the Buffalo house of "Clay R.," and we wish to commend that branch office, for its efficiency and apt attention to details. While handling the lion's share of big shipments, it is gratifying to see the consideration shown by the Buffalo "Clay, R.," to mixed carloads such as make up the large bulk of Michigan shipments, mixed carloads of cattle, sheep, lambs, calves and hogs, such as any large farm would clean up at times. We want to recommend anyone who has ever so light a load of mixed stuff, and whose shipping point is in Buffalo territory, to try a shipment, consigned to the care of "Clay R.," and we warrant the "account sales" will put the unerasable smile on his exposed surface, while contemporary pleasant interior sensations, will only be satisfied by lip or pen service in the praise of the old firm that makes "sales to suit."

Moreover, all the preceding exuberance of a pleased patron, is really but the prelude to what the writer really, more than anything else started his type machine to say. There is so much that needs saying, and we have been silent so long, please excuse us. However, here we say IT: Every day as we pass our time among a thousand ewes selected and bought by the "House of Clay R." at Chicago, we feel like commending unreservedly and from the housetops, the efficiency of the "Clay R." sheep department. "Court" Kleman's name is not on the firm's flag, simply because he was not in at the beginning, and men of the stock of the Clay's don't change their business handles even at death, but "Court" plays an indispensable part in the C. R. "Co.," a partner worthy of J. C.'s unerring judgment of men. You would never get it from Mr. Kleman that he is the "sheep partner," nevertheless he reigns supreme if unostenstationsly in the sheep house, ably seconded by "Ben" Cook, and backed up by a corps of assistants of the ablest and most obliging sort. Something appreciative ought to be said of each one of these boys, who have absorbed modesty of the Kleman type; their motto is prompt work and kindly courtesy. An astonishingly large proportion of the market's sheep receipts pass through Mr. Kleman's hands, so much of his personal attention is given here that more than half of the time he satisfies his midday hunger with a handout in one hand while he works the sorting chute gate with the other. A coffee cup finds convenient lodgment on the top rail of the chute. It is surprising what a lot of lunch is put away after this style, for with a basket of pie and sandwiches, a jug of coffee and a surplus of tin cups the bashful shippers are somehow helping in the disappearance of the high-cost (?) living, to say nothing of the wily buyers who take advantage of this face-feeding to try to "get next." They don't get many words out of "Court," no one does, but they give up prices, for Clay R. generally have the goods. Right prices are quoted and received, top prices for tops and others accordingly, the bulk of the market's sheep business being transacted here so systematically and quietly that if it were not for the bleating of the sheep all that could be heard would be the distant cries of the cattle drovers and the commands of the "Clay R." boys to the "Scales" to "weigh sheep from Clay R. to ———." Nevertheless there apparently was opportunity even among the stress of grading, sorting, weighing and penning, with its seemingly endless and interminable details, when "Ben" on a few moments' notice would find the time necessary to pass judgment on the desirability of a purchase from another firm. He always carries his buying face with him on these forays, and when you tell a fakir that you will buy something provided the stuff passes "Ben's" approval, the fakirs soon look elsewhere for victims. And right here I want to whisper that if I had staid at home and left it all to "Clay R.," or been guided when there, solely by their judgment, I would have been money ahead. Strange confession, but we don't know so much about sheep; not yet.

Say! We would like to say something about the satisfactory way our pigs were sold by the Buffalo house of "Clay R.," but this whole communication treats of an inexhaustible subject and we must stop somewhere so let's put the period right here.

Yours truly,
T. F. B. SOTHAM.

Wyoming Cattle Sell High.

Some of the best cattle from the West offered on the South Omaha market the past season were handled March 30 by Clay, Robinson & Co. at South Omaha for the Diamond Cattle Co. of Rock River, Wyo. This shipment consisted of a car of feeders that averaged only 877 lbs and sold at $6.75 and a load of heifers, averaging 935 lbs. went for slaughter at $6.10, extremely strong prices for this class of stock, same being hay fed. The Diamond Cattle Co., under direct management of F. C. Bosler of Carlisle, Pa., raises some of the best cattle in Wyoming, and during the past few years have received some very high prices, Clay, Robinson & Co. handling the consignments.

Weather Conditions Never Better

"As far as is known, weather conditions have never been so propitious for early spring work during March in Minnesota and the Dakotas as this season," writes our South St. Paul house. "But little frost was in the ground when the early winter snows fell and upon the appearance of warm weather it thawed out promptly. The melting snow was readily imbibed by the soil and there has been little or no high water. First plowing was begun about March 15 and some seeding was done at that time. Sowing was started in most sections of Minnesota and the Dakotas as early as March 20 and has progressed steadily. Present indications are that there will be an increased acreage of wheat as well as of barley and flax over last year, but it is rather early to try and make any definite predictions, as the weather situation may change materially at any time."

Finds Cattle and Hogs Scarce.

J. B. Lowman of Shelbyville, Mo.: "I thank you very much for your prompt attention and also for presenting my claim against the railroad. Since marketing my cattle in January I have spent most of the time in the South. I also made a trip through Western Missouri, Eastern Kansas and part of Oklahoma and observed that cattle and hogs were very scarce in those sections. Such as are on feed are mostly to be marketed in April, May and June. There are fewer cattle on feed here than a year ago and hogs are very scarce."

"I Received a Square Deal."

M. DeWolf, a pioneer and most successful live stock dealer of Windom, Minn., had cattle and hogs on the Chicago market this week, same being handled by Clay, Robinson & Co. Mr. DeWolf has been a prominent and extensive shipper of live stock for the past 30 years and has shipped to Clay, Robinson & Co. during the past 20 years. "During all that time," said Mr. DeWolf, "I have received a square deal in every respect. Clay, Robinson & Co. is a good firm for either the feeder or shipper, be he a small or big consigner. Mr. DeWolf was mayor of Windom for two years and during that time $40,000 was expended in improving the town, fine and substantial electric light and water work systems being installed. Windom is one of the nicest and most progressive cities in Southern Minnesota and has a fine sewerage system, and boasts of no saloons and nine churches. Mr. DeWolf is also a member of the school board and is a strong advocate of teaching school children the science of agriculture. He says this is one of the greatest means of keeping the country boys and girls on the farm and also interesting the town boys to take up farming as a vocation. Mr. DeWolf is a man of sterling qualities and to know him is to like and admire him. Two of his great rules in life are to keep his word and help the needy. Mr. DeWolf is of the opinion that further breaks in the hog market will occur, basing his conclusions on the narrow outlet for pork products, due to high prices, warm weather and cheap eggs and vegetables. He thinks cattle will go higher, believing there is a marked shortage of good fat cattle in the country.

Fires Do Not Exterminate Ticks.

Contrary to a widespread belief, the United States Department of Agriculture does not consider the burning over of national forest lands as an effective means of dealing with cattle ticks and the dreaded disease which it spreads. Regarding this Secretary Wilson in part says:

"It is true that at certain times of the year burning of grass on an enclosed field may remove the ticks wherever the fire pervades, but even then many places remain unburned, and the owner who depends upon the fire for eradication consequently fails. Firing leaves has not eradicated ticks, although followed for years. Instead of being beneficial in the forests, it has killed out the grass and eaten the new growth of trees, which so often furnish in the spring the only source of nourishment—the buds—upon which the cattle may browse, while the scanty herbage grows."

Silage for Fatteeing Steers.

We have just sold our first silage-fed cattle, and we give our experience for the benefit of those who contemplate the erection of silos and the feeding of ensilage, alone or in connection with corn or other concentrates, to fatten beef animals. We planted corn of the same variety and treated it the same in every way as we would for an ordinary crop of corn. We filled the silo on Sept. 20-21, when ears were all well dented and just about ready to put in shock. We were two days filling the silo, which is 32 feet high and 16 feet in diameter. It is built of fir staves and set on a 3-foot concrete pit, making it 35 feet deep from the top of the staves. It is supposed to hold 150 tons. Although we were two days filling, we could have filled in 1½ days had the machine worked properly, as over two-thirds of the corn went into the silo the last day. It settled nearly eight feet, leaving us about 27 feet of ensilage from the 15½ acres.

I bought 25 fairly good steers on the Chicago market Sept. 15 at $4.55. Their average weight was 877 lbs. I had on hand at this time 15 head of steers that we had roughed through the winter and summered through on grass. These would weigh around 1,025 lbs when the others came. From the time the steers arrived until Oct. 21 the 40 head run on grass, and at the latter part were fed the ears knocked off by the corn binders in cutting the corn for the silo and about three acres of late-planted soft corn. On Oct. 21, just one month after filling, we opened the silo. We found eight to ten inches of the top spoiled, but below this it kept perfectly. We began feeding with only a few basketfulls the first day, and gradually increased until by Nov. 7 they were getting all they would eat up clean, which was 90 basketfulls a day, each basket holding a bushel and a half. While it had not been our intention to feed any shock corn, we saw that we were going to have some that we could not get husked before winter set in. We fed 5½ acres of corn during November and the forepart of December, one feed a day of 8 or 10 shocks, with one feed of ensilage. After this they were fed ensilage alone until sold on Feb. 11. They then weighed 48,140 lbs, a gain of 10,835 lbs. The two lots were weighed separately, the last lot gaining 286 lbs per head and the older ones 245 lbs.

The 25 head were on the farm 148 days and on full feed 95 days. They gained in value $33.45 per head. While the 40 head averaged only 1,203½ lbs, when sold they brought a better price than any cattle of any weight shipped from here this season. Local buyers all said that they were better and had a better finish than any cattle in this vicinity. I am aware that this is not a heavy gain, but I do think it is a cheap gain, and I am well satisfied considering the fact that they were fed entirely by hired help and by a man who had never fed fat cattle in any way before. While we cannot have so many hogs following as on shock corn (about one hog to four steers), it looks as though two could be fed on the same corn in the silo as on shock corn. I am satisfied that the corn in the silo made me better than $50 per acre and I am hoping with this experience to to better another year.—M. E. Palmer in Ohio Farmer.

Note.—This is an interesting experience in the use of silage for fattening steers. The gains are surprisingly good considering the small amount of supplementary grains fed. Silage cannot be made to take the place of grain in a fattening ration and we believe that rather liberal feeds of corn and oil meal or cottonseed meal would have been profitable in feeding out this bunch of steers.—The Editors of Ohio Farmer.

Selecting Harvesting Machine.

This is a subject which should be of great interest at this time of the year. The long winter months are past. The season of activity is upon us. From now on until harvest time you will be busier every day. Now is the time to look over your equipment, find out what you will need, and then select the machine that in your judgment will be best adapted for your work.

It is a subject that calls for careful consideration, for the construction of any harvesting machine, however simple, affords the manufacturer, if he be so inclined, abundant opportunity to skimp a little in a score of places that will not show at the time you make your purchase. If you do not choose wisely, you may find that instead of being prepared to make every moment count at harvest time with an efficient, economical machine you have purchased "continuous trouble." Every delay due to a breakdown, every moment lost by a bungling machine at harvest time means a reduction of your profits.

It is the purpose of this article to call attention to a few points that you should consider carefully before buying any machine.

In the first place, it being as we said a simple matter to skimp a little in making a harvester in places where it will not show at the start, you should consider carefully the reputation of the manufacturer and the record of the machine in the field.

For example, harvesting machines in the I H C line are known quantities. The I H C trade mark is a guarantee of quality—a seal of excellence. I H C machines are known the world over for their efficiency.

Deering, McCormick, Champion, Osborne, Milwaukee and Plano harvesting machines have proved their labor-saving, profit-producing worth to millions of farmers in all parts of the world. They have a particularly good record for service on American farms. They seem to meet the American farmers' requirements as no other machines do. They get all the grain, no matter whether it is tangled, standing or down, in the quickest possible time. They have a strength and a wide range of adjustment that adapts them to all conditions of grain and ground.

The wide variety—six machines of known quality—gives you an opportunity of getting the machine that is best adapted to your individual use. The big demand for these machines permits their manufacture in such large quantities that the manufacturing cost is reduced to the lowest possible point, without sacrificing quality.

In buying a machine bearing the I H C trade mark, you are sure of getting a machine with the latest practical improvements. Every year finds the I H C experts in the fields making notes and watching to see where any improvement could be made to increase the efficiency of I H C machines.

Another question that should engage your attention now is the selection of binder twine. In choosing twine bearing the I H C trade mark in Sisal Standard Manila brands you are certain of satisfaction. The International Harvester Company of America has more at stake than selling twine. The company is vitally interested in the successful operation of thousands of binders and knows that no binder can work successfully with poor twine, and has therefore given the subject more careful consideration than any company that is not responsible for the success of the machine.

If you have not as yet made a selection do not delay any longer. See the local I H C dealer, or write direct to the International Harvester Company of America, Chicago, U. S. A., for the catalogs you are most interested in.

Protecting Little Pigs.

Little pigs may be kept from danger of crushing by the mother by having a fender made of a scantling, rail or pole securely fastened, say eight inches from the wall, and the same distance from the floor. The pigs will quickly learn the protection afforded by this device when the sow lies down. Some breeders advocate a farrowing pen not large enough for the sow to turn around in, and with walls open eight inches from the floor so the pigs may run in and out. A pen of this sort may be made by confining the sow at one end of her regular pen with boards so nailed that she will be unable to turn around.—From Coburn's "Swine in America."

A Fourteenth-Century Columbus.

Hjalmar R. Holand, writing in "Harper's Weekly," tells of the remarkable stone inscribed with runes, which was unearthed not long ago in Kensington, Minn. The stone is the record of a band of Norse explorers who penetrated into that region in 1362. It reads as follows: "Eight goths (Swedes) and twenty-two Norwegians upon journey of discovery from Vinland (Nova Scotia) westward. We had camp by two rocks (in the water) one day's journey north from this stone. We were out fishing one day. When we returned home we found ten men red with blood and dead. AVM (Ave Maria, save us from the evil!) We (have) ten men by the sea to look upon our vessel, (forty-one?) days' journey from this island. Year 1362.

Between the months of May and July, 1909, while flies were the thickest, the Prairie Cattle Co. dehorned 11,900 head of one and two-year-old steers, while they were on succulent grass, and used Shoo Fly Horn Paint, to prevent fly infection and shrink from loss of blood, which it did to perfection. Dehorning while cattle are gaining on grass cannot be accomplished without the use of this paint. It is beyond all doubt the greatest remedy the stockmen have for that purpose. It pays to use it.

PASTURE FOR CATTLE.

I will run for the summer or by the year, any number of cattle up to five thousand.

Pasture in South Dakota, on coast line of C. M. & St. P. R. R.

Shipping station in center of pasture. Best of grass and water. Terms reasonable.

W. I. WALKER, Council Bluffs, Ia.

WANTED The undersigned wishes to buy 1,000 cows with calves at their sides, for September delivery. Correspondence is invited from cattlemen in position to supply same.

Michigan Stock and Grain Farm for Sale

This nausual bargain is on the market at a price that insures an early sale. It is one of those rare things so many men would like to have and that are seldom found. It consists of 440 acres, in fertile condition, the soil never having been abused. It produces 50 to 60 bushels of corn to the acre, 25 to 35 bushels of winter wheat, 45 to 65 bnshels of oats, 2 tons of timothy, the best yields of clover, rye, barley, potatoes, beans, peas, rape, all the root crops, including sugar beets. Sugar beet factory handy. It is 3½ miles from railroad town, 1½ miles to inland village, 8 miles to college, 1½ to 3½ miles to churches, 1½ miles to grade school, on creamery route, R. F. D. and telephone line. Nice surroundings, good roads. 280 acres dark loam and level, 160 just a gentle roll; no rough land and all easily handled with machinery. 80 acres of hardwood timber, which is a very valuable asset. 120 acres in natural pastnre at present time. Wherever needed tile has been put in. A fine spring fed brook throngh pasture lot affords choice water for stock. 3 wells, 1 soft water cistern. Wind mill pumps water to tanks at barns. Good 11 room house, heated with hot water furnace, on stone foundation, 3 room cellar and cement floor. Barn No. 1—40x80, No. 2—36x60, No. 3—32x60, No. 4—36x40, all on stone fonndations, all in good repair. Hog house, hen house, 2 granaries, 3 corn cribs, 2 tool houses. Stock scales; $6,000 insurance on bnildings. Well fenced and cross fenced. Tenant honse. Fruit for home use, inclnding 4 acres young apple trees. Price $50 per acre, terms reasonable. Best markets in the United States. Where on earth will you find such a lay-out? This is but one of the remarkable farm bargains we are offering in the Seuthern half of Michigan and which are attracting farm bnyers from all parts of the United States. All sizes. Easy payments. List furnished on application.

S. V. R. HAYES, 714 Ashton Bldg., GRAND RAPIDS, MICH.

HOW ARE YOUR HOGS?

Dangerous policy to let them get wormy and out of condition while feed costs money.

VESEY'S STAR ANTI-CHOLERA does the work and pays big to feed. No herd is safe without it. Used and recommended by large hog feeders everywhere. Try it. If you are not satisfied money will be paid back. Price $9.00 per dozen bottles; $5.00 per half dozen bottles.

ANTI-CHOLERA CO., Union Stock Yards, Chicago

FREE A SHETLAND PONY AND OTHER PURE-BRED LIVE STOCK FREE

The Grandest Opportunity You Will Ever Have. No Other Such Chance In All the World for You. Don't Lose a Moment in Sending us the Coupon Below.

Thornburg, Iowa, Feb. 12, 1910.

FARMERS' TRIBUNE,
Sioux City, Iowa.

DEAR FRIENDS:—

I received my pony this day-noon and I must say he is a dandy. I think you could not have suited me any better. I thank you a hundred times for him, and I certainly will try and work for you again.

I have a very hard territory to canvass but I wrote a great many letters, so I got a good many that way. May I ask how old he is and what is his name?

Oh my, I am pleased. As soon as I can I will take him to What Cheer and get his and my picture taken and send you one. He came through in fine shape, and I have a fine warm stall in papa's new barn. I think his color fine, and his pretty white feet.

Again thanking you for him, I remain, as ever,

Your friend,
LEO MORTON.

The live stock which we are going to give away, **absolutely free**, is the best to be had. No better stock is found anywhere. The breeders furnishing this stock are known from the Atlantic to the Pacific and from Mexico to Canada. Let us tell you how to secure it.

Additional Live Stock Absolutely Free.

In addition to the Shetland pony, the following live stock will be given away:

HEREFORD BRED HEIFER from breeders of Hereford cattle, E. M. & R. W. Cassady, Props. of Walnut Ridge Stock Farm, Whiting, Iowa.

POLAND-CHINA BRED GILT from a breeder of Short-horn cattle, Poland-China hogs, Shropshire Sheep and Black Langshan chickens. A. L. Mason, Prop. of Greenbush Stock Farm, Early, Iowa.

BERKSHIRE BRED GILT is from a breeder of Percherons, Short-horns, Berkshires and Jerseys. W. S. Corsa, Prop., Gregory Farm, White Hall, Illinois.

NORTH STAR RAM comes from the originator and breeder of North Star Sheep, W. W. Bell, Valley Springs, South Dakota.

A SCOTCH COLLIE is furnished by M. A. McCready, Sioux City, Iowa.

THE TRIO OF WHITE PLYMOUTH ROCK CHICKENS is furnished by E. B. Babcock, Prop. of Morningside Poultry Yards, Sioux City, Iowa.

WE WANT YOU to have some of the stock and we are going to help you to get it.

SEND US IMMEDIATELY your name and address in the coupon below. This information as well as the live stock is free. Tear out the coupon and send it to us at AT ONCE.

FARMERS' TRIBUNE, 318 Iowa St., Sioux City, Iowa.

Please send me at once pictures and descriptions of the live stock you are going to give away. Let me hear from you immediately, as I want to get some of your live stock.

GREATEST SHEEP PAPER ON EARTH.

The AMERICAN SHEEP BREEDER AND WOOL GROWER will save money for all interested in sheep or goats. The annual subscription price is $1.00 (25 cents additional for postage in Canada). Each issue is worth more to the sheepman than the annual subscription price. Send $1.00 for one year, or ask for sample copy.

The American Sheep Breeder Co.,
149 Michigan St., Chicago, Ill.

Made of Hard, Stiff Wire, of Honest Quality

Fences Cost the Least and give the most returns of any improvements on the farm

Look around and see the farmer who has money in the bank and who buys another quarter-section every few years. See *his* farm—it is fenced hog-tight. What is good for him is good for you. Enough feed is wasted on the average quarter-section of unfenced fields to feed a large drove of hogs.

Any American Fence dealer will quote you figures that may astonish you on fencing your farm with heavy, hog-tight fence. You have no idea how little money it takes, considering what you will actually save.

American Fence is made of hard, stiff steel. It is made of a quality of wire drawn expressly for woven-wire-fence purposes by the largest manufacturers of wire in the world. Galvanized by the latest improved process—the best that the skill and experience of years has taught. Built on the elastic, hinged-joint (patented) principle, which effectively protects the stay or upright wires from breaking under hard usage.

The real test of a fence is the service you get out of it. Test, judge and compare American Fence under any and all conditions and you will find that the steel, the structure and the galvanizing are equal in durability, strength and efficiency to the hardest usage.

F. Baackes, Vice-Pres. & Gen. Sales Agent

American Steel & Wire Co.

Are You Looking for a Home?

No farmer should think of buying a home before seeing a copy of THE FARM AND REAL ESTATE JOURNAL. It contains the largest list of farm lands, city property and stocks of goods of any paper published west of Chicago. It reaches 50,000 readers each issue, 85 per cent of whom are farmers. Everyone who has any property they wish to advertise will find this journal one of the best advertising mediums published. Advertising rates, 2c per word each insertion. Send 75c and we will mail you the journal for one year or for 10c in silver or stamps we will send it for two months on trial and stop it at the end of the two months unless you renew your subscription.

FARM AND REAL ESTATE JOURNAL, TRAER, IOWA.

GASOLINE PUMPING ENGINE

It costs about ONE CENT AN HOUR to pump water with this engine. If your time is worth more than a cent an hour you cannot afford to pump by hand: It will raise 32 barrels of water per hour to an elevation of 25 feet, 10 barrels to an elevation of 100 feet, or proportionate quantities to other heights.

This engine can be connected to "any old pump" in 30 minutes. After you have watched it pump water for five minutes you will wonder how you ever got along without it. The longer you have it, the better you will like it. It is right on the job all the time. A turn of the fly-wheel and it is off. A child can operate it. The ladies often start it to pump a pail of water. They rest while it works.

It is shipped complete with walking beam, supporting frame and everything ready to set it up in complete working order, except three stakes for driving in ground.

Next to a windmill, this is the most economical outfit for pumping. We are selling **many thousands of them every year,** but our sale of Aermotors is still increasing.

A PULLEY for running cream separator, churn, washing machine, ice cream freezer, grindstone or other light machinery is furnished with this engine for $1.50 extra.

If you need an engine for pumping large quantities of water for irrigating, watering large herds of stock, or for other purposes, our Heavy Back-Geared Pumping Engine for $100.00 is just the thing you have been looking for. It will raise 125 barrels of water an hour to an elevation of 50 feet, or proportionate quantities to any height.

Our $75.00 2 H. P. General Purpose Power Engine with Fluted Cooler is the best thing going.

Larger sizes at proportionately low prices.

AERMOTOR CO., 2510-12TH ST., CHICAGO.

Make Too Much Fat.

The entire trend of the American stock grower for about half a century has been in the direction of producing the broadest backed animal that science, skill and human ingenuity could evolve, but of late years the tendency has been in a different direction. Experience of the last few years has proven that the quick maturing, fat handy and medium weight animal is the most profitable for the farmer to raise. In this connection Professor C. F. Curtiss, director of the Iowa College of Agriculture and Experiment Station, says:

"The 1,800-lb bullock and 200-lb wether have disappeared from our markets, and the over-fatted hog, with its extreme weight and waste, is no longer wanted. There are also other considerations besides the proportion of fat and lean. The tendency to push our hogs to early maturity by extreme forcing and selection for the form giving excessive obesity has also a tendency to softer tissues and a more flabby-sided carcass than can be combined with superior quality of the finished product. Fine grain, firmness of texture and a comparatively even distribution of fat and lean are the prime essentials in high-class pork products. These are the result, first, of heredity, and, second, of judicious feeding of wholesome, flesh-forming feed products, succulent feeds, grass and abundant exercise."

Cargo of Ocean Freighter.

Most landsmen are astonished when they learn the capacity of the ocean freighter. As an illustration, one may cite a freight liner, rated at twenty thousand tons' burden, which will carry loads such as may be briefly itemized thus: 160,000 bushels of wheat in bulk, equal to 320 carloads, or 16 trains of 20 cars each; 1,000 tons of flour, 80 carloads; 4,000 boxes of bacon, 75 carloads; 3,000 tierces of lard, 48 carloads; 1,500 bales of cotton, 40 carloads; 1,200 head of live cattle, 80 carloads; 3,600 quarters of dressed beef.

In addition there will probably be a thousand tons of miscellaneous merchandise—say, eighty carloads more; in all not less than 780 carloads, or thirty nine long trains of twenty cars each. Nor is the above by any means the entire load of a freighter of the burden mentioned. It will have accommodations for, say, 800 to 1,000 steerage passengers, as also for a crew of 150 men and fifty cattlemen, with food and fodder for all.

In the fuel-bins, too, there will be carried a burden of 1,300 tons of coal, or more than one hundred carloads.—Harper's Weekly.

All citizenship must rest ultimately upon occupation, for all good citizens must be workers of one kind or another, and there must be no parasitic class.—Theodore Roosevelt.

THE
BEST INVESTMENT ANY COW OWNER EVER MADE

That's what MORE THAN A MILLION COW OWNERS the world over have found the DE LAVAL CREAM SEPARATOR to be, after thirty years of separator use.

A DE LAVAL FARM SEPARATOR costs from $40.—to $175.—according to capacity. It saves butter fat and produces a cream of superior quality over any setting system or any other separator every time it is used,—twice a day every day in the year.

It involves far less labor than any setting system, and runs easier, has greater capacity and lasts from two to ten times longer than any other separator.

That's how a DE LAVAL separator saves its cost at least the first year, and frequently in a few months, and then goes on doing so right along for an average of twenty years.

Any desired separator information can be had of the nearest DE LAVAL local agent or of the Company directly.

4 Great Papers on Credit 4

THE INTER OCEAN (daily) - 1 year
THE PRAIRIE FARMER (semi-monthly) - 5 years
HOME LIFE (monthly) - - - 3 years
Uncle Remus's Home Magazine, (monthly) 1 year

$6.50 ACTUAL VALUE—481 NUMBERS

ALL 4 FOR $3.33 ON CREDIT

YOU KNOW THE QUANTITY—NOW READ ABOUT THE QUALITY

THE INTER OCEAN is second to none in the United States. It is noted for the strength, justice and common sense of its editorial reasoning—evading nothing—fearless and unapologetic for its convictions. The only Chicago daily printing a two-page sermon supplement. MOST COMPLETE AND RELIABLE MARKET REPORTS IN THE WEST. Its sporting columns are unexcelled—Baseball, Boxing, Wrestling, Racing—everything fully and accurately reported. THE INTER OCEAN is bound to no person, party or corporation. It is free to print all the news, all the time, regardless of the issue, without fear or favor. Lives up to its motto: "BE JUST AND FEAR NOT." To get the unbiased news of all the world all the time you must read THE INTER OCEAN. No public-spirited man can afford to be without it. (Regular price $4.00.)

PRAIRIE FARMER, the great farm journal of Illinois, founded in 1841. It was the paper of your father and of your grandfather. PRAIRIE FARMER today is a big red-blooded farm journal with FARM QUALITY, edited by the leading Illinois authorities: C. P. Reynolds, Editor in Chief. Hon. Frank I. Mann; L. R. Bryant, on Horticulture; Dr. Stephen A. Forbes, State Entomologist, on Insect Control; Miller Purvis, on Poultry; C. P. Dadant, on Bee Culture; L. F. Maxcy, on Corn Culture; Dr. Donald McIntosh, State University, on Veterinary Subjects; F. G. Graves, Cook County, Farm Legal Department; W. T. Davis, Homeseeker's Department, and others on practical lines. We feel sure that such a publication, edited by writers who reside on and operate their own farms, will prove interesting to every member in your family. The Home Department, edited by Miss Naomi Gordon, will doubtless be of special value to the ladies of your household. For over half a century it has sold for $1.00 a year.

HOME LIFE stands first among popular magazines. The Rev. Dr. Frank W. Gunsaulus, one of the foremost literary men of the West and long a national figure as writer and lecturer, contributes monthly editorials and educational articles. Humorous stories by Opie Read. It has a music page and a department devoted to crocheting, fancy needlework, fashions, home talk, etc. Generous installments of the popular serial stories of well-known American authors appear continually, and altogether this magazine is a storehouse of good things.

UNCLE REMUS'S HOME MAGAZINE—The big illustrated magazine of the South founded by the world renowned author, Joel Chandler Harris. Size 10x15, with nearly fifty pages each issue. A work of art and beauty, an ideal home magazine, departments for all the family, interesting from cover to cover—one that voices the best and highest aspirations and portrays clean and generous ideals; a feast of story and fiction. Old and young delight in its unequalled pictures and its abounding Southern never-to-be-forgotten scenes. A cheerful home visitor. (Regular price $1.00.)

Order Now—Pay When Convenient

All four papers will commence to come as soon as we receive your order, or if you are already a subscriber, your subscription will be extended for full length of time.

We don't require your money now, but will be glad to carry your name on our lists till November 1st, 1910, when "harvest time" makes payment easy.

If you prefer to send us $3.33 with your order we will send you a special set of our beautiful Premium Post Cards.

This offer can only be accepted from subscribers in small towns and on rural routes in Illinois, Indiana, Iowa, Michigan and Wisconsin.

Please note the two order blanks below—No. 1 to be used in case you send remittance with your order. No. 2 if you prefer to pay at your convenience. Be sure to fill out all blanks carefully.

Clay, Robinson & Company's LIVE STOCK REPORT

Vol. 20 | Chicago, Friday, April 15, 1910 | No. 15

Exporters Buying Few Cattle.

G. H. Shamberg, member of the firm of G. H. Shamberg & Son, New York packers and exporters, was at the Chicago Stock Yards. "Exporters are buying few cattle in the United States now for the reason that the prices are too high as compared with the market in Liverpool and London," said Mr. Shamberg. "Chief activity of exporters now is in the Canadian market. There the prices are relatively lower than here.

"The eastern states are awakening to the possibilities of greater production of beef as a result of a campaign of publicity now being waged in this interest. The industrial departments of the eastern railroads are sending out considerable literature on the subject of cattle raising and feed stuff production. We must have greater beef production if beef is to be held at a price affording general consumption, and it is a work of great merit to encourage increased growth of cattle in the eastern states."

Hogs are Scarce in West.

"Hogs in the West are very scarce and we are bound to have small receipts for many weeks ahead," said M. R. Murphy, superintendent of the Cudahy plant at South Omaha, who was a visitor at the Chicago Stock Yards. "Weighty hogs have long been a rarity in the West and there is little chance of the markets getting many for months. Breeding is being increased considerably as a result of the incentive of the record prices of the last few months. There is still a fair number of brood sows, and they will be kept on the farms. The hog prices are too high for both the packer and the consumer, but they have been put up to the present levels by force of the sharp decrease in marketings, and it is time now for greater production of hogs over the country."

Expects Light Crop of Lambs.

"There is no reason to expect anything but a light crop of lambs in Texas and New Mexico, and Wyoming flockmasters experienced a very hard winter," remarked Fred Baker, the well-known feeder at Fort Morgan, Colo., who marketed his season's feeding of lambs through Clay, Robinson & Co. at Chicago. "Losses there were very heavy and during the winter young Wyoming-bred ewes could have been bought by the thousands at $1.00 per head. This will all lead to ranchmen logically holding their lambs high next fall. It is my prediction that many of the big Colorado feeders will stay out of the game, refusing to take the chances, while the lamb crop will be gobbled up at high prices by inexperienced men who, led on by the soaring market that seems an assurity for the coming summer and the success of feeders during the past winter, will venture to line their pockets with the coin of the realm. And here's wishing them a full measure of success and prosperity."

Big Prizes for American Royal.

Directors of the American Royal Live Stock Show, Kansas City, have voted that $40,000 in prizes will be given at the next exposition of the association to be held in that city. The American Royal has gradually been getting better and bigger each year and the fact that such a large sum will be awarded to prize winning stock this year will be hailed with delight by breeders and feeders who exhibit at the exposition each season.

Twenty-Fifth Annual Report.

We are in receipt of the Twenty-fifth Annual Report of the Bureau of Animal Industry, for the year 1908, which was recommended to be published by Honorable James Wilson, secretary of Agriculture, and A. D. Melvin, chief of Bureau. Many important subjects to the live stock and farming industries, as well as fine half-tones, are to be found within its upwards of 500 pages. Some of the live stock and market price statistics are taken from and credited to CLAY, ROBINSON & CO.'S LIVE STOCK REPORT, showing that the Government recognizes the REPORT as an authority on these subjects. The Bureau of Animal Industry will receive 35,000 copies, of which 7,000 are to be for the Senate, 14,000 for the House and 9,000 for distribution by the Agricultural Department.

SHEEP FEEDING YARDS OF HEATH BROS. & DRAKE, MAY VALLEY, COLO.

Shortage of Stock in Missouri.

Reports to the State Board of Agriculture of Missouri show a decided shortage in live stock. Only 48 per cent of the usual number of cattle and 38 per cent of the usual number of hogs are now on feed, and farmers have only 64.5 per cent of the usual number of brood sows.

Clay, Robinson & Company's
LIVE STOCK REPORT

Issued every Friday at Union Stock Yards, Chicago.

Address all communications and make all remittances payable to THE LIVE STOCK REPORT, Union Stock Yards, Chicago.

A Cloud of Witnesses.

There is no question but what a pleased customer is the best advertisement that any firm can have. On pages eight and nine of this issue we present a remarkable showing along this line, comprising the names of several hundred stockmen who within the past few months, voluntarily and without solicitation, have written us to express their exceptional satisfaction with our work for them. We have arranged these names alphabetically by states, and the counties of each state are also alphabetically arranged, so that anyone may readily run down the list to their own county. We invite our readers to do this and we are sure that in many cases they will find there names of persons in their own locality. This showing ought to carry great weight with anyone who is undecided as to what commission firm to select. Please bear in mind that each name on this list is that of a customer who, within a comparatively short time past, has taken the time and trouble to write us an unsolicited letter of thanks and appreciation. It would be a very easy matter to fill this entire issue of the LIVE STOCK REPORT with similar names, but we believe that two pages suffice for the purpose and make a fairly representative showing from most of the principal stock raising states.

No Changes in Live Stock Tariff.

The recent tariff negotiations between the government of this country and Canada naturally led to the question of possible changes in the duties upon live stock. We received queries from two or three different Northwest Territory cattlemen, asking if any change had been made in this particular. For official information the question was submitted to Secretary Wilson, and we append his reply, just received, which is self-explanatory, and which indicates no change in the tariff, at least so far as the near future is concerned.

Messrs. Clay, Robinson & Co.,
Chicago, Illinois.

Gentlemen:

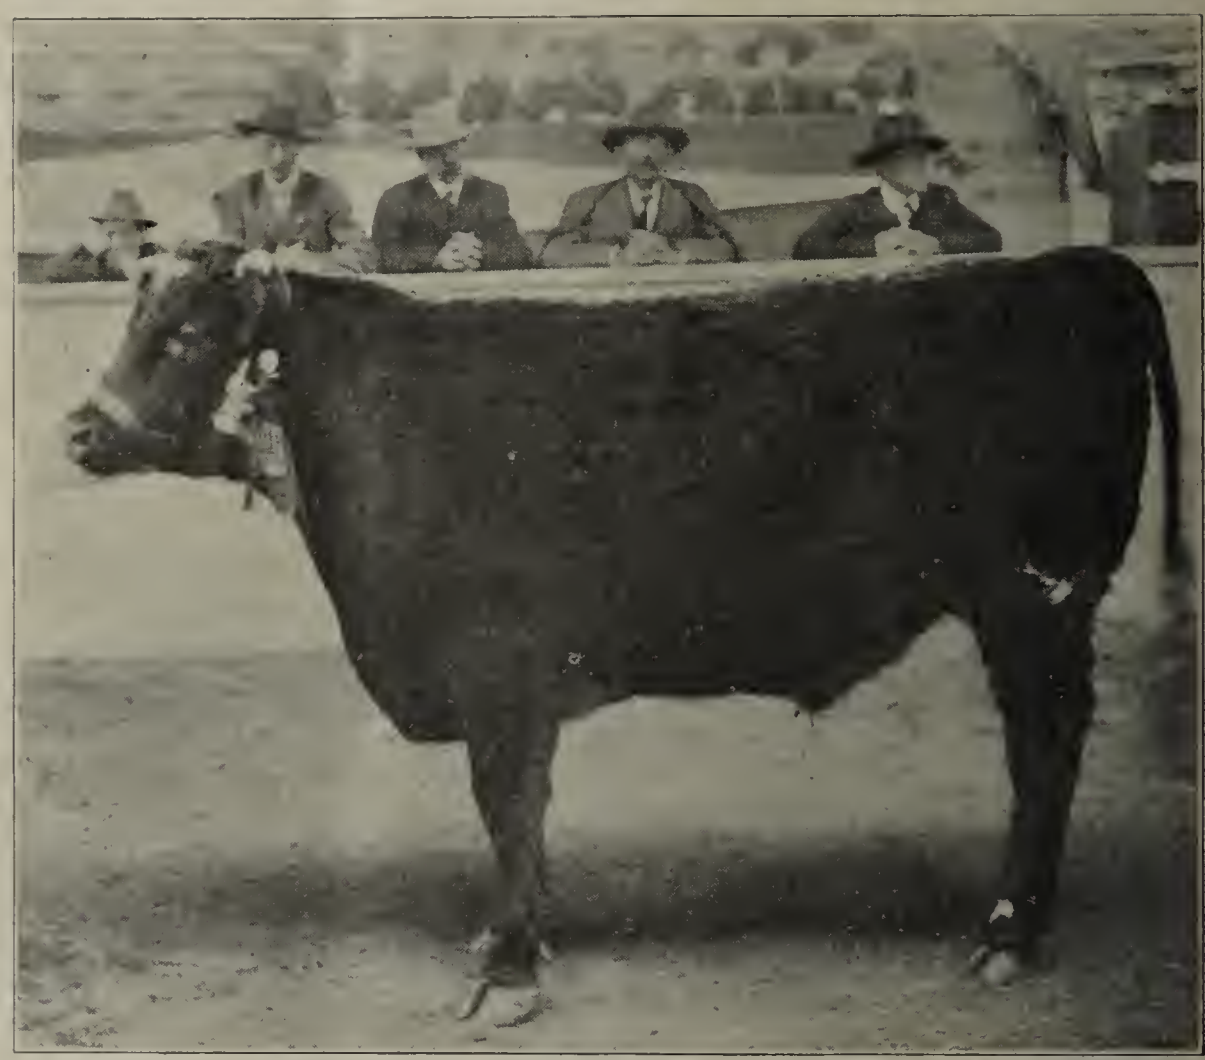
I referred to the Secretary of State your letter of March 31, relative to recent tariff negotiations with Canada. I am today in receipt of a letter dated April 7 from the Secretary of State, from which I quote as follows:

"The letter of Messrs. Clay, Robinson & Co. is evidently based on a misapprehension. The tariff negotiations with Canada related to the duties levied by the Dominion on the products of the United States as affected by the rates granted to France and several other countries through the operation of the Franco-Canadian treaty. These rates were adjusted satisfactorily so that Canada continues to enjoy the minimum tariff on her products entering the United States. Under the law, the President has no power, without the sanction of Congress, to lower the duties below the present minimum rates on live stock or other imports. The subject, however, may enter into future trade negotiations with Canada."

Very truly yours,
JAMES WILSON, Secretary.

Light Runs; Sharp Price Advance.

All that the sheep and lamb market needed was a few days of light supplies and an equable distribution of them. Result was a brisk trade and an advance in prices of about 35c for sheep and around 75c for lambs from low spot of two weeks ago. The market for shorn stock stands only 25@50c under the recent record-breaking price basis, while about two weeks ago the trade was in a demoralized condition, with rates 75c@$1.25 under the high time. We have given the reasons for the improved market since the recent slump. The causes for the deplorable state into which the trade was thrown were in the main crowding supplies in at a time when only very light ones were needed and the filling to overflowing of the big feed lots around Chicago, although the bad condition of the eastern dressed meat trade had a depressing effect on the market. The trend of the trade in the next few weeks is practically up to the course which the feeders will pursue. Light receipts augur well for the price range, but more liberal supplies will no doubt enable the slaughterers to cut some deep gashes in the market. Our advice is: Shear the stock in fleece, keep a close watch on the market, send in only the well-fatted lots and as far as possible avoid congesting the receipts.



"ROSEBUD," CHAMPION TWO-YEAR-OLD STEER.

At recent National Feeders' and Breeders' Show, Fort Worth, Texas. Property of Carpenter & Ross, Mansfield, Ohio.

One of Oldest Cattle Feeders.

A. L. Duncan, the well known farmer, feeder and live stock dealer of Alexis, Ill., was on the Chicago cattle market April 6 with 33 head of 1,495-lb beef steers which Clay, Robinson & Co. landed at $8.45, being 25c per cwt more than he expected. These cattle were bought in November at $4.50, averaging 1,195 lbs. They were given a ration of blue grass with corn fodder until Dec. 10 when they were placed in the feed lot, their ration comprising ear corn and alfalfa. Mr. Duncan says that alfalfa is one of the greatest feeds for live stock there is. He is the only alfalfa grower in that part, realizing 100 tons last season. He has been growing alfalfa there for eight years and says it does very well. Mr. Duncan is perhaps one of the oldest feeders in this country, in point of continuance of service. He has been feeding cattle for forty-one years and not once during that time has he missed one day. He has been shipping to Clay, Robinson & Co. liberally for the past three years. Mr. and Mrs. Duncan are celebrating their fortieth marriage anniversary.

Good Grass Beef in July.

Our Denver house writes: "Cattlemen on the Western Slope in Colorado all report that their cattle have wintered 25 to 35 per cent better than last year, with the exception of a small area on lower Bear River. The grass is fully three weeks to a month ahead of last season, and in most places new grass is from two to five inches high at the present time. If we have a normal season Western Colorado shippers will be sending in pretty good grass beef here in July. The winter losses have been the lightest in years. The weather was pretty severe up until after the first of January. Since that time we have had an open winter and the cattle have done exceptionally well. The recent storms caused very little damage to live stock and did thousands of dollars worth of good to the range. We look for about a normal movement of steers, but believe that cow shipments will be considerably curtailed this season."

Should Induce Larger Production.

The high markets for hogs in recent months, which were recently at top point since war times, offers the greatest inducements for increased production," said Professor William Deitrich of the Illinois Experiment Station. "We must grow a crop of hogs much larger in the coming seasons than in the last few, since the consumptive capacity has overtaken production. There is every incentive for farmers to raise more pigs and give them careful attention. They are one of the farmer's chief sources of revenue."

Prominent Scotchmen Here.

Among our visitors this week were Messrs. Alex McNabb of Menstrie, Scotland, and W. J. Anderson of Glasgow, Scotland, directors of the Swan Land and Cattle Co. of Chugwater, Wyo., who were on their way to inspect the company's holdings. Mr. Anderson and our Mr. John Clay were schoolmates at St. Andrews, Scotland, and are old time friends.

"Did Well for Him."

S. J. Warren, Barney, Ia: "About a year ago I advised my brother-in-law, A. H. Thurman, to ship to you, but he thought you had too much business. This winter, however, he has shipped you three loads and came back much pleased and thought you did very well for him. As for myself, I think yours is the best live stock commission firm there is and whenever I ship any stock it will be billed to you."

The Spring Pig Crop.

In every department of swine industry interest just now is centered in the pig crop. Farrowing is in full bloom throughout the hog raising territory and it is now possible to get a fair idea of the situation. Swine prices for months have been at such an altitude as to offer great inducements to the producer and it would appear reasonable that the number of sows bred was materially increased, that sows in pregnancy would have better care and attention during the gestation period and at farrowing time. Weather conditions, too, have been most favorable for farrowing and the care and health of the pigs. On the surface therefore assumption that an enlarged pig crop should be garnered seems well supported. Reports thus far, however, support the contention that this deduction is open to question. It is conceded the number of mature brood sows on farms last fall was small, unusually so. Encouraged to breed heavily, producers were forced to use young sows and experience indicates that a small number of pigs per sow is the best that can be hoped for when gilts are farrowing. Admitting then that a large proportion of the sows bred were gilts, a smaller crop of pigs must be expected even though the total number of sows bred approximated an average. This discrepancy would be reduced to some extent by favorable weather conditions, but not to an extent sufficient to offset reduced average of pigs per sow occasioned by the unusual proportion of gilts bred. The Department of Agriculture issues a statement covering principal hog producing states exclusive of Illinois, Indiana and Wisconsin indicating the number of brood sows on hand as 87.6, compared with 93.8 last year, and condition 95.9, compared with 96.6 a year ago. Based upon reports compiled by our own offices at ten great hogs markets, these reports covering the states enumerated in the government statement and Indiana, Wisconsin and Illinois as well, we believe the total number of sows bred to be approximately 25 per cent less than a year ago. Considering further the condition affecting breeding operations and results as above enumerated, the conclusion seems warranted that the spring crop of pigs will be not in excess of 65 to 70 per cent of that of a year ago.

Meeting of Wyoming Cattlemen.

The thirty-eight annual meeting of the Wyoming Stock Growers' Association was held at Cheyenne on April 5. They were not the wild and wooly cowmen that used to gather there in the late '70s and early 80s, but a representative crowd of modern cattle owners. There was no change in the official directory. W. C. Irvine was re-elected president, Robert D. Carey, vice president; J. D. Freeborn, treasurer; Miss Alice Smith, secretary. The report of the secretary showed that 173,298 cattle were inspected at South Omaha last year and 41,000 at Chicago. A total of 11,092 estray cattle were recovered at South Omaha and 6,072 at Chicago. This alone shows the value and necessity of the association. During the year 136 new members were admitted, bringing the membership up to 661.

Among the important moves made was to make an effort to have the Wyoming legislature repeal the law which created an inspection fee of 25c per head for all cattle brought into that state. Included in the resolutions were: That the present high prices of meat food products are caused entirely by a great shortage of supplies; that the Agricultural Department and state veterinarian department of Wyoming have done much to eradicate scabbies, and the co-operation of all cattlemen is urged; that attention be called to the desirable objects of the Scott grazing bill; that senators and congressman be petitioned to do away with measures inimical to grazing land privileges and unwarranted restrictions placed against settlers.

Among the stockmen present were: William C. Irvine, J. D. Freeborn, J. M. Carey, John F. Carey, J. C. Underwood, John Clay, A. H. Marble, J.A. Johnston, W.M. Spear, J. B. Kendrick, F. G. S. Hesse, A. A. Spaugh, William C. Thomas, J. C. Shaw, T. A. Shaw, C. B. Irwin, Lee Moore J. J. McIlquham, P. Macfarlane, Colin Hunter, Henry Altman, C. F. Rugg, George W Snow, John T. Snow, Luke Voorhees, T. H. McGee, John Whitaker, D. R Whitaker, Jess Yoder, Alex Nimmo, Dave Nimmo, C T. Farthing, Harry Farthing, John Innes, J. L Jordan, William Dawson, George LaPash, Neil Clark, A. E. Campbell, M H. Beetham, C. F. Hartman, General Manager Mitchell of Denver Stock Yards, C. L. Talbott, Theo. Tilleson and T. W. Tomlinson.

RANGE CATTLE INCREASE AT OMAHA.

The past range cattle season at South Omaha was not only the largest in point of number of cattle from Wyoming inspected, but also in the prices paid for the cattle, as is shown by the following figures, taken from Inspector Claude L Talbot's annual report, a comparison being made with the season of 1908 9:

Total Wyoming cattle inspected, 1909 10.....	173,298
Total Wyoming cattle inspected, 1908-9.....	155,381
Increase.....	17,917

SEASON 1909-10.

Strays reported to secretary.....	2,545	$109,881.81
Strays reported to owners.....	8,547	368,973,99
Totals.....	11,092	$478,855.80

SEASON 1908-9.

Strays reported to secretary.....	2.028	$ 78,760.75
Strays reported to owners.....	8,390	32,5783.70
Totals.....	10,418	$404,544 45
Increase for 1910.....	674	$ 74,311.35

Average value of strays, 1910.....	$43.17
Average value of strays, 1909.....	39 83
Increase.....	$ 3.34

Inspector Talbot attributes the increase in the number of cattle entirely to the increase in the number of owners, as the big outfits have about all "cleaned up." Most of the increase comes from the counties of Sheridan, Johnson and Big Horn and part of the increase in the value of the animals is undoubtedly due to the better care given the cattle under modern conditions on the ranges.

FAT STEERS IN FEED LOT OF A. D. SHAW, MEDICINE LODGE, KAN.

Conditions Somewhat Out of Joint.

In our issue of April 1 we advised prompt marketing of hogs as fast as ready. Making a constant study of conditions affecting the hog trade, and at all times closely in touch with the general situation by reason of individual investigation on the part of our own hogmen at ten great markets, this advice was promulgated because increased marketing was indicated by our study of conditions. One need but refer to hog market history for the past two weeks for evidence of how valuable this advice was to those who heeded. Throughout the hog producing territory the season is thirty days ahead of an average. March weather was unprecedented and perhaps never before in the history of production in the Middle West did hogs make as great gains in that month. It was but reasonable to expect therfore that the spring and early summer movement of hogs would be advanced proportionately as compared with normal years. This condition is evidenced by an increasing movement of swine marketward and by an increase in the average weight of hogs marketed the past ten days. To such an extent has the proportion of heavy hogs increased that at the close of last week light hogs commanded the premium, market experience in this regard being as much ahead of the average year as is the season, further evidence that the situation is somewhat out of joint. Starting two to four weeks ahead of the average season it is probable the early summer movement of swine will be checked as much earlier proportionately. Some time since we predicted the marketing of hogs March 15 to June 15 would show a shortage of around 40 per cent as compared with last year. We can see no reason to change our estimates in this particular, yet we advise the early marketing of hogs that are ready. There is much encouragement to hope for a favorable summer and early f hog market. Considering the outlook and the present market price of corn, we feel certain those who have pigs and shotes will entertain vain regret if they fail to fatten them for the summer and early fall market.

Sold Above Their Expectations.

Silver City, Ia., was well represented on the Chicago cattle market April 6. W. C. Swarts, the veteran and extensive shipper, had in a string of cattle which were handled by Clay, Robinson & Co. and sold 30c per cwt above his fondest anticipations. Mr. Swarts has been engaged in the shipping of live stock for the past 35 years and during the last six years of the existence of J. M. Robinson & Co. he was a patron of that firm and ever since the organization of Clay, Robinson & Co. has been a liberal patron of this firm.

The other party in from the above place was George Coiner, one of Iowa's most prominent feeders and farmers. He had in 20 head of 990-lb beef steers which Clay, Robinson & Co. landed at $7.20, being 50c per cwt above his expectations. Most of these cattle were of Mr. Coiner's own raising and the whole lot had not been on full feed over three months. Last year Mr. Coiner topped the cattle market the day he was here, as well as the previous year.

Congestion of Cattle Supplies.

Cattle feeders and shippers made the fatal mistake of landing 25,994 cattle at Chicago at the start of the week and sending relatively liberal shipments to the western River markets on both Monday and Tuesday. The Monday supply at Chicago was only 2,318 under the total marketed here last week. It was simply a case of filling the market hoppers to overflowing and enabling the buying interests to have things pretty much in their own way. Sharp price declines were registered at all the points and at Chicago on Wednesday sales were mostly 20@30c lower than the close of last week, with instances of the better kinds selling at still greater decline. Demand is considerably restricted at this time from normal volume and the price break was only logical. The Kosher strike against the high price of beef in New York is a source of worry to both the local packers and eastern shippers as it requires a considerable amount of beef to fill this demand in ordinary times. In addition to the above adverse conditions, the hog market has been successfully attacked by buyers, the Wednesday range being generally $1 0 under the recent high time. The general public is not taking kindly to the prevailing high cost of dressed meats and it takes only a few thousand cattle above actual trade requirements to bring about a lower price range. If feeders would only make a more equable distribution of their offerings throughout the week there is no doubt that the selling interests could have better control of the situation than they now have.

Wallace & White, Rio Grande county, Colo., marketed at East St. Louis on April 12 a lot of 292 lambs of 75 lbs average which our house sold at $9.60, the summit.

Western Cattle Ready Sale.

Colorado, Montana and Canada contributed to the cattle receipts here this week. They hit a lower market, being here Monday, when there was a price break of 15@25c. However, buyers showed them good favor, indicating that they want these cattle at the prevailing prices. Included in the sales were:

	No.	Av.	Price.
COLORADO BEET-PULP STEERS.

Year.....	$4.10 7.00	$4.30@6.55	$3.50 *7.00	$3.25@5.50

*Obtained by Clay, Robinson & Co. Sale of heifers at $7.00 a record price.

New Cattle Price at St. Paul.

The highest price ever paid for a carload of beef steers at South St. Paul is $7.75, same being obtained by Clay, Robinson & Co. April 11 for a lot belonging to B. B. Griffith of Wheaton, Minn. This shipment included 40 steers —15 averaging 1,462 lbs and selling at $7.75 and 25 of 1,266 lbs average at $7.25. The former figure was 60c per cwt above any other firm's sale that day and the latter 10c per cwt higher. These cattle were purchased in South Dakota last October at $4.00. They were put on full feed and showed a very good gain during the time they were fed. O. L. Myser, who acts as foreman of Mr. Griffith's farm at Wheaton, Minn., handled the cattle. Both gentlemen expressed themselves as very well satisfied with the results.

Condition of Hog Crop Better.

In a report on hogs, just issued by the Department of Agriculture, it is stated that the number of brood sows on the farm April 1 was 92.2 per cent of last year. In Iowa there is 92 per cent, in Missouri 80 per cent, in Kansas 81 per cent, in Nebraska 85 per cent, and other corn belt states ranged from 91 to 92 per cent. In the eastern states there were 95 per cent, in the South 92.8 per cent, in the Southwest 93.5 per cent and in the West and Pacific coast states 96 3 per cent. The condition for the country is 95.4, compared with 94.4 last year and the ten year average of 94.1.

New Price for Shorn Yearlings.

It was April 12 that Clay, Robinson & Co. at East St. Louis put a new top on the shorn yearling wether market at that place. They landed 103 head of 76 lbs average at $3 75, which was not only a record figure but proved 25c per cwt higher than any other sale of yearlings there that day. The offerings were fed and marketed by E. W. Chase of New Canton, Ill.

High Class Work at St. Joseph.

On April 12 Clay, Robinson & Co. did work that should attract the attention of feeders or shippers who are looking for the first-class salesmanship that is so essential when feeding or shipping live stock. On that day our house landed 483 Kansas-fed lambs of 69 lbs average at $9.80, yearlings at $9.25, wethers at $8.15 and ewes at $8.00, these prices being extreme tops for their respective classes.

Highest Price in Years for Cattle.

On April 6 our Denver house sold three loads of 1,154-lb cattle at $7.85. This price was the extreme top of the market there this season and the highest in many years on that market. They were fed and marketed by the Great Western Sugar Co. of Windsor, Colo.

Top Lambs by 20c Per Cwt.

E. S. Leavenworth of Wood River, Neb., one of the heaviest sheep feeders in the West, had two doubles of 69-lb Mexican lambs on the South Omaha market April 8 which our house sold at $9.60, topping the week's trade 20c per cwt.

Five-Months' Fed Cattle at $8.20.

C. B. Almquist, prominent in farming and feeding circles of Stanton, Ia., was on the Chicago market April 7 with 20 head of 1,253-lb beef steers which we sold at $8.20, pinnacle by 5c per cwt for offerings of their weight. These cattle were two-year-old grade Shorthorns and were practically all of his own raising. They were on a full feed of ear corn and clover hay for five months and made a fine gain in spite of the severe and cold weather last winter. Mr. Almquist expressed his entire satisfaction with the price his cattle brought. He has been shipping to us either at South Omaha or Chicago since the inception of our firm.

Add to Your Profits.

Experience demonstrates that the first warm days and nights of spring cause greater average mortality of hogs in transit than does the hottest summer weather. Such mortality can in most instances to a great extent be prevented if care be exercised in bedding cars, in loading and handling swine. Take pains to see that your cars do not contain a lot of old manure, hay or straw bedding, etc. For the next few months sand or exhaust or other fine cinders can be used to great advantage. See to it that hogs are carefully loaded, and not pounded into cars and piled up in loading. Do not overload. Better a little excess freight than a dead hog at these prices. Shrinks will be lighter, too, where care is exercised. The shipper can by a little extra pains and good judgment add much to his profits. It pays at all seasons to have cars properly bedded and to avoid rough usage in handling and loading swine.

Square Deal for Small Shipper.

A. W. Hess of Plover, Ia.: "Find enclosed 50c for which send me the REPORT one year. I consider it a very valuable paper and would not want to miss an issue. When I shipped a car of hogs to you on March 8 I was told that I ought to bill them in a regular shipper's name as I would get a better price if I did. The next day after my hogs were there, however, I got returns, showing my car sold 10c per cwt above any other hogs that day. I have been shipping one or two cars of hogs and sheep annually to Clay, Robinson & Co. for the past few years and intend to ship to Clay, Robinson & Co. in the future. My experience certainly shows that the small owner gets just as good prices and treatment from you as does the large shipper."

Receipts at Ten Markets.

Marketing of cattle, hogs and sheep at the ten leading markets (where Clay, Robinson & Co. have houses) for March of this year follow, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

Chicago.....	225,487	393,753	224,521	843,761

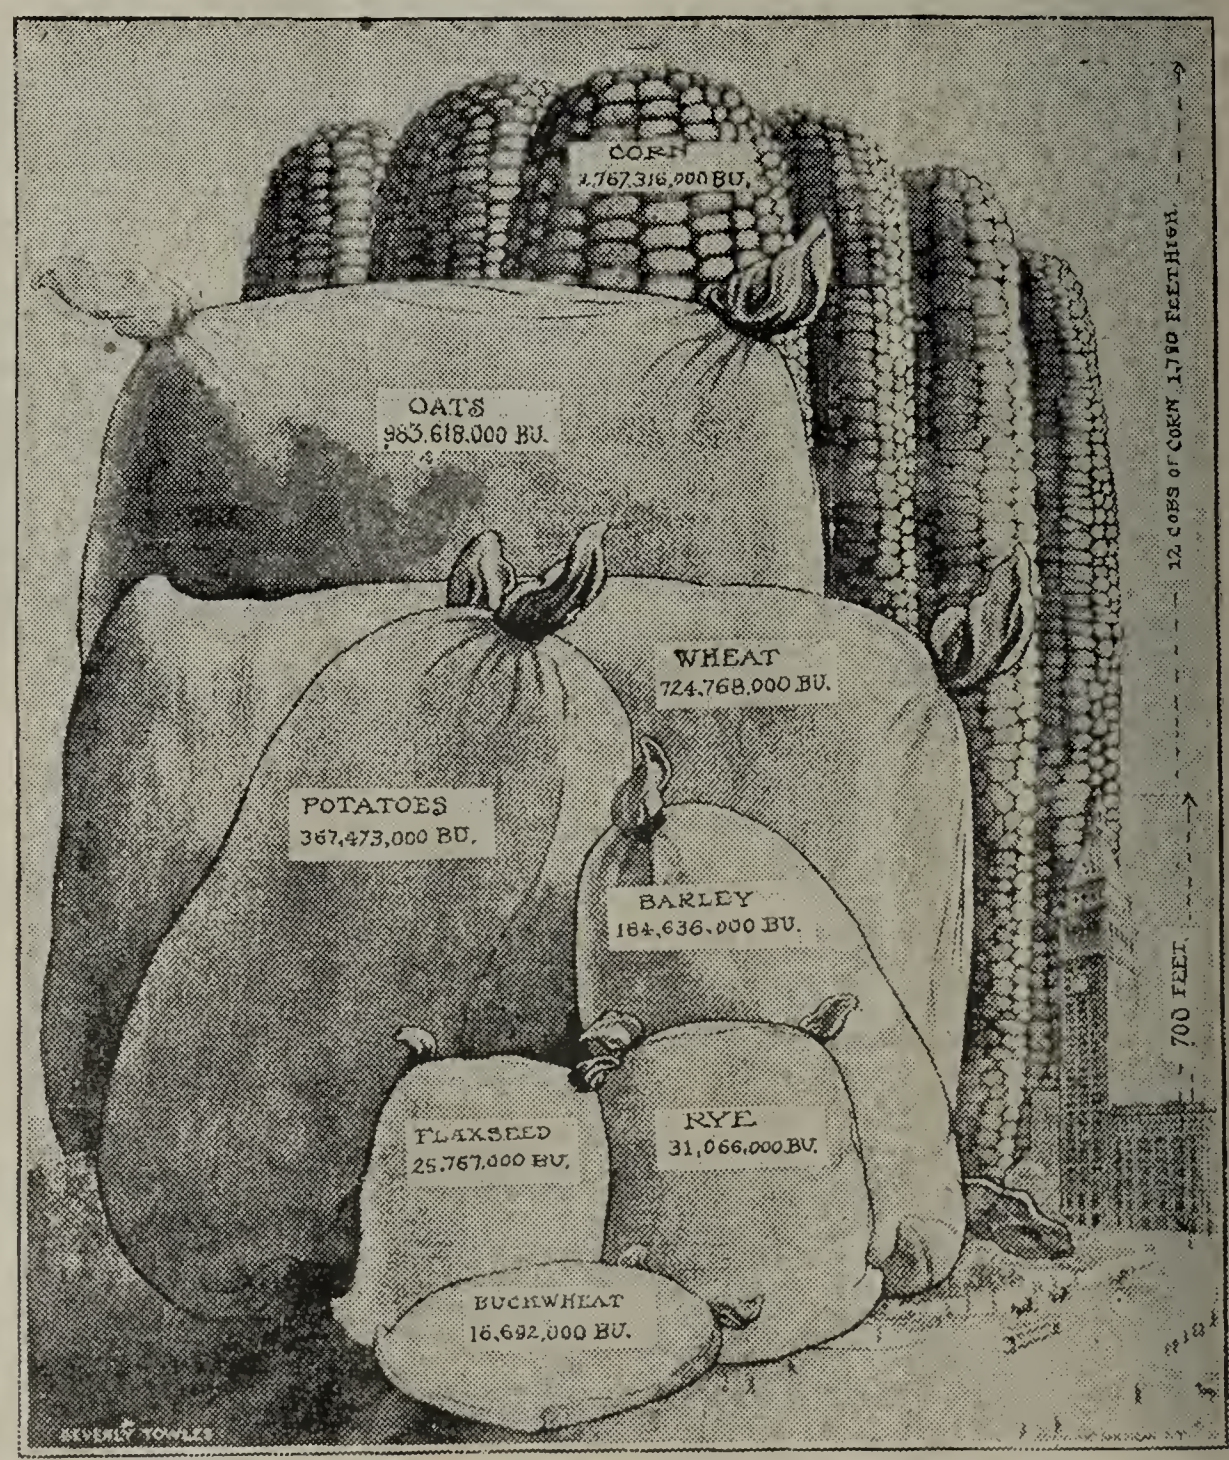
March, 1910....	702,212	1,367,380	822,436	2,927,028

O, how hard it is to die and not to be able to leave the world any better for one's little life in it.—Lincoln.



—Copyright 1909 by the Scientific American

UNITED STATES 1909 CROPS WOULD COMPLETELY DWARF METROPOLITAN TOWER.

This illustration estimates the size of these crops and shows what a stupendous heap they would make if the more important crops were piled up in Madison Square, New York, alongside the Metropolitan Tower. Comparing our crops with other countries, it is found that the United States leads the world in the production of corn, oats and wheat, while we are second in barley and fourth in potatoes.

CHICAGO MARKETS.

Cattle.

NATIVE BEEF STEERS.

Range of prices and bulk of sales of native beef steers this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Range.	Bulk.
This week.....	$5.50@8.65	$6.60@8.10
Previous week.....	5.50 8.65	6.65 8.00
Year ago.....	4.75 7.15	5.65 6.70
Two years ago.....	4.40 7.20	5.70 6.80

Receipts of cattle Thnrsday 3,928. Prices generally 10c higher. Top $8.65, paid for 17 head of 1,342 lbs average. Friday snpply 10,039. Market fully steady. Best offerings were distillers of 1,341 lbs average which sold at $8.00. As compared with the close of previous week prices showed an advance of 35@50c.

A supply of 25,994 at the start of this week proved far above all expectations. The improved price range of last week was doubtless responsible for the big receipts, feeders wanting to liquidate at higher prices. Buyers and sellers had some tronble in striking a trading basis, but when this was finally accomplished it was a 15@25c lower deal than the close of last week. Throughont the session the market was very slow, due in main to the fills which most of the cattle had taken on. Good to choice yearlings did not show the full extent of the decline, demand for these grades being very good at mostly 15c loss. Summit was $8.65, paid for 14 head of 1,607 lbs average. A load of yearlings, averaging 1,107 lbs, went at $8.20. Great bulk of business was conducted at $6.60@8.00. Tuesday supply 2,229. Dull but about steady trade. Best offerings at hand went at $7.60, averaging 1,099 lbs. Run of cattle Wednesday 14,000. It was the most uneven trade in a long while. While the good to choice beeves sold 10@15c lower, others went strong to 10c higher. More desirable arrivals were here than in any one day for a long while and buyers took the opportunity to pound the rates for these. Top beeves went at $8.50.

Revised quotations for all grades of native beef steers:

Extra choice to prime steers.....	$8 10	@	8 65
Good to choice steers.....	7 40		8 00

BUTCHER STOCK.

Active trade in cows and heifers Thursday at prices 10@15c higher. Bulls strong to 10c higher. Calves 25c higher than previous day's early trading. No quotable change in cow and heifer market Friday. Prices were 40@50c higher than previous week's finish. Bulls went 15@25c up from correspondlng day last week. Best vealers held steady, but medium and plain light weights sold 25@50c lower. The market showed a basis 75c@$1.00 lower than finish of the previous week.

A decline of 10@15c was the rule for cows and heifers on initial market day this week. However, demand from all sources was good at the lower rates. Prime 856-lb heifers from Missouri made $7.70. A moderate run and a good general demand prevented price declines for bulls. Choice yearlings were especially free sale. In spite of moderate supply buyers pounded calf prices to the tune of 25c. Steady trade in cows and heifers Tuesday. Bulls went strong to 10c higher. A liberal run of calves enabled buyers to lower prices 50c. Top for assorted vealers $7.50. Good to choice cows and heifers met brisk demand at firm prices Wednesday and other kinds were weaker sale. Bulls advanced 10@15. Desirable calves gained 25c and others went steady.

Revised quotations for all grades of butcher stock and calves:

Extra choice to prime yearling heifers.....	$7 00	@	7 75
Choice to prime export heifers.....	6 75		7 50

STOCKERS AND FEEDERS.

Strong to 10c higher prices ruled for stockers and feeders Thursday. It was a steady deal Friday and generally 15@25c up from close of previous week.

A relatively light supply and good demand from both local and outside sources enabled the selling interests to obtain steady prices for desirable offerings, although buyers forced declines of 10c for other kinds. Yardtraders competed freely against packers for weighthy feeders of value up to $6.00, but were reluctant to go above this figure. Buyers had to pay steady rates Tuesday, owing to the light number of offerings and a fairly good demand. There was a good demand Wednesday and offerings changed hands in due season at steady rates.

Revised quotations for stocker and feeding cattle:

Good to choice feeders	$5 75 @	6 25
Poor to medium feeders	5 15	5 60
Good to choice stockers	5 10	5 40
Plain to medium stockers	4 50	4 90
Inferior to common stockers	3 75	4 40
Good to choice stock heifers	4 40	4 75
Common to medium stock heifers	3 75	4 25
Plain to good thin young cows	3 75	4 40

MILKERS AND SPRINGERS.

Revised quotations for milkers and springers:

Choice to prime	$60 00 @	70 00
Medium to good	45 00	55 00
Common to plain	35 00	40 00

Hogs.

Bulk sales of hogs of respective weights this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Bulk 200 to 250 lbs.		Bulk 260 lbs and heavier.		Bulk 135 to 195 lbs.	
This week	$10.05@	10.45	$10.05@	10.40	$10.00@	10.50
Previous week	10.45	10.80	10.55	10.85	10.35	10.05
Year ago	7.00	7.55	7.05	7.55	6.90	7.45

Marketing of hogs Thursday 13,105. It was generally a 15@25c lower deal, although later on the finish was 10c higher than low time. Top $10.60 and bulk $10.35@$10.50. Receipts Friday 10,176. Opening strong to 5c higher, market closed flat. A spread of $10.35@10.50 gathered in bulk, with summit at $10.60. Saturday supply 3,785. Light hogs sold 10@15c higher and heavy weights were neglected and merely 5@10c up. Heavy stags were very unpopular. Summit $10.70 and most business at $10.45@10 60, being 20@25c lower than corresponding day of previous week.

The unexpected happened at the start of this week. A run of 30,249 head showed up, considerably in excess of general expectations. Trade had a sluggish beginning and a flat finish. Offerings weighing 210 lbs and down were 10@15c lower and weighty grades went 15@25c off, with the finish showing flat 25c loss. Most of the lighter weights sold early at $10.50@10.55 and most offerings weighing upwards of 225 lbs went at $10 25@10.45. Top $10 60, but in offerings with weight $10.40 bought as good as ever walked. All buyers quit before the noon hour. Receipts Tuesday 8,507. Generally it was a 15@25c lower market. Demand from all sources was very limited. Top $10 35, obtained by us, although on the late market $10.20 purchased prime heavy. Bulk of business, taking in all weights, was at $10.10@10.20. Rough heavy and all coarse and common packing grades were difficult sale, these kinds going under $10. Wednesday run 20,000. Prices 10c lower than previous day's close. Top $10.15 and bulk $10.00@10.10. As compared with the high time of the year rates showed around $1.00 loss.

Revised quotations for all grades of hogs:

Fair to choice heavy shipping	$10 05 @	10 15
Fair to choice butchers	10 00	10 15
Fair to choice medium weight	10 00	10 10
Good to choice assorted light shipping	10 00	10 15
Poor to good heavy packing	9 75	10 05
Poor to good mixed packing	9 90	10 05
Poor to good light bacon	10 00	10 10
Pigs, 115 to 140 lbs	9 85	10 10
Pigs, 110 lbs and under	9 00	9 75
Stags	10 75	11 25
Boars	3 75	5 00
Governments	4 00	6 00

Sheep and Lambs.

Following shows top prices and bulk of sheep and lamb sales this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Sheep Top.	Sheep Bulk.		Yearlings Bulk.		Lambs Top.	Lambs Bulk.	
This week	$8.10	$7.50@	8.10	$8.00@	8.50	$10.15	$8.75@	9.50
Last week	*8.50	7.25	7.75	7.35	8.25	*9.60	8.25	9.25
Year ago	6.50	5.40	6 00	6 25	7.25	8.35	7.00	8.15
2 years ago	6 50	5.05	6.00	6.50	7.15	7.75	6.85	7.05

*Obtained by Clay, Robinson & Co.

Run Thursday, 6,679. Sheep and yearlings went 10@15c higher and lambs 15@25c up. Bulk sheep brought $3.85@7.60 for shorn ewes and wethers, with top at $8.00, paid for prime 124-lb wethers, 80 head of which went on export account. Wooled Colorado lambs went at $9.60, obtained by us for two different lots, and shorn offerings mostly at $8.75@9.15, we landing two different lots of Colorados at latter price. Marketing Friday 7,840. Prices showed 15@25c gain for sheep and yearlings than previous day and were generally steady with previous week's finish. Best sheep offered were 117-lb shorn wethers which brought $7.90. It was generally a 25c higher deal for lambs than previous day and strong to 15c up from Friday last week. Shorn offerings were the rule and sales were largely at $9.25@9.40, with top at $9.50. A big string of 63-lb western wooled lambs went back to the country at $7.75. A small lot of 42-lb spring lambs made $10.50.

Receipts on initial market day this week 14,006. Sheep and yearlings were in scant supply and demand was good enough to enable sellers to hold prices on a steady basis with close of last week. However, outlet was limited at the prices. It was a steady to 10c lower deal in lambs. Trade was minus active tone from start to finish. It was fortunate that the run was kept down as buyers were very bearish. A few wooled Colorado lambs showed up and went at $10.00@10.15. Bulk offerings were shorn and went at $9.25@9.50, latter price being obtained by us for Colorado and Wisconsin-fed offerings. A load of shorn 83-lb western yearlings reached $8.40. Summit on sheep was $8.00, we landing Ohio-fed shorn wethers at this price. Sales of shorn sheep were at $6.50@7.75. Marketing Tuesday 14,761. Sheep and yearlings went 10c higher, as did also high dressing lambs, although other kinds were merely steady sale. Popularity centered on handy weight lambs. A small lot of fancy 43-lb spring lambs went at the outside price of $15. Wooled lambs from Colorado sold at $9.80@10, latter price being obtained by us. Summit on shorn lambs $9.60, this price being secured by us for Colorados, while most trading was at $9.25@9.50. Prime 133 lb shorn western yearlings and wethers mixed went at $8.40 and choice 124-lb shorn western wethers at $8.10. Most trading in sheep was at $7.25@8.00 for shorn ewes and wethers. Receipts Wednesday 14,000. Most trading in sheep went 10@15c lower. Lambs were 10@25c lower, with most late sales at the outside decline.

Revised quotations for all grades of sheep and lambs:

East St. Louis Markets.

[Special telegram from Clay, Robinson & Co.]

National Stock Yards, Ill., April 12—A fairly liberal supply of native cattle thus far this week, with best steers selling 15@25c lower than last week's close.

Best beeves today at $8.15, averaging 1,165 lbs. Bulk arrivals beef cattle with prices ranging generally around $6.75@8.00 for ordinary fleshed to choice offerings. There were instances of some of the offerings making around $7.00 going about steady. Heifer market about steady and fairly active. Good cows brisk sale, and others slow. Calf market was not materially changed, with top today at $8.50 and bulk of good lots at $8.00@8.25. There was a nominal supply of Southern cattle. One load of decent meal-fed Oklahoma steers, averaging 943 lbs, brought $6.60. She stuff was considered steady.

Hog market 40c lower than last Saturday. Top $10.35 and bulk $10.10@10.25.

Prices for sheep and lambs fully steady with last week's finish. Best lambs at $9.60, this sale being made by us for Colorados. Shorn westerns made $9.25 and yearlings $8.75. Spring lambs reached $10.40.

SON & CO. "SALES THAT SUIT."

OUTH ST. PAUL EAST ST. LOUIS EAST BUFFALO DENVER FORT WORTH

AMONG OUR CUSTOMERS

Paul Johnson, Madison county, Mont : "Thank you for trouble in sending me quotations on the markets."

William Hall, Seneca county, Ohio, writes our East Buffalo house: "Am well pleased with sale of lambs."

Ernest Block, Saint Joseph county, Mich.: "I thank you for your kindness and your advice about my cattle."

Charles P. Guy, Union county, Ohio: "Cattle came through in good shape and are starting out all right. Thanks."

John T. Craigmyle, Shelby county, Mo.: "There are very few cattle being fed here and hogs are scarce. Corn is worth 70c per bushel."

Our East Buffalo house April 8 sold for H. E. Whitney, Genesee county, Mich., 160 lambs of 73 lbs average at extreme top price of $10.

Fred Zeglin, Woodbury county, Ia.: "There are not many cattle on fed around here and practically no hogs to go to market before fall."

T. D. Bowman, Boone county, Neb., writes our South Omaha house: "I appreciate that sale of car of hogs which was sure a 'cracking' one."

Dr. J. O. Hoffman, Harlan county, Neb., writes our South St. Paul house: "Load of hogs certainly brought a good price. Much obliged to you."

Ed. Boltz, Hall county, Neb., writes our South St. Joseph house: "Sale of my hogs looks good. I had two crips there and you got one over the scales."

James Brown, Deuel county, Neb.: "Grass is starting fine and cattle are looking good. I think the REPORT the finest paper of its kind I ever read."

Geo. N. Dayton, Anoka county, Minn., writes our South St. Paul house: "Heifers reached Forest Lake in good shape. I am well pleased with them."

R. A. Switzer, Pembina county, N. D.: "Received your letter with claim enclosed for $35.80. Many thanks to you. I also got some time ago the N. P. claim of 78c.

R. E Waldo, Kalamazoo county, Mich.: "I was very well pleased with the steers in every way. Their weights, colors and age were as near what I wanted as could be. Thank you."

F. M. Windbigler, Warren county, Ill., was the owner and we the sellers of the 69 head of 186-lb hogs which brought the top price of $10.40 for light weights at Chicago on April 7.

L G. Davis, Laramie county, Wyo.: "Enclosed find $1.00 for REPORT for two years. Your paper keeps one posted on market conditions and I am always glad to receive it."

Glass Bros., Westmoreland county, Pa.: "Load of cattle you bought last October did well during the winter. We think we got as good cattle as could have been had at the price—$1.40."

Alex MacQueen, Merrick county, Neb.: "Received account sales for two cars of lambs. Your sales have been satisfactory. Thank you for the whole transaction, which has proven profitable."

M. S. Downey represented Mahaska county, Ia., on the Chicago sheep market April 6 with 403 shorn wethers and yearlings mixed of 87 lbs average, which we sold at top price of $8.10 for such stock.

A. L. Sayers, Dakota county, Minn., writes our South St. Paul house: "Your account sales of 53 sheep received and also check for $284.96, which is very satisfactory to me. Thanks for your efforts."

Joseph H. Warren, owner of the Aspen Dale Farm, Fauquier county, Va.: Cattle came and I am well pleased with them. People out here think them a fine lot. You secured them cheaper than I expected."

Morrow county, Ohio, was represented on the Chicago market April 11 with 342 head of 99-lb shorn wethers which we landed at top price of $8.00 for sheep. They were marketed by Thomas & Noe.

L. J. Williams, Linn county, Ia., was on the April 11 sheep market at Chicago with 165 shorn yearlings and wethers mixed, averaging 83 lbs, for which we obtained top price of $8.50 for such offerings.

F. & M. Martenson, Bent county, Colo., writes our South St. Joseph house: "Regarding sales you have made for us this season, we are very well pleased. Lambs you sold for us April 4 brought more than we expected."

F. G. Robertson, Steuben county, Ind.: "I feel guilty continuing to accept a paper as valuable as the REPORT without paying the cost of postage. I am therefore pleased to enclose herewith 50c for a year's subscription."

Mahaska county, Ia., was represented on the Chicago sheep market April 6 with 223 shorn wethers, averaging 91 lbs They were landed by us at $7.75, top for sheep by 10c per cwt and were marketed by F. F. Everett.

W. Stuart, Shiawassee county, Mich.: "Enclosed find $1.00 for which continue REPORT two years. I could not get along without the paper. We are having very dry weather here at present. Farmers are now sowing oats."

Bryan Smith, Hudson county, N. J.: "I am going to Ireland for a short time and would like to have your interesting and instructive REPORT sent me there, as it is much appreciated. Enclosed find 25c to cover postage."

W. H Robinson, Knox county, Ill.: "I have been getting the REPORT for a few weeks and feel that it has been of great benefit to me in connection with the market. Enclosed find $1.00 for which send me the paper two years."

C. A. Thomas, Bent county, Colo., was on the South St. Joseph market April 7 with 496 Mexican lambs, averaging 75 lbs, which our house landed at $9.45, extreme top of the market. Mr. Thomas was much pleased with the sale.

Geo. C. Belmont, extensive sheep feeder of Morgan county, Colo., had two cars of 86-lb Mexican lambs on the South Omaha market April 11 from his feed lot in Scotts Bluff county, Neb., which our house sold at top price of $9.75.

E. Biggins, Peoria county, Ill : Payne & McDonald, Kossuth county, Ia.; Blakely Bros., Mercer county, Ill., all had consignments of cattle at Chicago on April 6. We handled their offerings. The above gentlemen are well-known shippers.

Pleasing People

No one ever succeeded in pleasing everybody. But we believe we have come a little nearer that mark than any one else in our line of work. Anyway, "pleasing people" has made us the largest sellers of live stock in the world.

G. R Pomeroy & Sons, White county, Ill., writes our East St. Louis house: "We wish to thank you for the fine manner in which you handled our little consignment. When next we have anything for market we will most certainly patronize your firm."

D. R. Buffington, Chariton county, Mo., marketed four loads of cattle at East St. Louis on April 5. They averaged 1,084 lbs and were sold by our house at $6.95. The cattle were of pretty fair quality, had been fed about 80 to 100 days and were not fat.

A. Walton Fleming, Pauquier county, Va.: "Cattle reached here in good shape and I am very much pleased with them. I had about given up getting any cattle this spring and I am very much pleased with the prompt attention you gave my order."

C. J. Carlson, Sac county, Ia.: "Account sales of cattle received and I am pleased with same. You must have gotten a good fill on the cows and steers as the shrink on them was very small. Thank you for your good work. I assure you of my future patronage."

Summit of shorn lamb market at Chicago on April 11 was $9.50. This price was obtained by us for 246 head of 77 lbs average, belonging to H. Strachan, Larimer county, Colo., and 242 head of 81 lbs average, marketed by John Blanchard, Columbia county, Wis.

Carl Christiansen, Lake county, S. D.: "Feeders and stock raisers went through severe hardships last winter. There is a general desire to get out of stock raising out here on account of scarcity of labor and the last two severe winters. Many thanks for your special market letters."

Our South St. Joseph house topped the April 11 lamb trade 35c per cwt by selling for John Mariman, Bent county, Colo., 480 Mexican lambs, averaging 72 lbs, and for Colt & Goddard, of same place, 496 Mexican lambs, averaging 71 lbs, at $9.75. No other sales were recorded above $9.40.

Chas. Korn, Lamoure county, N. D.: "Our crop yield last season was exceptionally good; in fact, has been the past few years, and for this reason farmers in my section have largely given up the raising of live stock. Most everybody is busy seeding at this time. We had a nice rainfall last week."

W. I. Bell, well-known feeder, Fremont county, Ia., sold a load of cattle through our Chicago house at $8.05 Monday, a most satisfactory price, considering the bad condition of the market. These cattle were on feed around five months and did very well. The ration comprised ear corn and fodder chiefly for roughness.

A. E. Cook, proprietor of the famous Cook's Brookmont Farm, Sac county, Ia.: "The season is advancing rapidly and our prospects are very good for another year's crop, although it is quite dry at this time of the year. This has little or no influence over crop conditions, other than a great help in performing the seeding work."

The Diamond Cattle Co., running a large herd of cattle in Albany county, Wyo., had a nice lot of heifers at South Omaha April 7 which Clay, Robinson & Co. sold at $6.25, an outside price for stock of that kind. They averaged 921 lbs and were mostly high-grade Herefords. This company also had in a load of rather uneven feeders which our house sold at $6.65, averaging 967 lbs.

W. T. Snyder, superintendent of the Experiment Sub-Station of the University of Nebraska, Lincoln county, Neb., was on the Denver market April 9 with a car of hogs which averaged 260 lbs. They were sold by our house at $10.40, extreme top of market by 5c per cwt. Next highest price was $10.35, also obtained by our house for two loads of 249 lbs average, marketed by J. R. Porter & Son, Dundy county, Neb.

Limit for lambs at Chicago on April 6 was $9.50 and our sales at this price follow: For J. E. Preston, 475 head of 68 lbs average; R. A. Chase, 301 head, 75 lbs average and T. B. Parks, 481 head, 73 lbs average. The above gentlemen marketed their offerings from Morgan county, Colo. The next highest price was $9 40, this price also being obtained by us for 520 lambs of 66 lbs average, belonging to Preston & Hamilton of the same county.

C. F. Utemark of the prominent feeding firm of Utemark Bros,, Mills county, Ia., sold two loads of cattle at Chicago on Monday at $7.75 through our house. Mr. Utemark said that the price was satisfactory, considering the dull and lower condition of the market. The cattle were on feed about five months and made a good gain. They were fed mostly shelled corn and fodder, with oil meal as a conditioner, hay being used only at the last of the feeding period.

Carver Bros., Rice county, Minn., who have from three to five loads of cattle on the Chicago market every week and who are steady patrons of our house, had a shipment here Thursday of last week. The same was accompanied by George Farmer, who said that there were very few cattle to come from that country in the next few months and that the supply of fat hogs was very low. There will be a small crop of spring pigs, according to him, due to liberal marketing of brood sows.

Among the prominent stockmen who had hogs on the Chicago market April 6, and whose shipments were handled by us, were: M. W. Retter, Marshall county, Ia.; C. A. Johnson, Mercer county, Ill.; E. J. McDonough, Peoria county, Ill.; R. H. Allerton, Piatt county. Ill.; P. J. Yenrich, Lasalle county, Ill.; Paine & McDonald, Kossuth county, Ia.; J. H. Meyer, Clayton county, Ia.; Wyman Bros., Peoria county, Ill.; C. Meisgier, Fayette county, Ia.; W. A. Meyers, Dupage county, Ia.

A. C. Wells of the successful feeding firm of Paugh & Wells, Green county, Ia., had three loads of cattle and one of hogs on the Monday market at Chicago, both shipments being sold by us. Mr. Wells said that farmers are through with oat seeding in his part of the state and that some corn is planted. The spring farm work is advanced a month over late seasons. Mr. Wells has been feeding and shipping live stock for the past-thirty-five years and has marketed the bulk of his offerings through Clay, Robinson & Co. since their organization.

E. H. Bisbee, son of John Bisbee, well-known farmer and feeder, Watonwan county, Minn., was at Chicago Monday with two loads of cattle, most of which were of their own feeding. We handled the shipment and Mr. Bisbee said that the price was better than he had expected in view of the lower market. For the past several years the senior Mr. Bisbee has marketed his cattle, hogs and sheep through Clay, Robinson & Co. and last year our South Omaha house bought 70 head of stock cattle for him and the junior Mr. Bisbee said that they were very good cattle and were making excellent account of themselves.

C. J. Fleak was in from Guthrie Center, Ia., and was a caller at our Chicago house. He said that owing to the high prices there was a heavy liquidation of brood sows in that part of the state and has resulted in a small crop of spring pigs. There are not as many cattle on feed there as usual. Mr. Fleak and his father are now in the range cattle business in Colorado. While in North Dakota they marketed their cattle through Clay, Robinson & Co. and while in Iowa sold their sheep through our firm. Mr. Fleak said that they were highly pleased with results and

that they also intended to have our house handle their range cattle business.

Our Sioux City house sold 65 head of 284-lb hogs at top price of $10 on April 12 on account of Theodore Treinen, Plymouth county, Ia.

The 54 head of 270-lb hogs which brought the top price of $10.35 at Chicago on April 12 were handled by us and marketed by Charles Geyer, Sioux county, Ia.

E. C. Copeland, Page county, Ia., writes our South St. Joseph house: "I am very much pleased with sale of hogs and will do all I can for you in the future."

The limit for shorn lambs at Chicago on April 12 was $9.60, at which price we landed 246 head of 77 lbs average, being from the F. J. Schroeder feed lot in Larimer county, Colo.

Bedient Bros., well-known and extensive feeders of York county, Neb., had 172 beef steers of 1,327 to 1,435 lbs average on the Chicago market April 11 and we sold them at $8.10@8.40.

Ten dollars proved as high as wooled lambs made on the Chicago market April 12. This price was secured by us for 500 head of 73 lbs average, marketed by Theodore Lucas, Weld county, Colo.

F. A. Nave, one of the most prominent and extensive breeders of Hereford cattle in this country, with headquarters in Marion county, Ind., marketed at Chicago on April 11 a string of his heifers, they being handled by us.

J. C. Shepard, Calhoun county, Mich.: "I have been receiving your valuable REPORT for several years and consider it no more than right that I should pay the postage from now on. Please find enclosed 50c for ensuing year."

Jos. R. Porter & Sons, Dundy county, Neb., writes our Denver house: "Your remittance for hogs at hand. Will say that under the market conditions you did well with them. Wish to thank you for the way you handled that big hog."

L. A. Farwell, Morgan county, Colo., was represented on the South Omaha market April 12 with a load of 74-lb shorn lambs which brought $9.25 and a car of 87-lb shorn ewes which landed at $7.40. These prices were top for their respective classes and were obtained by our house.

Pinnacle of hog market at South Omaha on April 7 was $10.35. Our house landed two different lots at the price, sales of which follow: For Eldredge Bros., extensive farmers and stockmen, Hall county, Neb., 35 head of 306 lbs average, and for A. Stortz, Knox county, Neb., a load of 286 lbs average.

John Zehr, Buffalo county, Neb., showed his appreciation of our previous cattle sales for him by sending a big string of his Oregon-raised Nebraska-fed steers and heifers to our house at Chicago on April 11, we again landing them at very satisfactory prices, considering the dull and lower condition of the trade that day.

J. Leibee, Henry county, Ill.; R. S. Spire, Tama county, Ia.; A. Jones, Clay county, Ia.: Green & Beatty, McHenry county, Ia.; I. M. Hughes, Hamilton county, Ia.; L. Batchelor, Watonwan county, Minn., all of whom are frequent and prominent shippers to the Chicago market, were here Monday with consignments which were sold by us.

Included in the prominent feeders and shippers of hogs who were on the Chicago market this week and whose consignments were handled by us were: Charles Gayer, Sioux county, Ia.; E J. McDonough, Peoria county, Ill.; A. L. Miller, Sioux county, Ia.; C. S. Powell, Sauk county, Wis.; J. H. Runner, Grundy county, Ia.; A. F. Gretschman, Bonhomme county, S. D.; C. P. Downing, E. M. Whiting and N. D. Beall, Monona county, Ia.; J. H. Rath, Lyon county, Ia.; B. Dragoo, Woodbury county, Ia.; A. C. Wells, Greene county, Ia ; W. L. Bergren, Union county, Ia.; A. A. Benton, Mills county, Ia.

W. A. Dern, well-known farmer and feeder of Pickaway county, Ohio, was at Chicago this week and bought a load of stock cattle through our house. He has purchased stocker and feeder cattle through Clay, Robinson & Co. for the past several years. "Wheat is in very good condition in our part of the state," remarked Mr. Dern. "If the weather continues good a great deal of the corn will have been planted this month. Grass is extra good for this time of the season. There is a big shortage of fat stock. We will have a shortage of spring pigs, due partly to a good many pigs perishing in February and partly to the shortage of brood sows. Spring crop of lambs is in good shape."

J. E Kirk, Harrison county, Ia.; T. D. Betts, Merrick county, Neb.; J. A. Gephart, Saint Joseph county, Mich.; J. M. Meyers, York county, Neb.; H. Blunk, Crawford county, Ia.; F. B. Ceppes, Elkhart county, Ind.; M. Peters, Sac county, Ia.; H. J. Knauss, Harrison county, Ia.; G J. Rabe, Monona county, Ia ; W. D. Bell, Fremont county, Ia.; John Berry & Co., Benton county, Ia.; E. C. Smith, Pottawattamie county, Ia.; J. B Smith, Woodbury county, Ia.; A. W. Whitehouse, Polk county, Ia.; C. T. Kisor, Mahaska county, Ia.; A. A. Benton, Mills county, Ia ; A. R. Campbell, Buchanan county, Ia.; A. R. Wells, Greene county, Ia.; M. Martin, Fremont county, Ia.; C. M. Buck, Rice county, Minn.; L. W. Pierce, Woodbury county, Ia ; R. Rininger, Sac county, Ia.; H. Essman, Nobles county, Minn.; W. H. Dye, Marion county, Ind.; A. Gibbons, Madison county, Ia.; J. Reglin, Woodbury county, Ia., were the representative feeders who had cattle on the Chicago market at the start of this week. All of their consignments were sold by us.

Do It Now

Did you ever stop and ask yourself: "Why do Clay, Robinson & Co. make so many top sales?" It is a fact that they head the list in this line. Why? Because their salesmen are men of experience in their line, and have the ability to go into the Yards and get the full market value for your consignments. Did you ever try them? We offer the best service to be had on the ten leading markets. Take advantage of a good thing. Do it now. It means money in your pocket.

Conditioning Younger Cattle for Shambles.

Our East St. Louis house writes us as follows: "Hogs in in this locality are very scarce and we are bound to have small receipts for many weeks to come. As result of the high prices the last few months feeding is being increased considerably. The cattle feeders have no cause whatever to complain about the prices they have received for their cattle this spring. The majority of them have aimed to condition young animals as they do not require so much feed to get in marketable condition. This has been a safer investment than matured aged cattle. We look for prices to continue good for some time to come. While the hog market has shown a decided change lately, we do not feel that with the shortage in sight prices can go very low.

"During the past week this locality has been visited by nice rains. Spring work is progressing very rapidly. Oats are beginning to come up and some farmers have started planting corn. The wheat crop has been damaged somewhat on account of the severe weather last winter and it is estimated that the crop will not be over 60 to 70 per cent. Oklahoma has been wetted down nicely the past week and grass conditions are better than for several years. A great proportion of the corn has been planted in that country."

Weekly Receipts at Six Markets.

Following shows receipts, in round numbers, of cattle, hogs and sheep at six leading western markets last week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

More People; Fewer Animals.

During the last ten years the population of the United States increased about 12,000,000 and a decrease of about 5,000,000 in the number of available food animals are estimated by the Bureau of Statistics from reports on these two subjects, made by the census bureau and by the Department of Agriculture.

Another lesson on the law of supply and demand, deduced by the Bureau of Statistics, is that the supply of food animals has gone down 3 per cent, while the value has increased 22 per cent. Meanwhile, the price of grain necessary as food for these animals has increased from 56 to 75 per cent. The value of cattle, sheep and hogs in this country was estimated at $1,943,000,000 in 1901, and at $2,368,000,000 in 1910. This is an increase of 22 per cent.

Cattle form the one class of food animals which has come near keeping pace with the growth in population. They have increased in number 11 per cent, while the population has increased 16 per cent. About 2.3 animals to each person in the country existed in 1901. In 1910 there are about 1.9.

A pound of lard was worth 7.4c in 1901; in 1910 it is worth 18c, an increase of 143 per cent. This may be explained, in part at least, by the fact that there has been a decrease of 16 per cent in the number of hogs.

A Bigger Paper.

In pursuance of our policy of giving our readers biggest possible value for the nominal subscription price charged for the LIVE STOCK REPORT, we are this week again adding four extra pages. We shall hereafter run sixteen pages, instead of twelve, a large part, if not all, of the time. This will enable us to print more pictures, more articles of a general nature, and make the paper more useful and interesting all around. If your name is not on the regular subscription list, insuring receipt of every issue, 50c to cover postage will place it there for one year.

NOTICE!

Our "complimentary" mailing list has become so large that it is no longer possible to print the enormous editions required to cover same—to say nothing of cost of postage and other expenses.

From now on we can send the paper REGULARLY only to those who enroll as paid subscribers. Non-subscribers may continue to receive occasional copies, but the only way to insure receiving every issue is to subscribe. The subscription price is fixed at only 50 cents per year, which barely covers cost of postage. Payment of this nominal sum, however, will show us that you appreciate the paper and make it worth while for us to send it to you.

As a special inducement to send in your subscription at once, we will, provided you forward same as promptly as you conveniently can after reading this notice, send you, free and post-paid, a double-section key-ring—the best and handiest thing in this line you ever saw.

This, if you have not heretofore been a paid subscriber, will entitle you to the paper for A FULL YEAR FROM NOW—no charge for the time you have already received it. This does not apply to renewals sent in by persons who are already subscribers. Such renewals of course date from the subscriber's expiration date.

THE LIVE STOCK REPORT,
Union Stock Yards, Chicago.

Enclosed find 50c to cover postage on the LIVE STOCK REPORT for one year. Send the key-ring.

Farmers Making Serious Mistake.

"Even the manure is worth considerably more than the labor involved in feeding the cattle," says Professor H. W. Mumford of the Illinois Experiment Station. "There is a decided movement in Illinois now toward grain farming instead of live stock. I think that is a serious mistake. Practically half the corn grown in Illinois is shipped out of the state, enough to fatten two million steers. If the manure from these was properly preserved and properly applied to the land, it would increase the producing capacity of the farms of this state $12,000,000. That is not a fancy or a theory; it is a fact. Live stock consumes about 80 per cent of our corn. The high price of corn is caused by its demand to feed live stock far more than by its use as human food. Destroy the live stock market for corn and the price of corn would be much lower. I do not advise dry-lot feeding in summer, but I am not sure but we are coming to it. It must be demonstrated before we know about it. Pasture is the most expensive cattle feed. Silage makes cheaper beef than anything else. It can be kept throughout the year or two or three years. I have no doubt that silage is one of the most important feeds for beef cattle. I have never found a man who fed silage to beef cattle who has abandoned it. At the experiment station the beef breeding cows were wintered cheaper on silage and hay than they could be kept in the summer. A silo 18 by 36 feet is ample to supply silage six months for 50 steers."

Top Prices for Hogs.

Monthly top prices for hogs at Chicago for seven years, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

Fort Worth Markets.

Fort Worth, Texas, April 11—Sixty loads of cattle were here today, 35 of which were steers, and most of these were Southern grassers. Two loads of good long aged yearlings, averaging 937 lbs, marketed from Quanah, Tex., brought $7.00. Top grassers $6.40 and a bulk $5.60 @ 6.00.

Marketing of hogs today 1,500. Prices went 15c lower and closed 20c down. Top $10.40, for one load averaging 240 lbs, bought by an outsider. Local packer's top was $10.30.

Quality in Market Classes of Live Stock.

[Kansas Farmer.]

In order to place before our readers the opinions of men who have spent years in the handling of live stock on the market, we requested Clay, Robinson & Co., who are perhaps the best known live stock commission firm in the country, to express their judgment as to just what the markets demanded. Their reply, covering the several classes of live stock, is as follows:

CATTLE.

There are many different buyers of fat cattle on the markets. The leading purchasers are the big packing firms. Therefore they are the ones the cattle feeder should cater to; that is, prepare the class of cattle that they most desire. At the outset we wish to state that the fat 1,150 to 1,300 lb beef steer meets with the best demand throughout the year. Then there are the 950 to 1,100-lb yearling cattle that are in high favor at all times, where they have the quality and are fat. Between the first of August and the first of March the well-fatted 1,400 to 1,600-lb beeves are in best favor, while the handy weight cattle

meet with best demand during May, June and July. Eastern shippers are good bidders for the fat 1,150 to 1,450-lb steers, while the exporters are the good buyers of their kinds weighing 1,300 lbs and upward. There is usually a good demand for cows and heifers throughout the year, but best call is during the winter and early spring months, as it is during these months that fat she stock is the scarcest and commands the highest prices. In all cases, whether steers or she stuff, fat and quality are the requisites to the highest market prices.

HOGS.

The modern packer utilizes every type of hog from the 75-lb pig up to the 700-lb boar or stag. In general, taking it one day with another, our experience is that the class of hog which sells to best advantage—the hog that makes the best average price one day with another, week in and week out—is the one weighing 225 to 250 lbs, of good breeding, regardless of particular strain or type, carrying good flesh and well matured for his weight. The market-topping type of hog varies of course from time to

time, dependent upon supply and demand. When there is an over-abundance of heavy matured hogs the 280 to 350-lb lard hog sells at a discount and the 170 to 210-lb bacon or light butcher weight hog commands the premium. With a larger proportion of the hogs coming to market rather light in weight and lacking fat then of course the heavy lard hog commands the premium and the lighter weights sell at a corresponding discount.

SHEEP.

Demand for light, handy weight ewes and wethers, when fat, is good at all times of the year. Heavy sheep sell to best advantage during December, January and February, as at this time there is a big demand for English chops and heavy cuts of meat. Fat, handy weight yearling wethers sell at all times to good advantage and are given preference over heavy yearlings. This year the range between wooled and shorn sheep, irrespective of weights, has been less than usual. At this time of the year the preference is given to lambs weighing from 75 to 80 lbs. From June until about the first of December the heavier lamb is preferred. The same conditions as regards shorn sheep would apply to lambs. We would suggest to the feeder that in the fall of the year, when he puts his sheep or lambs on feed, that in buying old sheep he secure wethers weighing from 90 to 100 lbs. When finished they would weigh anywhere from 120 to 130 lbs or pos-

sibly a little more or less, depending upon how they are fed. In purchasing yearlings we advise getting as light weights as possible and be careful to select good thrifty lots. Where possible purchase them weighing around 65 to 70 lbs or even lighter, where they are perfectly sound. The lambs when purchased should be strong and thrifty and weigh from 50 to 60 lbs. We advise against buying native lambs as there is liability of them being diseased. The western lamb is the hardier and the best feeder.

Top Prices for Beef Steers.

Monthly top prices for beef steers at Chicago for seven years, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

*Obtained by Clay, Robinson & Co.

†Record price on open market by 20c per cwt, obtained by Clay, Robinson & Co. for a load of 1,518-lb Iowa-fed grade Hereford branded Wyomings.

SOUTHERN CATTLE for SPRING DELIVERY

We have for sale 4,000 head of Panhandle two-year-old steers and 1,200 head of two-year-old spayed heifers of the well-known "L F D" brand.

Also 5,000 head of good quality three, four and five-year-old Southern Texas and New Mexico steers, April and May delivery. All grade Herefords with the exception of 1,200 head of Angus. Suitable for Kansas and Oklahoma pastures.

Also 15,000 New Mexico and Arizona yearlings and 7,500 two-year-old steers for May delivery.

Also 2,000 New Mexico cows from three to six years old, in calf, and 700 head of two-year-old heifers. All high-grade Herefords.

1,050 head of mixed Colorado and New Mexico coming two and three-year-old steers, about 75% Whitefaces, all dehorned. Have been wintered and will be kept on hay until April 1st. Can be delivered any time up to May 1st. These steers are good boned, with excellent outcome.

Besides the above, we have 1,600 head of native dehorned steers, two to four year olds, for March 15th delivery. Also several mixed herds of choice narive cattle for immediate delivery.

Parties wishing anything in this line will do well to correspond with, or call on,

Clay, Robinson & Co.

Stock Yards, - Denver, Colo.

Starting Right in Cattle.

A cattle transaction of more than ordinary interest was closed recently when J. A. Grimm of Perkins county, South Dakota, purchased 21 head of pure-bred Shorthorns in the eastern part of the state. He will use this herd on his ranch and anticipates much better returns than from common cattle. The west river country is pre-eminently adapted to the production of cattle and it augurs well for its future when such cattle as these are taken there. There should be a large and insistent demand among the homesteaders there for pure-bred bulls, and Mr. Grimm is to be congratulated on his enterprise and foresight.

The above paragraph, from a recent issue of the Dakota Farmer, is sent us by Mr. Grimm, along with the following letter:

"Am a homesteader here now two years. As everyone is bemoaning the fate of the larger herds of this country will say we may never be able to replace the large herds of former years, but think what we lack in quantity will try and make up in quality. While the quality has been very good it could have been improved, for I have run across lots of VVV's in my rides and while some of those four and five year olds must have been good eating, a good low-down Scotch Shorthorn is my favorite. While I am a homesteader I think this is primarily a cattle country and believe you will always hear from Dakota beeves, and hope in the future there may be more corn feds than grassers."

Colorado Cattle Doing Fine.

Norman Ballantine of the Beggs & Ballantine Live Stock Co., with large feed lots at Sugar City and Rocky Ford, Colo., and among the most prominent and extensive raisers of cattle in the West, was at the yards having just returned from a trip to the feed lots, says the Denver Record-Stockman. He reports the cattle doing exceptionally well and Norman is feeling good over the outlook. Several carloads of steers which this firm marketed at Kansas City recently brought $7 90@8.00, sold by C. Robinson & Co., highest prices ever paid for Colo. steers there. Seven loads averaged 1,408 lbs, bringing a gross price of $109.82 per steer. These steers were fed about 100 days on pulp and grain and made a remarkable gain. Ballantine & Beggs raise good cattle and this is the kind they put in their feed lots. The result is that their cattle are good when ready to go to market and are always money makers. This firm bought the Lockhart feed yards at Sugar City and Rocky Ford some time ago and are feeding a large number of steers there during the season. Their feeding is carried on along strictly business lines, which is the only way to carry on the feeding or any other business in order to make it pay.

What I must do is all that concerns me, not what the people think. This rule, equally arduous in actual and intellectual life, may serve for the whole distinction between greatness and meanness.—Emerson.

Lip-and-Leg Disease.

The disease known as lip and leg ulceration of sheep, which has prevailed in Wyoming and other western states to such an extent as to cause the secretary of agriculture to place a federal quarantine on sheep from certain counties in Wyoming, is the subject of a publication just issued by the Department of Agriculture.

The investigations of the Bureau of Animal Industry, as well as those made by other authorities in this and other countries, show that lip-and-leg ulceration is contagious and is one of the various manifestations of a disease which has been given the general designation of necrobacillosis and which affects various species of animals. The disease in sheep as found in western states varies all the way from a mild sore mouth, which often heals without treatment, to a serious and virulent ulceration of the lips and legs and other parts of the body, which in aggravated cases is sometimes practically incurable. All the various forms of the disease, however, are due to the same germ, which is known as Bacillus necrophorus.

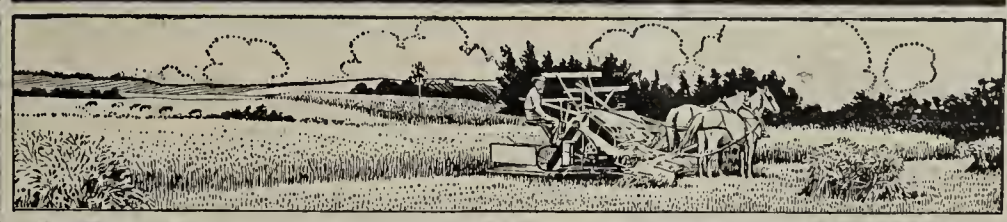
Many sheepmen have been inclined to doubt the contagious character of the affection known as sore mouth in lambs, claiming that the lesions were simply the result of injuries caused by eating frosted grass, coarse forage, etc. But even in cases of this kind Dr. John R. Mohler, chief of the Pathological Division of the Bureau of Animal Industry, has shown by his investigations that the wounds readily become infected with the germs in regions where the infection exists, and that mild cases are liable to develop into a more serious form.

The disease may not only spread among sheep and go from the mild to the virulent form, but is also easily communicable to pigs, calves, and other animals. Cases are cited where calves have become infected by being placed in a corral where sheep with lip-and-leg ulceration have been, and also where sheep have contracted the disease by being placed on a farm where necrotic stomatitis had occurred in hogs.

Benefits of the Silo.

Silage will keep young stock thrifty and growing all winter, produces fat beef more cheaply than dry feed, enables cows to produce milk and butter more economically, is more conveniently handled than dry fodder, prevents more of corn stalks in manure, furnishes a feed that the stock will relish in the cold winter months, makes palatable food of stuff that would not otherwise be eaten, enables the farmer to preserve food which matures at a rainy time of the year, when drying would be next to impossible. It is easily constructed and the expense of building will be more than returned the first year. It is the most economical method of supplying food for the stock during the hot, dry periods in summer, when the pasture is short.

Grain Cash



Your Responsibility and Opportunity

EACH farmer knows what share the rest of his family has taken in preparing for the grain harvest. Also the responsibility that rests upon him alone to choose the machines which will give the greatest amount of grain from his fields for the cash market.

Think back to last harvest time. Did you get all the profit from your acres that should have been yours? Or through delays, caused by tinkering with broken-down or inefficient machines, did you lose valuable time? Did you get all the grain—tangled or down—or did your machine leave a part of your profit in every field? Ask yourself today. Did I get the best results possible from my harvesting machine last year, and if so is it in condition to give me the same service this year? If not—every waste in net results takes that much away from family comfort, happiness and prosperity.

Choose wisely then—take time by the forelock now—and be prepared to deliver 100 per cent from your fields to the thresher.

The harvesting machines which have stood the tests of over 50 years—are the six of the celebrated I H C Line.

Champion McCormick Osborne
Deering Milwaukee Plano

These machines have demonstrated the practical verdict of over a million farmers all over the world.

They are the best that most expert workmen and machinery and high grade materials can make them. They have been improved every year in every detail of construction, whenever it has been found that any improvement could be made. These machines are built to work successfully under the varying conditions found in the harvest field. If the grain is down and tangled the reel and platform can be so adjusted that all of the grain will be cut and bound much the same as when it is standing straight.

In the manufacture of I H C machines great care is exercised both in the selection of materials and in construction. All the bearings are easily accessible so that you will have no difficulty in oiling the working parts and giving the machine the attention which it should have in order that the full measure of success may attend its work throughout the harvest season. Every precaution is taken to furnish you with a machine that you can depend upon during the busy harvest time when delays cost money.

Interchangeable parts that fit perfectly are quickly at hand, in case of emergency through your I H C Dealer. No delays when your ripe grain must be harvested.

And with any of these I H C machines you receive the most trustworthy, broadest guarantee of service, durability, simplicity, workmanship and materials.

No point in your absolute protection in every way has been overlooked.

You profit by the best experience not only of the vast majority of farmer users, but also by the experience of the most complete manufacturing organization in America.

See the I H C dealer at once. Take your choice of these machines. The quality is the same in all—the best possible.

Don't experiment with binder twine, either. Some low grade fibre may be used in the manufacture of binder twine for the harvest of 1910, and it is unnecessary to state that those who attempt to use twine made from low grade Manila fibre will have troubles of their own.

It is to the farmer's interest always to keep a weather eye on the future, and in this particular instance to secure his twine supply, whether it be Sisal or Manila, at as early a date as possible. Get one of seven perfectly dependable brands of twine and be sure. Choose Champion, McCormick, Osborne, Deering, Milwaukee, Plano or International—in Sisal, Standard, Manila and Pure Manila brands.

If it is not convenient to see an International Dealer, write for full information and the catalogues you want.

INTERNATIONAL HARVESTER COMPANY OF AMERICA

CHICAGO U S A

Condition of Wheat Lowered.

The Crop Reporting Board of the Bureau of Statistics of the United States Department of Agriculture estimates, from the reports of correspondents and agents of the Bureau, that the average condition of winter wheat April 1 was 80.8 per cent of a normal, against 82.2 April 1, 1909, 91.3 April 1, 1908, and 87 0 the average condition for the past ten years April 1. The decline in condition from Dec. 1, 1909, to April 1, 1910 was 15.0 points, compared with an average decline in the past ten years of 4.5 points. The average condition of rye April 1 was 92.3 per cent of a normal, against 87.2 April 1, 1909, 89.1 April 1, 1908, and 89.5 the average condition for the past ten years April 1.

Pleased With Sales of Hay-Feds.

S. W. Spring, Gallatin county, Mont., writes our Chicago house: "Thank you for your service in behalf of sale of two loads of cattle and also thank you for services rendered in last year's sale of two cars. I am well pleased with the manner they were handled and prices received. Also for the way you sent returns in such a short time and the itemized bill of every different class. It is a great help to me to know just what each class brought. I will certainly try to do you all the good I can in recommending your service to stockmen."

Last month we sold for Mr. Spring 21 head of 947-lb steers at $6.85 and 16 feeders of 863 lbs average at $6.40, while we landed the heifers at $6 00@7.00, averaging 755 to 830 lbs. The cattle were hay feds and $7.00 is a record price for hay-fed heifers. Mr. Spring is a breeder of registered Shorthorn cattle and registered Poland China hogs, as well as a prominent ranchman.

G. M. Collinson, Knox county, Ill.; O. Porter, Gregory county, S. D.; H. C. Lightle, Pike county, Ill.; Kent & Burke, Nance county, Neb.; S. Glasgow, Jr., Will county, Ill.; J. W. Cochran, Saline county, Mo.; Martin John, Rock Island county, Ill.; Earl Holliday, Atchison county, Mo.; P. Yenerich, Lee county, Ill.; P. H. Hall, Lincoln county, S. D.; C. Neisgeier, Fayette county, Ia.; H. P. Smith and W. E. Shetler, Henry county, Ill., were among the prominent feeders who had cattle shipments on the Chicago market April 6, same being sold by us.

Wealth Out of Soil.

Wealth comes out of the soil. Adam Smith said there are two factors in the production of wealth: Land and labor. We have the land and very much of it is practically valueless, because we have not the labor to tickle it with a hoe and make it laugh a harvest. The statement of Adam Smith is not exactly correct. There are four factors in the production of wealth. They are: Land, labor, capital, enterprise. Enterprise means the ability to plan, oversee, supervise and direct. It is initiative and wise initiative is the finest gift of God to man. Initiative is doing the right thing—the needful thing—without being told. Next to initiative is willingness to do the right thing told once.—Elbert Hubbard.

Milo as Drought Resister.

One of the chief advantages of milo is its ability to resist drought. Milo roots do not go so deeply as corn, but they fill the upper layers of the soil with their dense root growth. This habit of dense root growth makes milo dry the soil out more than corn. When the soil is thoroughly dry milo stops growing, but remains dormant. The weather can scarcely become so dry or so hot as to affect milo. It will remain green through the worst drying weather and winds that that may assail it. Our other common crops wither up, turn brown, and die under such conditions. However, when more favorable moisture and climatic conditions appear later, milo commences right where it left off and resumes its growth. It is this habit of dodging the drought that makes milo so favorable as a dry farm crop.—Alvin Keyser, Colorado Agricultural College, Fort Collins.

The law of the worthy life is fundamentally the law of strife. It is only through labor and painful effort, by grim energy and resolute courage, that we move on to better things.—Theodore Roosevelt.

WATCH, FOB & CHAIN FREE

Something Ailed It.

A colored man complained to the storekeeper that a ham which he had purchased there was not good.

"The ham is all right, Zeph," insisted the storekeeper.

"No, it ain't, Boss," insisted the negro. "Dat ham's shore bad!"

"How can that be," continued the storekeeper, "when it was cured only last week?"

The colored man scratched his head reflectively, and finally suggested:

"Well, sah, then it must have had a relapse."

Studebaker

E. M. F. "30."

The pleasure in driving an automobile depends to a large extent upon the ease of control. If the motor starts easily, if the gears can be shifted easily, automobile driving becomes a pleasure. The attention given to these points accounts in great measure for the wonderful popularity of the E. M. F. "30."

What Feed With Corn.

That corn is the greatest of all hog feeds admits of no doubt. That it may now profitably be made the entire ration is not at all certain. It is true that many men in the corn belt have made comfortable fortunes in growing hogs exclusively on corn. However, conditions have changed in recent years and the day of cheap corn has probably gone forever. As never before the stock grower is confronted with the necessity of figuring his cost of production to the last detail. It is a vastly greater problem to work out a profit in feeding 50c corn than 25c corn.

Many a man has made money in feeding cheap feed who would fail absolutely if the value of his feed increased 10c per bushel.

The reason for this is that the real cost of production is not known to him and he is constantly wasting feed, but does not know it. He is making some profit and does not see any necessity in figuring any closer. The hog grower of the present faces a condition that demands his closest attention and most intelligent application. How to produce a pound of pork at the least possible cost. That is the question. Of course corn is still the staple and cheapest hog feed, but it must be supplemented by other feeds to make the most of it. First foremost of these supplementary feeds is green forage. Many kinds of plants afford some of the desired elements, but the legumes, such as clovers, alfalfa, field peas, etc., are the great balancers for corn. Experiment has proven that alfalfa pasture with corn as an exclusive feed produced pork considerably cheaper than when 25 per cent shorts or 75 per cent skim milk was fed. Alfalfa pasture seems to be par excellence for a hog and it should be grown where possible.

Clover is nearly as good a feed for hogs at all seasons as alfalfa. While concentrates, such as shorts, tankage, oil meal, bone meal, etc., will nearly always cheapen and balance a corn or other carbonaceous ration, it should be borne in mind that far the cheapest gains are made where pasture is the main balancer. Where some of the legumes are not found to be adapted, rape will prove a profitable forage plant and each acre of good rape is worth a ton of grain for hog feed. Then there are Canada field peas, without which our northern neighbors would not attempt to grow pork.

Sown at the rate of two of peas and one of oats a splendid hog forage results. This crop is the main feed for hogs in some portions of the mountain states as well as in Canada. From our list of available forage plants some one or more may be chosen and grown that will very appreciably cut down the cost of growing pork. Scooping corn into an 8x10 yard is not all there is to modern hog growing and the sooner we appreciate the fact the better.—Dakota Farmer.

That which we acquire with most difficulty we retain the longest.—Colton.

REASONS FOR BUYING A DE LAVAL CREAM SEPARATOR

De Laval separators save enough over any gravity creaming of milk in butter-fat, quality of cream, sweet skimmilk, labor, time and trouble to pay for themselves every six months.

De Laval separators save enough over other separators in closer separation, running heavier and smoother cream, skimming cool milk, greater capacity, easier cleaning, easier running and less repairs to pay for themselves every year

Improved De Laval separators save enough over De Laval machines of five to twenty-five years ago in more absolutely thorough separation under all conditions, greater capacity, easier running and greater simplicity to pay for themselves every two years.

De Laval separators are not only superior to others, but at same time cheapest in proportion to actual capacity, and they last from five to ten times longer.

These are the reasons why the world's experienced separator users, including 98 per cent of all creamerymen, use and endorse the De Laval separators.

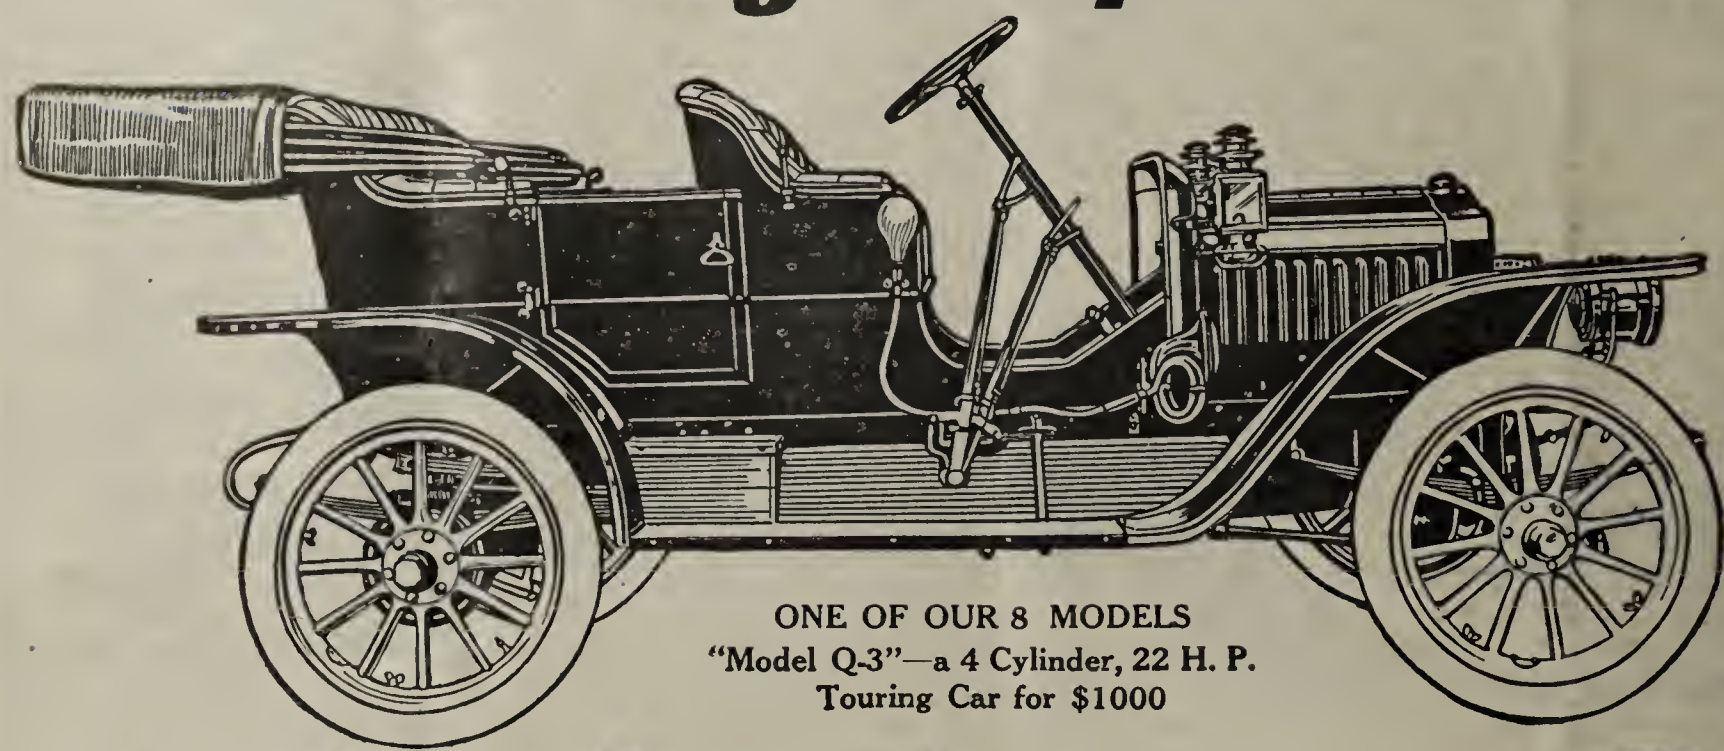
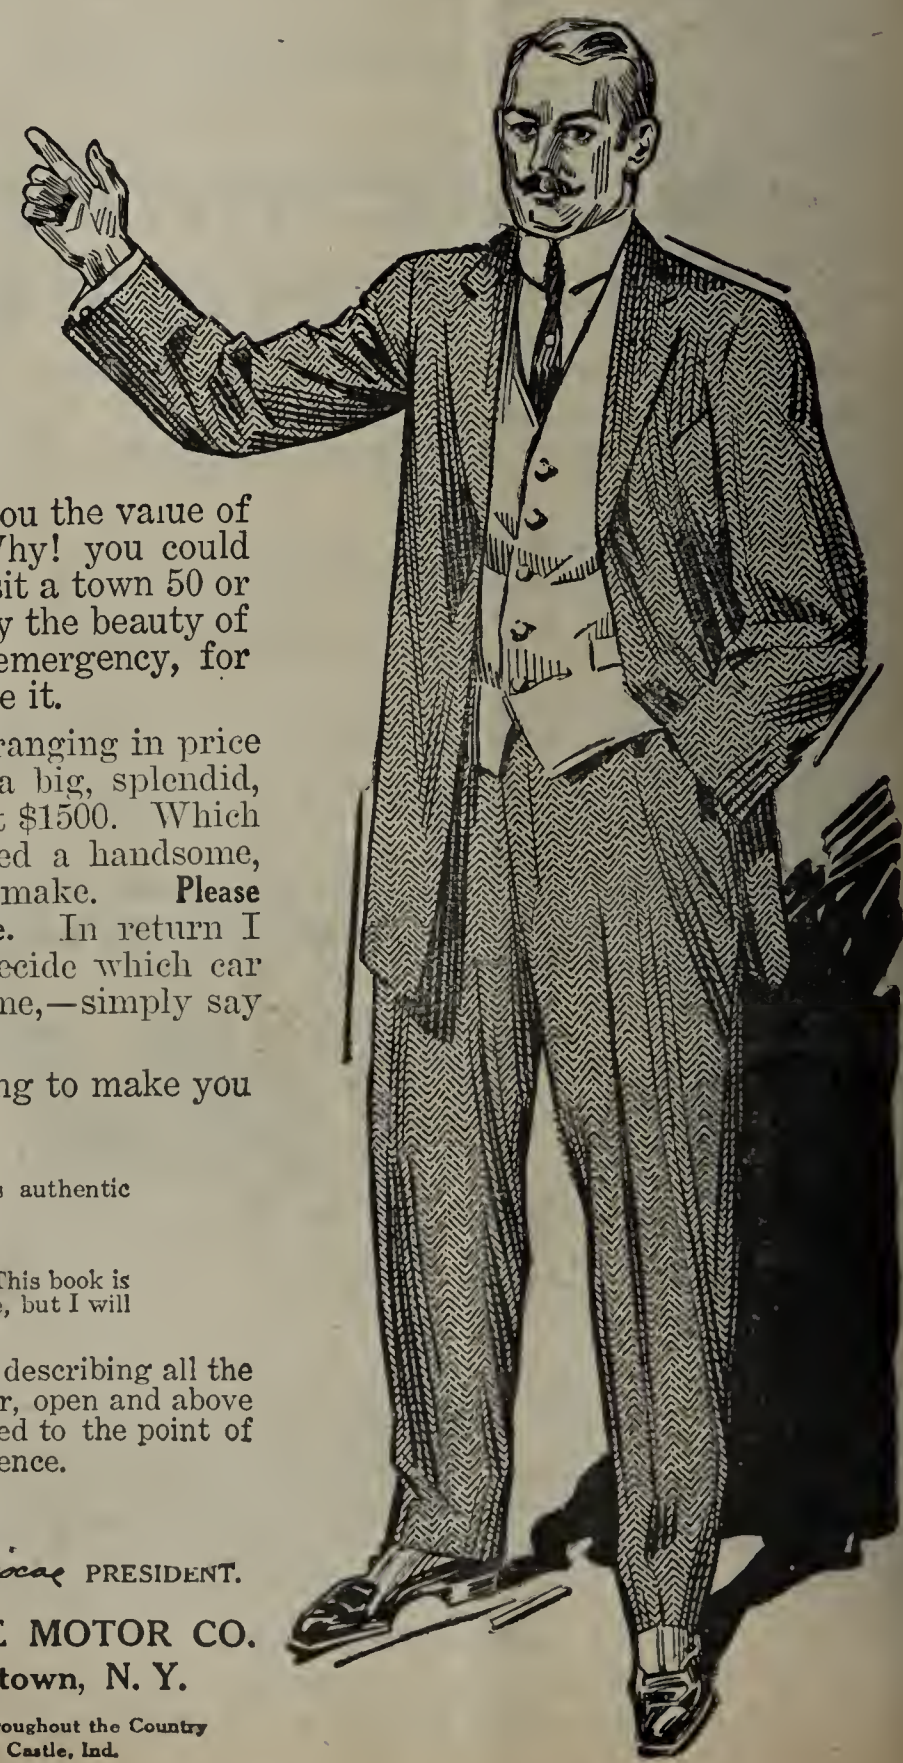
Ride in this Automobile at My Expense



ONE OF OUR 8 MODELS
"Model Q-3"—a 4 Cylinder, 22 H. P.
Touring Car for $1000

Be My Guest



I INVITE YOU and your family to take an automobile ride at my expense. There are no strings attached to this offer—no obligation to buy—it is simply my idea to get you and the Maxwell acquainted. I mean exactly what I say. I want you to ride in the Maxwell, and it shall not cost you a penny. I will give you a personal letter of introduction to the nearest Maxwell dealer and will request that he take you for a ride in a Maxwell automobile.

WHY YOU SHOULD TAKE THIS RIDE. It will prove to you the value of a Maxwell, its power, its comfort, it radius of action. Why! you could view the crops for miles around in a day, you could visit a town 50 or 100 miles away and return by night, you can see and enjoy the beauty of your country by automobile as in no other way. For emergency, for pleasure, for business, as a time saver, there is nothing like it.

WHICH MAXWELL WILL YOU TRY? We make 8 models, ranging in price from a 2-passenger, 12 horse-power runabout at $600 to a big, splendid, luxurious 4-cylinder, 30 horse-power family touring car at $1500. Which model will you try? To help you decide I have published a handsome, illustrated booklet, describing every automobile we make. **Please cut off coupon, carefully fill in your name and address and mail to me.** In return I will send this booklet without cost. When you get it, decide which car you will try, tear out the page, enclose it in a letter to me,—simply say "I want to ride in this automobile as per your offer."

THESE BOOKS FREE. When you send this coupon, I am going to make you a present of two additional books.

"THE CO-OPERATOR"

We publish a bright, newsy, handsomely illustrated magazine. It gives authentic information on automobiles. I will send it to you free of charge.

"HOW TO JUDGE AN AUTOMOBILE"

I have secured the entire edition of "How to Judge an Automobile.," This book is worth money to you if you want to be posted on this subject. It is not for sale, but I will gladly send you one—fully illustrated of course.

PLEASE UNDERSTAND when you mail the coupon you get the leaflet describing all the Maxwell models, also these two books absolutely free. This is a fair, open and above board proposition with no obligations attached. If you are interested to the point of mailing coupon I will do the rest and promise you a valuable experience.

Clay, Robinson & Company's LIVE STOCK REPORT

Vol. 20 — Chicago, Friday, April 22, 1910 — No. 16

Broader Outlet for Beef.

Evidence is not lacking of a revival of the consumptive demand for beef. Reflecting this was the absorbing of 26,241 cattle on Monday at only 10c lower prices. Eastern shipping buyers set the pace, taking upwards of 6,800 Monday, and proving price factors on the following days. Local dressed beef buyers were a close second in the race for supplies, showing that packers' coolers are not carrying heavy stocks of beef. Of course the sharp drop in the thermometer helped to stimulate the demand, but the fact remains that both local and eastern outlets have broadened materially over late weeks. The big weight beeves moved more freely than for some time, but light and medium weights are most popular with buyers. The public is still striving to get away from a high meat bill, resulting in heavy steers not commanding the preminm they should ordinarily. The sensational drop in the price range for hogs should not cause apprehension among feeders that the consumptive demand will switch sharply from beef to pork, as the former is still relatively cheaper than the latter. However, we advise marketing all cattle that are suitable, as well as those nearly so, for the shambles. Prices are remarkably high for both kinds. Besides it will not do to take any long chances.

Australian Meats in New York.

From New York comes the news of a large shipment of Australian frozen meat to that city. The consignment consisted of several thousand carcasses. In spite of being transhipped in England, the meat arrived in New York in such excellent condition and was of such good quality that the Australian agent received an order for 1,500 carcasses more. The meat delivered in that city costs the retailer an average of 2c less per pound than native meat. Five New York firms are handling Australian dressed meat regularly. One firm alone received 2,000 carcasses of mutton from there in one day recently. Now the Argentine exporters have entered the field, having secured several big orders. United States cattle and sheep feeders will watch this new phase of the meat supply with keen interest. Our cattle and sheep trade with England has been materially damaged by exports of dressed meats from the above mentioned countries. However, were it not for the abnormally high domestic prices, it is doubtful if frozen meats could be imported from those countries at a profit.

Record Lamb Price at Buffalo.

It was April 14 that our East Buffalo house smashed all price records for shorn lambs when they sold 209 head of 80 lbs average at $9.60, which figure was also 10c per cwt higher than any other shorn lambs brought that day. They were marketed by Alfred G. Miller of Bellefontaine, Ohio.

"MORGAN," CHAMPION COTSWOLD RAM AT FORT WORTH.

Owned by Alex Albright, Dundee, Texas, and shown at the recent National Feeders' and Breeders' Show held at Fort Worth, Texas.

Clay, Robinson & Company's
LIVE STOCK REPORT

Issued every Friday at Union Stock Yards, Chicago.

R. P. FALES.....Managing Editor
GUY FRIDLEY.....Associate Editor

Local and long-distance Telephone "Yards 4194."
Cable address "Kelso," Chicago.

This paper will be sent to anyone, whether a customer of Clay, Robinson & Co. or not, upon receipt of 50c to pay postage for one year.

If you receive the paper for a time without having ordered it, please understand that it is sent you with compliments of Clay, Robinson & Co., to keep you posted on the markets.

When requesting change of address always give old as well as new postoffice.

Advertising rate $2.80 per column inch, each insertion. Special low rate for live stock sale advertising. If you intend holding a public sale write for prices on quarter-page, half-page or page space.

Address all communications and make all remittances payable to THE LIVE STOCK REPORT, Union Stock Yards, Chicago.

Wool Market Touches Bottom?

Shearing of sheep in Utah, Nevada, Idaho, Oregon and Washington is pretty general. Large numbers of eastern buyers are wending their way westward. They are bearishly inclined, due to scoured wools having declined 10@12c per pound for the season. On the other hand the growers are steadfastly holding out for prices as high as last year's good range. They believe that with the decreased clip, owing to severe weather decimating so many flocks, and an unusually strong situation abroad conditions should favor the seller. Very little contracting has been done in the West thus far this year, while one year ago around 50 per cent of the clip had changed ownership. What the outcome will be is problematical. But growers should not accept bids that are very low. It is generally believed that prices in the East have touched bottom and that all material changes from now on should be for the better. At Pendleton, Ore., the season opened with a sale at 20c per pound, fully as high as last year. At Boston lately fine scoured territory sold at 65c per pound, and unscoured territory up to 26c.

Terrific Smash-up in Hog Market.

From the dizzy height attained on March 28, when top hogs sold at $11.20, swine prices descended in just three weeks $2.00 per cwt. The rapidity and extent of the decline has seldom been equaled and only once in the recollection of the oldest traders was a greater break experienced in one day than that of Monday, when last sales were negotiated on a basis of fully 75c per cwt under the prices paid at the best time the preceding market day—Saturday. The decline was due, not so much to receipts as to the lack of sale for pork products at the exorbitant prices made necessary by prices on the hoof. As forecasted in the Live Stock Report two weeks ago, this condition had become so aggravated that some recession was inevitable. Demand for pork products, both fresh and cured, was so curtailed that a great many of the small packers and slaughterers suspended operations and the big fellows were operating only to an extent necessary to supply a limited "regular" trade. It can safely be said that no one in the trade expected such terrific subtraction. So quickly did prices recede on Monday that buyers were unable to lower bids fast enough and the trade was extremely panicky and demoralized. One saving feature of the situation from the producers' standpoint is the fact that hogs made unprecedented gains during March and early April and at the market price of corn fat swine even at the reduced rates bring back a very considerable profit on the feed consumed. Possibly some further reduction in hog prices may be experienced during the next thirty rays, depending on the supply of hogs marketed and the demand. Lower rates should create an immediate improvement in the demand for meats, provided the retailer reduces his prices proportionately at once. At present cost of making fat hogs there is ample encouragement for keeping the pigs and shotes on the farm. Good judgment indicates that the hog will continue to be as profitable, if not a greater money maker, than any product of the farm.

Soaking Rain Visits Texas.

That section of Texas which had not had a good rain for three years got as much as six inches recently. Many of the ranges had been short of water for nearly a year and many cattle had died. So great was the extremity that the cattle were being rushed to Oklahoma pastures as fast as cars could move them. But since the rains the complexion of the situation has greatly changed. Thousands of cattle in only stocker flesh have gone to the Fort Worth shambles because of the aridity, but the heavy rains will cause a reduction in the receipts of this class of cattle and no doubt the movement to the Oklahoma and Kansas pastures will not be as heavy as contemplated, as Texas will now have plenty of good grass. Both the Oklahoma and Kansas pastures are reported to be in excellent condition and there should be an earlier run of southwest grass cattle than usual.

Made Big Profit in Sheep.

Last November Clay, Robinson & Co. at Chicago purchased 1,100 western wethers for H. B. Lewis of Stroh, Ind. The buying price was $4.50 and they averaged 94 lbs. One double of these wethers were marketed in the fleece at East Buffalo in the middle of March, averaging 120 lbs, Clay, Robinson & Co. selling them at $8.80, up to that time 5c per cwt higher than any sheep had ever made on that market. Early in April our Chicago house sold two doubles that were shorn and averaged 110 lbs at $8.25, summit that day by 15c per cwt. On April 19 we sold two more doubles of the shorn offerings, averaging 113 lbs, at $8.15, summit that day. Mr. Lewis stated that the first cost of these sheep was around $5,100. Besides this the cost of the feed, all of which was raised by him, and all the other charges amounted to about $3,500. The selling price, approximating the price for the double deck on the farm, Mr. Lewis places at $10,300, which, along with the estimated selling price of the wool at $1,500, brings the aggregate selling figure up to $11,800. Mr. Lewis figures that the sheep have netted him $3,200 in moneys, which does not include the value of the fertilization left on the farm. The Lewis farm is one of the most famous ones in the East and thousands of sheep have been prepared for the export trade on that place during the past forty years. Mr. Lewis himself has been in charge of the farm during the last ten years and has proven that he is a pastmaster in the art of farming and handling live stock. "I want to congratulate as well as express my sincere thanks to Clay, Robinson & Co. for the most excellent service in buying and selling these sheep," remarked Mr. Lewis. "It certainly has been a most profitable and satisfactory deal throughout."

Eastern Beef Trade Uncertain.

"I cannot recall a spring season when the eastern demand for beef was so uncertain and unsatisfactory as it has been so far this year," remarked James Brown, head cattle buyer for Armour & Co., at Chicago, to a representative of the South Omaha Journal-Stockman. "Business seems to be good down East and everybody is busy so that there is a big demand for meat everywhere, and when we can put our beef there at a reasonably stiff price there is plenty of call for it. Let the price advance a few cents, however, and the demand immediately falls off and we have our high-priced beef on our hands and must dispose of it as best we can. This accounts for the sharp fluctuations in the prices on the hoof. Eastern people know they must pay more for beef than a year ago and they are willing to do so to a certain extent. There is a limit, however, beyond which they will not go for we have tried it several times this spring. The prices of the beef on the hoof make little difference to us so long as we can find an outlet for the product, but when the price gets just so high the outlet at once closes up. Other people have their troubles, but this is one of the things the packer is up against that the public does not seem to understand."

Grass Six Weeks Earlier in Dakota.

James Burr, who looks after the South Dakota range interests of the Matador Land and Cattle Co., writes under date of April 12: "The weather since the first of March has been the best ever known in this part of the country, and grass is now better than it was last year on the first day of June, or about six weeks earlier. Cattle could not do better than they are doing at present, and everything looks favorable. The past few days have been like the month of June, and a few mosquitoes have been making themselves heard."

Sioux City Range Business Larger.

According to the report of Brand Inspector Ben Graham, receipts of range cattle at Sioux City for the 1909 season totaled 49,958 head, compared with 30,458 the previous year. Some of this increase was accredited to the extensions of the Milwaukee and Northwestern Railroads which tapped the range from which shipments heretofore have gone largely to other points. Most of the cattle came from western South Dakota. Of the total marketing 38,876 came from points within that zone and from Montana, less than one-quarter of the receipts being from the latter state. Of the remainder the Nebraska offerings totaled 10,386 head and Wyoming 1,726. The class of steers for slaughter was not of a very high order, although some good lots went at $6.00. There was a broad outlet for the feeder offerings and some heavy Montanas were taken out at a cost of $6.00 and most good heavy kinds went at $4.50@5.00.

Tommyrot---and Some Comments Thereon.

We quote the following remarkable paragraphs from an article entitled, "Does the Farmer Get His Share?," which appears in the Saturday Evening Post of April 9th, contributed by F. D. Coburn, secretary of Kansas Department of Agriculture.

"A Kansas farmer loads a car of hogs and ships them to market. When he reaches the stockyards and has his hogs unloaded into a pen he goes to the livestock exchange. He is greeted cordially by half a dozen commission merchants, all eager to transact his business. No buyer for a packing-house and no butcher greet him, or so much as signify a knowledge of his existence. The farmer selects a commission salesman who incidentally is the inevitable middleman, who will take the first profit off his product as it begins its tortuous travels to the ultimate consumer. The buyers do not buy direct from the producer but through an interpreter, the commission man. Possibly the farmer could not have secured so advantageous a price as the commission man did, but in all probability the commission man could have been eliminated to the mutual advantage of the producer, the packer and all others who have a part in taking those hogs from the packer to the laboring man who buys his meats at the market.

When the commission man is selected he goes to the office of the buyers, tells them he has a car of hogs in a certain pen and asks that they look at them. Maybe two or three or all of the buyers go to the pen, and maybe only one. Possibly the others do not want any hogs that day. So only one buyer goes with the farmer and the salesman. Reaching the pen the buyer still does not, apparently, know the farmer is in existence; he addresses all his remarks to the commission man, and the first remark after looking the stock over is that he is not particularly needing hogs then, but quotes a price he will pay, acting and speaking as if he were doing the go-between a great favor by taking the hogs off his hands. If the hogs are of a grade that some packer or butcher especially wants that day the offer may be close to or even the top price for the day, or it may be several cents under the top. The salesman haggles and begs the buyer to offer more, thus demonstrating to the farmer that he is working hard for that first profit from the sale of those hogs. But the buyer is obdurate. He has offered all he thinks the hogs are worth to his house, and as none of the other buyers bid the farmer is forced to sell for the offer, less, of course, the fee of the commission man.

The hogs are then driven to the yard scales and weighed, and a certificate of weight is given the farmer with the O. K. of the buyer. The farmer could take that scale ticket to the commission man's office and get a check for his money, but not until some further deductions are made. There are the yardage charges. These are not exorbitant, but they constitute the second bite out of each of the farmer's hogs, although the yards were used but an hour or two for unloading, feeding, watering and driving the hogs to the scales where they were weighed and turned into the pens of the packing company.

The farmer has been receiving five to eight cents a pound for his hogs. From this, before he received any money from the packing company at all, he paid, aside from what the railroad had arbitrarily chosen to take, two if not three intermediaries, one of which he paid twice. The first was the commission man, the second was the stockyards company, and the third another profit to the stockyards company for feed. Some yard companies furnish water free, and others make a separate charge for it. It is possible that the corn fed to this farmer's hogs in the yards and for which he paid double the market price was the same he had sold to a grain man a week before at forty cents per bushel. The farmer now pays eighty cents or, perhaps, a dollar.

When the farmer takes his hogs, cattle or sheep into his feed lot or barn for fattening in winter he must begin feeding heavily on grain and hay. The cereal market is firm, and often he has to buy hundreds of bushels of high priced feed to put his stock in condition for the markets. The cattle are on full feed four or five months, the hogs usually a shorter time. The owners watch the markets and figure months ahead to determine what may be the most opportune time for shipping and when prices will be best.

When fat enough the stock must be taken to market at once. Every day after the animals have reached the butcher stage it is an absolute loss to feed them, as the few pounds of flesh they then put on will not pay for the feed and care. They must be taken to market and the farmer has to divide with the commission man and the stockyards company, and submit to the assumed indifference or the browbeating of the packing-house buyer who says he does not need such stock that day, or that this particular lot are not fat enough or not of the right weight to suit his present demand, or that the house is overstocked and expecting a break in prices. These are some of a dozen schemes the buyer can use to beat down the price to the farmer, and the farmer has to submit. He cannot take his stock home. To do so would mean bankruptcy. To keep them in the yards for even a few days would wipe out all chances of profit, as often he is compelled to pay double the market rate for corn and hay, besides yardage charges.

Later this same farmer may return to town to buy some meat for his family's use. At the market the quotation is probably eighteen to thirty cents a pound for the best cuts, and when he makes a purchase it may be from some of the same animals he sold shortly before and for which he received five to eight cents per pound. Probably the farmer argued with the butcher to shave a little off the price. But the butcher said he couldn't and wouldn't, and if the farmer did not want the meat at the price quoted he could leave it."

It would be impracticable and very unprofitable for us or any other well-posted critic to take notice of the pages of slush which have appeared of late years a out the meat business. It has been a source of income to a lot of penny-a-liners, but when a man of Coburn's standing appears on the scene and makes a lot of statements that are totally misleading we cannot pass them by. And as it is a wise thing for the shoemaker to stick to his last, we confine ourselves to the portion of his article which relates to the Stock Yards. We will try to give him some insight into how the business is conducted, on which subject he appears to be practically ignorant.

The farmer seldom comes to the market when his hogs are sold. The great bulk of the hogs are sold to dealers in the country and shipped by them. The farmer is well posted on prices and this business is handled on a close margin.

The dealer does not come to market, and the "half dozen commission men waiting for his arrival" is a wonderful stretch of imagination. If they were hanging round, as Coburn so graphically pictures, their mission would be useless, for the hogs are consigned specifically at the point of shipment.

We never go to the buyer's office. They are generally in the hog alleys as soon as the seller. Don't you know, Secretary, that for the past few years the buyers have been hunting the seller?

Are you not aware that over and above the packers there are numerous eastern buyers who bid on practically every load of hogs offered?

Are you not aware that there are hog speculators who buy mixed loads of hogs, classify them and sell to the highest bidder? These men are the "eveners" of the market.

Are you not aware that the country packing-houses are persistent bidders for hogs in the country, and that the central markets have to strive to get hogs sent forward to these points?

Do you think, Mr. Secretary, it would pay a country shipper or a farmer to come to Chicago or Kansas City and save $8.00 per car commission in selling his product? Even if he was as expert as the man who is day in and day out on the market, his expenses would eat up his profit, and far more.

Let me tell you, Mr. Secretary, about the "tortuous path" of a load of hogs. A farmer who was not present when his hogs were sold sent in 60 head that averaged $35.00 per head, the car totalling $2,100.00. These were sold and the money remitted before the collection of the cash was made from the buyer—for $8 00 per car, a little over ½ of one per cent. The two bushels of corn fed to them, at $1.00 per bushel, totaled $2.00, less than one-tenth of one per cent. The yardage charge was less than one-fifth of one per cent, and the obdurate buyer, the nigger in the wood pile, per your fertile imagination, paid $10.77½ per 100 lbs for these hogs. The farmer in writing about the sale said his corn netted him considerably over $1.00 per bushel and it was worth about 45c per bushel at his elevator. Did the farmer get his share? Answer truly, Mr. Secretary.

You say that the farmer is getting from 5 to 8 cents for his hogs. Yes, they get that price, but how much more? Why not state the facts, Mr. Secretary, when you are at it? Do you read the papers? Don't you know hogs until the past week or so have been above the ten dollar mark for weeks?

Your lack of knowledge of business at the central live stock markets is simply deplorable. Your inaccuracies are beyond understanding. We could pile a mountain of examples where you have erred. You have done well for Kansas, on paper at least. We have admired your work. You have painted its glories with a free and easy brush. In your pen pictures there has been the soft glow of a Turner, the humor of Hogarth, the humanity of a Wiertz, the pathos of a Murillo, but alas and alack, your latest contribution to literature is not a pleasing picture. It resembles the sloppy work of a bill-board artist. J. C.

SWEET DUCHESS OF GLOSTER (Right)

Champion in Open Class at National Feeders' and Breeders' Show recently held at Fort Worth, Texas. Owned and shown by Carpenter & Ross, Mansfield, Ohio.

Rapid City and Bell Fourche, S. D.

[illegible] was e'er the ranchman's griefs began when [illegible] great mestings of stockmen every spring at [illegible] Another year has rolled round and we are there again. It is a bright, glorious day at Rapid City. The grass is green, the Indian pony is sleek in his coat, the brown prairie is changing its hue. Spring seems to have come a month earlier than usual. A great crowd of people, well dressed, gay in their manner, fill the streets. Occasionally you bump into an old cowman. Charlie Coffee from Chadron is there to meet old-time friends, but he seems a bit lonely. Morris Keilher is strutting about in a Prince Albert coat of the latest cut. The Holcombs are in automobiles and Pete Duhamel has lately made a second venture in matrimony. You will find him at his store, a big handsome building worthy of a greater place than Rapid. Ike Humphrey is selling implements; Ed Stenger is a banker; Mike Quinn is a capitalist, out of a job so far as we could see, and dear old Charlie Howard was too busy with his farm to attend the meeting. Tom Sweeney is the premier booster of the town. Tom is an evergreen, impressive, irrepressible, irresistible, a sort of human bomb, who explodes and spreads his magnetism all over the city and neighborhood.

Mr. Dawson presided, but outside the secretary of the association they could not get a cowman to go on the platform. We hear a lot about forest reserves and dry farming and so far as we could make out cattle raising was a forgotten art, an industry with a Rip Van Winkle past. Yet, withal, the Western Dakota Stock Growers' Association is strong, virile and full of useful work. But it has dropped down from a semi-political organization to a basis of strict work in the line of inspecting brands. Some times they follow up a cattle or horse thief. As a matter of fact they have gradually adopted the wise course followed by Wyoming stock growers and are now sticking close to their legitimate work. Consequently there is good team work and fine results.

You go up to Belle Fourche. There is no organization there. It has disappeared; in fact, it was always weak. The weather has changed and the day we spent there gave us an old-time spring blizzard—rain, sleet and snow. A grand wetting for the dry prairie, but rather a damper on city sports and cowboy pranks.

The changes are coming more swiftly than ever in this western country. The settlers are flocking more and more to the unoccupied lands of the West. The movement is at fever heat and there is one long procession of immigrants. Twenty-five years ago we saw it in Western Kansas. Will history repeat itself? That is the question the old-timer is asking. Will the plow rust out and the cow and the steer come again as they have done in the above state?

Losses have been above normal in all classes of stock in the neighborhood of the above towns. Sheep have suffered in some cases severely and it looks as if the losses will run from 15 to 25 per cent. Cattle have not been rounded up yet, but indications point to a considerable loss in this class of stock. The good weather since the first of March has been a Godsend to the ranchman. If we had had a stormy month immense damage would have been done to our western live stock.

J. C.

Old Officers Were Elected.

At the closing session of the eighteenth annual meeting of the South Dakota Stock Growers' Association at Rapid City, S. D., the old officers were elected for another year and the following selected as an executive committee:

James T. Craig, Belle Fourche; Al Taddikin, Belle Fourche; Al Field, Charles Hardy, S. G. Sheffield, Sturgis; W. Borst, Pierre; Charles Ham, Piedmont; I. M. Humphrey, Rapid City; Ed Stenger, Hermosa; W. H. Reed, Wasta; Fred H. Sears, Belle Fourche; J. H. Quigley, C. B. West, Oelrichs; H. A. Dawson, Pine Ridge; F. M. Stewart, Buffalo Gap; G. E. Lemmon, Lemmon; W. D. Driskill, Spearfish; J. R. Burr, B. C. Wassmar.

Colorado Lamb Feeders Fortunate.

Trade in sheep and lambs continues of the see-saw kind. Sellers are able to force prices to a higher level under very light supplies. Buyers very quickly lower rates under receipts a few thousand above actual trade requirements. Packers are experiencing as much difficulty in finding outlet for the dressed meats as ever, the high cost of the same reducing the demand to a very small volume. Then also a drop of around $2.00 in hog prices from the recent high level of the year, as against a loss of only 25@50c for ovine stock, is a bearish factor. Were it not for the abnormally small runs prevailing rates would fast melt away. It's an ill wind that blows nobody good. Colorado feeders are very fortunate. They have the great bulk of offerings suitable for market. A drought reduced the supply of fat stock in the Southwest to very light numbers and the protracted and severely cold winter gave the spring lamb crop a big set-back throughout Missouri, Illinois, Indiana, Ohio and other states that should be sending goodly numbers of spring lambs to market by this time.

HEREFORD BULL "GOOD ENOUGH."

Exhibited at the recent Feeders' and Breeders' Show, Fort Worth Texas, by Lee Bros., San Angelo, Texas.

Buyers Waiting for Grassers.

In most parts of the country the pastures are in excellent shape and are from four to six weeks ahead of last year. The run of grass cattle may be expected that much earlier than then. Buyers are anxiously waiting for a chance to knock the props out from under the cow and heifer market. Prices are at a record level. When grass stuff moves in sufficient volume some deep gashes will be made in the price range. Keep all fat lots coming to market and ship low-grade cows closely.

Sacrifice of Veal Calves.

Iowa, Illinois, Indiana, Wisconsin and Michigan are keeping the market hoppers well filled with calves. It is only natural that prices should sink under the weight of the big receipts. As compared with the high time, when Clay, Robinson & Co. sold vealers at the record price of $10.50, prevailing rates show upwards of $2.00 loss, although they stand around 75c above the recent low spot. Every spring the market is thrown into semi-demoralized condition by eagerness of dairymen to dispose of their "bawlers" to save milk. Another bad feature is the sacrificing of underweights that at prevailing prices could profitably be held back until they attain desirable weight and condition.

A Bigger Paper.

In pursuance of our policy of giving our readers biggest possible value for the nominal subscription price charged for the LIVE STOCK REPORT, we are this week again adding four extra pages. We shall hereafter run sixteen pages, instead of twelve, a large part, if not all, of the time. This will enable us to print more pictures, more articles of a general nature, and make the paper more useful and interesting all around. If your name is not on the regular subscription list, insuring receipt of every issue, 50c to cover postage will place it there for one year.

Money in Feeding Hogs.

All now know that there is a big shortage of hogs the country over. Many months ago Clay, Robinson & Co. predicted this for two reasons: First, few farmers have the nerve to feed 60c corn, and again the high price of pork tempted many to dispose of brood sows and other hogs that it would ordinarily have paid them to have kept. That there is money in feeding even 60c corn is shown by the following from D. C. Center of Iowa:

"Does it pay to feed 60c corn to hogs? Here is a report of the cost of raising 26 pigs which I marketed last fall:

Keeping four sows one year	$ 60.00
Cost of keeping the 26 pigs the first 3 months as follows: 500 lbs shorts, $7.50; 200 lbs tankage, $4; 20 bushels corn, $12 10 bushels oats, $4; total	27.50
Fourth month, 12 bushels corn, $7.20; 7 bushels oats, $2.80; total	10.00
Fifth month, 17 bushels corn, $10.20; 7 bushels oats, $2.80; total	13.00
Sixth month, 30 bushels corn, $18; 20 bushels oats, $8; total	26.00
Seventh month, 60 bushels corn, $36; 10 bushels oats, $4; total	40.00
Eighth month, 100 bushels corn, $60; 10 bushels oats, $4; total	64.00
Three-fourths of an acre of rape sowed in sweet corn the last plowing	5.00
Salt, 50c; wood ashes, 50c; copperas, 25c; lime, 25c; kerosene emulsion, 25c; salts 25c; total	2 00
Total cost of the 26 pigs average 8 months	$247.50

"Average weight of the 26 pigs, 8 months old, 236 2-5 lbs at $7.50 per cwt equals $460.95, leaving a profit on corn and oats of $213.45.

"You can figure out the price of the corn and oats and answer the question, Which?

"The four brood sows are worth $15 each more than they were a year ago, or the $60 charged them with.

"These pigs had the run of a blue grass pasture and running water, fed twice a day, and always came to their feed hungry. I have charged nothing for the work, neither have I credited anything for the fertilizer I received.

"The farmer's bank, which is his farm, has no run on it."

Farm Wealth is Phenomenal.

Phenomenal has been the increase in the last twenty years in the value of wealth produced on farms of the United States. Figures carefully prepared by the statisticians of the Department of Agriculture show this increase to have been $6,300,000,090 in the period from 1889 to the close of last year.

The revised estimates of the value of wealth produced on farms of the United States (on the census plan), annually since 1900, and the census statements for the years 1899, 1889, and 1879 are as follows:

YEAR.	VALUE.	YEAR.	VALUE.
1909.*	$8,760,000,000	1902 (interpolated)	$5,617,000,000
1908	7,891,000,000	1901 (interpolated)	5,317,000,000
1907	7,488,000,000	1900 (interpolated)	5,017,000,000
1906	6,755,000,000	1899 (census)	4,717,000,000
1905	6,309,000,000	1889 (census)	2,460,000,000
1904	6,159,000,000	1879 (census)	2,213,000,000
1903	5,917,000,000		

*Preliminary.

CHICAGO MARKET REVIEW, AND OUTSIDE MARKETS BY WIRE

Current Comment and Chicago Quotations to Wednesday Noon.

Receipts and Shipments.

Following shows official receipts and shipments of cattle, hogs and sheep at Chicago for the past week:

RECEIPTS.

	Cattle.	Hogs.	Sheep.
Wednesday, April 13.....	14,126	20,567	15,645
Thursday, April 14..	5,310	11,408	7,136

NATIVE BEEF STEERS.

Range of prices and bulk of sales of native beef steers this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Range.		Bulk.	
This week.....	$5.75	*8.50	$6.90@	8.10
Previous week.....	5.65	8.65	6.60	8.10
Year ago.....	4.80	6.95	5.60	6.60
Two years ago.....	4.40	7.25	6.00	7.00

*Obtained by Clay, Robinson & Co.

Thnrsday run 5,310. Steady trade in heavy beeves and 10@15c higher for other kinds. Top $8.40, paid for 36 head of 1,430 lbs average. Friday supply 1,184. All price changes tended upward. Sales included a load of 1,404 lbs average at $8.35. As compared with close last week light and medium weights sold steady, while high-costing kinds and heavy beeves still indicated 10@15c loss.

On initial market day this week 26,241 cattle arrived. The run was above all expectations. However, the market proved quite a surprise as there was fairly good life to the trade and prices in main were only 10c lower. Shippers and local dressed beef men gave the market good support, although exporters were doing practically nothing. Top was $8.50, obtained by us for 58 head of 1,583-lb pulp-fed beeves from Colorado, being a record price for such offerings. Most transactions were at $6 90@8.00. Tuesday run 3,422. There was a continuation of the firm nndertone to the market. Part of a load, averaging 1,289 lbs, went at $8.00, being best offered. Run Wednesday 17,000. Market slow at prices generally 10@15c lower. Top $8.50, paid for 34 of around 1,540 lbs average.

Revised qnotations for all grades of native beef steers:

Extra choice to prime steers.....	$8 00 @	8 50

BUTCHER STOCK.

Bulk sales of beef cows and heifers, canners and cutters, and bnlls this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Bulk cows and heifers.		Bulk canners and cutters		Bulk bulls.	
This week.....	$4.85@	6.50	$3.10@	4.10	$5.00@	6.00
Previous week.....	4.75	6.35	3.00	4.00	4.90	5.85
Year ago.....	4.25	5.25	2.35	3.25	3.90	4.60
Two years ago	4.00	6.00	2.10	3.10	3.85	5.00

There was strong demand for desirable cows and heifers Thursday, these clearing in qnick time at strong prices. Common and medium kinds were slow bnt about steady sale. Stronger market for bnlls. Firm trade in calves. Strong to 10c higher prices for cows and heifers Friday and generally 15@25c above previous week's finish for all desirable offerings. A few fancy heifers tonched $8 00 during the week and prime cows reached $7.25. Firm market for bulls and 25@35c higher for week. Trade in calves mostly 50c higher than last Tuesday and generally steady with close last week.

Active and steady trade in cows and heifers Monday of this week. Demand cleared rather liberal offerings in good season. Bulls steady to 10c lower, weighty kinds showing most loss. Generally steady trade in calves. Buyers took cows and heifers on Tuesday in quick order at steady rates. Outsiders furnished good competition. A 10@25c higher trade in bulls. Selected bolognas reached $5.65 and bulk fair to good kinds bronght $5.25@5.50, highest on record. Trading in calves showed 25@35c advance over corresponding day last week. Prime assorted vealers reached $8.25. Selling of cows and heifers Wednesday mostly 10c lower. Bulls declined 10@15c Calves made a firm range.

Revised qnotations for all grades of bntcher stock and calves:

Extra choice to prime yearling heifers.....	$7 00 @	7 75
Choice to prime export heifers.....	6 75	7 50

Two years ago.....	5.95	4.75	5.50	4.35	4.85

No material change in the market Thursday. Supply was light and demand good. Trade Friday was active to the extent of supplies at prices 10@15c higher than close of previous week.

At start this week a moderate run was included in the liberal general receipts, which, along with a good demand from both local and outside sources, brought about an active trade at prices steady to strong. There was no material change in prices Tuesday. Fresh supplies very small and sales quickly consummated. Quality was lacking in most arrivals Steady prices were obtained Wednesday, with outlet quite broad.

Revised qnotations for stocker and feeding cattle:

Good to choice feeders.....	$5 85 @	6 40
Poor to medium feeders.....	5 25	5 75
Good to choice stockers.....	5 20	5 50
Plain to medium stockers.....	4 75	5 10
Inferior to common stockers.....	3 75	4 40

Common to medinm stock heifers.....	4 00	4 35
Plain to good thin yonng cows.....	4 00	4 75

MILKERS AND SPRINGERS.

Revised qnotations for milkers and springers:

Choice to prime.....	$60 00 @	70 00
Medium to good.....	45 00	55 00
Common to plain.....	35 00	40 00

Record Price For Cattle

Never in the annals of any market was $8.50 paid for pulp-fed cattle until April 18, when

Clay, Robinson & Co.

obtained this price, which was also top of the trade with 26,441 head on sale, for 52 head of 1,583 lbs average from the Great Western Sugar Co.'s feed lots at Loveland, Colo. The cattle were grade Herefords, branded westerns and three year olds. They were bought by Sturtevant & Haley for shipment to Boston.

Hogs.

Bulk sales of hogs of respective weights this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Bulk 200 to 250 lbs.		Bulk 260 lbs and heavier.		Bulk 135 to 195 lbs.	
This week.....	$9.00@	9.35	$9.00@	9.40	$ 8.95@	9.35
Previous week.	9.95	10.45	9.95	10.40	9.90	10.50
Year ago.....	7.00	7.40	7.05	7.45	6.90	7.25
Two years ago.	5.35	6.00	5.30	5.95	5.25	5.95

Receipts Thursday 11,408. A lot of business was put over at fully 15c decline, although there was a good time later on when rates were not over 10c down from the previous day's general trading. Top $10.10 and bulk $9.90 @10.00. Marketing Friday 9,548. Opening 5c higher, with scratch sales showing more advance, trade closed with the appreciation all wiped out. Selected light reached $10.15, with best heavy at $10.07½. Bulk sales at $9.95 @10.05. Market was slow as ditch water. Marketing Saturday 7,009. It was a slumpy week end trade. Early a few sales were negotiated at 10c loss, but soon afterwards prices fell 15@25c, closing on the bottom and at the low point of the week. Top $10 and bulk sales at $9.75@9.85. As compared with close of previous week the market was generally 25c lower, with the summit $1 60 under high time of the year.

On initial market day this week receipts were 38,781. Opening 20@30c lower, market got worse as day advanced, and late selling was 40@50c lower. Limit late was $9.30, against $9.65 at start. Most early trading at $9.40@9 50 and late around $9.30. The break was second greatest for one day on record, most recession being in 1893, when the John Cudahy failure occured. Tuesday supply 13,941, with 12,000 left over from previous night. Market continued nervous, erratic and in a semi-demoralized state. First sales were 10@15c under previous day's extreme close, then became 25c off and afterwards were back to opening transactions. However, at the extreme close buyers refused hogs on this basis. Top $9.15 and sales largely at $8.90@9.00. Receipts Wednesday 17,000. Opening 10@20c higher, market closed with most of the advance lost. Top $9.25, we obtaining this price, and sales in main at $9.00@9.15.

Revised quotations for all grades of hogs:

*Obtained by Clay, Robinson & Co.

Run Thursday 7,136. It was generally a 10@15c higher deal for sheep and yearlings, with instances showing even more advance. Top sheep made $8.25, this price being obtained by us for shorn western wethers. Bulk arrivals were of this kind from Ohio and went at $8.00@8.25. Bulk lambs went 10c higher. Wooled Colorados made $10.00@10.20 and shorn lambs sold largely at $9.25@ $9.60, the latter price being obtained by us for westerns from Wisconsin. Two odd lots of spring lambs sold at $12.50@15.00, those at the latter price averaging 48 lbs and being of a fancy class. Receipts Friday 9,796. Strong market for sheep and yearlings with the previous day and generally 10@15c higher than corresponding day of previous week. Top sheep $8.15, obtained by us for shorn western wethers. Firm market for lambs and 10@15c higher than previous week's finish. Wooled Colorado lambs mostly at $10.00@10 15. Shorn offerings largely at $9.25 @9.65, latter price being the limit and obtained by us for several different lots.

Receipts on initial market day this week 13.802. Opening 10c higher for both sheep and lambs, market closed with advance wiped out. Most shorn sheep went at $7.75@ 8.35 for ewes and wethers, latter price being summit and obtained by us for western wethers. Wooled Colorado lambs brought $10.10@10.20, we securing latter price. Shorn lambs in heavy proportion and sold largely at $9.00@ 9.65, with other sales ranging at $9.70@9.80. Run Tuesday 15,815. At the start prices were 10c lower, but 15@ 25c declines were soon in force, market closing weak at bottom prices. We sold shorn western yearlings and wethers mixed at $8.50, which was the limit for yearlings. Shorn wethers again comprised a liberal proportion of total receipts and went largely at $8.00@8.15, latter being limit for aged stock and obtained by us. Wooled Colorados at $10.10, we landing offerings at the figure. Summit for shorn $9.75 and bulk $9.40@9.65. Wednesday run 14,000. Very dull trade, with buyers at start bidding a flat 25c lower, but most business was transacted at 10@ 15c loss. Top wooled lambs $10 and shorn $9.65, we making both sales. Best sheep offered at $8.10.

South Omaha Markets.

[Special telegram from Clay, Robinson & Co.]

South Omaha, Neb., April 19—Seven thousand cattle arrived Monday and Tuesday, against 13,000 corresponding days last week. An excellent market at prices strong to 10c higher than last week's close. Top beeves $8.00. Light and medium weights met with more ready sale. Very small volume of business in stockers and feeders, with prices steady.

Market for hogs today 25c lower. Top $9.05 and bulk $8.80@8.90.

Trade opened steady for best handy weight sheep and lambs and was slow and lower on other kinds. Close was weak. Top Mexican lambs $10.10 and best shorn at $9.20.

AMONG OUR CUSTOMERS

Charles Summers, Woodbury county, Ia.: "Thank you for your many favors."

J. W. Bauman, Polk county, Ia.: "Thank you for the cattle and hog market letters."

L. Stuart, Cedar county, Ia.: "Pastures are good, oats are up and old corn dried out well."

D. L. Halstead, Jasper county, Ind., shipped our Chicago house a load of beef steers on April 15.

M. T. Murrane, Green county, Ia.: "Thank you for your favors. I will remember you in the future."

J. P. Knifong, Linn county, Mo.: "I am getting your market letters for which accept many thanks."

E. E. Traphagen, Genesee county, Mich., writes our East Buffalo house: "Well pleased with sale of sheep."

J. B. C. Lutz, Warren county, Ill.: "Cattle and hogs in this community about all shipped out. There is plenty of corn still with farmers."

A. H. Whitney, Columbia county, Wis.: "I wish to thank you for the sale of our cattle. We were well pleased with what you received."

Newell Graves, Saguache county, Colo., writes our Kansas City house: "Received returns from deck of yearling sheep and am well pleased with same. I wish you success."

F. Lemon, Pierce county, Wis., brought in a shipment of cattle and hogs for the Chicago market April 15, selling the same through our house.

L. Whitney, Martin county, Minn.: "Fat cattle and hogs are pretty nearly all cleaned up around here and stock cattle are very scarce."

P. Smith & Son, Charlton county, Mo.: "We are very grateful to you for the market information you have furnished us from time to time."

R. Whisler & Sons, Farragut, Ia., had a load of 277-lb hogs on the South St. Joseph market April 16 with which our house topped the trade at $9 80.

Ed. Cole, Allen county, Ohio: "Cattle and hogs are very scarce and the crop of pigs will be below the average. I will always speak a good word for you."

A. P. Sullivan, Baker county, Ore.: "Our stock wintered fine and we have fine grass. We will have plenty fat cows and steers by the middle of June."

Childs Bros., Paulding county, Ohio, were represented on the East Buffalo market April 13 with 140 shorn lambs of 78 lbs average which our house landed at top price of $9.35.

T. A Cady, Jackson county, Mich, writes our East Buffalo house: "I think you did well with my yearling sheep, although the market had taken a big slump. Thank you very much."

Our Sioux City house topped the hog market April 13 by 5c per cwt with 65 head, averaging 299 lbs. at $9.80 for J. Weaver, Woodbury county, Ia., next highest sale being $9.75.

J. Rowes, Dubuque county, Ia.; H. Zumbali, Ogle county, Ill.; D. E Herriott, Guthrie county, Ia.; W. F. Widick, Webster county, Ia, each had a shipment of hogs to our Chicago house on April 15.

T. L Lindley, Barber county, Kan.: "Enclosed find 50c to pay for REPORT for another year. It contains some very useful articles and I think very often one number is worth more than the subscription price."

A. Frye, Washtenaw county, Mich, writes our East Buffalo house: "I am sorry the market has changed, but as far as your handling my lambs is concerned I am well pleased. Thank you very much."

The 537 head of 72-lb lambs which brought the extreme top price of $9.75 at East St. Louis on April 14 were fed and marketed by Payne & Roembach, Sedgwick county, Kan., and sold by our house.

O. A. Castle, Lapeer county, Mich., writes our East Buffalo house: "I intend shipping you a load of fat steers. You will receive more shipments later. I tell all that you are O. K. Thanks for your favors."

Morrow county, Ohio, was represented on the Chicago sheep market April 15 with 157 shorn wethers, averaging 97 lbs. They were sold by us at the top price of $8.15 and were marketed by Thomas & Noe.

A B. Johnson, Madison county, Ia.: "There are not any cattle on feed here and hogs are scarce, with stock hogs very high. Small grain all in and we are plowing for corn. Thank you for market reports."

F. F. Ide, Sangamon county, Ill.: "I feel under many obligations for the very satisfactory sales you made of my two cars of cattle I hardly expected to top the market with them. The shrink was very light."

Eaton county, Mich., was represented on the Chicago lamb market April 13 with 264 head of shorn offerings, averaging 76 lbs. We obtained the top price of $9.50 for them. They were marketed by E. B. Scott.

Limit for hogs at Chicago on April 13 was $10.15, which we obtained for 36 head of 318 lbs average, marketed by J. E. Fridley, Ogle county, Ill. This price was the top by a big margin for offerings of that heavy weight.

C. M. Jones, Jefferson county, Ind.: "I have been getting your REPORT for some time and now wish to become a regular subscriber. I have been getting a great deal of help from your paper. Enclosed find 50c for same."

Frank De Pre, Tama county, Ia.: "I do not know of anything for sale here soon and cattle are very scarce."

H. J. Cornish, Adair county, Ind., was on the Chicago market April 15 with both hogs and sheep to our house.

A. F. Kirchgatter, Worth county, Ia.: "There is no stock to be gotten around here that is suitable for shipment."

T. Donovan, Genesee county, Mich.: "Thank you for your kindness. You will have some business to do for me in the fall."

Jasper Jepson, Scott county, Ia.: "Thank you very much for your market reports, which have been of great value to me."

B. H. Goodall, Minnehaha county, S. D.: "Thank you for your market reports and when I have anything to ship will write you."

F. C. Fox, Cass county, Ill.: "Cattle and hogs are scarce in this part. Very few cattle are going on feed as they are considered too high."

F. C. Hobart, Webster county, Ia: "There are not many hogs or sheep in this territory, but quite a few cattle in poor flesh condition."

Panoramic View of the Stoc

Patrons of above market are reminded that the Fort Worth branch of Clay, Robinson & C
manager; James Stewart, cattle salesman; Wallace Jorgensen, HOG and SHEEP Salesman; Roy DeFo
nterests will be carefully looked after. Call upon, correspond with, and consign to Clay, Ro

J. M. Underwood, Pottawattamie county, Ia., marketed 38 beef steers, averaging 1,557 lbs, at Chicago on April 13 and we sold them $8.15. He is the son of the well-known and pioneer farmer and feeder, Samuel Underwood of Council Bluffs, Ia.

A. J. Trumbo represented Adams county, Ill., on the Chicago cattle market April 13 with 17 head of 1,155 lbs average which we landed at $7.50. They were grade Herefords, of good quality and fat and would have made $7.75 at the recent high time.

Stephen Osburn, Lenawee county, Mich.: "I shipped a load of lambs to your house in Buffalo and was well pleased with the way they were handled and the price they brought. I am a small feeder. Thank you for your market letters and the LIVE STOCK REPORT."

Fred Miller, Sioux county, Ia., shipped our Chicago house 16 head of 1 416-lb beef steers on April 13 and we obtained $8.15 for them. Mr. Miller, as well as his brothers, are noted for the great number and excellent flesh condition of the cattle handled by them.

D. C. Hobbs, Hamilton county, Ind.: "Very few cattle on feed in this part of the country and the fewest hogs that I ever knew of for this time of the year. Corn is plentiful and grass fine at this time of the season, but nothing in the stock line to eat it. There are not many sheep in this locality."

C. H. Middleton, Lyon county, Minn: "Stock is scarce in our section. Seeding is practically over and some grain is showing above the ground. Weather conditions have been ideal. There seems to be only a small number of brood sows here and farmers are not meeting with very good success with their pig crop."

At Chicago on April 15 we sold three different strings of shorn lambs at $9.65, which was the summit that day, as well as the highest price of the week. The sales follow: For F. P. Rudolph, Weld county, Colo., 489 of 77 lbs average; T. H. Wilson of same county, 254 head, 72 lbs; Drake & Wagner, Prowers county, Colo., 528, 76 lbs.

The Bonnie Meade Canning Co., Dodge county, Wis., an extensive canning concern, shipped our Chicago house 34 steers of 1,977 lbs average April 13 and we landed them at $6.65. The ration for these cattle included the refuse from peas, which in former years was thrown away but is now considered a valuable feed for both cattle and sheep.

J. C. Muller, Turner county, S. D, was at Chicago on April 18 with a load of cattle of his own feeding. We handled the shipment. Mr. Muller's father was a steady patron of Clay, Robinson & Co. for many years and the junior Mr. Muller said that he was also a warm friend of our firm, consigning all of his stock either to our house at Sioux City or Chicago.

H. H. Guttau, Pottawattamie Co., Ia., a prosperous farmer and stockman, was on the South Omaha market April 13 with a car of hogs, averaging 294 lbs, which our house sold at $9.90, the top. On the same day G. Perry, Butler county, Neb., had in a mixed load of cattle and hogs. The hogs in the shipment averaged 310 lbs and were also landed by our house at $9.90.

Columbus Canning Co., Columbia county, Wis.: "We have just received returns from the two loads of cattle you sold for us. These cattle were purchased by you last June and sold by you today, showing a very pleasing profit. We wish to thank you very much for the treatment we have received at your hands and to say that in the future we will depend upon the business of the Columbus Canning Co."

Ten dollars and five cents was 5c per cwt higher than any other hogs brought at Kansas City on March 15 and was obtained by our house for 66, averaging 259 lbs, shipped by W. J. & J. M. Rodgers, Mitchell county, Kan., well and favorably known Berkshire breeders. Our firm also sold that day for J. L. Williams, Smith county, Kan., 82 Duroc Jersey hogs, 235 lbs average, at $10, next high price of the day.

Charles Smith represented Butler county, Neb., on the Chicago market April 18 with three loads of cattle and hogs. Included in the offerings were 40 head of Angus steers of his own raising. "I was out in the Yards," said Mr. Smith, "and I was highly pleased with the handling of my stock." Mr. Smith is a prominent breeder of Aberdeen-Angus cattle, both the grade and the full blood, and also a breeder of Poland-China hogs.

George Jessen, sucessful feeder, Audubon county, Ia., accompanied four loads of cattle of his own feeding to Chicago on April 18, same being sold through our house. "I believe in letting well enough alone," remarked Mr. Jessen, "and as a result have been a steady patron of Clay, Robinson & Co., for the past six years." We sold for him 52 head of 1,239 lbs average at $7.75, and 17 of 958 lbs average at $7.65, being 15@25c per cwt more than he had counted upon, according to Mr. Jessen.

H. L. McKelvie, Clay county, Neb., had a shipment of cattle on the Chicago market April 13. The same was handled by us, sales being 15 steers, 1,480 lbs, $8.35, and 57 steers, 1,273 lbs, $8.10. Mr. McKelvie is relatively young in years, but has an extraordinary knowledge of choosing and feeding cattle. The cattle were just as represented by Mr. McKelvie in his letters to us for the past two months, in point of both quality and flesh condition. He has one of the finest feed lots and one of the best improved stock farms in the West.

Representative feeders and shippers of hogs who had in consignments at Chicago on April 13, and whose shipments were handled by us, included: F. W. Keel, Piatt county, Ill.; C. W. Anderson Cherokee county, Ia.; E. F. Rogers, Hardin county, Ia.; P. C. Smith and W. F. Green, Tama county, Ia.; G Gramm, McClean county, Ill.; Cahill Bros.,

Yards at Fort Worth, Texas.

splendidly equipped to give first-class service. With the following staff—Ireland Hampton, calf salesman; W. Y. Kyser, cashier; Harry Farmer, yardman, and other efficient helpers, your n & Co. at Fort Worth and you will be well treated and well pleased with our work for you.

William Woosley, Madison county, Ohio, writes our East Buffalo house: "I greatly appreciate the way you handled my sheep and price obtained for them. I certainly think you made a good deal for me, being really better than I expected. Thank you for past favors and good work."

Theodore Lucas, the well-known and successful lamb feeder, Weld county, Colo., had 997 lambs of 78 lbs average on the Chicago market April 13 and we sold them at $9.90, top of market, making the third time that we sold Mr. Lucas' lambs at the top of the market last week.

E. C. Smith, an extensive land owner in Texas and Montana, prominent feeder and president of the Texas Real Estate and Investment Co., with headquarters in Pottawattamie county, Ia.: "Was pleased with sales of cattle. Only wish that I had 100 head instead of 37 on feed this year."

Wm. Healy, Ward county, N. D.: "There is little fat stuff left in my section and bulk of stock is being used for home consumption. A great deal of seeding has been done, but there still remains much to do. We have had no reason to complain about the weather as it has been very favorable."

[illegible] County, Ia.; W. R. Pember, Rock county, Wis; [illegible] Chichester, Peoria county, Ill.; P. F. Breen, Columbia county, Wis., E. W. Wilson, Coles county, Ill.; J. W. Ward, Jr., Moultrie county, Ill.

E. P. Brewer, Macon county, Ill.: "Cattle and hogs are very scarce here."

Charles H. Hughes, Fulton county, Ill.: "There are very few hogs to come from here."

George Drewelon, Chickasaw county, Ia.: "Thank you for your market reports. They are always interesting."

J. E. McKee, Harlan county, Neb., writes our South St. Joseph house: "Thanks for good service in selling the hogs."

Ole Forsheim, represented Miner county, S. D., on the April 19 hog market at Chicago with 66 head of 248 lbs average which we sold at $9.10, limit for hogs of that weight.

Brundage & Cobb, one of the most prominent shipping firms in Illinois, marketed from Ogle county on Monday at Chicago a load of choice spayed heifers which we landed at $7.60.

The top for beef steers at South St. Joseph early this week was $8.10. Our house landed a load of 1,334 lbs average at the figure, they belonging to H. Bubb, Atchison county, Kan.

Lewis Price, LaGrange county, Ind., was the owner and we the sellers of the 202 shorn lambs of 80 lbs average which made $9.40 at East Buffalo on April 19, summit by 15c per cwt.

H. Gast, progressive farmer and feeder of Floyd county, Ia., sold cattle through our Chicago house at the very pleasing prices of $6.60 @7.15, the steers averaging 871 and 1,115 lbs respectively.

Charles D. Kinney, Antelope county, Neb.; M. Bacon, Dixon county, Neb.; H. C. Kjar, Dawson county, Neb., well-known feeders, sold cattle at very satisfactory prices through our Chicago house Monday.

J. B. Hunt, Muscatine county, Ia., prominent feeder and shipper, and who has been a regular and liberal patron of Clay, Robinson & Co. for many years, had a shipment of cattle to our Chicago house April 13.

Silas Steele, O'Brien county, Ia., was a mighty well pleased party when he learned of the sale of his cattle through our Chicago house on Monday. Mr. Steele is prominent in Iowa banking circles.

Columbus Canning Co., Columbia county, Wis, were the owners and we the sellers of the 321 shorn western lambs, averaging 83 lbs, which made the top price of $9.60 for shorn offerings at Chicago on April 14.

Among the frequent shippers and valued patrons of our Chicago house who had cattle on the market April 13 were: R. Spire, Tama county, Ia.; A. T. Jones, Clay county, Ia.; Clayton & Murnan, Denver county, Colo.

Wilcox & Littrell, the prominent and extensive feeders and stock dealers of Randolph county, Mo., and liberal patrons of Clay, Robinson & Co. at East St. Louis, had a shipment of cattle to us at Chicago on April 13.

Our South St. Joseph house topped the hog market April 18 with 66 head, averaging 202 lbs, at $9.50. They belonged to Arthur Richards, Rawlins county, Kan., who expressed himself as greatly pleased with our work for him.

Summit for sheep at Chicago on April 14 was $8 25. Our sales at this figure follow: For the Chester Farm Co., Madison county, Ill., 142 shorn wethers, 118 lbs, and for R. L. Farrar of the same county 120 shorn wethers, 134 lbs.

Among the prominent and successful Missouri cattle feeders on the Chicago market Monday were R. S. & M. S. Staples of Nodaway county for whom we sold six loads of cattle at $7.40, a very pleasing price according to the Messrs. Staples.

O. H. Martin, Clay county, Ia.: George Anpperle, O'Brien county, Ia.; Jaunti Bros. and W. F. Greimann, Hancock county, Ia., were among the successful feeders of cattle who had shipments on the Chicago market April 14, same being handled by us.

Top for butcher and heavy weight hogs at Chicago on April 14 was $10.05. We landed at this figure for the Farmers Elevator Co., Lyon county, Ia., 63 head of 250 lbs average, and for Salzman & Carper, Henry county, Ia., 69 head, averaging 261 lbs.

S. P. Fairchilds, McCook county, S. D., writes our Sioux City house: "I am certainly well pleased with the way you handled my hogs and your promptness in settlement. I trust to have a load this fall for you to handle and two new customers on your string."

Stube Bros., Brown county, Minn.; A. T. Jones, Clay county, Ia.; C. Lewison, Mower county, Minn.; Paullina Live Stock Co., O'Brien county, Ia., were included in the representative shippers who marketed cattle at Chicago and sold the same through our house this week.

Among our South St. Paul patrons April 19 was H. D. Kisor, prominent farmer and stockman of Rice county, Minn., who had a car of cattle on the market, 16 head of which averaged 1,178 lbs and brought $7.25. Mr. Kisor stated the sale was 25c per cwt above his expectations.

E. D. Eklund, Clay county, S. D., had 30 head of 1,492-lb beef steers at Chicago on April 14 which we sold at $8.15, a price that showed up well for Dakota and also indicated that Mr. Eklund knows how to feed cattle to good advantage. They were grade Herefords and good quality, but rather uneven.

M. J. Beacon, breeder of Hereford cattle, Dixon county, Neb., was on the Chicago cattle market Monday with a load of yearling steers of his own raising and feeding. We handled the shipment and he said the price was above his expectations. He has been shipping to our firm for the past eight years, or ever since he has been feeding and shipping stock.

L. V. Miller, Portage county, Ohio, who is one of the heaviest handlers of cattle and sheep in that part and also a prominent farmer, was at Chicago this week buying stock cattle through our house. He said that oats were about all sold in his part of the state, wheat looks good and pastures are in fair condition, considering the dry weather they have had all spring.

On April 18 our South St. Joseph house sold for W. Klusman, Bent county, Colo., one double deck of 69-lb lambs at $9.90, top for Colorados. Next highest sale of this class of lambs that day was that of two double decks of Mexicans, averaging 69 lbs, by our house at $9.85, from Louis Mariman of same county, being his second shipment to that market this year.

The 29 head of of 1,398-lb Angus steers which brought $8.35 at Chicago on Monday were fed by Glynn & Son, Montgomery county, Ill., and sold by us. One-half of these cattle were of their own breeding and feeding and would have readily topped the market if they had been sold separately. The above gentlemen are prominent breeders of Angus cattle and very successful feeders.

Among the prominent hog shippers and feeders on the Chicago market April 14, and whose shipments were sold by us, follow: H. J. Watson, Fulton county, Ill.; Mrs. A. S. Coon, Delaware county, Ia.; D. Wolf, Carroll county, Ill.; J. H. & H. C. Groves, Sangamon county, Ill.; Wolf & Buterbaugh, Carroll county, Ill.; G. Aupperle, O'Brien county, Ia.; Leafsredt & Erickson, Union county, S. D.; F. Belz, Butler county, Ia.; Otis Shepard, Newton county, Ind.; Paullina Live Stock Co., O'Brien county, Ind.

F. O. Childs, Spink county, S. D., prominent breeder of Hereford cattle, was on the April 18 cattle market at Chicago with a load of his own raising and feeding. He said this was his first shipment to Clay, Robinson & Co. and that he was much taken with the up-to-date-methods adopted by our firm. Mr. Childs has lived in South Dakota since 1870 and has seen land in his vicinity jump in value from $2.00@5 00 per acre up to around $80. He reports a much better call for well-bred cattle in his country, farmers giving more attention to raising cattle and less to grain farming.

William Williams, Iowa county, Ia., was on the Monday market at Chicago with a shipment of butcher stock and hogs of his own feeding. We sold the stock and Mr. Williams said that the prices were considerably above his anticipations, the cattle alone netting him better than $250. "I have been consigning to Clay, Robinson & Co. for many years," said Mr. Williams. "Only once during all that time did I ever stray away and that once was enough for me. I was induced to split a cattle shipment, sending one load to Clay, Robinson & Co. and the other to another firm. I gave the best cattle to the other firm and after my account sales were in I found that Clay, Robinson & Co. had sold the plainer cattle 50c per cwt higher than the other firm obtained for the best cut."

C. E. Latimer, Dekalb county, Ill.; H. Montgomery, Tama county, Ia.; E. Knighton, Dekalb county, Ill.; E. W. Erickson, Union county, S. D.; Adam Dieter, Dupage county, Ill.; R. T. French, Buchanan county, Ill.; Alleman Bros., Henderson county, Ill.; John B. Myers, Linn county, Ia.; J. W. Wood, Jr., Moultrie county, Ill.; C. F. Powell, Sauk county, Wis.; Fred Miller, Sioux county, Ia.; H. J. Cornish, Carter county, Ind.; R. Simpson, Cerro Gordo county, Ia.; C. H. Tripp, Rice county, Minn.; H. Larsen, Henry county, Ill.; W. F. Greene, Tama county, Ia.; E. Sulgrove, Adair county, Ia.; Lisle T. & T. Co., Dupage county, Ill; L. C. Winshell, Shelby county, Ill., all had cattle shipments at Chicago on April 13, the sales of which were negotiated by us. The above parties are prominent feeders.

We desire to make mention of the following parties who sold their hogs through our Chicago house this week, they being either prominent in feeding or shipping circles: W. L. Bergren, Union county, S. D.; Bell & Lutz, Fremont county, Ia.; N. D. Beall, Monona county, Ia.; Paullina Live Stock Co., O'Brien county, Ia.; Ben Schilling, Greene county, Ia.; P. H. Brannon, Chickasaw county, Ia.; H. Mesick, Crawford county, Ia.; M. T. DeWolf, Cottonwood county, Minn.; J. Graham, McCook county, S. D.; C. E. Holforty, Piatt county, Ill.; A. T. Jones, Clay county, Ia.; E. D. Rankin, Henderson county, Ill.; George Ballack, Racine county, Wis.; John Lacey, Cass county, Ill.

George M. Jones, Nodaway county, Mo.; F. W. Hollenbeck, Lee county, Ill.; C. D. Caldwell, Nodaway county, Mo.; J. Sindt, Ida county, Ia.; A. H. Walker, Greene county, Ia.; John Bowley, Greene county, Ia.; W. A. Wilson, Coles county, Ill.; H. Clausen, Ida county, Ia.; T. W. Underwood, Renville county, Minn.; J. Y. Gregory, Greene county, Ia.; Kennedy Bros., Ida county, Ia.; O. V. Peters, Cherokee county, Ia.; C. Klecker, Beadle county, S. D.; C. Braden, Montgomery county, Ia.; S. T. Dahl, Cottonwood county, Minn.; R. W. Hudson, Sanborn county, S. D.; J. McDowell, Clay county, Ia.; J. F. Peachin, McHenry county, Ill.; T. A. Whittet, Redwood county, Minn.; C. W. Crawford, Warren county, Ind.; J. W. Strain, Cerro Gordo county, Ia.; S. A. John, DeKalb county, Ill.; C. E. Holforty, Piatt county, Ill.; W. Merrison, Dane county, Wis., were representative feeders who favored our Chicago house with their cattle shipments this week.

Conditions and Losses of Farm Animals in United States.

Reports from correspondents and agents of the Bureau of Statistics of the United States Department of Agriculture indicate that the general condition in regard to healthfulness of farm animals on April 1 was very nearly the average. Sheep were slightly lower in condition than a year ago and than their ten-year average condition on April 1, cattle were slightly lower than a year ago, but above the average, and swine were above both a year ago and the ten-year average. The losses of cattle from disease were 21 per 1,000 head in the past year, compared with 19 the preceding year, and 21 the ten-year average; the losses from exposure were 17 per 1,000 in the past year, compared with 15 the preceding year, and 17 the ten-year average. Texas showed the greatest loss of cattle at 421,668, with Iowa and Nebraska second and third at 165,792 and 156,760 respectively. Wyoming had most loss of sheep at 1,163,244, with Montana and New Mexico second and third at 488,495 and 340,488 respectively. Greatest losses of hogs were in Iowa at 324,250 and Indiana was second at 162,414.

Bought Low; Sold High.

T. P. Chester of the extensive and successful feeding firm, Chester Farm Co., of Champaign, Ill., was on the Chicago market April 19 with two doubles of 111-lb shorn western wethers which Clay, Robinson & Co. sold at $8.15, top of the market. On April 14 we sold for the same party one double of 122-lb shorn westerns at $8.25, summit for a straight load of sheep last week. On March 4 we landed two doubles of their shorn western wethers at $7.95, pinnacle that day. They have 417 head of wethers back which they intend to sell through our house. All of these wethers, numbering 1,220 head, were bought last November on the Chicago market by Clay, Robinson & Co. at $4.40 @4.50, of which 1,000 averaged 100 lbs and the balance 94 lbs. As will be seen the wethers averaged from 111 lbs to 122 lbs after the fleece was removed, as against 94 to 100 lbs with the wool on, and the selling price was at $7.95@8.25, against the first cost of $4.40@4.50. In describing the way the sheep were handled, Mr. Chester said: "From November to December 7 they had the run of a blue grass and clover pasture and from the latter date until the middle of January were roughed through on rape and corn stalks, although given a little shock corn when the corn stalks commenced to give out. From the middle of January and on the feed ration comprised corn silage, shock corn and oat straw, but when the shock corn gave out they were fed corn silage, cut ear corn and clover hay. These sheep made an excellent gain both in the fleece and when shorn and we are certainly delighted with the buying and the selling service rendered us by Clay, Robinson & Co." The Chester Farm Co. has been a constant shipper to Clay, Robinson & Co. since 1893. This company also feeds cattle and hogs, last year being the first time that they ever handled sheep.

Death of Emory Cobb.

Emory Cobb, one of the best-known stock breeders of the country, one of the founders of the American Shorthorn Breeders' Association, and for many years president of that body, died at Kankakee, Ill., as the result of injuries received when a horse kicked him on the head, causing concussion of the brain. He was about 75 years old and leaves a widow and children. Mr. Cobb was an extensive owner of farm and city property and his stock farm was operated on a large scale.

SOUTHERN CATTLE
for
SPRING DELIVERY

We have for sale 4,000 head of Panhandle two-year-old steers and 1,200 head of two-year-old spayed heifers of the well-known "L F D" brand.

Also 5,000 head of good quality three, four and five-year-old Southern Texas and New Mexico steers, April and May delivery. All grade Herefords with the exception of 1,200 head of Angus. Suitable for Kansas and Oklahoma pastures.

Also 15,000 New Mexico and Arizona yearlings and 1,500 two-year-old steers for May delivery.

Also 2,000 New Mexico cows from three to six years old, in calf, and 700 head of two-year-old heifers. All high-grade Herefords.

1,050 head of mixed Colorado and New Mexico coming two and three-year-old steers, about 75% Whitefaces, all dehorned. Have been wintered and will be kept on hay until April 1st. Can be delivered any time up to May 1st. These steers are good boned, with excellent outcome.

Besides the above, we have 1,600 head of native dehorned steers, two to four year olds, for March 15th delivery. Also several mixed herds of choice narive cattle for immediate delivery.

Parties wishing anything in this line will do well to correspond with, or call on,

Clay, Robinson & Co.
Stock Yards, - Denver, Colo.

To Discuss Rate Charges.

The Illinois Railroad and Warehouse Commission classification meeting is called for May 4 in Chicago, when the petition of live stock shippers for additions in the Illinois commissioners' classifications will be discussed and all live stock shippers interested are invited to be present to announce their side of the case. The Chicago Live Stock Exchange will be represented by a committee of traders. The mixed carlot charges of the railroads in Illinois have long been under censure by the live stock shippers and the question will be brought to a close shortly, when the railroad and warehouse commission will give its decision. At present the railroads are applying the highest minimum charges on the maximum weights where cattle and hogs or hogs or sheep or cattle and sheep are shipped in one car. The practice of the railroads for a number of years has been to charge the highest minimum weight and highest rate. Suits have been instituted against some of the roads for sums representing the overcharge and the shippers have been successful in recovering damages.

"OUT IN COLORADO."

Residence and feed lot of Leatherman & Leasnre (E. B. Leatherman and Geo. W. Leasure), Lamar, Colo. Residence has all modern conveniences. The lambs shown (all blackfaces) were raised by the above gentlemen. They fed this season about 8,000 head, all handled by Clay, Robinson & Co.

Receipts for the Year.

Total receipts of cattle, hogs and sheep at six main western markets for the year ending April 16 and same period last year, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

Exhibition Futurity Stakes.

For a variety of reasons more or less cogent show and fair associations in the United States have in the past found it impossible to offer sufficiently large money premiums to encourage breeders in fitting, developing and exhibiting home-bred draft colts. Plenty of money has been available to attract large exhibits of stallions two years old or over, but in almost all cases the imported animals have carried off the honors and the cash. Very few fair associations also have found it possible to offer valuable premiums for the home-bred colts, imported sorts barred. As a result the home breeder of draft horses has had to be content with the crumbs which fell from the importers' table.

To remedy this condition and make it possible for the home breeder to win enough money to warrant him in developing and exhibiting the products of his American stud. The Chicago Daily Live Stock World has opened and guaranteed a series of exhibition futurity stakes for yearling draft colts, foals of this season, to be shown in the fall of next year. These stakes are for yearlings of the Percheron, Belgian, Clydesdale and Shire breeds—four in all. A small entry fee is required and The Live Stock World quarantees to add $1,000 to the four events. There are more Percherons in the United States than the other three draft breeds combined, and it is conservatively estimated that the Percheron stake will in due time be worth from $800 to $1,000 to the winners. Entries will close Aug. 1 next.

These stakes will be by far the most valuable show yard events ever arranged for yearling drafters in any country. The breeders should by all means enter their foals. The winner of these events will be by all odds the best advertised drafters of 1911, and the premiums will amply repay the expense incurred in development and exhibition. Full particulars may be obtained on application to The Chicago Daily Live Stock World, Live Stock World Building, Union Stock Yards.

H. O. Mohr represented Sac county, Ia., on the Monday cattle market at Chicago with two loads which we sold at $7.50. They were mostly of his own raising and he had fed them only about four months. Mr. Mohr expressed his entire satisfaction with the deal. He has been a steady patron of our firm for the past three years. Mr. Mohr is a well-known breeder of Shorthorn cattle.

NOTICE!

Our "complimentary" mailing list has become so large that it is no longer possible to print the enormous editions required to cover same—to say nothing of cost of postage and other expenses.

From now on we can send the paper REGULARLY only to those who enroll as paid subscribers. Non-subscribers may continue to receive occasional copies, but the only way to insure receiving every issue is to subscribe. The subscription price is fixed at only 50 cents per year, which barely covers cost of postage. Payment of this nominal sum, however, will show us that you appreciate the paper and make it worth while for us to send it to you.

As a special inducement to send in your subscription at once, we will, provided you forward same as promptly as you conveniently can after reading this notice, send you, free and post-paid, a double-section key-ring—the best and handiest thing in this line you ever saw.

This, if you have not heretofore been a paid subscriber, will entitle you to the paper for A FULL YEAR FROM NOW—no charge for the time you have already received it. This does not apply to renewals sent in by persons who are already subscribers. Such renewals of course date from the subscriber's expiration date.

THE LIVE STOCK REPORT,
Union Stock Yards, Chicago.

Enclosed find 50c to cover postage on the LIVE STOCK REPORT for one year. Send the key-ring.

Forty Cents Above His Expectation.

O. Remde, well-known farmer and feeder of Harrison county, Ia., wore a "Taft" smile on Monday of this week. It was all because Clay, Robinson & Co. sold 18 head of 1,522-lb steers for him at $8.40, which was within 10c per cwt of the extreme top of the market. When he arrived on the market at an early hour and found such a liberal supply on hand he said that he would have been glad to have been assured of getting $8.00. These cattle were grade Hereford branded westerns and were bought at Omaha in November at $5.25, averaging 1,150 lbs. They were on full feed around three and one-half months. For the first month the cattle were run on a clover pasture and then given a small ration of snapped corn with clover and timothy hay as roughness until the first of the year. Then they were put on a full feed of shelled corn and the same roughness as above mentioned. At no time were they given all the hay they wanted and given this only once a day which was at the noon hour. Mr. Remde is of the belief that where not so much hay is given to cattle they will consume more grain and put on a great deal more gain. The cattle were given 1½ tons of oil meal at the very last of the feeding period. "This is my first shipment of cattle to Clay, Robinson & Co.," said Mr. Remde, "and it will certainly not be the last. When I got ready to ship these cattle I was told by some parties that Clay, Robinson & Co. were too big a firm to ship to, but I am sure that when they hear of the nice price I received they will have to change their minds. One thing that I am positive of is that the small feeder receives as square a deal with Clay, Robinson & Co. as does the larger feeder or shipper."

Wool Market to Work Higher.

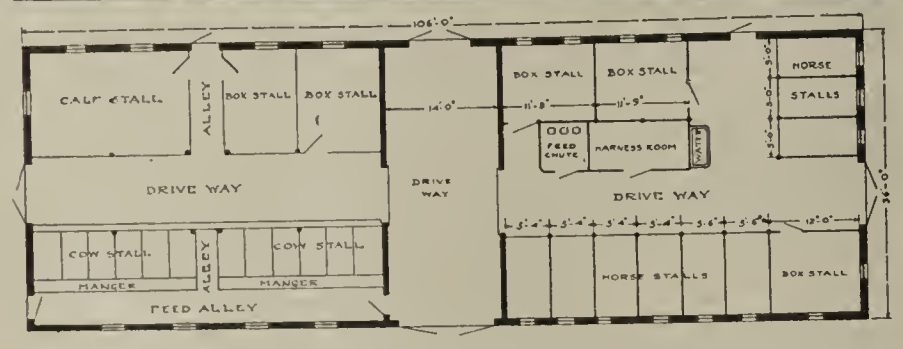
To point out the effect that the western warehouse has on the market, J. A. Delfelder, vice president of the National Wool Growers' Association, mentions the fact that two years ago wool brought only 9@13c per lb. Last year it brought 22c, while this year he expects the market to open up at 15@16c. He thinks that the market will become better as the season advances. That there will be a shortage in the supply of wool this year is also predicted by Mr. Delfelder. This will be due to the severe winter that has just been experienced. "This was one of the hardest winters that we have ever known," he said. "I am sure that about 10 per cent of the sheep in Wyoming and Montana were lost. It cost the stockmen at least 50c a head to carry the remainder of their flocks through, which means that this additional expense will have to come out in the price of wool or that the growers will be the losers."

Cattle in Excellent Condition.

In the sand hill districts of Northwestern Nebraska many cattle owners report their cattle never in better flesh nor in a more thrifty condition generally at this time of the year. The extreme weather conditions of cold, snow and extent of winter severity, commencing in November and continuing through the months of December, January and February, has never been equaled over the country west of the Missouri River. The prepared feed supply, sufficient to carry stock through this period of snow-covered range, would be the only security. This the Nebraska cattlemen reporting claimed to have.

Breeding Stock Scarce in Illinois.

H. E. Chichester of Brimfield, Ill., who has a shipment of stock on the Chicago market at least one day out of every week, and sometimes more often, was here accompanying a shipment of hogs to Clay, Robinson & Co. He has been shipping to us for the last ten years, and says that at no time within that period has the scarcity of fat cattle and hogs been as pronounced in the territory in which he buys as it is today. "Not only is stock in marketable condition virtually a minus quantity, but immature stuff and breeding stock is scarce," remarked Mr. Chichester. "I see no reason to expect a general lowering of values at this time on any class of live stock, as the arguments usually advanced at this season of the year will be counterbalanced by the known and marked scarcity of supplies. While the demand for meat at present prices is naturally curtailed to a great extent, it will, I believe, continue of sufficient volume to prevent lasting declines on the scant supplies coming." Mr. Chichester says that some corn has been planted in his section. Oats are up and the country looking "as fair as a day in June." For some reason, unknown to him, farmers are having rather poor success with the spring pig crop.



"MODEL" FARM BARN IN WISCONSIN.

Exterior and interior veiw of what is thought to be one of the finest barns this part of the country. It was built on the farm grounds of the Wisconsin Agricultural College at Madison and is considered a model barn for the farmer. Plans and specifications can be secured by addressing the above college.

R. A. Harlow, Mgr. Montana Ranch Company of Fergus county, will dehorn 1200 head of steers about May 1st, and use Shoo-Fly Horn Paint which permits dehorning with absolute safety during fly time.

Dry Feed to Grass.

One of the nice problems for the farmer each year is to get his live stock, and more particularly his cattle and sheep, from hay and grain to grass without checking them in their growth, and at the same time without decreasing the yield of his pasture or of his meadows during the coming summer.

It is a problem of no difficulty whatever to the farmer who has an old blue grass pasture on which he kept his stock last fall, and in which the young grass is starting up with the old. The farmer can turn his sheep or cattle on this kind of a pasture a month early. The dead grass will prevent the young, watery grass from scouring his cattle, and they will be ready to shed off a month sooner than they will if kept on dry feed till grass comes.

Neither is the problem difficult for the farmer who has plenty of silage. This will furnish the succulence that grass does, besides a grain ration easily digestible. This man can afford to keep his cattle off grass until it becomes somewhat hardened. He can keep his cattle off the meadows entirely and thus insure a full crop of hay during the month of June. Nor is it much of a problem for the man who has plenty of hay and grain. He can simply refuse to sacrifice the full benefit of his pasture or the full crop of his meadow; and is wise in so doing.

Comparatively few farmers, however, are in either of these favorable positions. Grain is high. Hay is about as high as we have known it to be, and the temptation will be to turn the cattle on grass as soon as it begins to show green. Possibly there is no help for it. Possibly grain or hay cannot be purchased in the neighborhood at any price. The high price of hay in the wholesale market shows that it is scarce over the entire country.

What happens, and apparently unavoidably, under these circumstances? The cattle will be turned out too soon on the meadows, and the crop of hay will be cut short half a ton or more. Or if they are put upon the pasture, they will keep it eaten down so close that it cannot make a satisfactory growth during June or July, when in the nature of things the growth, especially of blue grass pasture, will be checked with the hot suns after harvest until the September rains come.

It is not every man who can have a reserve blue grass pasture for spring use or even for winter use. The man with a large acreage can, and should wherever he can. It is not practicable for every man to have a silo, the main reason being that the silo is not profitable where the number of animals is small, and is costly where but one man in the community undertakes to construct a silo and provide himself with the machinery. This much he can do, however: He can talk over with his neighbors the condition he is in today, where losses both in the condition of his cattle and in pastures and meadows are inevitable, and can arrange with two or three of his neighbors to build silos and buy the machinery together, and thus protect themselves against like losses in the future.

Where this is not practicable, he can harvest more of his corn, shred the fodder in December and store it away. He can seed down more of his land to clover, and thus be able to keep his cattle in good condition on clover hay and shredded fodder until the grass is fit for them. All these things he can do, if he will. We have known good farmers who had no good grass pasture to keep their cattle on dry feed until clover began to bloom. It seems to us this is a little too long, and yet these men lose less in the end than the men who have barely enough hay and roughness to get their cattle through alive till grass comes.

Western farmers have gotten into the bad habit of turning their cattle onto grass too early, as the results of western conditions. When the country was largely open prairie farmers turned out their cattle as soon as things looked green. When blue grass pastures were more abundant than they are now, and when such grass as wild rye grew up in the spring along the streams, they turned their cattle out. When the prairies began to to show green their cattle roamed over the prairie and ate the dead grass and the green together. And so we have gotten into the habit, as part of our inheritance from our fathers, of doing things which the eastern farmer would not think of doing for a minute. This has forced us into the bad habit of pasturing the meadow up to the middle of May, and the result is from a half a ton to a ton less hay per acre than our lands could and should produce. This is one of the many things that farmers continue to do, we think, for the reason that they have not studied the history of the practice, and do not realize that although it was justifiable at its beginning it has been continued long after all justification is past.—Wallaces' Farmer.

"An article of merit is a joy forever," as the old woman said when she kissed the cow, after dehorning her in fly time and using Shoo-Fly Horn paint."

CATTLE FOR SALE.
One of our Colorado clients has decided to sell a string of three, four and five-year-old steers. These are nearly all natives, with perhaps 200 Southerns on them. There are 1,000 three year olds and 800 fours and fives, majority dehorned. They would make excellent cattle for Kansas grazers, and could go east over any line of railroad. Will be sold with a ten per cent cut. Address
CLAY, ROBINSON & CO., Denver, Colo.

PASTURE FOR CATTLE.
I will run for the summer or by the year any number of cattle up to five thousand.
Pasture in South Dakota, on coast line of C. M. & St. P. R. R.
Shipping station in center of pasture. Best of grass and water. Terms reasonable.
W. I. WALKER, Council Bluffs, Ia.

WANTED The undersigned wishes to buy 1,000 cows with calves at their sides, for September delivery. Correspondence is invited from cattlemen in position to supply same.
CHARLES O'DONNELL, Billings, Mont.

JUST WHAT YOU WANT
GET IT FREE

The Expansive File

Something every farmer and stockman needs for the classification and safe keeping of valuable documents, insurance policies, receipts and papers of all kinds. Substantially made. Six compartments. Size, 4½ by 10⅜ inches.

Here is Our Offer

Fill out coupon below with your name and address and send to us with $1.00 for two years' subscription to the weekly Live Stock Report, and the Expansive File will be sent you immediately free and postpaid by us. If not at present a paid subscriber here's your chance. This is a splendid opportunity for persons who have been receiving the Report complimentary for a while to enroll as regular subscribers, thus entitling them to the paper for two full years from now and giving them this valuable premium, all for $1.00.

We are sure that after you have used this Expansive File for a short time you would not be without it, to say nothing of also getting the Live Stock Report each week for two years. This file will absolutely prevent losing or mislaying your valuable papers and may save you many times its cost. Every document is properly classified and safely kept where you can put your hand on it at any time.

Present subscribers to secure this premium must send $1.00 for two years additional from present expiration date. Even though purchased by us in large quantities this is a pretty expensive premium for us to give away, in addition to furnishing, for the bare cost of postage, a paper which costs three times the subscription price to produce. We therefore wish to make it clear that the only way to secure the Expansive File is to send $1.00 for two years' subscription. Subscriptions sent in prior to publication of this offer do not count. No matter how far ahead your subscription may now be paid it will pay you to extend it two years more and secure this premium.

This announcement may not appear again, therefore send in the coupon at once.

ELLWOOD FENCE

MADE OF TOUGH SPRINGY STEEL

Savings from a Well-Fenced Farm Will Pay for Other Improvements

"'The most profitable crop walks to market or is carried in the cream can.' The raising of swine can be made one of the most profitable industries. It promises quicker and greater returns for labor and capital expended. Changing swine from one pasture to another is desirable, as they will do vastly better on fresh pasture and keep much healthier."

W. W. P. McCONNELL.

Ellwood Fence is built on simple, correct principles. The cross (or mesh) wires are firmly wound around heavy cable horizontal or line wires, forming a truss brace that effectually prevents side-slipping. It really is a WIRE BOARD, with meshes only 4 inches across throughout the first 18 inches of all styles of hog fences.

Ellwood Fences combine great strength with closeness of mesh. They hold the grown hog and the suckling pig. All styles furnished with barbed wire woven at bottom if desired. With barbed-bottom Ellwood Hog Fence you save the cost of an extra strand of barbed wire stretched under the fence, as is required with plain bottom fence

F. BAACKES, Vice-President and General Sales Agent
AMERICAN STEEL & WIRE CO.

GASOLINE PUMPING ENGINE

It costs about ONE CENT AN HOUR to pump water with this engine. If your time is worth more than a cent an hour you cannot afford to pump by hand: It will raise 32 barrels of water per hour to an elevation of 25 feet, 10 barrels to an elevation of 100 feet, or proportionate quantities to other heights.

This engine can be connected to "any old pump" in 30 minutes. After you have watched it pump water for five minutes you will wonder how you ever got along without it. The longer you have it, the better you will like it. It is right on the job all the time. A turn of the fly-wheel and it is off. A child can operate it. The ladies often start it to pump a pail of water. They rest while it works.

It is shipped complete with walking beam, supporting frame and everything ready to set it up in complete working order, except three stakes for driving in ground.

Next to a windmill, this is the most economical outfit for pumping. We are selling **many thousands of them every year,** but our sale of Aermotors is still increasing.

A PULLEY for running cream separator, churn, washing machine, ice cream freezer, grindstone or other light machinery is furnished with this engine for $1.50 extra.

If you need an engine for pumping large quantities of water for irrigating, watering large herds of stock, or for other purposes, our Heavy Back-Geared Pumping Engine for $100.00 is just the thing you have been looking for. It will raise 125 barrels of water an hour to an elevation of 50 feet, or proportionate quantities to any height.

Our $75.00 2 H. P. General Purpose Power Engine with Fluted Cooler is the best thing going.

Larger sizes at proportionately low prices.

HOW ARE YOUR HOGS?

Dangerous policy to let them get wormy and out of condition while feed costs money.

VESEY'S STAR ANTI-CHOLERA does the work and pays big to feed. No herd is safe without it. Used and recommended by large hog feeders everywhere. Try it. If you are not satisfied money will be paid back. Price $9.00 per dozen bottles; $5.00 per half dozen bottles.

ANTI-CHOLERA CO., Union Stock Yards, Chicago

CREAM SHIPPERS.

Send for sample copy of the NORTHWESTERN DAIRYMAN, the only paper of its kind published. A good advertising medium of manufacturers of Dairy supplies. Agents wanted, large commissions, sample free. Address

Northwestern Dairyman, St. Paul, Minn.

Are You Looking for a Home?

No farmer should think of buying a home before seeing a copy of THE FARM AND REAL ESTATE JOURNAL. It contains the largest list of farm lands, city property and stocks of goods of any paper published west of Chicago. It reaches 50,000 readers each issue, 85 per cent of whom are farmers. Everyone who has any property they wish to advertise will find this journal one of the best advertising mediums published. Advertising rates, 2c per word each insertion. Send 75c and we will mail you the journal for one year or for 10c in silver or stamps we will send it for two months on trial and stop it at the end of the two months unless you renew your subscription.

FARM AND REAL ESTATE JOURNAL, TRAER, IOWA.

Irrigation Pictures on Exhibit.

In the office of the Settlement Agent of the United States Reclamation Service, Room 802, Federal Building, Chicago, there are now installed a number of beautiful transparencies illustrating actual scenes on the various irrigation projects undertaken by this service throughout the West. These interesting pictures were on exhibition in Seattle during the Alaska Yukon-Pacific Exposition, and later at the Coliseum Land Show in Chicago, but are now made a permanent feature of this office. As it is impossible, from lack of space, to put all of these on display at one time they will be changed occasionally and new ones shown to the callers. Visitors are welcome to call at the office from day to day to view this exhibit, and those who desire may obtain free booklets and information regarding the opportunities for securing an irrigated farm direct from Uncle Sam by merely paying back to him on easy, long time payments without interest the actual cost of constructing the irrigation system.

Frozen Lamb Export Trade.

Consul General R. M. Bartleman of Buenos Aires reports that while the frozen lamb export trade of Argentine, Chile and Uruguay has greatly increased during the last three years, it has been in varying proportions between the three countries, as will be seen from the following table, showing number of carcasses:

	1907.	1908.	1909.	Total.
Argentina	114,964	359,388	537,135	1,011,487
Chile	24,951	76,121	201,486	302,558
Uruguay	.....	2,368	19,167	21,535
Totals	139,915	437,877	757,788	1,335,580

The development of the sheep raising industry in the Argentine territories of Tierra del Fuego, Santa Cruz and the Chubut will probably increase Argentina's exports of frozen lamb within the next few years, as plans are on foot for the erection of several new freezing establishments in those territories.

Three Good New Books.

We are in receipt of copies of the following new books on agricultural subjects: "Questions and Answers on Milk and Milk Testing" and "Questions and Answers on Butter Making," both by Professor Charles A. Publow, and also "The Study of Corn" by Professor Shoesmith. These are all useful books for farmers interested in the various branches treated of. They are published by the Orange Judd Co., New York. Price 50c each postpaid.

Persons and events may stand for a time between you and justice, but it is only a postponement.—Emerson.

100% A YEAR For Twenty Years To Cow Owners

That's the marvelously good investment that nearly 1,200,000 satisfied users are finding the

DE LAVAL CREAM SEPARATOR

With one or more cows the corresponding size of DE LAVAL separator saves its cost the first year, in more and better product and less labor, and it may be depended upon to go on doing so for twenty years, as there are already thousands of instances to prove.

There's half this much saving in the use of a DE LAVAL over inferior separators, while other separators last but from six months to five years instead of twenty years. They lose half that might be saved while they do last.

That's the whole separator story in a "nut shell" and the reason for the now nearly universal sale of DE LAVAL cream separators.

A DE LAVAL catalogue may be had for the asking. Likewise the trial of a DE LAVAL machine.

Shoo-Fly Horn Paint

Endorsed by stockmen throughout the country for preventing fly infection when dehorning in warm weather; heals rapidly. 75c per pint, sufficient for 50 head. Send for circular and testimonials. Manufactured by H. B. READ, Ogalalla, Neb.

IT TAKES MANY BRICKS FOR A BIG BUILDING

But the builder doesn't reject the individual bricks because they are small.

Neither do we slight or neglect the small shipper who sends in perhaps only a single carload a year. "Many a mickle makes a muckle," and upon that principle our business has grown, and still grows.

Jealous competitors, envious of our success, often tell small shippers that we are "too big, and too busy" for the small shipper to dare entrust his consignment—perhaps his year's investment—to.

It is a fabrication from whole cloth. It is an argument without any basis whatever. Last year just

Thirty per cent of our consignments of cattle at Chicago came in single carload lots.

That is to say, this was the daily average, for the whole year, of single cars belonging to different owners. It is the "day of small things" in the live stock commission business and as such cannot be ignored. We are organized and equipped to handled ALL shipments, big and little, and prepared to give them impartial and at once careful attention. Try us and be convinced.

TOO BUSY FOR SMALL SHIPPER?

Michael William O'Hara of Waterbury, Neb. (who is a small shipper) thought that instead of swallowing whole the misleading statements alluded to, he would give us a trial, and the result of same is shown by a letter received from him reading as follows:

> ***"I received the returns from my cattle and was well pleased with the way you sold them. Some people say that your firm has so many cattle to sell that you do not care to fool with the small shipper, but I do not think that way. The price that you got for those light weight cattle sold on Wednesday was good. I do not think any small firm can beat Clay, Robinson & Co."***

Clay, Robinson & Company's LIVE STOCK REPORT

Vol. 20 | Chicago, Friday, April 29, 1910 | No. 17

Another "Tortuous Path" a la Coburn.

Following up the LIVE STOCK REPORT'S comments in last issue, upon the remarkable article contributed to the Saturday Evening Post by Secretary Coburn of Kansas, we offer the following illustration of the rapacity of the live stock commission men and the Stock Yard Company, and incidentally of the buyers, for the secretary's careful consideration:

On Monday, April 18, we sold for the Great Western Sugar Co., Loveland, Colo., 52 steers at $8 50 per cwt and 37 head at $7.95, which grossed $11,101.40. Their net proceeds amounted to $10,667.29. The commission on the five cars was $50 00, less THAN ONE-HALF OF ONE PER CENT OF THE NET PROCEEDS. The yardage charge was $22.25, LESS THAN ONE-FOURTH OF ONE PER CENT. The feed charge at Chicago was $13.75, OR ONE EIGHTH OF ONE PER CENT. In other words, the total amount retained out of this shipment by the Stock Yard Company and the commission firm amounted to EIGHT-TENTHS OF ONE PER CENT of the amount remitted to the owners, and this amount covers the value of the hay supplied the stock.

This is but one of many instances that might be cited as showing the tortuous path which the shippers of live stock to market must follow.

Classes of Cattle to Ship.

There is a time to ship cattle and a time to hold. Now is the time to market certain classes as fast as convenient. Fat heavy beeves should be gotten out of the way. Buyers are giving the trade in them poorer support as the season advances, and this discrim'nation will be even more marked just as soon as hot weather appears. Common and medium quality steers and butcher stock that owners intend to send marketward within the next month or so should be shipped as fast as practicable. Texas grassers will be price factors at the markets within a few weeks and the run of native grassers will be earlier than usual. This is always a signal for a smashing of prices for the plainer grades of steers and most classes of she stock. These kinds of cattle are selling remarkably high now, and owners should take advantage of the good market conditions. Much delay will bring vain regret. We do not believe buyers will be able to work much harm against rates for good quality, fat handy weight and yearling cattle at any time, and these, where lacking good flesh, can well be held for longer feeding.

Dakota Heifers Bring $7.90.

South Dakota yearling heifers went at a new high price on the Chicago market April 26, considering the number and weight of the offerings. On that day Clay, Robinson & Co landed 19 head, including 6 steers, at $7.90, the lot averaging 739 lbs. The price was 15c per cwt higher than any steers made and 50c per cwt above any sale of a load of heifers. They were marketed by N. N Poulsen, the progressive stockman of Vermillion. He also had in 45 hogs of 266 lbs average which we landed at $9.65, within 5c of the extreme top for prime offerings.

Death of T. B. Tomb.

Upon Monday last at Los Angeles, Cal., where he had been residing the past few years, there passed away Mr. Thomas B. Tomb, for many years closely identified with the range cattle business in the Northwest, his business associate being Mr. R. C. Lake of Chicago. Mr. Tomb was born in Lycoming county, Pa., in 1840, but was practically brought up in Ohio, as he lived at Tiffin for a number of years. He moved to Kansas City in 1884 and made that point his headquarters during his long identification with the live stock business. Mr. Tomb was known to a host of cattlemen throughout the West and for a considerable number of years was a heavy shipper of range cattle to the market. He is survived only by Mrs. Tomb.

Judging a class of Herefords at the recent Feeders' and Breeders' Show held at Fort Worth, Texas.

Record Prices for Feeder Cattle.

The stocker and feeder market continues to stay in the lime light. A paucity of good to choice offerings and a broad demand have caused prices to reach new high levels. Both Chicago and Kansas City have sent out cattle for a quick turn in the feed lot at $7.50, and $7.40 was paid at South Omaha. Of course these steers possessed excellent quality, carried considerable flesh and were well worth the money to slaughterers. In Texas all records were smashed for so many two-year-old steers. Captain S. B. Burnett of Fort Worth sold 2,000 dehorned twos at $35 per head and 1,000 at $32.50. These cattle were of his famous Hereford breed. Out in Colorado new high prices are also being paid. From all of the central markets comes the word that orders for good quality young cattle are accumulating, with small chance of being filled.

Cable address "Kelso," Chicago.

This paper will be sent to anyone, whether a customer of Clay, Robinson & Co. or not, upon receipt of 50c to pay postage for one year.

If you receive the paper for a time without having ordered it, please understand that it is sent you with compliments of Clay, Robinson & Co., to keep you posted on the markets.

When requesting change of address always give old as well as new postoffice.

Advertising rate $2.80 per column inch, each insertion. Special low rate for live stock sale advertising. If you intend holding a public sale write for prices on quarter-page, half-page or page space.

Address all communications and make all remittances payable to THE LIVE STOCK REPORT, Union Stock Yards, Chicago.

A Trip Through the Northwest.

The writer left Chicago Sunday night April 10 on the Chicago & Northwestern "Omaha Limited" together with Mr. Clay and Messrs. Alex McNabb of Menstrie, Scotland, and W. J. Anderson of Glasgow, Scotland, directors of the Swan Land & Cattle Co., Chugwater, Wyo., who were on their way West to inspect the company's properties. We arrived in Omaha the next morning and after a good breakfast at the Omaha Club, Mr. Clay and the writer parted company with our Scottish friends, departing at 7:30 for the Black Hills country.

After attending the cattle meetings at Rapid City and Belle Fourche, S. D., (which events were described in last week's issue of the Report), we parted company, the writer heading for Miles City, Mont. While at Rapid City the secretary of the South Omaha Live Stock Exchange, Mr. A. F. Stryker, and several other members of that body very kindly invited me to join their party as they had chartered a Pullman, which I gladly accepted as our itinerary embraced the same points, and the trip was a very pleasant and congenial one. The South Omaha party was composed of the following gentlemen: A. F. Stryker, secretary; Walter E. Wood, Will H. Wood, Geo. P. Moorhead, E. W. Cahow, Allen Dudley, Jas. Burns, Jas. L. Paxton, F. E. Yost, A. C. Davenport, J. A. Shoemaker, J. M. Cook, Amos Snyder, W F. King, T. A Jackson, W. B. Cheek, A. A. Jasmer and C. L. Talbot.

We had a hard climb through a blinding snow storm to Deadwood, S. D. When that point was reached the snow was about a foot deep on the level. Taking the Burlington route from there and with the assistance of two engines we managed to reach Edgemont, Wyo., in good shape but late. We remained on the side track until the through train for Billings, Mont., came along next morning and we were taken to Clearmont, Wyo., our first stopping place. There we were met by Mr. Willis Spear and his boys with conveyances and driven to his ranch a little over two miles from town. A very gracious and cordial welcome by Mrs. Spear and several of her friends made everyone feel at home. The party were entertained with an exhibition of rough riding of bucking bronchos and wild steers by some of the ranch cowboys. This was followed by the barbecue, served from the mess wagon in a large tent a few yards from the house. There were present about sixty-five ladies and gentlemen, some of the visitors having ridden fully twenty miles to enjoy the occasion. After doing ample justice to the fine dinner we were invited to the house where nearly every member of the party present had to sing a song or tell a story. The evening's enjoyment lasted until about 10:30 when we were taken back to town, some in conveyances and some on horseback.

During the night we left for Sheridan, Wyo., arriving there in the early morning. Sheridan impressed us as a hustling, bustling place, with evidence of business activity on every side. Several of our party were royally entertained at dinner by Mr. and Mrs. John B. Kendrick and also enjoyed a drive in the afternoon through the kindness of Mr. C. R. Massie, cashier of the Bank of Commerce. We also had the pleasure of inspecting Mr. Kendrick's new residence, not yet completed, and all agreed that it was one of the best built houses they had ever seen, and a modern palace. It is situated on high ground overlooking the city of Sheridan, with a splendid view of the mountains, and an excellent outlook in all directions.

We left Sheridan that night, arriving in Billings, Mont., the following morning, which was Sunday, and everyone enjoyed immensely the stay in that city. During the day Mr. Charles O'Donnell, one of the big cattlemen of the state, took the writer and some of his friends in his auto to look over his big ranch which he recently purchased from Thomas McGirl. The valley was covered with alfalfa presenting a beautiful sight, in marked contrast to the last time the writer saw it some years ago. During the afternoon we inspected several hundred head of cattle which Mr. O'Donnell is feeding at the Billings sugar factory.

SWEEPSTAKES RAM

at recent National Feeders' and Breeders' Show, Fort Worth, Texas, shown by J. J. McKnight, Frisco, Texas.

That night we left for Miles City, arriving there Monday morning. Everything was very lively as the Eastern Montana Wool Growers' Association was scheduled to meet in the opera house at 10 o'clock and the town was full of stockmen. The meeting was well attended and several interesting speeches were made. The meeting was called to order by President O'Neill and the address of welcome was delivered by Mayor Farr to which Hon. William Lindsay fittingly responded on behalf of the wool growers. Mr. John Cosgriff of Cosgriff Bros., extensive sheepmen, gave a very interesting and instructive address. Among the prominent sheepmen in attendance was Mr. R. R. Selway of Sheridan, Wyo., and others long and prominently identified with the sheep industry of Montana.

Tuesday morning at 10 o'clock the Montana Cattle Growers' Association was called to order by President Ingersoll, who introduced Judge Sanner, the latter giving the address of welcome. The writer was highly honored by being invited by President Ingersoll to respond on behalf of the cattlemen to the address of welcome. Interesting speeches were made by Professor Linfield, of the Montana Agricultural College, Dr. Knowles, state veterinarian, Mr. J. W. Moore, president of the Chicago Live Stock Exchange, A. T. Stryker, secretary of the South Omaha Live Stock Exchange, and others. Dr. Sudduth gave a very practical and valuable talk on the growing of alfalfa, which was much appreciated by everyone.

A banker in another Montana city when I asked him whether he intended going to the meeting at Miles City replied that he did not and that the association was practically played out and accomplished very little good, or something to that effect. I told him that he ought to support such organizations as the wool growers' and cattlemen's associations as both were of a great benefit to the state as well as to the individual members, and pointed out to him that, for instance, when matters came up at Washington an individual stock grower could do nothing, whereas a committee from such organizations would carry a good deal of weight. Both meetings were very successful. Organization is a great thing and its value is exemplified in these organizations and it is to be hoped that both will continue their good work for many years to come. The "old guard" of sheep and cattle men were on hand as usual, and the railroads were especially well represented.

Miles City has made wonderful growth in the past two years. They have a splendid electric light system and both the main street and residence portion is brilliantly lighted.

Winter feeding of sheep and cattle in Montana is a successful innovation and there will be more or less of it done each season. Feeding can be done cheaper there than in the Eastern states as the weather is much better and the composition of the ground is such that feed lots do not become muddy to anything like the extent they do in the East. These points, together with the lower cost of feed, point toward the steady development of the feeding industry in Montana. Cattle fed last winter made money. Western hay-fed steers sold this spring for feeders as high as $7.30 on the open market and Montana hay-fed heifers sold up to $7.00, averaging around 750 lbs. Cattle north of the Yellowstone and in certain other parts of Montana wintered in fine shape, there being practically no losses. Sheep also wintered very well so far as the writer was able to learn.

Montana certainly has a great future and the people can hardly realize the resources of the state. One of its greatest sources of wealth is the excellent quality of the grass, with its remarkable flesh-forming properties. In this connection we recall a couple of Montana steers sold at Chicago last fall; one a yearling at 8c per pound and a four-year-old at 8¼c, fattened on grass, that were as good as they could be made with corn.

The members of the Miles City Club fairly outdid themselves in hospitality throughout the meeting and particularly in the serving of a delicious lunch, one of the features of which was "baby pig" fed for the occasion, together with other nice things. Messrs. Collins and Truscott, as well as other members present, did all in their power to give everyone a good time. Railroad and commission men look forward to the meeting next spring in something of the same spirit that children anticipate the coming of Santa Claus. Keep it up, gentlemen.

Our party left there Wednesday afternoon and upon arrival at St. Paul we were met by the secretary of the Stock Yards Company and the secretary of the Live Stock Exchange. Mr. McGivlny gave the party an elegant dinner at Carling's Restaurant. The following day we visited the Stock Yards and in the afternoon were taken out to Fort Snelling, Minnehaha Falls, and over to Minneapolis. In the evening the South St. Paul Live Stock Exchange gave us a banquet at the new St. Paul Hotel which was a grand success and a credit to them, all of which was appreciated by everyone present.

C. O. R.

The Boog-Scott Herefords.

We have recently received from Boog-Scott Bros., Coleman, Texas, a folder showing their herd of winning Herefords, comprising fourteen breeding animals. The Boog-Scott Herefords enjoy an enviable reputation all through the Southwest, while the winnings scored in the carlot classes by cattle from their herds at the International Expositions of the past few years speak eloquently of what blood and breeding will do. Both the cattle and the men behind the herd are a credit to Texas.

What of the Hog Market?

Bear forces in hog trade circles can extract but small encouragement from the attitude of producers, manifest anont the late decline in hog prices. When news of the disastrous break of Monday and Tuesday of last week reaohed the country it was evidently the signal for an immediate padlocking of hog lot gates, judging from the decided falling off in supplies at market centers since recorded. With but 20,300 hogs at Chicago the last three days of last week and less than 18,000 on Monday of this week, followed by a run of 6,714 on Tuesday and proportionately small receipts at other points, evidence accumulates that hogs in the country are in strong hands and that a panic to sell cannot be excited under existing conditions. It should be borne in mind that a short supply was marketed the first two days of this week, despite the fact that values at the olose of the week registered recovery of 35@40c from low spot last Tuesday. It is apparent the country is cognizant that a small supply of swine is held by producers. Cattle feeders will not be frightened into marketing hogs following cattle, since they cannot be replaced with younger stock, and the market price of corn is certainly not discouraging to hog feeding operations. In some localities a good many hogs have been contracted for first of May delivery at $10.00@10.50, another indication of the temper of the country as to the situation. Big packers of late exhibit marked stubbornness in paying the price. Armour followed the market with some freedom from $9.50 down to $9.00 and back to $9.50, but refused to go beyond this last price, standing pat on Monday until he got 2,000 at a price shading under $9.50 and going without hogs on Tuesday rather than exceed that cost. The talk of the packer is that at any higher figure a limited supply will prove sufficient. Pit trade acted ugly both Monday and Tuesday of this week, ruling lower, despite a higher hog market. In trade circles this condition was considered a manifestation of packers opposition to further recovery in hog rates.

Wool Market on Broader Basis.

Domestic supplies of wool are not plentiful and were manufacturers to come into the trade in larger numbers offerings would be reduced to very small proportions. The market is on a broader basis and more buyers are in the Boston trade than for some time. Those who anticipated further price depressions, for reasons of their own, would not be surprised if the market rested on a higher basis before long. Still more eastern buyers have been sent West, but as yet no deals of consequence have been recorded. The western range flockmaster is not weakening, in spite of the lack of speculative buyers. A Montana party who controls upwards of 1,000,000 lbs of wool is holding the same for 25c, and states he will not take a cent less. The wool off of Colorado-fed lambs around Chicago is moving more freely at 18@21c. At Boston recently territories went up te 26c, with Ohio and Michigan ¼ bloods at 29@31c.

Stock Growers Elect Officers.

At the annual meeting of the Montana Wool Growers Association, held at Miles City, the following officers were elected: President, F. D. O'Neill; vice president, D. A. Laney; secretary, G. W. Myers.

Election of officers at the annual meeting of the Montana Stock Growers Association resulted in C. H. Loud being made president; David Fratt, first vice president; G. W. Brewster and Ed. Birney, second vice presidents, and D. A. Raymond, secretary-treasurer.

Our Export Trade Dwindles Fast.

Since 1879 there have been 3,013,268 cattle and 329,337 sheep received at the foreign cattle market at Deptford, England, from the United States. The largest number in any year was in 1890, when over 158,000 animals arrived. Last year the trade dwindled down to 75,619 cattle and 19 sheep, the smallest number since 1888. The trade with Canada began in 1893, and in all 583,911 cattle and 296,861 sheep have been received there. Last year the arrivals were 46,604 cattle and 60 sheep, the smallest number since 1901. In one year, 1903, as many as 46,000 were sent from Canada to that market. The trade with the Argentine Republic began in 1889 and closed in 1900. During this period the arrivals consisted of 287,289 cattle and 1,463,238 sheep. In February, 1903, the trade was resumed and 19,643 cattle and 65,493 sheep arrived in the succeeding four months. In consequence of foot-and-mouth disease appearing in Argentina in June, 1903, the Board of Agriculture of Great Britain prohibited the further importation of animals from that country, and the prohibition is still in force.

Record Price for Montana Cattle.

Never before was $7.10 paid for hay-fed feeder cattle on the Chicago market until April 21, when Clay, Robinson & Co. landed 21 head of Montanas at this figure. On the same day we also sold 24 head of 1,091 lbs average at $6.75. So far as is known no other hay-fed feeders ever went above $6.50 until last week. The above cattle were mostly Shorthorns and were handled and marketed by A. A. Sandahl of Wolsey, Mont., who was well pleased with the prices we obtained for his offerings.

There has been an urgent call for hay-fed feeding cattle at all of the markets all season, but few have been available. This would suggest the possibility of feeder traffic between the short-grass country of the Northwest and the corn belt. Such cattle can be carried through the winter on a light ration and sent to market at a period just before the rise of grass in the low-altitude region, when feeders always realize the highest prices of the year. Thousands of thin range cattle are sent every fall to Chicago, South Omaha, Sioux City and South St. Paul that, if held back and fed a little hay through the winter, would well repay the trouble and expense incurred.

HEREFORD BULL "HESIOD BOY."

Shown by Scharbauer Bros., Midland, Texas, at the recent National Feeders' and Breeders' Show at Fort Worth, Texas.

Michigan-Fed Cattle at $8.25.

At East Buffalo on April 25 Clay, Robinson & Co. sold for F. A. Turner of Caro, Mich., 41 head of grade Hereford cattle at $8.25. These cattle were bought by Clay, Robinson & Co. at Chicago last October at $4.80. The total cost of the cattle laid down at Caro was $2,053.36 and the feed that the cattle ate cost $1,232.20, divided as follows: Cottonseed meal $260, corn $450, ten acres corn silage $400, ten tons of clover hay $120, two barrels of salt $2.20, making a total cost of cattle and feed $3,285.56. When sold at East Buffalo they went at a net sum of $4,073, which, adding the profit of the hogs that followed the cattle—$325—makes a total net of $4,398. Taking the total cost of $3,285.56 from this sum, it is seen that there was a net gain of $1,112.44. Mr. Turner is a past-master in the art of finishing cattle for the shambles. He expressed himself as being well pleased with the buying department of Clay, Robinson & Co. at Chicago and equally as well pleased with the selling department at East Buffalo.

Did Not Reverse Sheep Tax.

While the committee from the Northern Colorado Sheep Feeders' Association, which conferred at Fort Collins, Colorado, with the State Board of Equalization, did not succeed in having the tax on feeder sheep repealed, they did manage to have the matter referred to each individual board of equalization, which is the board of county commissioners. It is within the discretion of that board to appraise the sheep in any manner they see fit, and the probability is that they will be appraised according to the length of time they are in the possession of the feeder, which, in the great majority of cases, is about one-third of the year.

A New Bank at Worland, Wyo.

The Stock Growers' State Bank has been organized at the above point and is now ready to do business.

The officers are Hon. W. A. Richards, president; George F. Rae, vice president; George A. Agnew, cashier.

Directors are: W. A. Richards, A. H. Marble, H. B. Henderson, C. G. McDonald and Geo. F. Rae.

The officers and directors of this bank form a strong organization. The president, Hon. W. A. Richards, is not only a successful ranchman, but has occupied a commanding position in the political world. He has served as Governor of Wyoming, as Commissioner of the Land Office at Washington, and is now Tax Commissioner of Wyoming, a position which was forced upon him, as he had fully intended to retire from all political work and devote his time to his own business interests.

Mr. Geo. F. Rae, who is vice president, will be the active manager of the bank, as he has had a varied experience both in the East and West. He was for many years connected with the firm of Clay, Robinson & Co., at Denver, South Omaha, East Buffalo, Chicago and other points, and latterly he has been connected with the firm of Degan & Rae, which was quite successful.

The other directors are strong men. Mr. A. H. Marble is vice president of the Stock Growers' National Bank of Cheyenne, and president of the Wyoming Trust and Savings Bank of the same city. Mr. H. B. Henderson was for many years State Bank Examiner of Wyoming and is now cashier of the Wyoming Trust and Savings Bank at Cheyenne. Mr. C. G. McDonald is a successful buiness man in the Big Horn Basin.

Worland is on the Burlington Railroad in the lower end of the great Big Horn Basin of Wyoming. There are about 40,000 acres of land under ditch in the valley around Worland, and a big range country to the east and west. It is a mixed cattle and sheep country. The farm land under the ditch is exceptionally good, suitable for all western crops. Alfalfa runs from four to five tons to the acre after the first year and does better than any place we have been. When this land under the ditch gets settled up we think this is going to make one of the best feeding points in the country. The railroad is building its line through to the east and will make a fairly short haul to Denver and Omaha.

Belated Run from Arizona.

The following comes from our South St. Joseph house: "There have been few spring lambs here thus far this season. They are getting started later than usual. Arizona is very dry and there will not be many fat sheep out of there soon. Texas has not a heavy supply. Consequently receipts will run very light during May. There are not enough lambs back in the northern section of the Arkansas Valley, in Colorado, to make heavy receipts here at any time."

Grass Texas Cattle to Increase.

Our East St. Louis house writes: "It will only be a short time until we will begin getting a more liberal run of Texas cattle, and we look to see all casses of cows and medium heifer stuff, as well as low-priced native steers, suffer a decline very soon. We advise shipping this class of offerings as fast as possible. However, fat yearling cattle and also handy weight steers of good quality should sell well right along."

Germany Lifts Ban on Pork.

A great market has been opened to the United States packers. The German government has lifted the ban on our pork, after being in force for four years. The German inspection law, which has just been repealed, acted almost as a prohibitive measure against United States pork. It will now be admitted when passed on favorably by United States inspectors. Our exports of meat to Germany will now have a chance to grow, but there is little chance of exporting pork. Domestic prices are too high. Regarding this phase of the situation, Edward Morris, president of Morris & Co., says:

"Just now we have not enough hogs to go around in the United States. That will not last long. As soon as there is a surplus the German market will take care of it."

CHICAGO MARKET REVIEW, AND OUTSIDE MARKETS BY WIRE

NATIVE BEEF STEERS.

Range of prioes and bulk of sales of native beef steers this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Range.	Bulk.
This week.....	$5.75@8.50	$7.00@8.00
Previous week.....	5.85 *8.50	7.00 8.10
Year ago.....	4.75 7.00	5.50 6.50
Two years ago.....	4.50 7.25	5.85 6.90

*Obtained by Clay, Robinson & Co.

Marketing Thursday 8,187. Most heavy offerings sold at 10c loss, other kinds going steady. Local buyers were chiefly interested in light and medium weights, sellers having to depend upon eastern shippers to find outlet for heavier and higher costing kinds. Summit was $8.50, paid for 25 head of 1,474 lbs average. However, there were few sales above $8.00 and selling was largely at $3.75@7.75. Marketing Friday 1,733. Prices steady to 10c lower. Top was $8.25, paid for 19 head of 1,299 lbs average. As compared with olose of previons week prioes for heavy lots snowed 10@20c decline and other kinds sold steady to 10c lower.

At the start this week receipts totaled 23,202. This run proved fully as many as expected and above actual trade requirements. Result was dull trading from start to finish at prices 10@15c lower. Heavy and high-costing beeves continued in disfavor, with lighter and lower-cost ing kinds meeting best call from the outset. A load of prime 1,558-lb offerings made $8.45 and a load of fancy long 1,117-lb yearlings $8.10. Trading was mostly at $7.00@8.00. Tuesday supply 3,633. General demand was slack and trade ruled slow at no more than steady rates. A good many fat weighty kinds were not shown. Over forty loads of Dakota corn-fed steers that were delayed enroute and should have been here Monday arrived, but most of them were held over. Best beeves offered included 20 head of 1,237 lbs average at $7.75. Marketing Wednesday 18,000. Dull trade from start to finish at prices generally 10@15c lower and in cases 20c off. Demand from all sources was reduced, indicating that the dressed beef market is in poorer shape. A load of prime beeves, averaging 1,653 lbs, reached $8.50.

Revised qnotations for all grades of native beef steers:

Extra choice to prime steers.....	$8 00 @	8 50
Good to choice steers.....	7 60	7 90
Medium to good steers.....	7 00	7 40
Plain to fair short-fed steers.....	6 50	7 00
Common to fair steers.....	6 00	6 50
Extra choice to prime yearling steers.....	7 90	8 25
Good to choice yearling steers.....	7 50	7 75
Medinm to good yearling steers.....	6 75	7 25
Good to choice stags.....	6 50	7 50
Common to medinm stags.....	5 75	6 40

BUTCHER STOCK.

Bnlk sales of beef oows and heifers, oanners and cntters, and bnlls this week, with oomparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Bulk cows and heifers.	Bulk canners and cntters	Bnlk bulls.
This week.....	$4.75@6.60	$3.10@4.15	$5.65@6.50
Previous week.....	4.85 6.75	3.15 4.25	5.35 6.25
Year ago.....	4.35 5.50	2.50 3.35	4.10 4.75
Two years ago.....	4.50 6.25	2.00 3.25	3.75 4.50

Most cows and heifers went at 10c less Thursday. Receipts were quite liberal for the fonrth market day of the week. Bulls went 10c off. Bnyers were ready buyers of the rather heavy crop of calves at prices strong to 25c higher. A load of prime vealers, averaging 109 lbs, reached $8.50. Mostly 10c lower prices for cows and heifers Friday, with sales largely 10@15c lower than close of previous week. Top heifers for week $7.85 and a few prime cows landed np to $7.00. Bulls made a firm range and went 25@35c higher than corresponding day of preceding week. Strong market for calves and 25@35c gain over last week's close. Top for week $8.60.

It was a slow deal in cows and heifers Monday of this week, althongh prices were not quotably lower. Snpplies were about normal. The qnota of high-grade offerings was smaller than in late weeks, indicating that feeders have thinned ont their feed yards of high qnality classes, since prioes have been a strong inducement to ship. A moderate run and a good demand enabled sellers of bulls to obtain prices steady to strong. Distillers made a new high price of $6.40 and our sale of bolognas at $5.75 also established a record figure. Buyers were indifferent bidders for calves and all price changes tended downward. Steady prices ruled for cows and heifers Tuesday. Top was $7.90, we selling 19 head, inclnding 6 steers, at the price for N. N. Poulsen of Vermilion, S. D. Bnlls active sale at steady prices. A good demand developed for calves and steady rates prevailed. Top $8.25. Selling of cows and heifers Wednesday was strong to 10c higher. Bulls went 10c higher. Calves held steady.

Revised quotations for all grades of butcher stock and calves:

Extra choice to prime yearling heifers.....	$7 00 @	7 75
Choice to prime export heifers.....	6 75	7 50

Who?—CLAY, ROBINSON & CO.

What?—TOPPED HOG MARKET

Where?—CHICAGO

We scored the highest hog sales on three different days last week, and also topped the market this week, they following:

Friday, April 11—One load from Iowa at $9.65, pinnacle by 5c per cwt.

Thursday, April 14—Two loads from Iowa at $9.25, extreme top.

Friday, April 15—One load from Illinois at $9.50, being 10c per cwt above the next highest price, which we also obtained.

Wednesday, April 27—A load each from Illinois and Iowa at $9.60, being top by 2½c per cwt.

Of course every day we sell hogs at the highest market price obtainable, regularly topping the trade for their class. It makes no difference whether your hogs are good, bad or indifferent, they are in safe hands when consigned to

Two years ago	5.85	4.75 5.40	4.35 4.85

*Record price, paid for a load of 1,123-lb Shorthorns.

Proportion of offerings in this department to general receipts Thursday was small. This, along with a good demand, enabled sellers to hold prices steady in spite of the weak to lower beef steer trade. Two loads of Montana hay-fed steers, averaging 1,155 lbs, were sold by us at $7.10, a record price for such offerings. Most of these cattle were Shorthorns and of good quality. Trading Friday was generally strong to 10c higher than same day of previous week. Supply was meager and comprised mainly plainish stockers.

On Monday of this week prices for bulk of offerings showed 10c loss. Attendance of outside buyers was small, due to the bad weather. Most arrivals were medium and plain steers and sellers found difficulty in finding outlet for these classes. A slow but about steady trade Tuesday. Receipts were light, as was also the demand. Rates were steady to 10c lower Wednesday.

Revised qnotations for stocker and feeding cattle:

Good to choice feeders	$5 75 @	6 35
Poor to medium feeders	5 15	5 65
Good to choice stockers	5 10	5 35
Plain to medium stockers	4 65	5 00
Inferior to common stockers	3 75	4 40
Good to choice stock heifers	4 65	5 25
Common to medinm stock heifers	4 25	4 50
Plain to good thin young cows	4 25	4 75

MILKERS AND SPRINGERS.

Revised quotations for milkers and springers:

Choice to prime	$60 00 @	70 00
Medinm to good	45 00	55 00
Common to plain	35 00	40 00

Two years ago	5.25	5.80	5.20	5.75	5.20	5.75

On Thnrsday run of hogs was 9,518. A tedious session and a sway-back trade. Opening 5@10c higher than the previous day's low spot, the market quit after most urgent orders had been filled. A booming pit trade, however, forced packers into the market and trading became active at 10@15c advance over low time Wednesday. Top $9.25, which price was obtained by us and sales in main at $9.15 @9.20. Marketing Friday 7,464. Supplies everywhere were of famine like proportions. Some early sales were 20@25c higher, but most trading at 15c advance. Summit $9.50, we obtaining this price, which was 10c per cwt higher than any other load of hogs made. Bulk of business at $9.30@9.40, quality running uniform and pretty good. Receipts Satnrday 3,347. Opening 10@15c higher, market lost most of the advance subsequently. Summit $9.55 and sales in main $9.40@9.50.

This week opened with a total of 17,847. Generally speaking the trade was 10c higher, extremes showing 5@ 15c advance, depending on time Satnrday with which comparison was made. Pinnacle $9.65 and bulk at $9.50@ 9.60. Marketing Tuesday 6,714. Opening 5@10c higher than previous day's best time, market closed with half advance lost. Top $9.70 and bulk $9.50@9.65. Run Wednesday 17,000. A few scratch early sales 10c lower than best time previous day, but it was soon a 15@20c lower deal. Top $9.60, obtained by us for two loads and 2½c per cwt above any other sale, with choice at $9.45@ 9.50, a lot of business at $9.40@9.45 and Armour's kind of mixed at $9.35.

Revised quotations for all grades of hogs:

Fair to choice heavy shipping	$9 45 @	9 60
Fair to choice butchers	9 40	9 55
Fair to choice medium weight	9 40	9 50
Good to choice assorted light shipping	9 40	9 50
Poor to good heavy packing	9 20	9 40
Poor to good mixed packing	9 30	9 45
Poor to good light bacon	9 35	9 45
Pigs, 115 to 140 lbs	8 90	9 30
Pigs, 110 lbs and nnder	8 50	9 00

Sheep and Lambs.

Following shows top prices and bulk of sheep and lamb sales this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Sheep Top.	Sheep Bulk.		Yearlings Bulk.		Lambs Top.	Lambs Bulk.	
This week	*8.15	$7.25@8.00		$8.00@8.35		* 9.90	$8.75@	9.40
Last week	*8.35	7.50	8.25	8.25	8.50	*10.20	9.00	9.65
Year ago	6.15	5.25	5.70	6 15	6.50	8 80	7.10	8.45
2 years ago	6.75	5.30	5.75	5.75	6 25	7.65	6.65	7.50

*Obtained by Clay, Robinson & Co.

Receipts Thursday 11,008. Buyers donned their bearish clothes and made sellers do sums in snbtraction to the amount of 10@15c. It was a dull, sticky market, due to receipts being above actual trade requirements and a narrow outlet through eastern shipping channels. Top sheep $8.10, we obtaining this figure for shorn western wethers. Most trading at $7.25@7.90 for ewes and wethers. Extra choice 98-lb shorn western yearlings had to go at $8.25. A fancy class of 78-lb shorn Colorado lambs made $9.60 early, but $9.50 was the practicable top, with sales in main at this price down to $9.25. The first spring lambs to arrive here this season from Kentucky included 73 fat 45-lb offerings at $11.50, with the second cut, averaging 43lbs, at $9.00. Receipts Friday 3,402. Market generally strong to 10c higher and as compared with close of previous week showed mostly 10@15c loss. Top sheep $8.20, paid for shorn western wethers. We topped the lamb market with Colorados at $9.90, as well as native shorn lamb trade with offerings from the University of South Dakota at $9 50, although a fancy lot of 81-lb western lambs made $9.60.

This week started out with a run of 14,948. There was a meager supply of sheep and yearlings and these went in due season at generally steady prices. Bulk of offerings were shorn wethers, which went at $7.25@8.15, latter price being obtained by us. Very choice 89-lb shorn western ewes reached $7.50, and a similar class of yearling wethers, averaging 97 lbs, made $8.25. Dull, draggy trade in lambs from start to finish. Sellers stoutly resisted sharply lower bids of buyers, but finally had to cede 10@ 15c before they were able to clear their pens. Top lambs went at $9.90, this sale being made by us for Colorados. A fancy lot of shorn Colorados landed at $9.50, but most trading in shorn lots was at $8.75@9.35. Wednesday supply 15,000. A few early sales were about steady, but with adverse reports from the East the market quickly weakened and bulk of trading was at 10@15c decline, although some final transactions were 25c down. Top sheep $8.10 and early in day $9.60 was paid for lambs. Colorado wooled lambs at $9 90, we making the sale.

Revised qnotations for all grades of sheep and lambs:

SPRING LAMBS.		
Good to choice	$12 50 @	15 00
Medium to good	10 50	12 00

East Buffalo Markets.

[Special telegram from Clay, Robinson & Co.]

East Buffalo, N. Y., April 26—Marketing of cattle Monday and Tuesday totaled 4,700. Heavy beeves went 15@25c lower than last week's close, with light handy weights 10c off. Cows and heifers held steady.

Run of hogs first two market days this week 12,000. Prices steady with last Saturday's close. Mixed, mediums and heavies made $9.75@9.80 today, with pigs and lights at $9.65@9.75.

Arrivals of sheep and lambs Monday and Tuesday totaled 14,000. While sheep went strong to 25c higher than last week's close, lambs were dull at about steady sale. Top lambs brought $8.90@9.15, with best yearlings at $8.75, wethers $8.00 and ewes $7.25.

South St. Paul Markets.

[Special telegram from Clay, Robinson & Co.]

South St. Paul, Minn., April 26—Monday and Tuesday cattle run this week totaled 3,500. As compared with last week's close beef steers held steady. Best stockers and feeders steady and others slow sale.

Receipts of hogs first two market days this week 4,700. Prices advanced 10@15c over last Saturday. Top today $9.30 and sales in main $9.20@9.25.

Three hundred sheep and lambs arrived Monday and Tuesday this week. Market strong with last week's close. Top shorn stock: Lambs $9.50, yearlings $8.50, wethers $7.75 and ewes $7.50. Wooled stuff sells 50@75c higher than shorn.

East St. Louis Markets.

[Special telegram from Clay, Robinson & Co.]

East St. Louis, Ill., April 26—Native supply of cattle fairly liberal first two market days this week. Heavy beeves slow at prices 10@15c under close last week. Best offerings, averaging 1,453 lbs, made $8.15. Butcher steers and plain killers under 1,050 lbs lost 10@15c. Irregular trade for other kinds at rates steady to 15c lower. Heifers declined 15@25c, best making $8.10. Best cows held steady and other kinds declined 10c, with top today $6.75. Firm market for bulls and calves. Stockers and feeders steady sale. There was a light supply of southern cattle and prices held steady with close of last week.

Opening 10c higher, today's hog market closed with advance lost. Top $9.80, being 25c up from last Saturday. Bulk sales $9.60@9.75.

Trading in sheep and lambs about steady with last week's close. Shorn native lambs brought $8.50@9.25, with fat mutton sheep around $8.00. Wooled western yearlings made $9.15, western wethers $8.70 and western ewes $8.00, all being fed in Missouri. Good fat bucks ready sale at $6.00@6.25.

*Obtained by Clay, Robinson & Co.

†Record price on open market by 20c per cwt, obtained by Clay, Robinson & Co. for a load of 1,518-lb Iowa-fed grade Hereford branded Wyomings.

Among the valued and highly esteemed patrons of our South Omaha office is R. M. Hewson, who is connected with the Lexington Shipping Association, at Lexington, Neb., which association handles the bulk of the hogs and a considerable portion of the cattle that are marketed from that locality, which speaks well for the efficient management of Mr. Hewson. This gentleman's name will doubtless be familiar to many of our readers, as he enjoys an extensive acquaintance in Illinois, Indiana and South Dakota, particularly the first named state, as well as in Nebraska. Mr. Hewson was born twenty-three miles southwest of Chicago and lived at Orland, Ill, until 1883, when he removed to Lexington and has lived there ever since, being engaged in farming, stock raising and shipping. His association ships 15 to 25 cars of hogs a month, most of which are marketed through Clay, Robinson & Co. at South Omaha, proving that Mr. Hewson recognizes and appreciates good service.

Adversity borrows its sharpest sting from our impatience.—Bishop Horne.

AMONG OUR CUSTOMERS

I. G. Aker, Morgan county, Colo.: "Your sale of two cars of lambs for me was thoroughly satisfactory."

Andrew Losleben, writes our South St. Paul house: "I wish to thank you for the $4.05 freight overcharge."

Charles F. Rippy, Laclede county, Mo.: "I think the REPORT is splendid and should not like to be without it."

H. F. Johnson, Grant county, Wis., writes our South St. Paul house: "Cattle arrived in good shape and are all right."

On April 22 our Sioux City house topped the market with 47 hogs, averaging 311 lbs, at $9.15 for A. J. Paul, Sac county, Ia.

Nine dollars and twenty-five cents proved limit for hogs at Chicago on April 21. We sold 94 head of 241 lbs average at this figure.

Our Sioux City house topped the hog market April 20 with 63 head, averaging 281 lbs, at $9.05 for Lee Miller, Cedar county, Neb.

Joseph Horner, Lagrange county, Ind.; "Was well pleased with sale of lambs, especially on fill you got. The shrink was very light."

George W. Evans, Boulder county, Colo.: "I sold my lambs through your South St. Joseph house and am more than pleased with results."

M. E. Wall, Ray county, Mo., writes our Kansas City house: "I received the cattle and they are a very good class of steers. Thank you."

H. C. Butler, Lapeer county, Mich.: "Your REPORT is a good market paper and I should miss it. Enclosed find 50c for a year's subscription."

Ed. Holt, Scott county, Ia., had a load of 1,194-lb cattle on the Chicago market April 22 and we sold them at $7.65. They were of his own feeding.

Edward L. Lemert, Doniphan county, Kan., writes our South St. Joseph house: "You got a good price for the lambs and I am pleased with the sale."

J. A. Whitlow, Weld county, Colo., was the owner and we the sellers of the 256 shorn lambs of 82 lbs average which made top price of $9.65 at Chicago on April 20.

Robert Penman, Champaign county, Ill., writes our Kansas City house: "I got home all right with the cattle. Everyone who has seen them think they are good ones."

M. C. McLain, Dunn county, Wis.: "Account sales and check in settlement of fifteen cattle received and everything was O. K. I was very well pleased with sale."

Andy Nelson, Dawson county, Neb., had a double deck of 84-lb shorn lambs to our South Omaha house April 19 and they landed them at $9.20, topping the market by 20c per cwt.

Fred Zeglin, Woodbury county, Ia.: "Thank you for the good sale of my cattle. They weighed 110 lbs more at Chicago than at home and I got 35c per cwt more than I expected."

H. Schult, Scott county, Ia., writes our South Omaha house: "Cattle came through all right and they are just the kind I ordered. I was surprised to get them in such a short time."

D. A. Linden, Bureau county, Ill., a regular and frequent shipper, was at Chicago on Friday of last week with a consignment of cattle to us and also ordered the REPORT sent to him.

W. F. Widick, the popular and extensive Iowa live stock dealer, was on the Chicago market with cattle and hogs from Webster county April 21, we selling both lots to his entire satisfaction.

L. Virtus, Steele county, Minn., was at Chicago on Monday with a load of steers and she stock of his own feeding. They were consigned to us, this being the first time he has ever shipped to our firm.

H. J. Slye accompanied a load of cattle to Chicago on April 22, they averaging 1,156 lbs. They were sold by us at $7.35. The cattle were from the Mrs. Luther Slye estate, Delaware county, Ia.

John Young, Wyandot county, Ohio: "Find 50c for subscription to your valuable paper for one year. Thank you for not stopping it when the time expired. I can't get along without the REPORT."

Emerson E. Bartlett, Wyandot county, Ohio: "The REPORT is surely the best stock paper that I ever read. Enclosed find $1.00 for which continue my subscription two years and send me expansive file."

R. B. Gordin, Madison county, Ohio, had a consignment of sheep on the Chicago market April 18, included in which were 160 shorn western wethers of 121 lbs average which we landed at top price of $8.35.

H. E. Chichester, Peoria county, Ill., and the Elkport Co-operative Co., Clayton county, Ia., well-known dealers in live stock, were represented on the Chicago market April 20 with cattle shipments to our house.

E. S. Leavenworth, one of the largest feeders of lambs in the West and also prominent in cattle feeding and farming circles, Hall county, Neb., sold 45 head of 1,482-lb beef steers through our Chicago house April 20 at $8.20.

Leonard Fusby, Polk county, Neb.: "I find that your REPORT is the best paper of its kind to be had and gives the soundest advice of any publication on live stock and markets. Enclosed find 50c for a year's subscription."

Whole Country Well Informed

Clay, Robinson & Co. keep the country so well informed on the markets the shipper is in position to take advantage of the best market. That's one of the reasons our clients are so generally successful. Our experts in ten of the leading live stock markets of the world watch the trend of trade every hour and post one another. Then in turn they give this information, condensed, to our patrons. Every day our cattle, hog and sheep departments at these ten markets mail to our friends the latest market news and information. More than that, the shipper in territory contiguous to two or more markets is advised by us from these several points. He thus is enabled to select the best point for his shipment. If you are located where you could ship to two or more markets, and are not being advised by us from each of these points, a card to us will secure you this valuable information. Keep it before you that we have the best talent to be secured in each of the following markets: Chicago, Kansas City, South St. Joseph, South Omaha, Sioux City, South St. Paul, East Buffalo, East St. Louis, Fort Worth and Denver. Having our own houses at all these points, our market information is not distorted or colored by local interest. Let us keep you posted, that you may select your best market. That's our reason for having branch houses. We want to sell your stock where the return of dollars to you will be greatest.

Henry Schneider, Freeborn county, Minn., writes our South St. Paul house: "Cattle arrived in good shape. Thank you for the well-picked cattle for pasture use. Please send me another load about like them as soon as you can."

M. S. Downey, Mahaska county, Ia., on April 19 favored our Chicago house with 492 shorn western yearlings and wethers mixed of 81 lbs average and we obtained $8.50 for them, summit for this class of offerings, as well as limit for yearling stock.

J. A. Schowal, Harvey county, Kan.: "Your letter and check for $42.52 received. I am more than pleased with the efforts you have made in collecting the damage I suffered by the negligence of the railroad. I wish to commend your strict honesty and fairness."

C. W. Karns, Hardin county, Ohio, regarding the lambs we bought for him: "They were the best I ever fed. I lost only three out of 373. We found only half a dozen ticks on them when they were shorn. I wish to acknowledge your ability and I surely appreciate your fairness and honesty in filling my order according to specifications. I am indebted to you for the market reports you have furnished me the past winter and up to the present time."

J. D. Evans, Iowa county, Ia.; P. F. Weidauer, Pocahontas county, Ia.; L. S. Peterson, Lasalle county, Ill.; Elkport Co-operative Co., Clayton county, Ia., were represented on the Chicago hog market April 21, they selling their consignments through our house.

It was April 19 that our South Omaha house sold for E. S. Leavenworth, Hall county, Neb., two double decks of 69-lb Mexican lambs at $10 10, summit of the market, and also two double decks of Mexican yearlings, averaging 78 lbs, at $9.00, pinnacle in that class.

Our Chicago house topped the lamb market on both April 21 and 22 with the T. W. McCurdy offerings from Morgan county, Colo., the sales being at $9.90. On the former day we sold 518 of 73 lbs average at the price and on the latter day 759 head of the same average.

Fremont county, Ia., was represented on the hog market at Chicago on April 20 with 78 head of 306 lbs average for which we obtained top price of $9.25, being 10c per cwt higher than any other offerings of as light weight made. They were marketed by the extensive shipping firm of Bell & Lutz.

R. Hudson, Lyon county, Minn., was on the Sioux City market April 22 with two loads of cattle consigned to our house and expressed himself as very well pleased with the sale. Speaking of the REPORT he said: "It is the best paper of its kind published in the United States and I would not be without it if it cost $5.00 per year."

Nix & Collins, Weld county, Colo., marketed 513 lambs, averaging 78 lbs, at Chicago on April 18 and we landed them at top price of $10.20. On following day they had in 1,027 head of 77 lbs average, we also topping the market with these at $10 10. April 19 they marketed 1,013 more, averaging 77 lbs, which we also landed at top figure of $10.

J. Heft, Floyd county, Ia., prominent farmer and feeder, was on the Chicago cattle market Monday with two loads. They were consigned to us, this being his first time to sell his stock through our firm. "I want to say," said Mr. Heft, "that I was highly pleased with the handling of my cattle, as same was certainly done in a most up-to-date manner."

I. G. Ludwig, Sanborn county, S. D., writes our Sioux City house: "I am very much pleased with the advice your cattle salesman gave me and think I did well by selling at Sioux City. When I have any more to ship Clay, Robinson & Co. will be good enough for me. The fellows who shipped through told me I did right in selling at Sioux City."

The April 22 receipts of hogs were contributed to by J. Leinenweaver, Keokuk county, Ia.; O'Connor Bros., Blackhawk county, Ia.; E. J. Gable, Livingston county, Ill.; J. C. Desmarias, Grundy county, Ia.; N. D. Beall, Monona county, Ia. We handled all of these consignments for the above parties, who are well known either as feeders or live stock shippers.

The Columbus Canning Co., Columbia county, Wis., an extensive concern, as well as heavy feeders of cattle and sheep, were represented on the Chicago sheep market April 21. Our sales for them included 153 shorn western lambs of 90 lbs average at $9.50 and 83 shorn western wethers, averaging 108 lbs, at $8.10, both prices being top for respective classes.

H. Daggart & Son, successful live stock dealers, Carroll county, Ill., had on the Chicago market April 22 a load of 51 hogs, averaging 288 lbs. We sold them at $9.50, being 10c per cwt higher than any other load of swine brought. Next highest price was $9.40, also obtained by us for 62 head of 298 lbs average, they belonging to J. Frerichs, Grundy county, Ia.

Pinnacle for sheep at Chicago on April 19 was $8.15. Our sales of shorn western wethers at this figure follow: For J. W. James, Lagrange county, Ind., 382 head, 116 lbs; H. B. Lewis, Lagrange county, Ind., 399, 112 lbs; Chester Farm Co., Champaign county, Ill., 404, 110 lbs; W. C. Wilson, Racine county, Wis., 180, 123 lbs; Price Bros., Lagrange county, Ind., 199, 120 lbs.

C. J. Kolb, Jr., Ida county, Ia., prominent and successful farmer and feeder, was represented on the Monday cattle market at Chicago with 48 head of branded western steers. We handled the shipment, which included 17 head of 1,417 lbs average at $8.30 and 31 of 1,383 lbs at $8.10. These cattle were bought on the Sioux City market last fall at $5.00, averaging 950 lbs. Mr. Kolb remarked that he was certainly well pleased with the sales. He, along with his father, C. J. Kolb, Sr., and his cousin, L. Kolb, will sail for Germany on May 11. His father immigrated to Iowa from Germany in the early '60s and is one of the pioneer farmers and feeders of that state.

W. H. Morrison, progressive farmer and feeder of Clay county, S. D., was at Chicago on Monday with a load each of cattle and hogs, same being handled by us. "Had I sold my cattle at home I would have been the loser by about $92. This is my first load of cattle to Clay, Robinson & Co., although I have always shipped my hogs to Clay, Robinson & Co at Sioux City," said Mr. Morrison.

D. Barker, well known in Iowa Aberdeen-Angus cattle and Poland-China hog breeding circles, and who lives in O'Brien county, was at Chicago on Monday with two loads of cattle which we sold to his satisfaction. They were of his own raising and feeding. Mr. Barker has bred, raised and fed Angus cattle for the past nine years and of six of these he has sold his stock through our house.

James Smith, one of Iowa's extensive shippers and also successful feeders, Worth county, was on the Monday cattle market at Chicago with two loads mostly of his own feeding. This was his initial shipment to us and the prices were 10c per cwt better than he even anticipated. Mr. Smith usually ships from one to four loads of stock every week and last year marketed 100 cars of hogs.

Carl Fessel, the well-known Woodbury county (Iowa) feeder, was again at Sioux City on April 19 with steers and he put a top on the market, although he had only one steer of the kind good enough to do it. His consignment of short-fed steers sold at $7.25, but included one 1,410-lb whiteface steer left over from his earlier marketing which had come into condition good enough to bring $8.00. The shipment was handled by our house.

Our Chicago house April 20 was honored with hog shipments from the following parties, who are either progressive feeders or shippers of live stock: C. T. Pape, Warren county, Ill.; August Nuesus, Stephenson county, Ill.; W. C. Norton, Adams county, Ill.; Jas. Buswell, Iowa county, Ia; B. G. Williams, White county, Ind.; J. M. Hochstetter, Dallas county, Ia.; W. F. Bryant, Marshall county, Ia.; J. D. Funk and E. Bozarth, McLean county, Ill.

The following pominent feeders patronized the Chicago cattle market April 21 through our house: J. H. Larson, Dekalb county, Ill.; J. C. Burr, Johnson county, Ia.; Geore Benton, Audubon county, Ia.; E. Reineke, Pottawattamie county, Ia.; A. Bruington, Warren county, Ill.; B. Schaefer, Steele county, Minn.; William Nesbit, Marquette county, Wis.; F. W. Stuart, Kalamazoo county, Mich.; C. G. Laipple, Hardin county, Ia.; Willard Brown, Will county, Ill.; H. R. Hitchcock, Winnebago county, Ill.; P. G. Timmerman, Franklin county, Ia.; L. S. Peterson, Lasalle county, Ill.

Miller Bros., among Iowa's large and successful feeders and shippers of live stock, shipped in from Henry county to our Chicago house April 20 a string of cattle which made satisfactory prices, considering the dull and lower condition of the trade that day. Included in the shipment was a lot of 145-lb veal calves which made $8.25, the top that day. Sam Miller accompanied the consignment and remarked that the recent break in the hog market has caused an increased movement of young swine marketward. He is of the opinion that this is to be deplored, as young, thrifty hogs can be held for heavier weight to excellent advantage.

W. Larison and his brother-in-law, W. L. Summers, were on the Chicago market Monday from Mills county, Ia., and they were among the best pleased shippers in the trade. They consigned their stock to us for the first time and stated that they received prices better than they expected, Mr. Larison stating that his sale was 10c per cwt better than he anticipated. Both gentlemen are prominent farmers and feeders. Mr. Larison had in two loads of cattle and hogs, the cattle numbering 38 head, averaging 1,085 lbs and selling at $7.60 and the hogs at $9.57½. Mr. Summers' cattle numbered 53 head, averaged 1,359 and landed at $7.90 and the hogs at $9.57½. All of the cattle were bought on the South Omaha market in August and were branded westerns, Mr. Larison's averaging 740 lbs and costing $4.00.

Following prominent feeders helped swell the receipts of cattle at Chicago on April 20, all of which were handled by our house: E. G. McCaffrey, Crawford county, Ia.; C. M. Follett, Mills county, Ia.; H. R. Laird, Fremont county, Ia.; Farnsworth & Fowles, Ida county, Ia.; H. K[illegible] Scott county, Ia.; J. Buswell, Iowa county, Ia.; E. M. M[illegible] holland, Hamilton, Ia.; C. Salie, Sioux county, Ia.; Chas. Baskin, Hardin county, Ia.; W. J. Davidson, Madison county, Ia.; George Farwell, Ogle county, Ill.; John Stark, Dupage county, Ill.; C. I. Stark, Will county, Ill.; E. D. Rankin, Henderson county, Ill.; Collins Bros., Clay county, Ill.; G. C. Shumaker, Fulton county, Ill.; D. S. Lowe, Moultrie county, Ill.; H. W. Thayer and R. C. Hanlon, Henry county, Ill.; George Adee, Dekalb county, Ill.; George Smith, McLean county, Ill.; J. D. McKenzie, Whiteside county, Ill.; B. G. Williams, White county, Ind.; Frank Pierce, Laport county, Ind; John Hudson, Newton county, Ind.; Edward Gall, Cass county, Mich.; M. C. McLain and B. F. Breen, Dunn county, Wis.

Fremont county, Ia., was represented on the Monday cattle market at Chicago. R. Porter brought in four loads of 1,372-lb branded westerns of his own feeding which brought $8.05. These cattle were bought on the South Omaha market in October at $4.60, averaging 975 lbs. T. C. Cole had in four loads of branded westerns of his own feeding, averaging 1,373 lbs, which made $8.15. These cattle were also purchased on the South Omaha market in October at $4.60, averaging around 975 lbs. Bird McDaniels, son-in-law of Mr. Porter, marketed three loads of cattle and one of hogs of his own feeding. The cattle were branded westerns, averaging 1,303 lbs, and made $7.90 and the hogs landed at $9.50. These cattle were bought on the South Omaha market in October at $4.30, averaging 960 lbs. "We were all certainly delighted with the handling and selling of our cattle," said Mr. Porter. "I have been feeding cattle for twenty-one years and Clay, Robinson & Co. have handled my shipments. Mr. Cole has been feeding cattle five years and has sold all of his offerings through the same firm." Mr. McDaniels is a young feeder, but judging from the start that he has made he will soon rank among Iowa's most prominent finishers of cattle. Mr. Porter is probably one of the best feeders in the Middle West and is also a keen buyer. He topped the Chicago market through Clay, Robinson & Co. last year on two different occasions.

Dan Casement, Riley county, Kan., had in 180 hogs, averaging 260 lbs, to our Kansas City house April 26 and they sold them at $9.50, top for the day.

S. Crane, Weld county, Colo., was the owner and we the sellers of the 591 lambs of 81 lbs average which made the top price of $9.90 at Chicago on April 25.

William E. Zimmerman, Elkhart county, Ind., writes our East Buffalo house: "Am well pleased with sale you made. Thank y u very much for past favors."

Our South Omaha house sold two double decks of 71-lb Mexican lambs Tuesday for E. S. Leavenworth, Hall county, Neb., at $9.90, extreme top of the market.

W. H. & G. P. Kistler, Rock Island county, Ill., writes our South Omaha house: "Cattle came in good condition. We call them a very good bunch and are well satisfied."

John Bradshaw, Shelby county, Ill.: "I think the REPORT is all O.K. I could not raise or feed stock without it. Enclosed find $1.00 for two years' subscription."

The pinnacle for cattle at Denver early this week was $7.35. Our house obtained the price for five cars of the C. L. Walker 1,200-lb beef steers from Boulder county, Colo.

Our Kansas City house sold April 26 a lot of 11 yearling steers and heifers, averaging 628 lbs, at $7.00 for F. W. Preston, Marshall county, Kan., well known as a Hereford breeder.

The 183 shorn western wethers of 125 lbs average which sold at the top price of $8.15 at Chicago on April 25 were owned by J. E. Lavely, Wyandot county, Ohio, and handled by us.

W. S. Leach, Calhoun county, Mich.: "Please accept thanks for good service, prompt remittance and good sales, considering the quality of 250 lambs sent your East Buffalo house last week."

T. H. Lintner, Dakota county, Minn.: "I was well pleased with price obtained for car of stock I shipped to your house at South St. Paul. Enclosed find 50c for a year's subscription to REPORT."

G. Giddings, Anoka county, Minn.: "Enclosed find $1.00 for which extend my subscription to REPORT two years and send me expansive file. I will always remember the good work you have done me."

E. R. Illenben, Lenawee county, Mich.: "You have sent me your REPORT free of charge for at least five years, so I think I would be an ingrate if I did not subscribe. Enclosed find 50c for a year's subscription."

On April 25 our East St. Louis house landed two doubles of 83-lb shorn lambs at $9.25, summit by 5c per cwt. These lambs were forwarded from Kansas City and belonged to R. H. Norton, Mitchell county, Kan.

Limit for Colorado steers at Kansas City on April 25 was $7.75 and was obtained by our house for two lots shipped by the Great Western Sugar Co. from Morgan county, Colo., averaging 1,253 and 1,390 lbs respectively.

W. R. Hall, Faulk county, S. D., prominent farmer and stockman, was represented on the South St. Paul market April 25 with a deck of 81-lb shorn lambs of his own raising and feeding which our house sold at $9.50.

A. Hunter, Johnson county, Ia; Ed. Biggins, Peoria county, Ill.; E. A. Keagle, Ford county, Ill.; First National Bank, Iroquois county, Ill.; Stuebe Bros., Clay county, Minn., sold stock through our Chicago house Tuesday.

Our Chicago house April 25 sold for F. R. Bend, DeKalb county, Ill., 30 head of 273-lb hogs and for W. R. Coward, Fremont county, Ia., 75 head of 264 lbs average at the same price, as high as hogs of these weights made that day.

E. E Halfhill, S. D., writes our Sioux City house: "Find enclosed $1.00 for which credit me with two years' subscription to REPORT. You have been sending me your market letters for some time for which I thank you very much, as they were of great benefit to me."

M. H. Haskins, Harlan county, Neb., writes our South St. Joseph house: "Under the circumstances we are well pleased with price for lambs and thank you for your untiring efforts in our behalf. The season's work panned out very well, and we thank you again for your good work for us."

E. T. James, Barnes county, N. D., writes our South St Paul house: "I am pleased to inform you that the railroad company has paid me for the claim which you filed for me last December. Thank you for your promptness in the matter. I appreciate very much the good work you did in selling my last car of stock."

Representative feeders or shippers of hogs who sold their offerings through our Chicago house on April 25 included: L. A. Dexter, Hancock county, Ia.; B. F. Dragoo, Woodbury county, Ia.; W. H. Morrison, Clay county, S D.; B. McDonald, Fremont county, Ia.; J. K. Johnson, Hamilton county, Ia.; S. O. Welch and Eli Schultz, Hardin county, Ia.; R. Bahly, Olmsted county, Minn.; W. L. Summers, Mills county, Ia; F. Hanson, Linn county, Mo.; H. Eimers, Kossuth county, Ia.

At Chicago on Monday the following parties, who are either prominent in feeding or shipping circles, were represented on the cattle market with shipments, which were handled by us: F. R. Iddings, Montgomery county, Ia.; C. J. Simpson, Howard county, Mo.; A. G. Fisher, R. McDaniel, C. A. Barnes and Henry Dalton, Fremont county, Ia.; R. Bada, Mills county, Ia.; Fred Hanson, Linn county, Mo.; S. A. Walcott, W. Nowack and J. Charlton, Pocahontas county, Ia.; H. Sargent, H. B. Smith and J. H. Pollock, Plymouth county, Ia.; H. Willer, Grundy county, Ia; Hensley & Thielen, Audubon county, Ia; F. R. Bend, Dekalb county, Ill.; H. C. Brown, Greene county, Ia.; G. V. Jordan, Crawford county, Ia.; J. S. Smith, Worth county, Ia.; A. A. Wilkinson, Webster county, Ia.; J. B. Warner, Iowa county, Ia.; J. O'Donnell, Polk county, Ia.; L. Dexter, Hancock county, Ia.; C. Atkinson, Mower county, Minn.; E. K. Howe and F. L. Bowman, Butler county, Ia.; E. Schultz and S. O. Welch, Hardin county, Ia.; J. A. Simpson and Henry Emers, Kossuth county, Ia.; Green & Beatty, McHenry county, Ill; G. A. Parrish, Warren county, Ill.; C. H. Tripp, Rice county, Minn.

Expect Big Crop of Lambs.

According to reports from New Mexico, good rains fell on the ranges in Socorrow, Sierra and Valencia counties and indications point to a successful lambing this season and the saving of more than the average percent of lambs in those counties. The lack of rain was being felt on the range in those counties and until the recent storm the indications were that drought conditions would do much damage. In the northern counties the storm was accompanied by a severe and sudden drop in temperature. Several inches of snow fell and sheep suffered considerably.

England Has Imported No Sheep.

It is remarkable that not a single sheep has been imported in the first quarter of the current year, says The London Live Stock Journal In the corresponding period of 1909 there were only 3,311 as compared with 23,770 received in that of 1908. But a complete blank has not been shown for a quarter of a year before since the import trade first became a regular one. The lack of sheep has not been made up by mutton, as the quantity is about 142,000 cwt less than in the first quarter of last year.

Rules on Stock Transit.

Judges Sanborn and Adams of the United States Circuit Court of Appeals, St. Louis, have handed down three important opinions on the twenty-eight hour law, which specifies railroads must not keep stock in transit for a longer period than twenty-eight hours without unloading, unless written request be made by the owner, in which case stock can be confined in cars no longer than thirty-six hours. The case of the Santa Fe Railroad, in which the lower court upheld the Government contention that the agent acting for the owner in making the written request exceeded his authority, and that the request must be made by the owner himself, was sustained by the Court of Appeals.

Will Not Rush Hogs Marketward.

John Cudahy, the well-known packer, believes that growers are feeding more hogs than is generally supposed, and that they will not rush them to market because of the recent decline in price, now that conditions show signs of improving. "One great drawback to the packers is the fact that when lard and meats are lowered the retail price fails to discover the fact, but continues to sell at the same old price," said Mr. Cudahy. "It would be better for the packer and the consumer if we could only swing around into normal channels again, as we would then know about what to expect."

Reduced Feeding in Ohio.

H. M. Ensign, an extensive cattle and hog feeder of Ohio, is in Chicago obtaining a few loads of stock and feeding cattle through Clay, Robinson & Co., to ship to his large farm near Jamestown, Ohio. Mr. Ensign feeds annually from 200 to 400 cattle and from 400 to 600 hogs, finishing his cattle largely for the export trade. He buys only a good class of stock. "Feeders are up against it in one sense of the word," said he. "Six-cent stocker steers cannot be fed out, with corn at present price, and sold for less than a 2-cent advance over the purchase price, unless dependence may be placed on the hogs following the cattle to furnish the profit. This stocker and feeder market is clear out of sight. When I was here last, the first week in March, I bought a string of good stockers at $5.55. This week when I tried to duplicate them I discovered that the same kind would cost me now $1.00@1.25 more and the possession of a search warrant was almost necessary to locate them at this advance.

"Cattle feeding operations in Ohio this summer will not reach more than 25 to 40 per cent of the normal summer feeding, due to the high price of feeders and corn. I doubt if it reaches 25 per cent of normal."

Bar Against Mexico Cattle.

Cattlemen in Western Texas have been anxious to restock their depleted pastures with Mexican cattle, which can be bought cheap enough to make the venture profitable, although they must pay a tariff tax; but the quarantine regulations bar such stock from entrance for any purpose but immediate slaughter, and Secretary Wilson has just stated that no arrangement can be made to avoid the existing restrictions, says the Breeder's Gazette. These cattle have been exposed to Texas fever and so are prohibited from entry by the act of Congress forbidding the importation of cattle, sheep or other ruminants, or swine, which are infected with disease or which have been exposed to infection within sixty days before their importation. Dipping the cattle does not enable them to escape these restrictions.

Rushing Cattle to Kansas Pastures.

"The rush of cattle is on now from Texas and the Southwest to the Kansas pastures," remarked W. P. Anderson, the popular stock agent of the Santa Fe Railroad. "We have already moved 1,500 cattle, which is ahead of time, and we expect to mave 6,000 carloads in the next few weeks. The great advanee in the season is going to be a big help to cattlemen. The country has received soaking rains down in that part of Texas where rains were most needed, and now the whole country is green and stock is doing well. Crops look well and cattlemen are in fine spirits."

Paying More Attention to Quality.

"I feel that the values of all farm products will continue," says John Geltmacher, the veteran Chicago provision trader, who is also a considerable land owner and is conversant with his subject. "The old-fashioned farmer is a thing of the past. He worked his land and himself so hard that he and it are both compelled to take a rest. The farmer has grown rich and the land poor. We have, I think, seen our maximum production of grain and live stock. The farmer now realizes that he can make as much money out of a light production by getting high prices as by taxing himself and his land and selling the product at lowest prices. This is developing itself to a surprising degree in stock. More attention is paid to quality than quantity. There is more money and less work and risk in handling one hog at 8c than two or three at 4½c. The same is true in grain."

Annihilating Coyotes in Wyoming.

A. Allen, a prominent stockman of Carbon county, Wyo., says that last winter there were destroyed in the vicinity of Baggs, along the Wyoming-Colorado line, more than 2,000 coyotes. Eight pounds of strychnine was used in the work. The poison cost approximately $300, with $200 added for labor in putting it out and skinning the carcasses. The operators made over $1.50 per head on each coyote killed, and much more on wolves and mountain lions. Wolves, coyotes and other predatory wild animals are becoming scarce in the Baggs country, and on a stretch of range thirty miles long by twenty miles wide, where Mr. Allen and his neighbors have been operating, a live coyote is seldom seen, while the prairie is strewn with skinned carcasses of the animals. Mr. Allen admits that a few dogs were killed by eating the poisoned bait, but says dogs are more easily replaced than are the thousands of sheep that annually fall prey to coyotes.

Craig Leaves Oklahoma Station.

Prof. John A. Craig, director of the Oklahoma Agricultural Experiment Station, Stillwater, Okla., has resigned his position to take effect May 1. We understand that Professor Craig has been doing some very effective work in the above position and we regret that the agricultural and live stock interests of that state are not to have the benefit of his further services. We have known Professor Craig for many years personally, as well as his reputation for conscientious, painstaking and thorough experimental work and instruction wherever he has been.

Southwest Cattlemen Win Case.

A decision in favor of cattlemen of the Southwest in their fight for lower freight rates on cattle to northern markets and northwestern ranges, was handed down by Master in Chancery Seddon of St. Louis. Judge Cowan conducted the case on behalf of the Interstate Commerce Commission, under the special appointment of the attorney general of the United States. More than $1,000,000 has been saved the members of the Cattle Raisers' Association of Texas through the reduced rates ordered by the Commission, and now that the rate is made permanent through the recent decision the benefits to the cattlemen will continue from year to year.

Northwest Wheat is Benefited.

Following comes from our South St. Paul house: "A severe cold wave struck the Northwest recently. There was also a precipitation of snow, some locations reporting a fall of three inches and others as much as a foot. Great benefit will accrue to the field crop as a result, as agricultural experts say the wheat plant is of a hardy growth and can withstand colder weather than has been experienced and that the snow will act as a fertilizer to the growing crops. Practically all small grain has been put in in South Dakota and Southern Minnesota. Farmers are now getting ground in readiness for corn. Indications point to an increased acreage of flax and corn in South Dakota, of wheat and flax in North Dakota and of wheat in Minnesota.

On Stock Farm of Isaac Deffenbaugh & Son, Hastings, Neb.

Sowing Large Montana Tracts.

Our South St. Paul house writes: "Farmers in Southern Minnesota and South Dakota evidenced sufficient confidence in the early spring and, with passing of frost from the ground, started seeding wheat. However, in the more northern points, especially in those sections of North Dakota, early operations were devoted to getting the soil in readiness, preparing seed and other farm labor, and most farmers were rather wary about sowing. The greater part of wheat seeding, however, is now about completed in the three states, except in the Red River Valley, and what wheat was put in early has been up for some time and appears very thrifty. Farmers are now giving their attention to the seeding of oats and barley. A thing which looms up very noticeably at this time is the large tracts being sown to small grains in Eastern Montana."

Brings Breeder and Buyer Together.

I. L. Reynolds, secretary of the Intermountain Four State Fair and International Sheep Show, which will be held September 23 to 29 at Ogden, Utah, writes us: "Conservative figures show that about 140,000 rams have changed hands each year among the sheepmen of this Intermountain empire. It is the purpose of this show to bring the breeder and buyer together for mutual benefits and protection in the buying and selling of the various breeds and grades of sheep. Assurance is given that the largest number of pure-bred sheep ever brough together at any previous show and sale will be here and thousands of buyers will also be in evidence. In the last few years the breeders have been very successful in educating the sheepmen in the using of high-grade sheep and there can be no better means of continuing this campaign than to get them all together at such a sheep show and auction sale. The first four days of the show will be devoted to the exhibiting and selling of private sale. The last two days will be given over to the grand auction sale.

War on Sheep Disease.

Secretary Verry of the State Board of Sheep Commissioners, Wyoming, reports that the outlook was never brighter for the cleaning up of lip and leg ulceration within that state. Letters are coming in daily from the different associations, in which they strongly commend the program as mapped out at a recent meeting, and pledging themselves to support the State Board of Sheep Commissioners in every way possible and agreeing to co-operate fully with the federal authorities. Federal men are already engaged in the actual work of inspecting all sheep within the counties of Big Horn and Fremont. If the northern counties are found clean as a result of this inspection they will probably be released from federal quarantine.

John Clay Contest.

Much interest has been shown in the competition for the $100 in cash prizes, offered by John Clay, to the members of the Hoard Press Club presenting the three best articles relative to the live stock industry of Wisconsin. The prizes are worth considerable effort and have aroused the interest of the entire college in better writing.—The Student Farmer, Wisconsin College of Agriculture.

NOTICE!

Our "complimentary" mailing list has become so large that it is no longer possible to print the enormous editions required to cover same—to say nothing of cost of postage and other expenses.

From now on we can send the paper REGULARLY only to those who enroll as paid subscribers. Non-subscribers may continue to receive occasional copies, but the only way to insure receiving every issue is to subscribe. The subscription price is fixed at only 50 cents per year, which barely covers cost of postage. Payment of this nominal sum, however, will show us that you appreciate the paper and make it worth while for us to send it to you.

As a special inducement to send in your subscription at once, we will, provided you forward same as promptly as you conveniently can after reading this notice, send you, free and post-paid, a double-section key-ring—the best and handiest thing in this line you ever saw.

This, if you have not heretofore been a paid subscriber, will entitle you to the paper for A FULL YEAR FROM NOW—no charge for the time you have already received it. This does not apply to renewals sent in by persons who are already subscribers. Such renewals of course date from the subscriber's expiration date.

THE LIVE STOCK REPORT,
Union Stock Yards, Chicago.

Enclosed find 50c to cover postage on the LIVE STOCK REPORT for one year. Send the key-ring.

Hold Rousing Meeting.

The Alumni Association of the Nebraska School of Agriculture held their annual banquet in honor of the graduating class, in the mammoth new banquet hall of the Lincoln Hotel at Lincoln, Neb., on Thursday evening, April 21st. The committee in charge of the affair spared no pains in making the preparations, and as a result everything came off without a hitch. Plates were laid for 200, upon tables arranged in the shape of a large letter E, with the guests of honor seated along the end. Needless to say, this presented a very beautiful spectacle after all were seated. A five-piece orchestra furnished splendid music during the feast, intermittent to which the boys gave some of their old college yells and songs.

The toastmaster of the evening was Mr. W. R. Wood ('06), one of Omaha's leading dairymen, and his wit and forcefulness displayed the fact that he was worthy of the honor bestowed upon him. Mr. Leonard Herron ('05), at present editor of the Nebraska Farmer, gave the address of welcome to the graduating class and "did himself proud" with his well chosen remarks. Following this Mr. F. E. Barrett ('10), spoke in behalf of his class, and emphasized the necessity for his classmates to remain faithful to their alma mater. Mr. W. E. Reed, he congenial manager of Clay, Robinson & Co.'s South Omaha house, was the next speaker on the toast list, and his ability to tell stories brought forth the applause of the whole house, and when through, the boys gave three cheers and a tiger to show their appreciation. Following this Regent Coupland spoke of the influence that the agricultural school was having upon the farmers of the state, and Professor Rosa Bouton of the Home Economics Department, gave a few remarks concerning the work in her department, and extended a welcome to all present, which remark naturally met with the approval of the boys. Dean Burnett contrasted his college days with those enjoyed by agricultural students at the present time, and General Manager E. Buckingham of the South Omaha yards closed the toast list with a brief comparison of his early education and that of the young man of today, and expressed his desire to see everyone present make the best of the wonderful opportunities which lay before them.

The next evening the graduation exercises occurred, and seventy-five young men and eight young women were added to the ranks of the alumni association, which now boasts of a membership of 330, since its organization eight years ago.

Much Tested Seed Corn.

Farmers generally over the state are beginning to realize the dangerous condition of seed corn, as as indicated by the great number of inquiries heard on every hand as to sources from which good seed may be secured. In order to supply this information so far as possible, the Iowa Experiment Station has made a careful survey of the state, locating as much seed corn of the different varieties as could be found which had been tested and was of known vigor. The information secured is contained in a circular lately issued by the Farm Crops Department of the Experiment Station; and which gives, aside from the variety, the county in which grown, the number of bushels on hand, price per bushel, whether sold in the ear or shelled, etc.

The Experiment Station has been testing samples sent by farmers over the state, and from the large number received have found a few which test exceptionally well. These have been listed, together with the name of the variety, number of bushels on hand, etc., where this information was available.

The Experiment Station is sending these circulars to farmers who make inquiry for them, but strongly recommending that whenever possible seed be secured in the immediate neighborhood where it is to be planted, provided good tested seed can be found. This information is given not to advertise the seed which the men have listed to sell, but as a matter of information and accommodation to the large number of farmers who are in need of seed corn, and who are making inquiries from sources from which seed may be secured. Over 60,000 bushels of the different varieties which have either been tested with the individual ear test, or which have shown from a composite test to be very high in germination, are listed. Those desiring this information should write the Farm Crops Department, Ames, Iowa.

Argentina as Feeder of World.

The following statistics, covering the outlook for Argentina becoming the leading country in supplying the world's requirements of breadstuffs and meats, are taken from a review prepared by Dr. Emilio Lahitte, Director of the Statistical Department of that country:

All promises point to a not far distant period when the Argentine, with 30,000,000 cattle and 69,000,000 sheep and swine, with extended prairies and abundant grasses, and a population of 6,000,000 to 7,000,000 souls, will be called upon to occupy first rank among meat-exporting countries, with all the greater advantage in that it must produce it in greater quantities and of better quality by utilizing the ever-increasing excess of its corn harvests.

In 1908 the freezing establishments of the republic exported 573,946 beef cattle. As the total export of frozen meat is consumed by the English market, these figures show the supremacy of the Argentine in that market over the other producing countries.

As regards mutton, the figures of the exportation for 1909 by the freezing establishments reach 3,297,667 head, approximately.

It is conservative to estimate that very soon the Argentine will have an excess of 5,000,000 tons of wheat, and will occupy the first rank among the exporting countries of this grain. Indications point to a corn harvest this year of at least 6,000,000 tons. Although the world's production of Indian corn reaches the enormous figure of 90,000,000 tons, the international commerce therein is only 5,600,000 tons (annual average of the five years, 1903-1907). Until a short time since, the United States provided, approximately, 66 per cent of this demand, the remaining 34 per cent being exported from Argentina, Russia, and the Danube region, but the exportation from the United States diminishes each year, the necessities of its own markets absorbing 98 per cent of its production, in spite of the increase in the harvests. The Argentine is the only producing country that can compensate the difference.

Southern and Western Cattle

FOR MAY DELIVERY.

The Right Kind at The Right Price.

WE HAVE ON HAND, FOR SALE THROUGH

OUR Denver HOUSE

Between 30,000 and 40,000

Choice Cattle

of various classes and ages. These cattle are now mainly located in Texas, New Mexico, Arizona and Wyoming.

HERE ARE SOME OF THE OFFERINGS:

THE GREEN CATTLE. Shorthorn-Hereford cross. Full age July 1st.
4500 yearling steers, 75 per cent Whitefaces.
4000 two year old steers.
2000 three year old steers.

MAMMOTH LAND & CATTLE COMPANY.
2000 yearling steers.
500 two year old steers.
500 three year old steers.

THE LORDSBURG CATTLE.
2000 yearling steers.
1500 two and three year old steers.

CHIRICAHUA CATTLE COMPANY "CCC" brand.
3500 two year old Arizona steers.
3500 two year old steers, the McAdams panhandles.
1200 two year old spayed heifers, "LFD" brand.
2500 Wood-Hagenbarth yearling steers, dehorned.
Also 4000 good New Mexico yearling steers.

Clay, Robinson & Co.

UNION STOCK YARDS **DENVER, COLO.**

Meat Exports in Big Decrease.

Official Government reports of exports of meat and dairy products for March and for the nine months since July 1 last indicate the low state which has been reached by the United States meat export trade. Export values for March were $4,000,000 less than March, 1909, and $6,500,000 less than March, 1908. For the nine months the total was $24,000,000 under that of a year ago, $48,000,000 less than two years ago, $49,000,000 less than three years ago, and $58,000,000 less than for a similar period in 1906.

The figures for March show the tallow exports as 75 per cent decrease from a year ago; bacon, 60 per cent decrease; canned beef, 50 per cent less; hams and oleo oil and neutral lard, one-third less; lard, 45 per cent less; and pork, about 25 per cent less. The decrease ran through the entire list, except for a slight increase in oleomargarine shipments.

For the nine months, as compared to a year ago, the losses were 115,000,000 lbs in lard, 60,000,000 lbs in bacon, 39,000,000 lbs in oleo oil and neutral lard, 38,000,000 lbs in fresh beef, 33,000,000 lbs in hams and shoulders 15,000,000 lbs and in pork 13,000,000 lbs.

No Large Crop of Pigs.

"We have no means of knowing the actual facts," says Henry Wallace, the well known Iowa agricultural editor, "but other things being equal, there should be a large percentage of both the pigs and lambs that came in March saved this year. We have known as much as one-third of the pig crop and lamb crop to perish simply because of bad March weather. If pigs and lambs that came in March or the first half of April this year die, it will not be because of the weather. The season has been dry beyond all records of the last fifty years. There has been the maximum amount of sunshine, which is life to the youngsters. Therefore, we look for a large percentage of the pigs and lambs to be saved. This does not necessarily mean that there will be a large crop of pigs this year. Too many farmers have sold their mature brood sows, and are depending upon gilts for their supply of pigs. Too many farmers became discouraged two years ago and concluded to go out of the pig business. Nature has been very kind to farmers who have made these mistakes; so kind that the pig crop this year over all the West should, notwithstanding these mistakes, be nearly normal."

There is not single good reason why you should not ship to Clay, Robinson & Co. There are many good reasons why you should.

Milo Culture.

Milo will grow in almost any tillable soil. However, owing to its habits of growth it does not do so well on the heaviest clays or on the lightest sands, although it will grow as well or better on poor soil than most crops. It responds well to good soils and good treatment. Fields that have been under cultivation for a long time and have light, sandy soil can usually be manured with profit if the manure is rightly applied. Milo will do well on newly broken sod. Considering its wide adaptability for different soils, it will be found adaptable for most of the soils of the dry farming region.—Alvin Keyser, Colorado Agricultural college, Fort Collins.

Save on Cement.

An interesting experiment was recently completed at the Ohio Station involving the use of cement for barn floors. Two groups of steers, one consisting of 30 head, the other of 28, both lots being uniform, received the same ration and care for a six-months' fattening period. Both lots were stabled, the only difference being that the first lot was on a well compacted earth floor and the second lot on a cement floor. The manure from each stable was carefully weighed and analyzed. The value of the manure as fertilizer was computed on the basis of nitrogen, phosphorus and potassium figured at commercial prices. The results showed that the manure saved from the 28 steers on the cement floor was worth $45 more than that saved from the 30 head on the earth floor. The value per ton of the manure from the cement floor was $2.96, compared with $2.81 for that taken from the earth floor. The experiment showed an actual cash saving of $45 in the six months' feeding in favor of the cement floor. This was one-half the initial cost of the cementing. In other words, the loss from feeding on the earth floor, although it was the best of its kind, was one-half enough to pay for the entire construction cost of the cement floor. If we reduce this comparison to equal numbers, and apply it to 28 steers in each lot, the results are even greater in favor of the cement floor. In this comparison the loss in the use of the earth floor equals two-thirds the cost of cementing. This is a practical demonstration of the value of cement as stable flooring. Its advantages would probably be equally as prominent in a test with dairy cows or other farm stock.

Feeding Potatoes to Cattle.

Some of the cattle feeders of Northern Colorado who have been feeding their stock cooked potatoes do not consider the experiment a paying one. The potatoes are cheap in that section at present and stockmen are getting them for 10@20c per cwt. But as one feeder expressed it: "A steer will eat 75 to 80 lbs of potatoes per day and added to the cost of the potatoes the cost of cooking it makes a pretty expensive feed, even at the low price prevailing." The cattle relish the feed and do well on it. Whether it pays or not is a question in the minds of some of the feeders.—Denver Record-Stockman.

DAYS MEAN DOLLARS

WHEN YOUR GRAIN IS RIPE

WHAT of the harvest time? Will you be ready? The Spring rush is on. Each day, for several months to come, will find you more and more pressed for time.

Look over your harvesting facilities now. Nothing else is so important. Make sure that harvest time will find you prepared to crowd every hour full of rapid work, well done.

It is very important to have your fields properly fertilized; and it is important that the seed bed be properly prepared before seeding time. It is also important that the best quality of seed be selected and drilled into the ground evenly and at a uniform depth; in other words, all the preparatory work involved in growing wheat and other grain crops is important and, therefore, should be carefully done—but no matter how carefully you may do the preparatory work, if the rush of harvest takes you unawares and you plunge into your fields with inadequate equipment, more or less loss is inevitable, for delays in the harvest fields are costly. Therefore, it behooves you to make sure that your harvesting machines are ready to go into the field. If repairs are needed, now is the time to secure them—if a new machine is needed, now is the time to decide which one to purchase.

Remember what a vital part the harvesting machine will play in your returns on the year's business. There is too much at stake for you to take the slightest risk. It isn't necessary. You can insure yourself against loss. Choose your equipment from the I H C line of machines.

Thousands of farmers are secure in the prospect of reaping all the profit that their grain will represent in the fields because they have chosen machines from one of these six lines—

Deering McCormick Osborne
Champion Milwaukee Plano

Take your choice from these and be sure of getting the most work done in the shortest time at lowest cost.

You cannot get a machine under any other name that will pay you such big dividends on the investment.

Bear in mind that if you attempt to pull through another harvest with machines that are old and worn there will be heavy loss of time and grain. Perhaps a breakage will occur on the most critical day, and unless it is an I H C machine you may have to wait long for repairs.

To put your money into a machine of unknown worth or doubtful character would be equally short-sighted.

The test of time, the successful experience of thousands of farmers, shows you the way to sure results—an I H C.

Among the six styles you are certain of finding one that will just meet your requirements in every particular. And whether the conditions for harvest be favorable or unfavorable, whether you have a fine, uniform stand or a beaten down, tangled crop to reap, the work will go forward smoothly, rapidly, uninterruptedly, netting you the maximum profit. In case an accident should happen I H C interchangeable parts are always quickly at hand through the nearby I H C dealer.

Every I H C dealer carries a stock of repairs that fit when repairs are needed.

Repairs having the I H C standard of excellence can be secured at almost every cross roads or village. This availability is not only a great convenience, but also saves valuable time which means money to the busy farmer in case of accident in the harvest field.

And don't experiment on binder twine. Some low grade fibre has been used in the manufacture of binder twine for the harvest of 1910, and it is unnecessary to state that those who attempt to use twine made from low grade Manila fibre will have trouble.

It is to the farmer's interest always to keep a weather eye on the future, and in this particular instance to secure his twine supply, whether it be Sisal or Manila, at as early a date as possible. Get one of the seven perfectly dependable brands of twine and be sure. Choose Deering, Champion, McCormick, Milwaukee, Osborne, Plano or International—in Sisal, Standard, Manila and Pure Manila brands.

If it is not convenient to see an International dealer promptly, write for full information and the catalogues you want.

ADVERTISE in The Live Stock Report

FOR SALE

160 acres deeded land fenced, about 75 acres in timothy and alfalfa hay, abundance of water for irrigating and house use. Seven-room log house, first-class milk cellar and meat house, 3-room log bunk house with large store room adjoining. Good sheds and barns for horses and cattle. Ranch cuts about 135 tons of hay. There is machinery sufficient for running ranch, and 3 sets of double harness.

200 acres pasture, leased Government land joins on the north partly fenced, material on the ground for finishing a 4-strand barbed wire fence. Lease costs $10 per year for an unlimited length of time.

80 acres leased school land on a mesa, located about 2 miles from home ranch. This land is unfenced. Practically all of this 80 acres can be put in cultivation, and can get an abundance of water by building a ditch about a mile long. Lease costs $10 per year by a term of years, and can be leased from 3 to 5 years at a time.

Best Ration For Hogs.

In a recent bulletin the College of Agriculture of the University of Missouri has published the results of a number of swine feeding experiments by E. B. Forbes. These experiments prove that corn—good corn—is a good feed for any animal and that there is no reason for witholding it from any animal needing food. At the same time it is shown that corn alone is not nearly so good or so profitable a feed as corn supplemented by some proteid food such as tankage, linseed oilmeal or soy beans. In hogs fed exclusively on corn the animal becomes very fat and chubby and does not develop properly; the bones are brittle and easily broken. Sixty-five hogs were used in this experiment and they were divided into lots of five each. Twelve different rations were used with corn alone in two of them and corn supplemented with some other feed in the others. The hogs fed on corn and linseed oilmeal and those fed on corn and tankage gained the most. Those receiving corn alone were most unsatisfactory. A full account of this work, "The Effect of Rations on the Development of Swine," may be obtained free by writing for Bulletin No. 81, to F. B. Mumford, Director of Agricultural Experiment Station, Columbia, Mo.

Wind-Breaks for Plains.

A wind-break usually consists of one or two rows of trees so placed as to check the full force of the wind over the protected area. The prevailing winds in this section being from the west and north these are the sides along which a wind-break or shelter belt is usually planted.

For a quick growing wind-break the black locust is good. Fit the land as carefully as for a crop of corn, and in a strip at least one rod wide for a single row of trees. Set one or two-year-old seedlings two or three feet apart. cultivate after every good shower, until the first of August and do not prune. The Russian olive, handled in the same manner, is also an excellent tree for this purpose where a wind-break of only moderate height is desired.

A more efficient wind-break is made by setting a double or tripple row of the same kind of tree, or the row on the windward side may well be of Russian olive with the black locust next. Set the rows eight feet apart, which distance will allow ample room to cultivate between them. If some kind of coarse, heavy litter is available for a winter mulch it is well to use it as soon as winter sets in. All kinds of stock must be kept away from young trees, and even large trees soon suffer if the stock have access to them.—B. O. Longyear, Colorado Agricultural College, Fort Collins.

Table of Manurial Values.

The following table of manurial values is given in a bulletin issued by the Department of Agriculture:

	PER TON VALUE.
Droppings from hens	$7.07
Droppings from sheep	3.30
Droppings from pigs	3 20
Droppings from horses	2.21
Droppings from calves	2.18
Droppings from cows	2.02

CATTLE FOR SALE.

One of our Colorado clients has decided to sell a string of three, four and five-year-old steers. These are nearly all natives, with perhaps 200 Southerns on them. There are 1,000 three year olds and 800 fours and fives, majority dehorned. They would make excellent cattle for Kansas grazers, and could go east over any line of railroad. Will be sold with a ten per cent cut. Address

CLAY, ROBINSON & CO., Denver, Colo.

IMPORTANT TO
CREAM SEPARATOR BUYERS

Don't make the mistake of assuming that the inexperienced buyer can't see the difference between cream separators.

You can't see the difference in results, in quantity and quality of product, ease of operation, cleaning and durability, of course, without comparative use of different machines.

But there is not a sensible man anywhere who in comparing the DE LAVAL and any other cream separator side by side—the design, construction, finish, assembling and unassembling of parts, simplicity, manifest ease of cleaning and all around practicability—cannot appreciate the superiority of the DE LAVAL to the other.

And when it comes to practical test, every responsible person who wishes it may have the free trial of a DE LAVAL machine at his own home without advance payment or any obligation whatever.

WHY make so important an investment as a cream separator without being SURE that you are right? You simply have to ask the nearest DE LAVAL local agent or write the Company directly.

Winter Feed Proposition.

The experience of owners of live stock during the feeding season just past has been such as to call their attention very forcibly to the cost of feeds, both grains and rough feeds. It has taught a lesson of economy in the use of feeds; it has demonstrated the necessity of a supply fully equal to the demand of an all-season feeding period. With the farmer and live stock grower there should be plans made before the sowing and planting season arrives to cover the feed requirements of the live stock to be wintered. Feed crops have a market value now, no matter how common they may have been a few years ago or how little attention they received. The strawstack is now utilized as a feed for cattle when only a few years since they were burned, considered a waste product of little or no feed value. That there are feed crops of great value and easily and cheaply produced there is abundance of proof. As an illustration we mention sorghum and Kaffir corn as a rough feed for cattle. These feeds are easily and cheaply produced, yield large crops and are among the very best rough feeds for all the fodder-eating animals kept on the farm. They are not only a favorite with the stock, but they cannot be excelled in feeding results. The yield of a good feeding crop is an important feature for or against its use. These crops are large yielders, not subject to much damage from weather in the harvesting. To those who have not tested sorghum or Kaffir corn as a hay or fodder crop we recommend a trial of a few acres sown broadcast. It can be sown after the corn crop is safely started. The latter part of May and first part of June is the usual period of seeding.—Twentieth Century Farmer.

Feeding of Corn Meal.

Fattening hogs will usually finish faster on corn meal than on shelled corn, and many farmers favor corn meal for that reason. Experiments covering the quantity fed plainly show, however, that hogs given corn meal eat more feed in a given time than those on shelled corn. When both the feed eaten and the gains made are taken into consideration the profit in favor of corn meal is considerably less than many suppose. Corn and cob meal has been shown to have about the same value as pure corn meal. If any advantage is had from corn and cob meal, as is claimed by some stockmen, it no doubt largely comes from the bulk furnished by the particles of cob, which by rendering the contents of the stomach less compact or more porous helps to their easier and more complete digestion.—From Coburn's "Swine in America."

High Salaried Salesmen Wanted!

We want a number of high salaried salesmen. We are extending our business into new territory and can offer high salaried positions to a number of high-grade salesmen of experience and proved ability. Experience in our line is not necessary, but a practical knowledge of live stock and agriculture is valuable.

We Want Keen, Forceful Men

of strong personality and good habits, with brains, initiative and integrity, who are trained, skillful salesmen. We do not care to take up your time unless you are **persevering,** have **full confidence in your ability** and can furnish the best references that you are a **business getter** and **absolutely reliable.** But if you **have a good record as a successful salesman** and are looking for an opportunity to make more money, we would like to correspond with you with the view of arranging a personal interview.

These Positions Will Pay Big Salaries

to men who can make good in them, and the qualifications we specify will make them win.

We manufacture the Standard Line of stock food, live stock, poultry and veterinary preparations and sell exclusively to dealers. Our advertising and selling plan is the most attractive and best in this line of business, making a foundation for **sure and permanent success** for the right man. Write us at once.

CLAY, ROBINSON & CO.

Clay, Robinson & Company's LIVE STOCK REPORT

Vol. 20 | Chicago, Friday, May 6, 1910 | No. 18

Australian Mutton in United States.

There is no serious danger that mutton shipped to the United States from Australia will materially damage the market of the American sheep grower. The long haul of Australian ovine product across the equator makes it necessary to freeze the mutton in a solid mass, as refrigeration is out of the question for this class of meat. For many years frozen mutton has been shipped to England, but those who have seen it in the Smithfield market are well convinced that it will never compete with the fresh home-grown article. In the first place most of the sheep in Australia are of the Merino type and not good mutton producers. The long shipment in a frozen condition is said to toughen the fibre and makes it salable on a very cheap basis. While this is satisfactory to a certain class of limited wage earners in England, it is doubtful if such mutton could ever be made popular in this country with the masses. While the present price of mutton is so high it is possible to ship Australian goods at a profit, even with the tariff, but when domestic prices fall to the normal, as they are likely to when the range grass stock starts to come next July, Australian ovine products will find scant favor.—Live Stock World.

Keeping Sheep in Iowa.

One of the best paying things on the farm is sheep, and yet but comparatively few have become interested. There is profit because of the rapid increase. W. H. Weisbrod of Rossie, Ia., says 25 sheep will double the first season and the lambs if sold in the fall will average about $5@6 per head after six months' pasture and the clip would be worth $2 on an average. Charles S. Rogers of Greenville, Ia., who has western sheep, gets an average of $1.75 for clip, but thinks good Shropshires should average about $2.50. Frank Walker of Rossie, Ia., got $4.95 from the clip of one pet sheep and Rob Roberts sheared 52 lbs from three Cotswold sheep. Wilmer Goff of Ruthven, Ia., said his sheep run at a profit of $7@11 with each ewe he started with at the beginning of the year. He also said the pasturage was economical, as what would keep one cow or steer would keep eight sheep. Mr. Weisbrod said also he got $20 per acre out of land by keeping sheep on it. He got the weeds out, and after keeping sheep on a piece of land for five years he secured three fine crops of corn, averaging 60 bushels per acre. Mr. Rogers said he got $10 per acre out of land per year by keeping sheep on it and he further said: "There is more clear money in keeping sheep on land than any other farm animal and with less care." It seems to be generally agreed that large flocks of sheep are not likely to be as healthy or profitable as moderate size flocks, usually not more than 100 head. C. D. Zahrt of Spencer, Ia., thinks 70 head about right. We would like to see more corn-belt farmers raising sheep. Look it up and see if it will not pay. Clay, Robinson & Co. would be glad to furnish information and their unexcelled service to all farmers who desire it. Write us at any one of the ten leading markets.

Dry Farming and Live Stock.

Many cattle and sheep growers from all the Northwestern and Pacific states and provinces and the Mississippi and Ohio valleys will attend the fifth session of the Dry Farming Congress in Spokane, Wash., the first week next October, according to advices received by John T. Burns, secretary-treasurer of the organization, who says that the settlemen are learning that farming does not mean the extinction of the live stock industry. He added:

"The prejudice of the stockman against farming is natural. He sees his open range cut up into tracts and finds it somewhat hard to adjust himself to the new conditions, brought about by the transformation of the West by dry farming. But the progressive live stock growers have already recognized that the change does not mean the ruin of the industry. On the other hand they know that the adoption of new methods will result in a greater live stock industry even than was known in the palmy days of the open range.

"Iowa, populated by thrifty farmers, has four times as many cattle as Montana under the open range. Montana has about 5,000,000 sheep, according to Government reports. The state has an area of more than 146,000 square miles, while Ohio, with an area of slightly over 41,000 square miles, is credited with more than 3,000,000 head of the same class of live stock. Ohio has small farms and high-priced land.

"Colonel E. J. Bell, manager of one of the largest live stock outfits in Wyoming, who was a speaker at one of our sessions, asserted that on 5,000 acres, with 1,200 acres cultivated, they were handling about as much live stock as they handled formerly on 50,000 acres of open range. The lesson of this is that with dry farming supplementing live stock raising more cattle, hogs and sheep will be raised in the great stock growing sections.

"The old days of large herds grazing at random over vast areas of open range have gone forever. The range-fed steer is fast being supplanted by the beef fattened by feeding. One result of this is that the quality of the beef is better. The same is true of sheep. Consequently the live stock grower gets better prices for his product."

It's better to be out on the farm looking into the city, than to be in the city wishing yourself back on the farm. It's another case of easier to get in than out"—From the experiences of thousands who have tried it both ways.

Population Overtakes Production.

"Our population is increasing faster than our food production," declares Secretary of Agriculture James Wilson. He says serious trouble lay in the unnecessary deterioration of eastern farms. "It costs more to get things done in our country than most others," he added. "Until recent years lands were abundant and could be had for the asking. Railways pushed ahead of the home getters, the reaper came and a change came about. The farmer formerly compared with other workers at low wages, but a change has come. Production does not increase as fast as population and prices go up. It costs more to pay carriers, dealers, manufacturers and all classes now than ever before. The farmer gets good prices now, but it costs twice as much to grow things as it did ten years ago."

"King of Commission Men."

Willis O. Wing, one of Ohio's most successful farmers and feeders and a brother of Joseph E. Wing, the famous agricultural writer, associated with the Breeder's Gazette, writes our Mr. C. A. Kleman from his Woodland Farm near Mechanicsburg: "Our shippers here admit freely that we have the best bunch of lambs this year that we ever had and a party said that they probably would be the best 1,400 head that would go to Buffalo this year. I am not a bit afraid to consign them to the king of all commission men for sheep—yourself. I think I will ship to you at Chicago. This section shed most of its lambs last week. All seemed bound to get in before the price could get up."

Home for Aged Scots.

Members of the Illinois St. Andrew's Society are looking forward to "Dedication Day," at which time the corner stone of the only Scottish old people's home in the United States will be laid. On that day, some time in May, John Williamson, president of the society, will ply the trowel and preside over the formal ceremony attendant upon the celebration of a significant event in Scottish-American history.

For a number of years the Scots of Illinois have been endeavoring to raise a fund for the erection of a home for their aged and provide a fund adequate to sustain it properly. They started out to secure $100,000, of which $30,000 is to be used for the building and $70 000 for maintenance. So well have they succeeded that a site has been purchased at Riverside, Ill., and the building is so far along toward completion that the corner stone will be set in place in May, with the assurance that the home will be ready for occupancy July 1 next. Accommodation will be had for twenty-six people, men and women, aside from the employes required to provide for the comfort of the old folks.

By the time that the doors of the home are thrown open the Scots expect to have a clear title to the structure. Already James B. Forgan, treasurer of the fund, reports cash in hand amounting to $21,375.29, all of which is available for the building, in addition to $21,000 contributed to the sustenation fund, and which will be paid whenever required. The late Thomas Murdoch bequeathed $20,000 to the cause, and the late Robert Clark $1,000. Dr. John A. McGill gave $2,500; J. Ogden Armour, $1,000; Edward Morris, $1,000; John Williamson, $1,000; James B. Forgan, $500; Charles H. Dickey, $500; Mrs. Julia McEwan, $500; John Clay, $500 and Thomas Templeton, $500.

At the dedication ceremony addresses will be made by Rev. John Balcom Shaw, D. D., Rev. James MacLagan and James B. Forgan. James H. Rodgers and Mrs. Margaret Flaws Hunter will sing, while the Caledonian Pipe Band and the Juvenile Pipe Band will furnish Scottish music.

From noon on "Dedication Day," when the pipers begin their skirl, until 8 o'clock, when "Auld Lang Syne" is voiced, there will be a gathering of the clans at Riverside. Transportation arrangements have been made to accommodate several thousands of people and cars will be run at frequent intervals from West Harrison Street and Forty-eighth Avenue.

Scots large and Scots small, Scots old and Scots young, Scotch born in the Highlands and Scots born in the Lowlands, to say nothing of the army of Scots who claim this land as their birthplace, are expected to attend the dedication. It promises to be the largest gathering of Scots ever witnessed in Illinois.—Henry Barrett Chamberlin in Chicago Record-Herald.

Clay, Robinson & Company's
LIVE STOCK REPORT

Issued every Friday at Union Stock Yards, Chicago.

R. P. FALES.....Managing Editor
GUY FRIDLEY.....Associate Editor

Local and long-distance Telephone 'Yards 4194."
Cable address "Kelso," Chicago.

This paper will be sent to anyone, whether a customer of Clay, Robinson & Co. or not, upon receipt of 50c to pay postage for one year.

If you receive the paper for a time without having ordered it, please understand that it is sent you with compliments of Clay, Robinson & Co., to keep you posted on the markets.

When requesting change of address always give old as well as new postoffice.

Advertising rate $2.80 per column inch, each insertion. Special low rate for live stock sale advertising. If you intend holding a public sale write for prices on quarter-page, half-page or page space.

Address all communications and make all remittances payable to THE LIVE STOCK REPORT, Union Stock Yards, Chicago.

To Increase Australian Imports.

Fifty thousand Australian fresh mutton carcasses will be arriving in New York every week during the coming summer, according to the expectations of the company that has started the new branch of the meat business. This statement is made by a correspondent who was commissioned by the Breeder's Gazette to investigate the subject. He found that the two thousand carcasses which recently arrived were just as good as American mutton. Another consignment of four thousand carcasses is due to arrive May 26 and eight thousand a week later. Mr. Zohn, the New York importer, says that some fresh beef, as well as mutton, is coming from Australia and also from South America.

ONCE A BIG EXPORTER; BECOMING IMPORTER.

It is an interesting reversal of trade currents that this country, which so enormously exceeds any other country in the production of live stock, and for years has exported annually over 200 million dollars' worth of meats and meat products, should now become an importer. This country's sheep number almost 57 million, as compared with 83 million in Australia and 75 million in Argentina. Our exports of sheep on the hoof to the United Kingdom, once of considerable proportions, are now insignificant. This is due in no small measure to the record exports of sheep and lamb carcasses from Australia and Argentina.

OPINION OF SWIFT'S SHEEP EXPERT.

"Wholesale importation of Australian frozen mutton at New York does not surprise me," said Robert Mathison, chief of Swift & Co.'s sheep buying department. "There have been occasions when we could have imported it, but did not care to take the initiative. It will not be a permanent trade, as the condition in this country that has made importation possible will last only a few weeks longer, when grass sheep will begin to run freely. A decline of 1c per pound in the American sheep market would put up the bars against Australian mutton."

OUR BEEF EXPORTS DECREASE 40 PER CENT.

Regarding our exports of fresh beef to the United Kingdom, they have been on the decline since 1903, while our exports of beef cattle have been steadily decreasing, dropping in 1909 nearly 400,000 head from 1904. Argentina, so long prophesied as our formidable competitor in the English beef market, has now supplanted us in that class of product. Government figures, showing the growth of the Argentina fresh beef trade to the United Kingdom and the decline of our own, are so interesting that we quote them in full, pounds of fresh beef imported into the United Kingdom from the United States and Argentina during the years indicated following:

Year.	From United States.	From Argentina.
1898	257,819,072	12,128,256
1899	308,723,296	16,841,216
1900	321,130,656	46,173,344
1901	356,192,592	86,456,048
1902	256,532,080	103,459,776
1903	301,719,040	129,047,632
1904	268,833,632	187,630,352
1905	250,007,072	288,977,024
1906	271,784,128	313,142,256
1907	270,771,648	301,454,048
1908	160,399,904	400,369,088

Since 1898 the Argentina exports of fresh meat to the United Kingdom have increased over 3,300 per cent, while the exports from the United States have decreased 40 per cent. This comparison needs no explanatory comment. The beef cattle and the refrigerated beef that the United Kingdom formerly bought of us she now is securing from Argentina at a lower price than it could be obtained in this country.

Shown at Fort Worth.

"Heather Twain," champion junior bull at the recent National Feeders' and Breeders' Show, Fort Worth, Tex., owned by W. J. Miller & Son, Newton, Ia.

Registered Hereford bull "Christmas Lad," shown at the recent National Feeders' and Breeders' Show, Fort Worth, Tex., by W. N. Collier, Gale, Tex.

"Shenstone Albino," shown at the recent National Feeders' and Breeders' Show, Fort Worth, Tex., by Carpenter & Ross, Mansfield, Ohio. Grand Champion open class.

Badly Shattered Cattle Market.

Buyers have wrought havoc with the cattle market. Prices have been working lower for the past three weeks. This week was the worst of all. Rates went down with a crash. Chaotic conditions ruled at the start and trading on later days was not of an encouraging nature. It was another "meanest market of the year."

The decline from Monday of three weeks ago was 40@50c for good to prime beeves and 75c@$1.00 for common to medium lots. The loss for cows and heifers from the high spot of the year—Monday of last week—was 40@60c, while bulls sold 50c@$1.00 under the record range of late last week. Increased runs at the six western markets over the previous week and a year ago, light competition from exporters, decreased eastern shipping demand, ability of packers to dominate affairs, larger stocks in beef coolers and a falling off in consumptive demands were among the bearish factors sellers had to contend with. There is small wonder that such deep gashes were made in the price range. Cattle feeders are now propounding the question: "Are prices going to seek still lower levels?" This can be answered in the affirmative, if all signs do not go amiss, on all but choice desirable weight corn-fed steers. The fruit and vegetable season is near at hand. Fairly liberal runs of corn-fed cattle are in sight for the next several weeks. Slop-fed offerings will commence coming forward soon, with Kentucky having a record number of these on hand. After liquidation of corn-feds has spent its force then will grass steers from the Southwest and butcher stock from native pastures make their bow to the market in liberal numbers. This is always a signal for a sharp lowering of the price range on everything except the best corn-fed steers.

We repeat our advice of the past several weeks: Market all cattle, either steer or she stock, that are fat, as well as those of fair quality intended for the shambles within the next few weeks, as fast as practicable. Present and prospective conditions warrant this course.

Cows, heifers and bulls have not sold as high in years and as soon as Texas grassers make their appearance in goodly numbers, which will be in a few weeks, the above class of cattle will, we believe, decline anywhere from $1.00@2.00 per cwt. Hence our advice to ship immediately. Steers of good quality that need several weeks' feed to finish them, in our opinion, can be held, as in case prices don't suit owners in the near future they can be turned out and fed corn on the grass for the August and September market.

Little Doing in Wool Trade.

Deals in wool, either among farmer or range clips, have been the exception during the past week; at least, we have not heard of them. Eastern buyers are not able to close up many contracts in the West. Owing to the wool storage warehouses at Chicago and Omaha the grower is more independent, since he can store his clip if the bids do not suit him. In Ohio some medium wools have changed ownership at 23c. The Boston market continues slow. More business could be done there if dealers would shade their prices, as woolen manufacturers are showing more interest in the offerings. Recent sales there included Ohio XX at 34c, Ohio one-half and three-eighths bloods at 31 and 32c and one-quarter bloods at 33c, Michigan one-quarter bloods at 29c, one-half blood territory at 25c, low Montana one-quarter blood at 24½c and Oregon up to 22c. It is claimed that the transactions in fine medium territory increased the number of buyers, but they were greatly disappointed with the quality of the wool shown at the prices.

Disinfecting of Corrals.

We cannot emphasize too much the necessity of disinfecting premises where diseased sheep have been quartered. Scabies will live indefinitely under favorable conditions. In many instances sheep have become infected through being quartered upon premises where scabby sheep were kept some six to eight months previous. To disinfect any premises: Remove all litter and foreign matter from the pens, then saturate the ground, fences, posts, etc., with a solution containing 5 per cent carbolic acid or with a solution containing 2 per cent cresol. When cresol is used it must be mixed with soft soap, in order to render it easily soluble in cold water.

AMONG OUR CUSTOMERS

M. J. Jipson, Clay[county, Ia.: "Thank you for your market letters."

John Mitchell, Wright county, Minn.: "Cattle arrived all right. I am well pleased with them."

H. Blanchard, Howard county, Neb.: "Fat cattle are about all gone in this part of the state."

A. B. Nelson, Fremont county, Ia.: "Thank you for past favors and for your advice on the market."

C. B. Randall, Billings county, N. D.: "Cattle wintered well in this country. We should have early beef."

E. E. Flisher, Cherokee county, Ia.: "We thank you for past favors and hope to do business with you in the future."

M. S. Downey, proprietor of Lone Elm Farm, Mahaska county, Ia.: "I was well pleased with last sale of sheep."

Stark county, Ill., was represented on the Chicago hog market Friday of last week with a shipment from P. Termus.

John Blakely, Bureau county, Ill.: "Hogs are very scarce about here now, but there will be quite a number of cattle later on."

J. E. Major, Belmont county, Ohio: "I feel grateful for your best efforts in sale of sheep and lambs. I appreciate he same very much."

R. Whitely, Jr., Macoupin county, Ill., writes our Kansas City house: "Car of cows arrived in good shape. Am very well pleased with them."

Seohrest & Sons, Riley county, Kan., write our Kansas City house: "We are very well pleased with sale of cattle, receiving more than we expected."

J. E. McKee, Harlan county, Neb., writes our South St. Joseph house: "Think you sold six cars of cattle all right and thank you for your good service."

On April 27 our East Buffalo house sold for E. H. Walker, Branch county, Mich., 81 shorn western ewes of 111 lbs average at $7.25, summit for ewes.

L. D. Musselman, Logan connty, Ohio, marketed 188 head of 75-lb shorn lambs at East Buffalo on April 27 and our house obtained top price of $8.90 for them.

By consigning his 55 hogs, averaging 271 lbs, to our Chicago house on April 29 J. P. Nelson, Henry county, Ill., was enabled to obtain top price of day—$9.65.

W. S. Corsa, Jefferson county, Neb., writes our South St. Joseph house: "I wish to thank for your good work, and would say that sale of cattle is entirely satisfactory."

C. C. Charlson, Winnebago county, Ia.: "There are very few hogs in this part of the ocuntry and the spring crop of pigs was greatly reduced. Cattle are very scarce."

Colt & Rhoades, Bent county, Colo., were represented on the East St. Louis market April 27 with two cars of 68-lb wooled lambs which our house sold at $9.00, top for wooled offerings.

Hallum & Finseth, Burleigh county, N. D.: "Your favor, enclosing check for $1.20 as refund in freight on car of cattle shipped you last fall, received. Accept our thanks for same."

Pinnacle for cattle at East St. Louis on April 29 was $7.65. This price was obtained by our house for 21 head of 1,278 lbs average, marketed by A. S. Mawhinney, Page county, Ia.

The 505 wooled lambs of 90 lbs average which sold at top price of $9.90 on Chicago market April 27 were marketed by Perry Reeder of Larimer county, Colo., and handled by us.

Bedford county, Tenn., was represented on the East St. Louis market April 27 with a lot of native ewes for which our house secured top price of $8.00, they belonging to Tillman & Mason.

Our South St. Joseph house topped the market April 27 with 69 hogs, averaging 246 lbs, at $9.35 for Jacob Claassen, Gage connty, Neb., 5c per cwt above any other load on the market.

W. F. Widdick, Webster county, Ia., a regular patron of our firm and who has one or more shipments to the Chicago market every week, had in both cattle and hogs Thursday of last week.

On the Thursday hog market of last week we had the pleasure of handling hogs for the following prominent stockmen: C. P. Downing, Monona county, Ia.; Craig & C., Lagrange county, Ind.; E. Streed, Ida county, Ia.; E. Biggins, Peoria connty, Ill.; D. Dutler, Benton county, Ia.; A. Effinger, Lake county, Ill.; Pyle & Hanson, Franklin county, Ia.; Uhl & Bloom, Buchanan county, Ia.

B. J. Moore, Ringgold county, Ia.; W. D. Wilson, Grundy county, Ia.; J. Leibee, Henry county, Ill., regular and prominent shippers, sold cattle through our Chicago house on Wednesday of last week.

H. D. Kisor, Rice county, Minn.: "I was on the South St. Paul market with the cattle and was treated fine by your people. Thank you for your kindness in the past and good luck to you in the future."

The three cars of 60-lb wooled lambs which made $8.75, pinnacle for wooled stock at East St. Louis on April 28, were handled by our house and marketed by Henry W. Christie, Mitchell county, Kan.

Thatcher A. Parker, Vigo county, Ind., writes our Kansas City house: "Goats came last night. This morning they were hard at work clearing brush. I am well pleased with the purchase. Thank you for courtesies."

Extreme top on the South St. Paul hog market April 29 was $9.30, which our house obtained for one load of 270 lbs average, belonging to Joachim Schemel, Renville county, Minn., being the only full load bringing the price.

Dane Bros., Dekalb county, Ill.: "I am much pleased with the REPORT and do not like to miss any copies. Thank you for past favors. Enclosed find $1.50 for which please send me the REPORT and Breeder's Gazette for one year."

Stuebe Bros., who are one of the largest and most successful shipping firms in Minnesota, with headquarters in Brown county, had in their weekly consignment of cattle and hogs to our Chicago house on Thursday of last week.

You Have Been Tricked

If you have listened to the statements of some parties who have told you that Clay, Robinson & Co. were too big and busy to handle your shipments to advantage, and, what is worse, you were not considered by them smart enough to detect the trick.

It is true we have a big business, but it is made up of small shipments. Our force is large and we are able to look after the details of handling any shipment, whether large or small.

Again, a big firm is a healthy firm. It has grown because it has followed up-to-date methods. If you believe in bigger things, live men and methods, and best of service, ship to

Clay, Robinson & Co.

G. L. Hedstrom, Knox county, Ill., writes our Kansas City house: "The 44 calves received and am well pleased with them. I want to thank the buyer who selected them. Other good judges of cattle saw them and say they are a good bunch."

P. C. Heninger, Keokuk county, Ia.: "There are not as many cattle on feed as usual in this part. Hardly any hogs are to be had. No corn has been planted. Oats and fruit were damaged by recent freezing weather. Corn is worth 60c per bushel."

Eight dollars and twenty-five cents was 15c per cwt higher than any other shorn western wethers brought on the Chicago market April 28. This price was obtained by us for 90 head of 121 lbs average, they belonging to M. S. Downey, Mahaska county, Ia.

J. H. Runner, Marshall county, Ia.: "I never had a load of hogs sold that pleased me better than the one you handled for me. The price was right at the top and only 95 lbs shrink on the load. Thank you. Anything I can send your way I will be glad to do so."

A. & J. Mitchell, extensive farmers and stockmen of Wright county, Minn., had a shipment of cattle to our South St. Paul house April 27 which averaged 1,099 lbs and brought $6.90. These cattle were purchased by our house there in September at $3.90, averaging 847 lbs.

On April 27 our Sioux City house topped the cattle market with their sale of 1,394-lb steers at $7.60 for L. McFarlane, Charles Mix county, S. D. Next highest sale was $7.50, which they also obtained for one load of 1,381-lb steers, owned by J. C. Howard, Antelope county, Neb.

S. L. Woodburn, well-known farmer and feeder, Rock Island county, Ill., was on the Chicago market April 27 with 41 head of 1,074-lb cattle for which we secured $7.60. Mr. Woodburn was delighted with the sale, which was relatively higher than cattle from his neighborhood shipped to another firm made the same day.

W. Pruett Graham, Franklin county, Ky.: "Enclosed find check for $3.00 for REPORT and bulletin which I have been sending to me gratis, but on account of the great good I derive and also the pleasure in reading them I feel that I want to do my part in promoting their welfare."

Gale & Farr, extensive sheep and lamb feeders, Weld county, Colo.: "We beg to acknowledge receipt of your favor with duplicate account sales, being cleanup of our feeder line. We take this opportunity to thank you for the attention which you have shown us and the sales you have obtained."

Frank Hummel, Pulaski county, Ind.: "Find $1.00 enclosed for REPORT for two years' subscription and expansive file as premium. I think the REPORT a good paper and don't want to be without it. We are having disagreeable weather now (April 27). I wish Clay, Robinson & Co. success."

Honorable George M. Wilber, well-known cattle feeder of Union county, Ohio, and a member of the Ohio House of Representatives: "Of several agricultural journals that come to my desk each week I find more condensed live stock news in the REPORT than in any other. Enclosed find $1.00 for which continue sending me the paper for two years."

Pinnacle for hogs at Chicago on April 27 was $9.60, which we obtained for two different lots as follows: For Bell & Lutz, Fremont county, Ia., 72 head of 232 lbs average and for Schultz Bros., Carroll county, Ill., 75 of 243 lbs average. These sales were 2½c per cwt higher than any other hogs brought and also top for their weights by 5c per cwt.

H. E. Chichester, Peoria county, Ill.; A. B. Metzinger, Rock county, Wis; A. Chambers, Clinton connty, Ia.; Paullina Live Stock Co., O'Brien county, Ia.; J. C. McConaughy, Jones county, Ia.; T. F. Weidauer, Pocahontas county, Ia., each had a shipment of hogs on the Chicago market Wednesday of last week, selling the same through our house.

H. J. Cornish, the popular live stock shipper of Porter county, Ind., who has from one to five loads of stock on the Chicago market every week, and who is a regular patron of our firm, had in a shipment of cattle Wednesday of last week. He wrote a Clay, Robinson & Co. post card to a friend of his to the following effect: "Another satisfactory cattle sale."

John C. Connell, successful farmer and feeder, Gregory county, S. D., sold 21 head of 1,351-lb beef steers through our Chicago house April 29 at $7.25. He complained bitterly of poor railroad service, but highly praised Clay, Robinson & Co. for the excellent handling of the cattle and the price obtained. This was his initial shipmet to us. Mr. Connell said that they were long on corn in his country, but short on cattle and hogs. Corn is selling a little under 40c per bushel, against 75c one year ago.

Below will be found the names of prominent parties in live stock circles who sold cattle shipments through our Chicago house late last week: S. M. Miller, Montgomery county, Ill.; Ed. Dugan, Greeley, county, Neb.; A. Yearion, Iowa county, Ia.; G. Bartz, Henry county, Ill.; J. H. Herriman, Knox county, Ill.; Chas. Toyne, Muscatine county, Ia.; R. H. McKenzie, Dekalb county, Ill.; Lisle L. & T. Co., Dupage county, Ill.; A. Olson, Monona county, Ia.; G. M. Hannaford, Racine county, Wis.; W. Streed, Ida county, Ia.; A. D. Long, Shelby county, Mo.

C. J. Ritchie, prominent farmer and feeder and a fancier of Shorthorn cattle and Poland-China hogs, represented McLean county, Ill., on the Chicago market Thursday of last week with two loads of cattle and one of hogs which we sold to his entire satisfaction. Mr. Ritchie has been a constant and liberal shipper to Clay, Robinson & Co. for the past ten years. His nineteen-year-old son, Stanley Ritchie, accompanied him to market and was an interested and keen observer of how business is conducted at the Yards. Mr. Ritchie stated that he would soon retire from active management of his farm and that his son would take charge of both the farming and the feeding operations, and we bespeak for him a successful career.

Joseph T. Stillinger, represented Montgomery county, Ia., on the Chicago cattle market Wednesday of last week with 36 head of 975-lb heifers and steers mixed for which we obtained $7.50, top for this class of offerings. These cattle were Angus yearlings and of his own raising and feeding. "I got every bit as much money as I had expected," he said. Mr. Stillinger is prominent in Iowa Aberdeen-Angus cattle breeding circles, raising both grade and pure breds. He has been a liberal feeder of live stock for the past 24 years and has been shipping to Clay, Robinson & Co. He patronized only one other firm with three loads of cattle during all of those years, which, as he says, "is positive proof that Clay, Robinson & Co. render the service that satisfies."

Fred Tiedeman, Benton county, Ia.: "Thank you very much for sending me your market reports all this while."

Samuel Day, Johnson county, Mo., writes our Kansas City house: "Cattle arrived O. K. and I am pleased with your purchase and all transactions."

A. C. Balsford, Delta county, Colo.: "Please find enclosed 50c for year's subscription to REPORT, which I always read with great interest and much profit."

C. D. Scott, Oakland county, Mich. "I have been getting your REPORT a long time for nothing. I think it is a fine paper. I send you 50c to pay for it one year."

W. N. Hough, Logan county, Ohio: "I have been receiving the REPORT for quite a while and appreciate it very much. Enclosed find 50c for a year's subscription."

I. J. Atwood, breeder and feeder of live stock and president of the Vermilion County Sunday School Association, Vermilion county, Ill.: "I am getting your REPORT. Thanks for your kindness."

It was May 3 that our East St. Louis house topped the hog market 2½c per cwt when they landed 66 of 264 lbs average and 70, averaging 257 lbs, at $9.37½. Both lots were marketed by D. B. Mayfield, Cooper county, Mo.

T. E. Burner, well-known farmer and feeder, Hancock county, Ill., was at Chicago on Monday with a shipment of cattle to us and reported hogs scarce and fewer cattle on feed in his section than he has ever known.

John Blanchard, prominent in Wisconsin real estate and feeding circles, with headquarters at Columbus, had 236 shorn western lambs of 77 lbs average at Chicago on May 2 and we landed them at $9.00, top by 10c per cwt.

Wm. Gutches & Son, Floyd county, Ia., writes our Kansas City house: "Cattle arrived in good shape. They are just what we wanted. Thank you for your attention and the choice you made for us. You will hear from us in the fall."

Summit for shorn lambs at Chicago on May 3 was $8.90. Our sales at this figure follow: For State Agricultural College, Larimer county, Colo., 460 of 85 lbs average and for F. P. Howarth of same county 1,156 head, averaging 72 lbs.

It was April 27 that our Sioux City house sold two loads of steers at $7.15 for Gilbert Hoogner, Cedar county, Neb. They bought these cattle for Mr. Hoogner in October at $4.50 and they showed a gain of 250 lbs over the weights at that time.

Miller Bros. & Yount, well known shippers and feeders from Olds, Iowa, had seven carloads of cattle and hogs on Wednesday's market. Both Sam Miller and Mr. Yount accompanied this shipment and expressed themselves as being well satisfied with the sales.

W. S. Prickett, Houghton county, Mich.; William Mann, Oscoda county, Mich.; Uhl & Bloom, Buchanan county, Ia.; D. R. St. Clair and H. Rose & Co., Faulk county, S. D., each had a shipment of hogs on the Chicago market May 3, same being handled by us.

J. R. Hutchison, manager of the W. E. Harris cattle affairs in Custer county, Mont., writes under date of April 29: "We had a nice shower last night, which we needed very badly, as the continued dry weather was causing some uneasiness. Stock of all kinds doing fine."

Charles Scheerer, Larimer county, Colo.: "I want to thank you for the good sales you made of four loads of lambs. You will still find me, as heretofore, speaking a good word for Clay, Robinson & Co., for I feel as though yours is the only reliable sheep commission firm."

Our Sioux City house topped the cattle market May 2 with 36 steers, averaging 1,159 lbs, at $7.75 and the cow trade with a lot at $7.25. These cattle were fed and shipped by John Scott, Charles Mix county, S. D. This sale of steers was the highest on that market for about two weeks.

R. M. Divine, Elk county, Kan.: "Very few hogs in this county, and don't know of a car of steers on feed. A few half-fat steers off grass will be shipped in July or August. Farmers about all done planting corn. Cattle most all out on grass. Need rain pretty badly for grass."

"I was certainly not dissatisfied with the price my two loads of cattle brought when I got out in the Yards and found the market was in such bad straits." This is the way G. A. Smith, Kingsbury county, S. D., expressed himself regarding our selling service for him on Monday at Chicago. He is a well and favorably known feeder in his part of the state.

L. Goettsch was on the Chicago market Monday from Cass county, Ia., with 18 head of 1,173-lb steers which we sold at $7.20, a price that was to his satisfaction, considering the dull and lower market. These cattle were grade Shorthorns and of his own raising and feeding. He is a prominent breeder of Shorthorn cattle. This was his initial shipment to us.

L. E. Wallace, associated with S. W. Gale, an extensive dealer in and feeder of cattle and hogs, Knox county, Ill., was at Chicago on Tuesday with a load of heifers which were handled by us to his entire satisfaction. Mr. Wallace stated that there were a good many brood sows in that part of the state, but farmers were having bad luck with pigs. The supply of cattle on feed is very light.

Peter Britt represented Hancock county, Ia., on the Chicago market Monday with 19 head of 1,331-lb beef steers for which we obtained $7.75. These cattle were branded grade Angus, bought in South Dakota at $4.25, averaging 975 lbs when put in the feed lot. They did not get on a full feed of corn and clover hay until January and made an excellent account of themselves the past few months.

Included in the parties who are well known either in shipping or feeding circles in their respective localities and who favored us with their hog shipments on Monday of this week were: Bell & Lutz and J. C. Van Natta, Fremont county, Ia.; A. W. Hawley, Humboldt county, Ia.; Ed. Biggins, Peoria county, Ill.; Denton & Putman, Pottawattamie county, Ia.; H. C. Miller, Guthrie county, Ia.; C. P. Downing, Monona county, Ia.; Paine & McDonald, Kossuth county, Ia.; C. Lewison, Mower county, Minn; E. B. Nelson, O'Brien county, Ia.; M. Sanford, McCook county, S. D.; John Mackin, Marshall county, Ia.; P. F. Weidaner, Calhoun county, Ia.; J. H. Charlton, Pocahontas county, Ia.; A. F. Bright, Wabash county, Minn.

Cass county, Ia., was represented on the Chicago market Monday with several shipments, the owners being R. P. Bain, A. G. Bain and G. J. Parkinson. All these gentlemen are prominent feeders and farmers. The former Mr. Bain has been a regular patron of Clay, Robinson & Co. for the past several years and said he got more than he expected for his cattle when he learned of the wretched condition of the market. His 25 head of 912-lb steers brought $7.30. The latter Mr. Bain had in 31 head of rough, heavy calves which we sold at $4.75@5.50. This was his initial shipment to us and he expressed his satisfaction with the way they were handled. Mr. Parkinson had in a mixed load of cattle and he also said that we secured prices fully as high as he anticipated, with the trade in such bad shape.

We wish to make mention of the following progressive farmers and feeders who marketed cattle through our Chicago house Wednesday of last week: D. J. Todd, Dekalb county, Ill.; R. Bada, Mills county, Ia.; J. W. Farrow, Fulton county, Ill.; J. M. Bay, Mercer county, Ill.; T. H. Qusen, Warren county, Ia.; F. J. Foust, Whitley county, Ind., John Phalen, Piatt county, Ill.; P. W. Crane, Racine, county, Wis.; W. A Smith, Clayton county, Ia.; A. Yearin, Iowa county, Ia.; B. S. Miller and R. F. Duncan, Louisa county, Ia.; L. Fisher, Fulton county, Ill.; W. W. Bonderman, O'Brien county, Ia.; A. Chambers, Sioux county, Ia.; O. Wundschneider, Benton county, Ia.; D. T. Nicoll, Cedar county, Ia.; N. W. Woodside, Adair county, Ia.; H. E. Thayer, Henry county, Ill.; R. R. Baker and F. D. Wood, Muscatine county, Ia.; R. Mack, Union county, Ia.; J. J. Kirkwood, Delaware county, Ia.

L. Nordyke, representative farmer, breeder and feeder, Miami county, Ind., was at Chicago on Wednesday of last week with a load of cattle of his own feeding to us and ordered the REPORT for another year. He has been shipping live stock to our firm for the past 12 years. Mr. Nordyke is a fancier of Duroc-Jersey hogs and Aberdeen-Angus cattle, handling both the grades and pure breds of the latter class. He is of the opinion that where available brood sows should be bought regardless of price, as it will be fully two years before a normal crop of hogs will be available for the market, and also opines that the farmer who feeds cattle should raise the same and start feeding them from calf age and have them in a marketable condition when they reach the two-year-old age. Mr. Nordyke says that Southern Indiana has a light crop of pigs, due to farmers selling off their brood sows so freely when prices were at $10@11.

Walter L. Morris, Story county, Ia., was at Chicago on Monday with 40 head of 1,418-lb branded western beeves which were sold by us at $7.50. Our South Omaha house bought these cattle last November at $4.60, averaging 1,160 lbs. They were put in the feed lot Dec. 1. He stated that he got as much money as he expected in spite of the severe break in the market. Mr. Morris is a prominent breeder of Shorthorn cattle and Duroc-Jersey hogs. He has been shipping to Clay, Robinson & Co. for the past eighteen years and has been a subscriber to the REPORT for ten years. R. L. Johnson, well-known farmer and feeder of the same place, had in three loads of cattle which we landed at $7.50. "This is my first shipment to Clay, Robinson & Co. and I will certainly come again, as I have no complaint to make of the way the cattle were handled and the price received, considering the miserable condition of the trade," remarked Mr. Johnson.

The Middle West was liberally represented at Chicago on Monday with cattle shipments and no small portion of them were sold by our house, a big number being in one and two-load lots, which confirms our claim that the business of Clay, Robinson & Co. is made up mostly of small shipments. Included in the list, who are either prominent in feeding or shipping circles, were: F. H. Plumer and F. W. Ouren, Mills county, Ia.; J. H. Larson, Dekalb county, Ill.; P. C. Nelson, Burt county, Neb.; C. M. Lucas, Dan Schaaf and Bell & Lutz, Fremont county, Ia.; Wissmath Packing Co., Lee county, Ia.; E. Biggins, Peoria county, Ill.; J. L. Carrigan, Harrison county, Ia.; R. H. Allerton, Piatt county, Ill.; Elkhorn Valley Investment Co., Boyd county, Neb.; J. Riser & Son and C. A. Mark, Madison county, Ia.; W. Krinkie, Sam Welk and Hans Manson, Faribault county, Minn.; Denton & Putman, Pottawattamie county, Ia.; S. Vanbuskirk, Plymouth county, Ia.; M. C. Cain, Knox county, Ill.; J. H. Charlton, Pocahontas county, Ia.; Stuebe Bros. and A. C. Sherman, Brown county, Minn.; O. P. Wright, Marion county, Ia.; W. G. Robson, Green county, Ia.; W. Williams, Iowa county, Ia.; A. F. Bright, Wabash county, Minn.; George W. Royer, Redwood county, Minn.; Green & Beatty, McHenry county, Ill.; A. T. Jones, Clay, county, Ia.; M. Hughes, Hamilton county, Ia.; John Owens, McLean county, Ill.; M. T. DeWolf, Cottonwood county, Minn.; C. Lewison, Mower county, Minn.

Nebraska Beeves at $8.35.

On May 4 at Chicago Clay, Robinson & Co. scored the top cattle sale over any other firm that day by 30c per cwt by landing Nebraskas at $8.35. This was in the face of the fact that there were 15,000 cattle on sale that day. The price was also the top for the week by 5c per cwt. These cattle were fed and marketed by D. Campbell of Ansley, Neb., who is a prominent farmer and feeder of that section. The lot comprised 16 head of grade Herefords of 1,483 lbs average and the price obtained was $8.35. The cattle were mostly branded westerns, bought in Nebraska by Mr. Campbell at a cost of $4.30. They were put in the feed lot Nov. 4, averaging 1,110 lbs. For the first three months they were fed a light ration of corn and alfalfa. After that they were given all of the corn and alfalfa that they would clean up. Last winter was the first time Mr. Campbell ever sold stock through Clay, Robinson & Co. He stated that the price secured for his cattle on Wednesday was the highest he ever obtained and he was highly delighted with the whole transaction.

The next highest sale of the day was $8.15. Clay, Robinson & Co. also obtained this figure for 16 head of 1,605-lb offerings from South Dakota. They were fat but coarse, branded westerns and mostly Shorthorns.

Severe Drop in Sheep Market.

Colorado is keeping the market hoppers of the River markets and Chicago amply supplied with lambs, while Ohio and Michigan are pouring offerings into those of East Buffalo and Pittsburg. To make matters worse, the consumers are in rebellion against the high price of dressed meats and have cut their bills down to a minimum. Another depressing feature was the severe drop in prices for cattle and hogs, while the vegetable season is having its customary effect. Packer buyers have had things more their own way than usual, and they certainly have not been napping. This is indicated by a price drop of 50@75c for sheep and yearlings and 90c@1.25 for lambs from the high spot in April. Not until the Colorado-fed stock is well out of the way and eastern feed lots are well emptied is there hope for any improvement in the market, as packers are extremely bearish and consumptive demand down to very low levels.

Kansas College-Fed Hogs.

Under the direction of the Agricultural College of Kansas at Manhattan, an experiment on the different feeds has just been completed on a string of 210 of hogs. Early last week 180 of these hogs were marketed at Kansas City at the top price on the market for that number—$9.50. They averaged 260 lbs. These hogs were fed in 3 lots on that many different rations. Each lot received the same attention otherwise, and a strict account was kept of the cost of the different rations.

Lot No. 1 was fed on a ration composed of 90 per cent ground corn and 10 per cent tankage. In the 50 days fed they showed a gain of 76 lbs at a cost of $5.18 per cwt.

Lot No. 2 had a ration consisting of ground corn, 30 per cent shorts and 8 per cent tankage. The cost was $4.98 per cwt and the gain 87 lbs.

Lot No. 3 had a ration consisting of all the ground corn they would eat, and alfalfa hay furnished in racks. The gain was 70 lbs and the cost $5.64 per cwt.

CHICAGO MARKET REVIEW, AND OUTSIDE MARKETS BY WIRE

Current Comment and Chicago Quotations to Wednesday Noon.

Receipts and Shipments.

Following shows official receipts and shipments of cattle, hogs and sheep at Chicago for the past week:

NATIVE BEEF STEERS.

Range of prices and buik of sales of native beef steers this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Range.		Bulk.	
This week.....	$5.50	*8.35	$6.75@	7.75
Previous week.....	5.75	8.50	6.90	8.00
Year ago.....	5.00	7.25	5.80	6.80
Two years ago.....	4.75	7.30	6.00	7.05

*Soid by Clay, Robinson & Co.

Receipts Thnrsday of iast week totaied 6,749. An uneven, dull and generally 10c iower market. Demand from all sources was very iimited. Top for carload lot was $8.10, for 1,430 lbs average. Marketing Friday 1,919. A draggy affair, although prices held about steady. Practicaily oniy one big packer was in the trade. Best offerings at hand included 37 head of 1,370 lbs average at $7.70. The deciine from finish of previous week was 25 @35c.

Chaotic conditions ruled in the cattle trade at the start of this week. Everything was in buyers' favor from the start and became even more favorable as the day's session grew oider. A totai run of 24,987 was a few thousand above popular guesses aud stood arennd 10,000 above actual trade requirements. Beef steer prices were siashed viciously, 15@25 being cnt from the range in force at iast week's close. There has been a terriffic smash-up from Monday of two week's ago, the good to prime kinds showing 25@50c and others 75c@$1.00 ioss. A iiberai supply was unsold by the noon hour, and not a few of the plainer iots had not found outiet at the finai trading honr. Eastern shipping demand was iimited chiefly to the best grades and competition from exporters was light. Thus locai buyers had the market for other kinds under their care, and they made the most of the opportunity. The weather was miserabie, a coid, drizzling rain putting cattle in poor looking condition and caused them to take on very little "fili." Top was $8.30 for 16 head of prime 1,522-lb Angus, and a few other iots, averaging 1,360 to 1,532 lbs, went at $7.90@8.25. Buik of business was at $6.75@7.75, with piain to decent iight offerings at $6.00@6.25 and tailings down to $5.50. Run Tuesday 2,439. Light demand from ail sources. While trade rnied duli, prices were about steady. Most of the good iots availiable were not shown. Best offerings soid was one load of 1,273 lbs average at $7.40. Receipts Wednesday 15,000. Market had better iife and prices ruled steady to 10c higher. Top beeves went at $8 35, we obtaining this price for 16 head of 1,483 ibs average, belonging to D. Campbeil of Nebraska. Next highest price was $8 15, this sale aiso being negotiated by us for 16 head of South Dakotas, averaging 1,605 lbs.

Revised qnotations for ali grades of native beef steers:

Extra choice to prime steers.....	$7 85 @	8 35
Good to choice steers.....	7 40	7 75
Medium to good steers.....	6 85	7 30
Plain to fair short-fed steers.....	6 25	6 75
Common to fair steers.....	5 60	6 15
Extra choice to prime yearling steers.....	7 75	8 10
Good to choice yearling steers.....	7 25	7 65
Medium to good yeariing steers.....	6 50	7 00
Common to fair yeariings.....	5 50	6 25
Good to choice stags.....	6 25	7 00
Common to medinm stags.....	5 50	6 00

COWS AND HEIFERS.

Prices for cows and heifers broke mostly 10c Thursday of iast week. There was poor cail from both locai and outside sources. Rates were about steady Friday and showed no quotable change from previous week's finish.

Buyers pounded the market at start this week down 15@25c from iast week's finish, bulk showing 25closs. As compared with Monday of previous week the deciine was 25@40c. Suppiy was liberal and competition iighter than for some time. Steady prices were obtained on Tuesday, but the market had mean tone. Some grassy stuff showed up, but did not show enough e idence of green feed to cause very sharp discrimination against them. Generaiiy a 15@20c lower deai Wednesday. Buyers were extremeiy bearish and intent on getting prices on much lower basis.

Revised quotations for ali grades of cows and heifers:

Extra choice to prime yearling heifers.....	$7 00 @	7 50
Choice to prime export heifers.....	6 50	7 25
Fair to good heifers.....	5 75	6 25
Common to plain heifers.....	4 75	5 50
Choice to prime cows.....	6 50	7 00
Good heavy cows.....	5 75	6 25
Medium heavy cows.....	5 15	5 60
Piain to fair cows.....	4 25	5 00
Plain to good cutters.....	3 40	4 00
Medium to good canners.....	3 00	3 30
Common to fair canners.....	2 50	2 90

BULLS.

Prices held steady for bulls on Thnrsday of last week and there was no quotable change on Friday. As compared with finish of previons week rates were mostly 25c higher.

Bull market was hit a hard blow at the start of this week. As compared with last week's close prices siumped 40@50c after the first ronnd or so. One class was hit as hard as the other. A very desirabie class of bolognas had to go at $5.30 and it took very good butchers to mske $5.85. Prices continued on the toboggan Tuesday, the decline being 10@15c. Rates were iowered mostiy 10@15c Wednesday.

Revised quotations for ali grades of bulls:

Good to choice bntcher bulis.....	$6 00 @	6 40
Fair to choice export bnlis.....	5 50	6 00
Piain to medium butcher buiis.....	5 15	5 75
Good to choice heavy bologna bnlis.....	4 75	5 00
Common to medium bologna bulis.....	4 25	4 65

CALVES.

A strong to 25c higher market for caives Thursday of iast week. Assorted offerings made $8.60. Trade showed strength Friday, with a few prime offerings reaching $8.75. Rates indicated 25@50c advance over finish of previous week, in spite of the week's total being within 722 of record rnn of 16,541 that week.

Calf buyers were very bearish on the opening market day this week, as local prices were relatively higher than in the East. Bulk of arrivais went 25c iower than iast week's close. The practical top was $8.25, we landing several lots at this figure. Generai demand was very weak. Tuesday's market received a bad jolt. Prices were 50@65c down from high time last week and bulk sales 25@35c off from corresponding day last week. Prime calves made $8 00, most being assorted. Relatively few saies were made untii after the noon honr. Prices advanced mostiy 25c Wednesday.

Revised quotations for all grades of caives:

Good to prime vealers.....	$7 75 @	8 25
Poor to fair vealers.....	5 75	7 50
Good to choice heavy calves.....	5 00	5 50
Poor to fair heavy caives.....	3 50	4 75

STOCKERS AND FEEDERS.

Top price and bulk sales of stockers and feeders this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Top Feeders.	Bulk Feedsrs.	Bulk Stockers.
This week	$0.60	$5.50@6.00	$4.75@5.25
Previous week	6.80	5.50 6.25	4.85 5.50
Year ago	5.75	5.00 5.50	4.25 4.90
Two years ago	5.75	4.65 5.35	4.00 4.65

Although supplies of stockers and feeders on initial market day this week wsre moderate, the severe break in beef steers and a very small demand from all sources caused a price break of 15@25c from last week's finlsh. Outside demand showed some improvement on Tuesday, yet tone of trade continued dull. Prices were about steady. Slaughterers have gotten a liberal quota of the strong weight offerings thus far this week. Fairly active trade Wednssday at prices 10@15c higher.

Revised quotations for stocker and feeding cattle:

Good to choice feeders	$5 60 @	6 10
Poor to medium feeders	5 00	5 50
Good to choice stockers	4 90	5 25
Plain to medium stockers	4 50	4 85
Inferior to common stockers	3 75	4 25
Good to choice stock heifers	4 65	5 00
Common to medium stock heifers	4 25	4 50
Plain to good thin young cows	4 25	4 75

MILKERS AND SPRINGERS.

Revised quotations for milkers and springers:

Choice to prime	$60 00 @	70 00
Medium to good	45 00	55 00
Common to plain	35 00	40 00

Hogs.

Bulk sales of hogs of respective weights this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Bulk 200 to 250 lbs.		Bulk 260 lbs and heavier.		Bulk 135 to 195 lbs.	
This week	$9.30 @	9.40	$9.30 @	9.45	$9.25 @	9.35
Previous week	9.40	9.00	9.45	9.60	9.35	9.55
Year ago	7.05	7.40	7.15	7.45	0.95	7.25
Two years ago	5.45	5.65	5.40	5.65	5.40	5.60

Receipts of hogs Thursday of last week 11,602. Opening 10@15c higher on speculative and shipping demand, the usual happened and more than half of the advance was lost before the close. A bad break in provisions had a depressing effect. Top $9.65 and considerable $9.50@9.60 trade was done on high spot. Howevsr, more lots sold at $9.50 in the session than at any other price, as it bought mixed early and good ones late. Heavy sows in odd lots were discriminated against, those of 350 to 400 lbs average being thrown out of straight loads and selling in small lots at $8.75@9.00. Run Friday 6,743. About same kind of a market as previous day. Early trade on a $9.50@9.60 basis, with top at $9.65, obtained by us, but finish was like previous session, $9.47½ taking offerings that brought $9.50 early. Saturday supply 4,779. Market not quotably changed from previous day's average, top bsing $9 60 and bulk going at $9.50@9.55, which showed 5@10c gain over the previous week's close.

Hog sellers had to take a severe drubbing Monday of this week. A run of 29,949 was sevsral thousand above expectations. To make matters worse receipts were liberal both east and west and only normal shipping ordsrs could be uncovered. Most business was on a 25c lower basis than last Saturday. Top $9.42½, with bulk sales at $9.25@9.35. Quality was good. Marketing Tnesday 10,299. Opsning 5@10c higher than low spot previous day, market closed with part of the advance lost. Top $9.40 and bulk trading $9.25@9.35. Receipts Wednesday 15,000. Generally a 10c higher market, with top at $9.50 and most trading $9.35@9.45.

Revised quotations for all grades of hogs:

Fair to choice heavy shipping	$9 40 @	9 50
Fair to choice butchers	9 40	9 50
Fair to choice medium weight	9 35	9 45
Good to choice assorted light shipping	9 35	9 50
Poor to good heavy packing	9 15	9 35
Poor to good mixed packing	9 25	9 40
Poor to good light bacon	9 30	9 40
Pigs, 115 to 140 lbs	9 00	9 25
Pigs, 110 lbs and under	8 50	9 00
Stags	10 25	10 75
Boars	4 00	5 50
Governments	3 00	6 00

Sheep and Lambs.

Following shows top prices and bulk of sheep and lamb sales this week, with comparisons, as compiled by CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT:

	Sheep Top.	Sheep Bulk.		Yearlings Bulk.		Lambs Top.	Lambs Bulk.	
This week	$7.75	$7.00@7.50		$8.00@8.25		*$9.10	$8.40@	8 90
Last week	*8.25	7.25	8.00	8.00	8.25	*9.90	8.75	9.40
Year ago	6.00	5.75	6.25	6.75	7.00	9.45	7.65	9.00
2 years ago	6.65	4.25	5.90	5.85	6 35	7.75	6.65	7.55

*Obtained by Clay, Robinson & Co.

Marketing of sheep and lambs Thursday of last week 10,174. A weak to 10c lower trade than close of previous day. We sold 90 head of 121-lb shorn western wethers from Iowa at $8.25, being 25c per cwt higher than any other full load lot of sheep made. Most trading in ewes and wethers at $7.00@7.90. One fancy lot of 83-lb shorn western lambs reached $9.50, but bulk of trading at $8.75@9.35. Twenty-two head of 39-lb spring lambs brought $11.50. Run Friday 3,122. It was gensrally a 10@15c lower deal, with trade dull and sticky throughout the day. A very good fat class of 102-lb shorn western wethers had to go at $7.85. A double of choice 77-lb shorn western lambs from Ohio brought $9.35 and limit for wooled stock was $9.90, while only a very choice class of spring lambs could have found outlet as high as $13. As compared with close of last week general market was on a 25c lower basis.

Extremely bad conditions surrounded the sheep and lamb market on Monday of this week. Supplies were greatly increased both east and west. Receipts 18,268. Lambs were in heavy proportion and prices were lowered 25@40c from last week's close, while rates for sheep showed 15@25c decline. Local buyers were in complete control of the situation, as prices at both East Buffalo and Pittsburg were relatively lower than here and eastern shipping outlet was practically closed. Quotable top for wooled lambs was $9.50. Bulk trading in shorn lambs was at $8.50@8.90, with limit $9.00, we obtaining this price for shorn western Wisconsins. It was generally a $7.25@7.50 dsal in ewes and wethers, with top at $7.65 for extra choice 107-lb western wethers. Yearlings and wethers mixed made $8.00@8.10, while the limit for yearlings was $8.25, and they would have had to been lamb weights to reach this figure. Tuesday arrivals 7,153. While the trade was more active, sellers were unable to make buyers do sums in addition, bulk sales being steady. Most sheep were shorn wethers, which made $7.00@7.40, with best offered, averaging 131 lbs, at $7.60 Lamb offerings in main shorn and went largely at $8.40@8.90, latter price being limit and obtained by us for two different strings of Colorados. Marketing Wednesday 12,000. It was a steady deal in good to choice offerings, with all price changes for less desirable kinds tending downward. Best sheep offered were shorn western wethers at $7.50 and $8 90 was limit for shorn lambs. Wooled offerings at $9.10 were handled by us.

Revised quotations for all grades of sheep and lambs:

SPRING LAMBS.

Good to choice	$10 50 @	12 50

*Net gain. †Net loss.

South Omaha, East St. Louis and South St. Joseph count calves as cattle.

Secretary Wilson on Beef Production.

In a communication to our Mr. C. O. Robinson, Secretary James Wilson of the Agricultural Department writes to the following effect regarding the production of beef cattle: "The cheapest beef is produced of course where the rancher gets Government grass for nothing, and the dearest beef where the farmer must feed dear corn. Now I am satisfied that our people are producing beef at too expensive a rate and that they could modify their methods and produce it cheaper; that is, the farmers can. Instead of taking the two-year-old steer in the fall and feeding it corn all winter, I would run him through on corn fodder, and that would save millions of acres of corn fodder in the West, provided I could get help to do it where I happened to be farming, and then put the steer on grass for another summer. Then the corn grower would have the option whether he would still make the export steer off grass, as is done in many cases, or finish him with corn. That would give us cheaper beef. But our people do not understand these things very well. I propose to get out a circular calling their attention to the waste that goes on on farms along this line.

"I know very well that when a man is feeding 60c corn through the winter he is not going to get back the price of that corn, even at present prices for beef, and that is why people are not feeding beef so much. The demand at the present day, that began some time back, for young beef—baby beef, beef not two years old—is vicious, so far as economic production is concerned, because you must feed high-priced feed to the calf from the time it comes until the time it goes to Chicago. Were we to turn around and grow the steer before we fatten him, or finish him on grass the summer he is coming four years old, we would produce much cheaper meat. But another difficulty comes in there—the western farmer cannot get help enough to put up more corn to take care of more cattle. There is where the foundation trouble lies."

Columbus Canning Co., Columbus county, Wis.: "As our feeding season is closed, we wish to express to you our appreciation for the manner in which our business has been handled. You have bought and sold over 5,000 sheep and lambs for us this season. To show you that we are satisfied, will say we will be in the market again by August 1 for more."

Southern and Western Cattle

FOR MAY DELIVERY.

The Right Kind at The Right Price.

WE HAVE ON HAND, FOR SALE THROUGH

OUR Denver HOUSE

Between 30,000 and 40,000

Choice Cattle

of various classes and ages. These cattle are now mainly located in Texas, New Mexico, Arizona and Wyoming.

HERE ARE SOME OF THE OFFERINGS:

THE GREEN CATTLE. Shorthorn-Hereford cross. Full age July 1st.
- 4500 yearling steers, 75 per cent Whitefaces.
- 4000 two year old steers.
- 2000 three year old steers.

MAMMOTH LAND & CATTLE COMPANY.
- 2000 yearling steers.
- 500 two year old steers.
- 500 three year old steers.

THE LORDSBURG CATTLE.
- 2000 yearling steers.
- 1500 two and three year old steers.

CHIRICAHUA CATTLE COMPANY "CCC" brand.
- 3500 two year old Arizona steers.
- 3500 two year old steers, the McAdams panhandles.
- 1200 two year old spayed heifers, "LFD" brand.
- 2500 Wood-Hagenbarth yearling steers, dehorned.
- Also 4000 good New Mexico yearling steers.

A Bulletin on Irrigation.

Our good friend, John H. Gordon of the United States Department of Agriculture Experiment Station at Cheyenne, Wyo., has quite recently completed certain experiments in "Supplemental Irrigation with Small Water Supplies." The results of these experiments are embodied in a bulletin issued by the United States Department of Agriculture under date of April 7. Quite a variety of crops are covered by these experiments and the results shown in detail. This should prove of considerable interest and value to western farmers in sections of the so-called semi-arid region where water for the irrigation of large areas is not available and where the larger part of the land must be farmed without irrigation if farmed at all. These experiments were conducted for the purpose of determining the possibilities of irrigation with small water supplies in such sections as mentioned. Notwithstanding the fact that the season of 1909 had an abnormally large rainfall, the advantages of irrigation are very clearly shown by the crop returns as secured at Cheyenne. The experiments were in personal charge of Mr. Gordon.

Fleeces Free from Dirt.

Advices from the West are that the shearing season has opened on the ranges in Central Oregon and Central Idaho, and buyers from the East and South are already gathered at Pendleton, Ore. Reports from districts where shearing has been done are that the fleeces are remarkably free from dirt, while the staple is fully up to the standard, being long and firm. The buyers seem anxious to bid on the clips, but so far no transactions have been recorded. Unless higher prices are forthcoming it is probable that a large quantity will be held for the sales dates. The general sentiment seems to prevail that 20c will be t ruling price, depending entirely upon the quali

The dates for the public sales in Oregon and Idaho have finally been agreed upon by the buyers and sellers as follows: Mountain Home, May 16; Payette and Weiser, May 18; Midvale and Cambridge, May 20; Pendleton, May 24; Echo, May 25; Pilot Rock, May 27; Heppner, May 31; Midvale and Cambridge, June 3; Payette and Weiser, June 4; Shaniko, June 7; Pendleton, June 10; Pilot Rock, June 11; Vale, June 13; Ontario, June 14; Mountain Home, June 15; Baker City, June 17; Shaniko, June 21; Heppner, June 24; Wallowa county, July 1; Shaniko, July 7, and Wallowa county, July 12.

Payne & Roembach, Wichita, Kan., write our East St. Louis house: "We wish to thank you for the good work done for us by your sheep salesman. You sold 28 double-deck cars for us this season and in each sale satisfactory results were obtained. Your methods are all right."

Danger in Feeding Roots.

Stockmen have long been of the opinion that a ration of mangels or sugar beets in some way causes kidney or bladder stones when fed for any length of time. To shed some light on this subject the Iowa Experiment Station has been carrying on some experiments in feeding mangels and sugar beets to rams. The results of those experiments show conclusively that such feeding is attended with considerable danger, and is almost sure to prove fatal if continued for any considerable period of time. For short fattening periods there is no particular danger, and the roots make a valuable addition to the ration. A full account of the experiments is given in Bulletin 112, which may be obtained free by writing to Director C. F. Curtiss, Iowa Experiment Station, Ames, Ia.

Where Tariff Began.

In a letter from Gibraltar to the Chicago Record-Herald William E. Curtis says: "The town of Tarifa, just north of the straits of Gibraltar, gave its name to an unpopular but profitable custom which now prevails in almost all civilized nations. The first tariffs were levied by a gang of privateers upon vessels passing through the Straits of Gibraltar. This historical fact has been the subject of many a jest and much sarcasm. Some people think the example of the original pirates of Tarifa has been imitated too zealously in modern times. The tariff collected by the bold seamen who stood guard over this strait was devoted to the common good as well as personal purposes, but the town never prospered and today it is a sleepy village of fishermen without a future and without a hope, and nothing but a story to make it famous."

A Correction.

Through an error on the part of the photographer in marking the picture, we mentioned the cut appearing on front cover of our April 22 issue as representing a champion Cotswold ram at the National Feeders' and Breeders' Show at Fort Worth, Tex., whereas this animal was a Lincoln (Geary's 359, Reg. No. 15303, bred by Geary, London, Ont.) The champion ewe shown in the same picture was Lybrook's 98—17990. Both were from the flock of Alex Albright, Dundee, Texas.

NOW IS THE TIME TO PREPARE for the HARVEST

TO BE sure of the full profit from your acres at harvest time, you must take the step now that will insure your being able to make every minute count then. A delay at the time when you are harvesting your crops will be costly under the most favorable circumstances, and it may destroy the profits of a whole year's work.

Preparing the soil—planting good seed—at the right time—these are highly important—but they are only the means to an end—only steps that lead to the all important time when you reap your reward.

You cannot reap your full reward without the proper machines any more than you can reap reward without proper care in the preliminary steps.

To reap all the profit that should be yours you must be prepared with the most efficient harvesting machines.

And now is the time to select them—to make sure you are ready. You are going to be busier every day from now on.

Start today to look over your equipment. Find out what you will need. Think what it was that would have helped you out most last year. Resolve that this year you will be ready.

There are many points to consider in choosing a harvesting machine. You must consider them all carefully. You not only want efficiency, dependability, durability—but you want the machine that will meet your particular requirements.

You can only be sure of getting all these by taking the proper time to make your selection. And your first consideration should be to find now a line of established reputation that will give you the greatest number to choose from.

Your first step therefore should be a visit to an International dealer.

Under these names—

Champion McCormick Osborne
Deering Milwaukee Plano

—You will find the machines that will meet your requirements.

Thousands of farmers, hard-headed business men with just the same problems that confront you, have had their problems solved by some one of these machines. They did not buy a Champion, Deering, McCormick, Milwaukee, Osborne or Plano because they were prejudiced in their favor. They bought because they were convinced that these machines represented the highest standard of excellence in harvesting machines—because these machines met their requirements—because they felt they were getting the greatest return on their investment. And they were not disappointed.

Now, the only reason for this is because the machines were made right in the first place and no expense has been spared to make them better. Every year finds the experts responsible for the design and construction of these machines in the field making notes—watching to see where any improvement, however slight, can be made to increase their efficiency.

The manufacture of these leading machines by one organization means much to you because—

—It permits the manufacturer to control ore mines, steel mills, timber land and saw mills so that he can be absolutely sure of the finest quality of raw materials and secure them at the lowest cost.

—It permits the concentration of forces on improvements, the employment of the most skilled labor—the installation of the most up-to-date labor-saving machinery. It means in a "nutshell" improved quality at a reduced manufacturing expense.

—It permits you to purchase a superior product at the lowest possible price.

Were it possible to make as good a harvesting machine as any one of these six leading lines under any other condition, the price would be so high that it would be impossible to sell it.

You cannot afford to experiment at harvest time. Smooth, rapid, uninterrupted work is an absolute necessity. Each machine made under one of the six names mentioned is tested under much more trying conditions than will ever be encountered in the harvest field before it is sent out. Nothing ever goes wrong on one of these machines without mighty good cause—but no machine is proof against accident.

If your team should run away and a smash-up result, the extra parts can be quickly had from a nearby International dealer. Every International dealer carries a stock of extra parts that fit. This means a lot to you because at harvest time you can't afford to go skirmishing over the country, hunting for an extra part. When the grain is ripe for cutting it has to be cut. It won't wait several days for a repair part from some far away factory.

The success of any undertaking depends on careful preparation. Insure the full yield of your harvest by preparing for it now. See your dealer at once.

Choose the machine that fills your requirements.

If you don't know an International dealer, write to us and we'll give you the name of the one nearest you.

International dealers also sell the seven most dependable brands of binder twine—Champion, Deering, McCormick, Milwaukee, Osborne, Plano and International in Sisal, Standard Sisal, Manila or Pure Manila

INTERNATIONAL HARVESTER COMPANY OF AMERICA Chicago U S A

TRADE MARK THE I·H·C LINE

LOOK FOR THE I. H. C. TRADE MARK. IT IS A SEAL OF EXCELLENCE AND A GUARANTEE OF QUALITY

Successful Texas Shorthorn Men.

We take pleasure in presenting the accompanying cuts of prize-winning Shorthorn bulls shown at the recent National Feeders' and Breeders' Show, Fort Worth, Tex., by gentlemen who are good customers of Clay, Robinson & Co. at Fort Worth, and well known in Southwestern breeding circles. We refer to J. F. Rhea and A. B. Britton of Ovalo, Tex., who, besides being breeders, are engaged together in the handling of live stock under the firm name of the Jim Ned Valley Land and Live Stock Co., of Ovalo, Tex. They, however, handle their registered stock separately. Mr. Rhea had four head of Short-Horns at the Fort Worth Show, which carried off twelve ribbons. Among his winners were the roan bull "Diamond King's Butterfly," shown above, grand champion in the quarantine division; sweepstakes Shorthorn bull "Blythesome Lassie;" yearling Shorthorn bull "Red Cline," and the eleven-months-old Shorthorn bull calf "Roan Diamond. Mr. Rhea has sold breeding cattle throughout the Southwest and we met at the Fort Worth Show many people who were well pleased customers and who recommended him very highly as a breeder of high-class cattle. Mr. Rhea has been raised in the business and is one of the veterans in that line in Texas.

Mr. Britton was also well represented on the prize list with his Shorthorn bull "Red Diamond King" shown above, and roan heifer "Queen Ovalo." Mr. Britton is an influential stockman of his section who has quite recently embarked in the business of breeding Shorthorns, and we are confident he will "make good" and build up a herd that will be a credit to him and to the breed and state he represents.

DIAMOND KING S BUTTERFLY.

RED DIAMOND KING.

Railroads to Boost Cattle Rates.

Due to an increase in commodity freight rates between "common points" of the Missouri and Mississippi Rivers on the part of the railroads, cattle tariffs will receive a boost, something that has been predicted for some time. The railroads have filed an increase with the Interstate Commerce Commission and a big protest from shippers is certain to follow from the interests that will be affected by the change. An increase of 2½c on cattle from Chicago to St. Paul has been made and will become effective June 1. There has also been advance in the western territory on raw wool.

A Good Spring in the West.

A year ago our Mr. John Clay wrote to the LIVE STOCK REPORT in part: "The writer has traveled over Colorado, Nebraska, South Dakota, Montana, Utah and Wyoming, and from all of them comes the cry of cold, dry days and very little green grass." Conditions are greatly improved at this writing over then. There have been bad days there this spring, but good ones have been the most frequent. Rains have been fairly plentiful. Grass has gotten an excellent start. Prospects for the lamb crop are fine, considering the wretched winter. Cattle are doing nicely and an early run of fat range beeves is promised.

String Out Cattle Shipments.

A good plan for those who have five or more loads of cattle ready to come to market to follow would be to string the shipment along. Instead of marketing them all in one shipment send in two or three loads one week and balance the following week or so. If this is generally followed results will be much better for the selling interests and will prevent a congestion of supplies of good cattle on any one market day.

The Sublime Oberammergau

Passion Play

In the little village of Oberammergau, in the Bavarian Highlands, the Sacred Drama of the Passion Play of Jesus the Saviour will be presented this summer. It has been presented every ten years by the people of this village as a religious fête in fulfillment of a vow made to God centuries ago in return for His mercy in delivering them from pestilence and sparing their lives. It will be an event of world-wide interest. Already the full capacity of many steamships has been sold out for months ahead to those who will make the pilgrimage to see this wonderful religious ceremony.

"The Passion Play" on Post Cards

At enormous expense the original photographs taken from scenes in the Passion Play have been secured and reproduced in many beautiful colors. There are fifty-five views in all, regular post card size, packed in a neat box ready for mailing.

A full description is printed on the back of each card, so by beginning with No. 1 and looking at the pictures in the regular order you have the Passion Play before you—a wonderful and beautiful presentation of the greatest event in the history of mankind.

A booklet describing the play and the people in it accompanies each set of the cards. It is estimated that 50,000 people will visit this play. Everybody will be talking and reading about it, and you will be fortunate to have this opportunity to secure this fine set.

How to Secure a Set for Yourself Without Cost

The Commoner, WILLIAM JENNINGS BRYAN editor, has arranged a plan whereby all who are interested in the political principles advocated by that paper may view this remarkable religious play by fifty beautiful post cards without expense. We want you to write at once and secure one of these beautiful cards and learn our plan by which a full set of these cards are given away.

CUT OUT AND SEND US THIS COUPON AT ONCE

THE COMMONER, Lincoln, Nebraska:

Enclosed find one two-cent stamp for wrapping and mailing one card out of the set of the Wonderful Passion Play post cards. Please advise me how I may secure the complete set.

NATIONAL HAY ASSOCIATION

If you have HAY or STRAW to ship don't fail to write us. Market information free.

FOR SALE

160 acres deeded land fenced, about 75 acres in timothy and alfalfa hay, abundance of water for irrigating and house use. Seven-room log house, first-class milk cellar and meat house, 3-room log bunk house with large store room adjoining. Good sheds and barns for horses and cattle. Ranch cuts about 135 tons of hay. There is machinery sufficient for running ranch, and 3 sets of double harness.

200 acres pasture, leased Government land joins on the north partly fenced, material on the ground for finishing a 4-strand barbed wire fence. Lease costs $10 per year for an unlimited length of time.

80 acres leased school land on a mesa, located about 2 miles from home ranch. This land is unfenced. Practically all of this 80 acres can be put in cultivation, and can get an abundance of water by building a ditch about a mile long. Lease costs $10 per year by a term of years, and can be leased from 3 to 5 years at a time.

Studebaker

USED AND SECOND HAND CARS

Some people imagine that because a car has been used it is necessarily "second hand," but this is a mistake. We have cars on our floor which have been used but which are in no sense "second hand." When we refer to a machine as being used it means just what it says—that it has had some service, perhaps as a demonstrator, and possibly a new car taken from our show room floor and used for a short time for some special service. In that event we put the car in our shops and overhaul and repaint it. It is made just as good as new, looks just as good and carries with it precisely the same guarantee, but because it has had some service the price is materially reduced. This is our loss and your gain. We have some second hand cars too (all have been thoroughly overhauled in our own shops) and each and every one of them is a bargain at the price asked. Address Dept. Breeding Ewes for Sale

On account of needing more pasture for my dairy herds I will sell 90 breeding ewes with lambs by their sides at $7.00 per head—not sheared. GEO. V. SAFFARRANS,
Marion Farms, - - Palmyra, Mo.

CATTLE FOR SALE.

One of our Colorado clients has decided to sell a string of three, four and five-year-old steers. These are nearly all natives, with perhaps 200 Southerns on them. There are 1,000 three year olds and 800 fours and fives, majority dehorned. They would make excellent cattle for Kansas grazers, and could go east over any line of railroad. Will be sold with a ten per cent cut. Address

Shoo-Fly Horn Paint

Endorsed by stockmen throughout the country for preventing fly infection when dehorning in warm weather; heals rapidly. 75c per pint, sufficient for 50 head. Send for circular and testimonials. Manufactured by H. B. READ, Ogalalla, Neb.

Ration for Small Pigs.

The Wisconsin Agricultural Experiment Station gives the following ration as a well balanced and suitable one for the pigs from weaning time until they have reached a weight of 250 to 300 lbs:

Ground oats (free from hulls)	35 lbs
Wheat middlings	35 lbs
Corn meal	20 lbs
Oil meal	8 lbs
Salt	2 lbs

They further say: If feeding for market, which would be after they have attained 100 lbs, they should be supplied all the ear corn they will clean up in addition. By closely watching you will see about how much they can take. Don't overdo it. Feed an ear apiece, and if it is all taken up clean you can add to this until you get about all they can handle and clean up good. If fed liberally on the slop ration above given the young pigs will seldom eat too much corn. Disorder comes from feeding corn unmixed with a sufficiency of other feeds.

Animals being developed for breeding purposes should not be fed any ear corn, or crowded as hard as those prepared for early market. It is intended to grow and develop them and their ration should be confined to that purpose. They also need plenty of exercise. This hardens and develops the muscles and strengthens the bone.

The Experiment Station people make a point on this mixture or balanced ration on the fact that it contains the standard grains, while the oil meal specified in every ration is important and serves a desirable function. In mixing the slop and preparing the feed it forms a sort of jelly with the water and gives the entire mixture a consistency and uniformity that cannot otherwise be obtained. Without the use of oil meal in the slop the other feeds will rapidly settle to the bottom of the barrel and the slop will be thin on top and thick at the bottom. It also serves an important function in the animal body, by regulating the digestive organs and imparting a quality to the skin and hair that cannot otherwise be secured. When supplemented with warm skimmed milk young pigs take to this very readily. If it is desired to wean pigs early in order to breed for fall litters, the ration should be carefully prepared to suit their needs. It is very important to avoid stunting little pigs, for growth once checked is difficult to overcome and means a loss of profit, and if the warm skimmed milk or separator milk can be added to the slop it will greatly serve to retain the pig's flesh and growth will continue without any interruption. If desirable the pigs can be weaned by the seventh or eighth week and put entirely on the growing ration.

In addition to this feeding the little pigs should always have access to good pasturage, either clover, alfalfa, wheat, rye, barley, oats or blue grass. The pasture that the pigs are eager to partake of is one of the cheapening processes in hog feeding. The farmer who has no permanent grass pasture should sow rye, wheat, oats or barley to furnish pasture. A good hog feeder in Iowa reports that he does secure $50 an acre from his rye sowed as a pasture for his pigs. It helps to balance the ration, to keep the system in good condition and the efforts made in eating the grass aid in the development and digestion of the animals.

NEW BOOK

A New Complete Edition of

Mr. Bryan's Speeches

Containing All of His Important Public Utterances

In two handy volumes. You can follow Mr. Bryan practically through his entire career, from his valedictory oration at Illinois College in 1881, through his early public life, his presidential campaigns, his world tours, his platform experiences, and his participation in meetings of organizations devoted to national progress, as well as international congresses for the promotion of the world's peace.

The subject matter of these speeches covers a wide range of topics, from the fundamental and vital problems of national and world life to the highest ideals of human endeavor. A handy means of reference to the student of social problems of the present and future.

A Brief Outline of Contents

In these volumes you will find all his important political speeches on the Tariff, Banking, Currency, Bimetalism, Income Tax, Money, the Silver question, Imperialism, Colonialism, Government Ownership, The Trust Question, Guaranteed Deposits, Election of Senators by Direct Vote, Initiative and Referendum, Labor, 1908 Tariff Speech, State and Nation, etc., etc. Here you will find all his speeches in foreign lands, before the World's Peace Congress in London, in Cuba, Japan, England, etc., etc. These books contain his educational and religious lectures—The Price of a Soul, The Value of an Ideal, The Prince of Peace, Man, Missions, Faith, etc., etc.; his miscellaneous speeches—Character, Gray's Elegy, Memorial Day at Arlington, Receptions in Lincoln, his home city, at the White House Conference, on Commerce at the Taft-Bryan banquet, to His Neighbors, Tributes to Jefferson, Lincoln, etc., etc.

The Only Complete Collection

While Mr. Bryan's speeches, lectures and public addresses have appeared from time to time in different editions of his works, or have been issued in separate form, these two volumes contain the only authentic, complete and authoritative collection of all of his speeches ever issued. This is the first publication in book form of a complete collection of Mr. Bryan's speeches from his first entry in public life up to the present time.

This complete collection of speeches comes in two handsome volumes, cloth bound, 12m., gilt top, and printed in large clear type. Frontispieces showing Mr. Bryan at various stages, with biographical introduction by his wife, Mary Baird Bryan. Price per set, $2.00, in cloth binding, prepaid. Bound in half leather, $3.00 prepaid. **Agents wanted.**

Sent prepaid on receipt of price. Address all orders and make remittance payable to THE COMMONER, Lincoln, Nebraska.

Special Offer

For a limited time, to any one sending $2.25 for 2-volume set of the new book, "Speeches of William Jennings Bryan," we will include without extra cost a year's subscription to The Commoner. If already a subscriber, date of expiration will be advanced one year. If half leather edition is wanted send $3.25. Send all orders and make remittances payable to The Commoner, Lincoln, Neb.

Montana Roundup Association.

The regular annual meeting of the North Montana Roundup Association was held at Fort Benton npon Friday and Saturday last. The convention was very well attended and a sncoessful meeting resulted. Dr. John Carroll was elected president, Dan Kyle vioe president and our redoubtable friend, Major Thomas Cummings, again assumes the office of secretary and treasnrer of the association. It was voted to hold the next meeting at Chinook, Mont.

Cattlemen Need not Fear.

Frozen beef cannot compete with chilled beef, and therefore United States cattle growers have little to fear in the growth of the River Plate frozen meat trade. Although the British quotations show that River Plate chilled beef is inferior to chilled beef from the United States, the opinion of exporters at Buenos Ayres and other slaughtering points is that the quality is improving, although the quotations may not yet show it. However, concludes the National Provisioner, with the marked falling off in our own exports of meat and meat products we can well find it worth while to watch the progress of the energetic young nation to the south of us, whose stock of cattle is nearly five per head per capita of population.

Iowa College-Fed Cattle.

Professor W. J. Kennedy of the Iowa Agrioultural College marketed a lot of hogs and cattle at Chicago on May 6, same being handled by Clay, Robinson & Co., the hogs numbering 18 head, averaging 275 lbs and going at $9.60. The cattle represented the completion of a very interesting and unique experiment. There were 9 steers that averaged 1,222 lbs and sold to I. Brown of Armonr & Co. at $7.90. Mr. Brown placed an individnal value upon the steers ranging from $7.30 to $8.35. These cattle were bought last fall at Ames for $4.40. They were grade Angus, branded westerns and coming twos. The cattle were all put on the same feed. When taken in they were judged and marked by every member of the freshman animal husbandry class. Ninety days later they were judged and marked again and then about May 1, after 180 days, they were again marked. Ratings were based upon 60 per cent for the first, 15 per cent for middle period and 25 per cent for the end of feeding period. They gained 2½ lbs per day. Professor Kennedy says he thinks every boy was able at the first to pick the best and the worst steer in the lot.

Allowance is to be made 60 per cent on final valne of cattle and 40 per cent on their daily average gain. The interest created by this experiment was very deep and genuine, as it gave the boys a thoroughly practical demonstration as a basis for judgment. The winner of the contest will be awarded the Charles Gray gold medal.

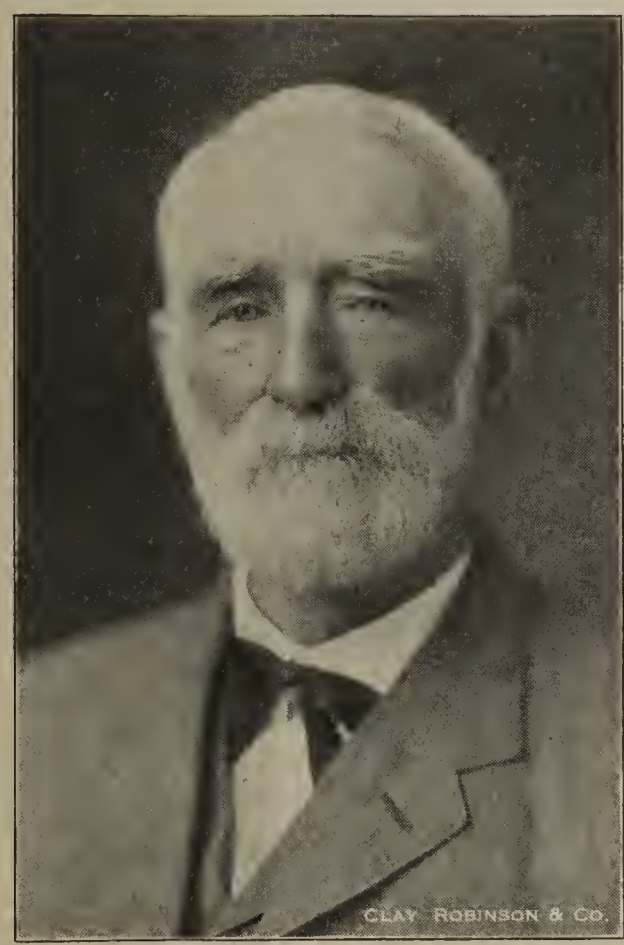
Professor Kennedy says their experiments showing that gall stones in breeding cattle came from sugar beets and mangles is developing rather sensational interest, as it is believed by prominent medical authorities that information of vast human interest may result in this way.

Hog Crop Considerably Smaller.

Reports from 115 counties in the Middle West show that the crop of hogs in farmers' hands, as compared with a year ago, is considerably smaller, while the condition of spring pigs is only fair, both as regards the number and the health of the crop. The report is compiled by L. J. Schwabacher & Co. of Chioago from information obtained from farmers in all of the Middle Western states and also from the South, who have filed reports on the condition of the hog orop in the connties in which they live.

Will Never Have Cheap Meats.

David Rankin of Tarkio, Mo., one of the biggest farmers in Amerioa, and who oultivates 24,000 acres of rich Missonri land and 6,000 acres across the border in Iowa, and who considers it a poor year when he does not harvest a million bushels of oorn, says beef and pork never will be cheap again. I don't see how the packers can make mnch



DAVID RANKIN.

on meat," said he. "The price is se high the people can't afford to eat muoh of it, and the volume of business has shrunk. The producers' profits have not been reasonable for three years. The law of supply and demand alone is responsible for high prices of meat. There is an actual shortage of hogs. Again, there is no cheap land left on which to raise cattle, and those who do raise cattle risk and often stand big losses."

Indiana Cattle Feeders' Meeting.

The third annnal spring meeting of the Indiana Cattle Feeders' Association was held at Purdue University, Lafayette, Ind., on April 30. When Frank DePuy of Wabash oalled the meeting to order he was greeted by about 200 cattle feeders, representing practically every connty in Indiana and also representatives from Pennsylvania, Ohio, Illinois, Missouri and Kansas.

William M. Jones of Fairmount discussed cattle feeding work that has been conducted on his farm in co-operation with the Indiana Experiment Station. He said this work had demonstrated the practicability feeding corn silage to beef cattle. Among many other things which Mr. Jones learned from this work is that in winter feeding it does not pay to give the cattle very much range. Other things being equal, the smaller the feed lot the better. This experiment also demonstrates that the addition of cottonseed meal to the ration increases the profit of the feeding operation.

H. P. Rnsk of the Experiment Station reviewed the cattle feeding situation in Indiana and presented the results of the past winter's experimental work. He said there is an increasing tendency to market the crops in snch a way that as large a per cent of the fertility as it is possible to retain will be kept on the farm. In the face of the demand for feeders and the increasing tendency among farmers to market their crops throngh live stock Indiana is confronted with the fact that there has been a slow bnt steady decrease in the beef cattle during the last five years. There are two explanations of these seemingly conflicting conditions; first, Indiana has ceased to rank as a prodnoer of beef cattle and is turning her attention more and more to the fattening of cattle produced elsewhere; second, the farmer with only three to five cows, who formerly had a few yearling stockers for sale every spring, is now vealing his calves. One of the most adverse conditions in the Indiana beef cattle situation is that that state is not produoing beef cattle in sufficient numbers to be considered as a source of stocker and feeder stuff for her own feed lots. Western steers, too, are not so plentiful as in former years and altogether the prospect for cheap feeders is not very bright. He said this is a condition which he believes Indiana cattle feeders are going to find more and more difficult to meet as the years go by and the time is not very far distant when they will be compelled to prodnce their own feeders.

He discussed the influence of the soarcity of clover hay on the cattle feeding industry during the past winter and said that one of the best ways to guard against suoh emergencies is by the erection of silos. The Purdue Experiment Station has been investigating the value of silage as a roughage for fattening steers for several years and enough data have been obtained to justify the statement that when properly supplemented with some nitrogenous conoentrate corn silage is one of the most economial roughages which the cattle feeder can use.

During the last winter the experiments were carried on with three objects in view; first, to make a further stndy of the influence of corn silage in the ration; second, a study of the influence of different proportion of the snpplement in the ration; third, a continuation of a study of long and short feeding periods. Ninety head of steers were used in this experiment, two lots of 15 eaoh and six lots of 10 each. In every case cattle receiving corn silage in the ration made more rapid and cheaper gains than those which did not receive corn silage in the ration. Of the six lots of cattle which were fed 160 days, the lot receiving a ration of shelled corn, cottonseed meal and a fnll allowance of oorn silage, with what clover hay they would consume in addition to corn silage, made the most rapid gains. The average daily gain of this lot was 2.63 lbs and cost $9.56 per cwt. They returned a profit of $18.09 per steer without including the pork made frcm the droppings.

Where silage was included in ration 2½ lbs of oottonseed meal per 1,000 lbs of live weight daily proved more economical than 1¼ lbs of cottonseed meal per 1,000 lbs live weight. However, this was not trne where clover hay was the only rougage used. Owing to market conditions the results of the long vs short feeding trial were in favor of the short-fed cattle.

No Marked Shortage of Cattle.

The predicted shortage in markst supplies of cattle has thus far failed to materialize. There have been two and a half million cattle at six markets thus far this year, against the same number in 1909. Chicago and other points show increases, but Kansas City's lessened supply serves to even up the receipts as a whole. The cattle were in the country at the time the predictions were made, and it is but another illustration of the unreliability of such forecasts. We are producing live stock over a vastly wider area; the business is in an ever increasingly larger number of hands. There may be but few big growers, but there is a host of smaller men whose output in the aggregate is tremendous. Again, we have more people to feed, and even if our export business has fallen off and Argentina and Australia given us some concern in the matter of competition, we are on a plane of high prices in every department of the live stock business, as it affects the consumptive demand. True, our production is less than two years ago; in fact, away below what it ought to be, and what it has been the past decade.

But our argument is this: There can be, in our opinion, no marked shortage in cattle receipts this year. The Southwest and Northwest grassers will be moving freely marketward the next few months. There may be less than a year ago, but every one knows that last year's receipts were surprisingly liberal, and if we do have less this year that does not essentially mean a famine run. Bear in mind the host of small rangemen. They are as the army of Sennacherib in numbers, and their influence is not to be regarded lightly. They will "sweep down" in ever multiplying phalanxes and their combined forces will mean no inconsiderable numbers of cattle. There is, too, lots of native grass and cattle roaming over it, and summer supplies of grass-fed natives will in all probability be fairly good. So much for supplies.

Now what of the market? Are we predicting lower rates? Not necessarily. The market has remained upon an excellent basis the past four months. With a continuance of receipts running, say evenly, with a year ago, and our present industrial and commercial activity, and taking conditions the past four months as a criterion for the next eight (a not unreasonable hypothesis), why should values decline seriously? Why should we predict or expect lower prices? They may come, it is true, but if the live stock industry will be saved from the onslaughts of over zealous investigators, yellow journalism and unfair criticism and calumny we venture to say the course of the market will be such as to yield the producer very fair returns indeed.

"Does the Farmer Get His Share?"

The above query, propounded by F. D. Coburn in an article fairly bulging with errors and unfounded statements in a recent issue of the Saturday Evening Post, is being answered quite vigorously from various sources. We handled the subject without gloves in a recent issue of the Report and do not propose to devote further space to it, but lest anyone hastily assume that we took up the cudgels simply because of the Secretary's apparent animus against everything pertaining to the Stock Yards or to live stock commission men, we quote the two articles below from the vigorous pen of Philip H. Hale, editor of the National Farmer and Stock Grower of St. Louis, who, not being a commission man, will certainly not be suspected of bias:

ADDICTED TO AGRICULTURE.

The Saturday Evening Post is unfortunately addicted to agriculture. It perpetrated the great Alaska wheat fake upon a million readers, and has now selected Hon. F. D. Coburn as a market expert and has misled the million once more. Mr. Coburn is a great man; his books on alfalfa and swine husbandry have given him a lasting place in the Hall of Fame; but his article, "Does the Farmer Get His Share?" in the Saturday Evening Post of April 9th, is so full of misinformation and false conclusions that we imagine Coburn was never guilty of writing it. The article leads people to believe that the commission charges, yardage and other expenses at the stock yards eat up a large proportion of the amount paid for the farmers' hogs, whereas all these stock yard expenses combined don't amount to much over 20 cents on a twenty-five dollar hog. The Saturday Evening Post ought to get the accounts of sales of hogs, cattle and sheep at any or all of the markets and tabulate them and show the result. Then Mr. Coburn's article should be rewritten in an intelligent manner in accordance with the facts and the "clap trap" cut out.

When the journalistic trained misinformers and jungle writers arrive at the preordained conclusion that black is white, people who know the facts simply smile and let it go at that; but Hon. F. D. Coburn, Secretary of the Board of Agriculture of the state of Kansas, ought to do better, for it is his business to know something of market methods, and his very article more than any other shows ignorance of the farmers' opportunities and of the competitive features of the market, and will mislead every man who puts faith in it. We have confined ourselves to the criticism of but one section of his article relating to the market for hogs. If Mr. Coburn was to act as a buyer of hogs for just one day, and on that day there were not too many hogs for sale on the market, he might not be able to buy any hogs, but he would very likely be a wiser man at night than he was in the morning.

JUSTICE TO THE MARKETS.

There never has been a time in the history of the world when the farmer who raises live stock has received in market any more money for his stock on the average than he has done in the past six months, and there never has been a time since the world began that the commission and yard charges on the selling markets have been less in proportion to the total amount received by the farmer. There never was at any time previous so much buying competition in the markets as there is now. This statement is made in a paper reaching 125,000 stockmen, and we don't expect anyone of them to dispute it. The reason this statement is made is because an article appeared in the Saturday Evening Post which is calculated to mislead a million people. It needs correction, and needs it badly.

Illinois-Fed Beeves $8 20; Top of Market.

H. B. Cobb, one of Illinois' famous feeders, was on the Chicago market May 6 with 22 head of 1,395-lb beef steers from Compton, Clay, Robinson & Co. selling them at $8.20. This price was 45c per cwt higher than any other firm obtained for cattle that day, the lot which brought $7.90 also being sold by us. Mr. Cobb had anticipated only $8.00, and this explains the "Taft" smile which spread over his face when he learned of the price they brought. The cattle were grade Herefords, of good quality and had been on a full feed only 100 days, they being in exceptionally good flesh condition for the time fed. These cattle were bought last fall at $4.40. Mr. Cobb is an old and valued patron of our firm.

E. S. Leavenworth Holds Record.

E. S. Leavenworth of Wood River, Neb., marketed two doubles of wooled lambs at South Omaha on May 4, 5 and 6 each. Clay, Robinson & Co. sold the lots on the former days at the top price of $9.30 and the shipments on the latter days at $9.45, the pinnacle. Mr. Leavenworth probably holds the record for the number of times of topping the South Omaha ovine market for one season. He sold his entire season's feeding of 25,000 head through our house. Remarking of the Friday sale, the Journal-Stockman comments:

"Receipts off the Burlington included a two-car shipment of Mexican lambs from Wood River, Neb., owned by E. S. Leavenworth, one of the staunch patrons of this market and naturally a 'repeater.' They were the last of his winter's feeding and brought the day's top, $9.45.

"Mr. Leavenworth is not only one of the largest feeders of this state at present, but can also produce a record that compares favorably with the heavy feeders of the early days. His flock this winter consisted of 25,000 head of Mexicans and practically all of them were marketed at South Omaha. No better evidence of the wisdom of shipping to this point could be desired."

Light Summer Run of Cattle.

Samuel Miller, of the regular and extensive shipping and feeding firm of Miller Bros., Olds, Ia., and I. I. Yount, Whalen, Ia., between them sold seven carloads of cattle through our Chicago house Wednesday of last week at very pleasing prices. Speaking of conditions Mr. Miller said:

"Both cattle and hogs are in lighter supply than they have been for many years. I live in one of the largest cattle feeding and hog raising sections of the Hawkeye state, but one could almost count on the fingers of one hand the loads of fed cattle that remain to be marketed from our immediate vicinities, while hogs are also practically a minus quantity, barring brood sows and the new pig crop. There won't be over half the usual number of cattle summer fed there, and there won't be a full crop of pigs by any means. The supply of cattle on pasture promises to be not more than half as large as a year ago, and it looks like a shorter supply of corn-fed cattle for the late summer months than ever before. Many of the regulars announce their intention of staying out of the feeding game this summer, lacking the nerve to pay fat cattle prices for thin stuff to finish. This condition is so general that if short supplies of fed stuff for the late summer months are to be the chief price governing factor it looks like prices would at that time soar to dizzy heights. The pig crop will be light, not because of any worse luck than usual with the youngsters, but because fewer old sows and a larger percentage of gilts were bred, this cutting down the size of litters. Not many old sows were left to breed, the country having been drained of them by the low market two years ago, and the high market at farrowing time. Everybody is ready to plant corn and lots of it. The corn acreage will be considerably larger than last year in our section, scarcity of cattle to graze being one factor, a prospective high corn market another, and the fact that old clover meadows were in the main frozen out and plowed up another."

Packing of Wool.

Too much care cannot be taken by the wool growers to see that their clips are properly packed. In fact, complaints are being made constantly by the eastern manufacturers over the manner in which many western clips are sacked and we would state that sheepmen pay for this in an indirect way. See that each fleece is tied separately. Avoid any foreign matter being placed in the wool sacks. Pack the locks and tags in separate sacks and label them "locks and tags." Do not mix the black fleece with the white ones—pack them in separate sacks. In many mills people are employed just to pick the black fibres from the white fleeces. It is advised that all black sheep be sheared in certain pens, in order to take this precaution. In a few words, every wool grower should endeavor to establish a favorable name among the buyers and the mills relative to the packing of his wool.

AMONG OUR CUSTOMERS

Marion Hunt, Jasper county, Ill.: "Cattle received and they are very satisfactory. Thank you."

On May 5 our Kansas City house sold 83 steers for Wm. Wells, Graham county, Kan., at $7.40.

J. H. Legere, Graham county, Kan., well and favorably known as a buyer and shipper, sold steers through our Kansas City house May 5.

Ward & Moulton, Jasper county, one of the largest buying and shipping firms in Southern Missouri, had a car of hogs to our Kansas City house May 5.

A. W. Karr, Weld county, Colo.: "I must thank you for the sales you have made for me this spring. I am perfectly satisfied with them all around."

J. B. Grier, Wayne county, Neb., had a load of cattle at Sioux City May 5 which our house sold. He said that the weights and price were very satisfactory.

May 2 our South Omaha house sold 658 Mexican wooled lambs at $9.40, averaging 72 lbs, for E. S. Leavenworth, Hall county, Neb., pinnacle by 40c per cwt.

Our East St. Louis house sold May 4 for J. V. Young, Pottawatamie county, Kan., two cars of 74-lb shorn lambs at $8.75. This was top by 25c per cwt.

L. E. Potter, active manager of the Farmers' Elevator Co. and a prominent stockman, Springfield, Minn., had two cars of hogs to our South St. Paul house May 5.

J. F. Bundy represented Burt county, Neb., on the May 4 hog market at South Omaha with 60 head of 325 lbs average which our house landed at top price of $9.15.

A. W. Hawley, proprietor of the Whip Tree Farm and prominent in Royal Belgian Draft horse circles, Humboldt county, Ia.: "Account sales of hogs was entirely satisfactory."

A. White, Miner county, S. D., had a mixed load of cattle and hogs at Sioux City on May 6. He is one of Clay, Robinson & Co.'s old customers and was well pleased with his sale.

B. W. Olinger, Brule county, S. D., landed a load of hogs on the Sioux City market May 6. He is one of South Dakota's big feeders and a regular customer of our house at that point.

W. E. Beckwith, Pottawatomie county, Kan., well known as an extensive sheep feeder, had a car of hogs to our Kansas City house May 5 that brought within 10c per cwt of the top.

Our East St. Louis house May 6 sold for Pete McLachlan, Howard county, Mo., one deck of spring lambs, averaging 53 lbs, at $9.50, being 50c per cwt higher than any other sale of lambs.

Hans Skovgaard, Washington county, Kan., a long-time patron of Clay, Robinson & Co., was on the Kansas City market May 5 with a string of steers that were sold by our house at $7.55.

W. F. Bresien, Saginaw county, Mich., writes our East Buffalo house: "I was well pleased with sale of load of cattle, calves and hogs. Thank you for prompt returns and past favors."

Joseph Zack, Yankton county, S. D., had a load of hogs at Sioux City May 4. He is a regular customer of Clay, Robinson & Co. and stated he was well satisfied with the service rendered.

J. M. Laceck, Washington county, Pa.: "I have been taking the REPORT for several years and don't think that I would want to do without it. All kinds of fat stock scarce in this vicinity."

John R. Jones, president of of the Farmers' and Merchants' Bank, Hankinson, N. D., was among the shippers to the South St. Paul market May 5, having a consignment of mixed stock to our house.

Nebraska had an able representative on the Kansas City market May 5 in the person of J. Mulica, Franklin county, who consigned our house a string of mixed steers and heifers that sold satisfactorily.

The Joseph Lay Co., manufacturers of brooms and brushes, Randolph county, Ind.: "Cattle came and they look very good indeed. Thank you for interest taken and prompt attention to our order."

H. L. Talbott, Barton county, Kan., had three cars of 1,233-lb cattle on the East East St. Louis market May 5 and our house landed them at $7.40. These cattle were of plain quality and two-thirds fat On the same day our house sold for Newt Bros., White county, Ill., some fair quality yearlings of 717 lbs average at $7.65.

H. H. Brownson, Clay county, S. D., had two loads of cattle on the Sioux City market last week and stated that he was well satisfied with the price our house obtained, and his weights were also very good.

F. Ludwig, Woodbury county, Ia., had a load of butcher stuff at Sioux City May 6 and expressed himself well pleased with the sale. Mr. Ludwig is one of Clay, Robinson & Co.'s oldest patrons at that market.

T. F. Stock, Cass county, Mo., who, in conjunction with James Robertson of Mitchell county, Kan., has been feeding a large bunch of cattle, was at Kansas City May 5 with some steers that we sold by our house at $7.20.

C. B. Ingersoll, Lorain county, Ohio, writes our East Buffalo house: "Well pleased with sale. Shrink was very light and with the market as it was I think that you did very well. I hope to deal with you again in the future."

August Heeb, Scott county, Mo.: "Fat cattle about all gone from here and marketable hogs are practically not obtainable. Well pleased with prices and weights of load of cattle. Clay, Robinson & Co. are good enough for me."

Nels Utter, Cedar county, Neb., patronized our Sioux City house May 5 with a load of cattle. As he was leaving he remarked: "Well, I was pleased the last time I was here and I feel better this time, so everything is all right."

John Bonderson, Dakota county, Neb., sold two loads of cattle through our Sioux City house May 5. Mr. Bonderson remarked that he was very well pleased with weights and price of his cattle, price being highest he ever got.

There's A Difference

In the ability of different commission firms—just as some doctors and lawyers are more successful than others. All commission firms charge alike for their services—the BEST costs you not a cent more than the POOREST. The salesman's work is what counts in your net proceeds. Get the most money for your stock by consigning to a firm that has the salesmen and the facilities for getting top market prices—

Clay, Robinson & Co.

John Ryan, cashier State Bank of Frank W. Hubbard & Co, Huron county, Mich.: "We have on many occasions spoken a good word for you and will be pleased to do so whenever the opportunity is afforded us. We wish you success."

J. Carlson, an enterprising farmer and stockman, Harrison county, Ia, was on the South Omaha market May 6 looking after the disposal of a car of mixed cattle and hogs. Mr. Carlson expressed himself as well pleased with our work for him.

Chas. Swanson, who feeds cattle and hogs with J. W. Bridenbaugh, Dakota county, Neb., was represented on the Sioux City market with three loads of cattle last week. Mr. Swanson is a good feeder and his cattle were good enough to sell at $7.40.

Fred Prauner, Madison county, Neb., on May 3 marketed two loads of steers, averaging 1,497 lbs, at $7.75, extreme top of the market. Mr. Prauner is one of the prominent farmers and feeders in that locality and his shipments invariably land at high figures.

A. M. Wilkins, Adair county, Mo., marketed May 6 at East St. Louis 61 hogs, averaging 285 lbs, at $9.75 and also John C. Yaeger, Pike county, Ill., 66, averaging 270 lbs, at same price, which was the top and obtained by our house. Both of these parties are regular shippers.

Fred Schulte, Pierce county, Wis., one of our most valued patrons at South St. Paul, was there with a mixed load May 6. Mr. Schulte, who is very favorably known in his section, acts as shipper for the farmers there. He stated that the severe frosts had worked some harm to small grain.

The South Omaha shorn lamb market was topped by our house when they landed at $8.50 a string of 506 head, belonging to C. Adams, Weld county, Colo., and averaging 77 lbs, and also 492 head, averaging 81 lbs, marketed by Theodore Jacobson, Morgan county, Colo. On the same day they sold for N. Miller, Weld county, Colo, 261 head that averaged 76 lbs at $8.40. The above mentioned lambs were the only shorn ones to land above $8.35 that day.

Joseph P. Peters, Merrick county, Neb., writes our South Omaha house: "I was very well satisfied with sale of hogs. I could not expect any more, and besides was in luck, striking the high day and letting the best firm in Omaha handle them. I wish you good luck and more business."

T. B. Honnold, vice president of the Farmers National Bank, Edgar county, Ill.: "Cattle arrived O. K. and two and one half hours earlier than I have ever received them before. Thank you for your kindness in having them sent via of C. I. & S. Railroad, saving me $1.20 and making quicker time."

C. A. Holmquist, Knox county, Neb., marketed a load of cattle at Sioux City May 3, and stated that Clay, Robinson & Co. were good enough for him. E. P. Lindgren of the same county also had in a load the same day which our house handled for him, being pleased with the price and weight.

A. Anderson represented Bon Homme county, S. D., on the Sioux City cattle market May 4 with a load of his own raising and feeding which our house sold at $7.50, top by 10c per cwt. On the same day they also sold for F. H. Anderson of the same county a load of light steers at very satisfactory prices.

W. S. Harris, Richard county, Neb., was at St. Joseph May 5 with a car of mixed hogs which our house sold at $9.35, being 20c per cwt more than he expected. Besides they weighed 60 lbs more on the market than at home. This was Mr. Harris' first shipment to that market and he was exceptionally well satisfied with results.

Wm. and Fred Meyer, Washington county, Kan., were on the South St. Joseph market May 4 with two loads of cattle and hogs which our house sold for them, and they expressed themselves as very well pleased with the sales. They report a great need of rain in their locality, there being very little grass and the wheat and oats suffering from dry weather.

C. D. Honston, Burt county, Neb.: "Very dry in these parts at this writing (May 4). Farmers are all up with their work and planting corn. Hogs coming in slowly. Sheep all out. A few big bunches of cattle being fed here for June market. There will be a big pig crop in this country. Enclosed find 50c for your valuable paper. I think it a 'cracker-jack.'"

It was May 2 that our South Omaha house sold for C. Adams, Weld county, Colo., 262 shorn lambs, averaging 79 lbs, at $8.70; also 245 of 82 lbs average at $8.60 for Theodore Jacobson, Morgan county, Colo., and 506 head, tipping the beams at 79 lbs, for C. W. Lucas, Weld county, Colo., at $8.55. These were the only shorn lambs that sold above $8.50 that day.

J. L. Davis, Butler county, Kan., who was at South St. Joseph on May 5 with two loads of steers, averaging 1,115 lbs, which our house sold at $6.95, reports weather and crop conditions quite favorable in his locality, moisture being plentiful and grass starting good, and while wheat has been badly winter killed, oats are looking well. Mr. Davis was very well pleased with our our sale for him.

P. P. Klick, proprietor of the Long Prairie (Minn.,) meat market, had a consignment of mixed stock to our South St. Paul house May 6. In speaking of conditions in his section he mentioned that there was considerable stuff in his immediate vicinity which would be ready to move this coming fall. The crop situation looks favorable and no serious damage was apparent as a result of the recent cold snap.

John Scott, Charles Mix county, S. D., was represented on the Sioux City market May 2 with two loads of cattle and one load of hogs, same being handled by our house. Mr. Scott is one of South Dakota's biggest feeders. His cattle topped the market by 45c per cwt, selling at $7.75, and his hogs went within 5c per cwt of the top. Mr. Scott stated he was well pleased with Clay, Robinson & Co.'s selling service.

Represented at South St. Paul, Minn., May 4 with shipments to our house were O. G. Greene, Marshall county, S. D., Thompson & Sons, Todd county, Minn., H. P. Young, member Board of Directors of Farmers Elevator Co., Saint Croix county, Wis.; Merricks Bros., Watonwan county, Minn. These gentlemen have been identified in the stock business for quite a time and are prominent shippers to the above point.

J. J. Harding, Larimer county, Colo., was on the South St. Joseph market May 5 with 508 improved Mexican lambs, averaging 77 lbs, which our house sold at $8.95, a very satisfactory sale to Mr. Harding. He says that while the alfalfa hay crop will be short this year in Colorado and lamb feeding will not show any increase next season, considerable best ground is being re-seeded to alfalfa and in a year or so lamb feeding will increase.

CLAY, ROBINSON & COMPANY'S LIVE STOCK REPORT

[illegible] McLain, Dnnn oonnty, Wls.: "Satisfied with sale of [illegible], considering the way the market went."

[illegible] onth Omaha house had a car of cattle May 6 from [illegible] Fult, a young farmer and feeder, Knox connty, Neb.

Henry Dalton, Fremont county, Ia.: "I wish to thank yon for the promptness in regard to my cattle sold a few weeks ago."

Sims & Smith. prominent stockmen, Coeper county, Mo., sold a load of cattle throngh our East St. Lonis house on Tuesday.

J. A. Wilcox, Hardin county, Ia.: "I am satisfied with sale of cattle. The way they were divided np I think yon did yonr best."

John W. Mosman, Williams county, Ohio: "Well pleased with sale of lambs and will remember you next fall and winter."

S. N. Peterson, an extensive buyer and farmer of Hamilton connty, Neb., had a shipment of mixed cattle to our South Omaha honse May 5.

Files & Johnston, prominent Missouri shippers, with headquarters in Pettis connty, disposed of a load of sheep through onr East St. Lonis house Tuesday.

At South Omaha on May 4 our house handled two doubles of shorn lambs, averaging 80 lbs, for Theo. Jacobson, Morgan connty, Colo., at $8.50, the top.

J. F. Peachin, progressive farmer and feeder, McHenry connty, Ill., had a mixed shipment of cows and hogs on the Chioago market May 5 for which we obtained very satisfactory prices.

H. S. Schaffer, a progressive farmer and stockman of Boone county, Neb., was at South Omaha on May 4 with a shipment of steers and cows which onr house sold at satisfactory prices.

Winnebago county, Ia., was represented on the cattle and hog market Thursday of last week with a consignment from A. T. Grove. They were handled by us and were of his own feeeding.

On May 3 H. E. Hershey, Buffalo connty, Neb , had two double decks of shorn yearlings and wethers on the South Omaha market that were sold by our honse at $8.00, averaging 119 lbs.

George Cobb, one of the most extensive shippers of live stock in Illinois, had in from Lee county Friday of last week a shipment of butcher stock which we handled to his entire satisfaction.

Renn Bros., Custer county, Mont., extensive cattle and sheep ranchmen and valued oustomers of Clay, Robinson & Co. for the past fifteen years: "Stock is in fine condition this year on acconnt of an early spring."

Ed. Biggins, Peoria oounty, Ill., who perhaps is one of the most frequent hog shippers to the Chicago hog market and who always sells his offering through our house, was on the market late last week with a shipment.

Irvin Jones, Buffalo connty, Neb., had a donble deck of ewes and spring lambs to our Sonth Omaha house May 6. The ewes made $7.15, top by 15c per owt. The springers averaged 54 lbs and sold at $11, being less than two months old.

H. M. Sullivan, Custer county, Neb., who is an excellent feeder and always handles cattle of good qnality, sold 100 head of cattle on the Chicago market Wednesday of last week through our house at the satisfactory prices of $7.40 and $7.70.

R. Richardson, Sangamon county, Ill.; E. L. Crow & Co. and N. E. Beal, Monona county, Ia.; R. J. McKenney, Knox county, Ind., each had a shipment of hogs on the Chicago market Friday of last week, selling the same through our house.

R. Neilson, Montrallie county, N. D.: "We have not had any rain here as yet to speak of. The sontheast wind generally sends us rain this time of the year and has been blowing strong the last three or fonr days, but with no indication of rain in sight."

Not a week passes that the Lisle Trading and Transfer Co., Dupage county, Ill., do not have several shipments of cattle or hogs on the Chicago market. They are one of the heaviest shipping concerns in that part of the state and always honor us with their patronage.

S. C. Larson and N. P. Jensen, favorably known farmers and feeders, Hutchison county, S. D., each had a shipment of steers to the Chicago market Thursday of last week. We made the sales, landing the Larson 1,241-lb offerings at $7.40 and the Jensen 1,091-lb lot at $7.25.

G. Hayslett represented Cedar county, Ia., on the Chicago cattle market Friday of last week with 22 head of 1,152-lb beef steers which we landed at $7.15. That he was delighted with the sale is reflected in the fact that he had anticipated only $6.60 for his offerings.

J. A. Mabry, Rogers connty, Okla.: "I think Clay, Robinson & Co. are fine people to deal with. They will get the top price for yon if any one can. I highly appreciate your kindness in sending me the REPORT as long as you have. I think it is the best stock paper published. Enclosed find 50c for ensning year."

R. H. Sewell, Bremer county, Ia., was the owner and we the sellers of the 66 head of 246-lb hogs which made the top price of $9.75 at Chicago on May 5, being 2½c per cwt higher than any other hogs of as light weight brought that day and up to then the highest since April 16.

J. H. Larson, a retired farmer, prominent feeder and a long-time patron of onr firm, represented Dekalb county, Ill., on the Chicago cattle market Wednesday of last week with a shipment of steess for which we obtained $7.60@7.75, prices that brought good cheer to Mr. Larson..

A strong price was obtained for 18 head of 1,388-lb beef steers when our Chioago house landed them at $7.75 Wednesday of last week. These cattle were branded westerns, of good qnality and were fed and marketed by C. E. Moorehead, Monona connty, Ia., who is a pastmaster in the art of preparing cattle for the shambles.

J. E. Robinson, Henry connty, Ill.; F. H. Dobson, Platt county, Ill.; L. O. Gates, Jackson county, Ill.; J. M. Christie, Steele county, Minn.; Johnson Bros , Louisa county, Ia., well known in feeding circles in their respective localities, were represented on the Chioago cattle market Thursday of last week with consignments. We had the pleasnre of rendering them sales that suit.

On Farm of E. & H. Boyd, Vermontville, Mich.
